CHELIEU AND ONTARIO NAVIGATION COMPANY

For several hours a heated debate was waged in the use at Ottawa this week respecting the proposed new ital issue, by the Richelieu and Ontario Navigation Comy. The bill was reported from committee without amendnt, but an amendment will be moved on the third reading. e amendment is to be submitted by Mr. W. F. Maclean, South York. He suggests that the new stock issue shall sold at auction. Towards the end of the debate the Premier nitted the importance of the subject, especially as regards blic service corporations, and said that legislation to deal h it had been under consideration by the Minister of Justice some months.

Sir Rodolphe Forget, M.P., president of the company lying to his critics, said that the company had been in siness since 1845. It had 1,560 miles of water routes and enty-two steam boats. He then outlined the purposes for ich it was proposed to use the new capital giving this :—Fort William terminals, $500,000; steamer at Port hur, $750,000; terminals and coal plant at Toronto, $200,- to $250,000; new Quebec-Montreal steamer, $750,000 to 000,000; new Saguenay steamer, $500,000; improvements Quebec terminals. "We exepect," he said, "to spend the e millions in three years."

The second section of the bill, he said, was designed to ow the company to make use of the moneys it had from nings. They got their earnings in four or five months and eded them for twelve. They had to pay salaries, etc. Also y had to make advances to subsidiary companies; such the Northern Navigation Company and the Inland Naviga- n Company. They did not want to go outside of naviga- n. They had a contract with the Grand Trunk, for in- nce, which required them to build a steamer for the Port hur trade whenever asked, on twelve months' notice.

SOVEREIGN LIFE ASSURANCE COMPANY

A gratifying return of the year's operations was presented at the annual meeting of the Sovereign Life Assurance Company of Canada at Winipeg. In summarizing the growth and success of the company, the examining actuary, points out three pleasing points in connection with the year's operations:—(1) the company obtained the largest increase ever made in its business; (2) the highest rate of interest earned on its funds; (3) a large profit arising from a favorable mortality expense. The extent of these results can be seen in the official report appearing on another page. The surplus to shareholders and policyholders at the end of the year (exclusive of paid-up capital of $209,995) amounted to $154,077. This amount exceeds the net surplus at the end of 1911 by $48,424. The total assets of the company at the close of the year amounted to $955,239, having been increased during the year by $91,693, or 10.6 per cent.

About 48 per cent. of the total assets of the company, or $439,717, is now invested in first mortgages upon improved farm lands in Western Canada and upon city property. Over 70 per cent. of this amount is yielding to the company 8 per cent. interest. The small amount of outstanding interest at the close of the year, namely;—$1,608, is evidence of care used in selection of mortgages. Municipal debentures and bonds held, amount to $337,362, and the remaining 15 per cent. is invested in policy loans secured by legal reserves, cash in banks, etc.

The position now attained by the company will, no doubt, result in increased activities and returns satisfactory to both shareholders and policyholders.

MUNICIPAL BOND BIDDING

For the $26,500 5 per cent. debentures of Minnedosa, Man., only one bid was received, and, as it was too low to be considered, no award was made.

The $101,000 5 per cent. 40-year waterworks and electric lighting debentures of Penticton, B.C., have not yet been sold, as no satisfactory bids have been received.

Three offers were received from Toronto bond firms for the Tillsonburg, Ontario, $24,878 5 per cent. 30-year sewer and public school debentures. As previously noted, the offer of Messrs. W. A. Mackenzie and Company was accepted.

Two bids were received from Regina firms for the $3,000 6 per cent. 15-year debentures of Cupar, Sask. The offer of Messrs. Nay and James was accepted.

For the Mount Hope R.M., No. 279, Sask., $8,000 6 per cent. 20-year road debentures three offers were received. The Flood Land Company, Regina, was the successful bidder.

DEBENTURES AWARDED

South Springfield, Man.—$120,000 5 per cent. 20 instalments, to Messrs. W. A. Mackenzie.

Cupar Village, Sask.—$3,000 6 per cent. 15 instalments, to Messrs. Nay and James, Regina.

Prince Albert, Sask.—$281,000, to Messrs. W. A. Mackenzie and Company, Toronto.

Mount Hope R.M.—$8,000 6 per cent. 20-years, to Flood Land Company, Regina.

◆

The name of the Colonial Bond Company, Limited, has been changed to that of Audit Realization Company, Limited.

A large realty transaction was recently closed at Vancouver when the Prudential Investment Company purchased approximately 170 acres of land from the Canadian Pacific Railway.

INVESTMENT OF MUNICIPAL SINKING FUNDS

Edmonton is one of the cities which, unwisely, we hink, invests part of its civic sinking funds in loans on mortgages. Eleven applications for loans were considered by the Edmonton sinking fund board during the year ended October 31st, 1912. The loans granted amounted in the aggregate to $394,000, made up of the following amounts: $49,000, $65,000, $55,000, $30,000, $50,000, $60,000, $40,000 and $45,000; total, $394,000. Altogether $550,000 from the fund was requested, some requests being refused.

"All the loans bear interest at 6½ per cent. per annum, and in each case are within the prescribed limit of 50 per cent. of the value of the property. They are first mortgages, which have been duly executed and registered. The practice followed by the board is that when a loan has been granted and the proper sworn affidavit of value by the city's land valuator has been made, the sum is advanced from time to time as building progresses on the architect's estimate of 80 per cent. of the value of the work completed; and before final payment is made the following sworn statements are required: (1) The architect as to the value and completion of the building. (2) The owner as to the value and date of completion. (3) The contractor as to the satisfaction of all liens. (4) The city building inspector in confirmation of the final value of the building.

In making their latest report, however, it is significant that the members of the sinking fund board say: "To complete the board's obligations under the above mentioned loans will absorb a considerable portion of next year's sinking funds, and the board are of opinion that before granting further loans on mortgage it is desirable to put a portion of next year's funds into first-class securities."

The practice of certain municipalities in investing portions of their sinking funds in first mortgages has increased of late. It is a matter which requires careful consideration, the safety of municipal sinking funds being of prime importance. Cities and towns should not risk their credit by any questionable methods in connection with these funds.

The primary object of a sinking fund is to make definite and certain provision for the maturing bonds of a municipality, and, therefore, the most important qualification of the sinking fund investment is absolute security.

FINANCIAL REFORMS

During the next few years we are likely to see considerable changes in existing financial legislation. In addition to the Bank Act revision, now being undertaken, Mr. White, Minister of Finance, has promised a bill next year regulating the operations of loan and trust companies. Mr. White also stated, while the House was in committee on a certain bill early this month, that the Joint Stock Companies' Act will require revision at a comparatively early date. During the debate on the bill to increase the capitalization of the Richelieu and Ontario Navigation Company, Premier Borden stated that a bill regarding the question of some control of quasi-public corporations had been under the consideration of the Minister of Justice for several months. It is a subject, said the Premier, which is by no means free from difficulties. "At the same time," he added, "there is a good deal of force in the suggestion that there ought to be control over some companies at least, particularly those that are performing quasi-public functions."

These matters will keep busy those Cabinet Ministers who mark the charts of Canadian finance. There are also other important questions in this direction for consideration. One is the desired inclusion in the British Trustee List of Canadian provincial securities. This matter has been persistently advocated by *The Monetary Times* for several years. We have the assurance of the provincial premiers of the Dominion that they will be pleased to take co-operative action to gain entrance to the Trustee List. The next move awaits the pleasure of the Dominion Government.

There is room, too, for improvement in the insurance department at Ottawa. When companies are in bad condition, the Insurance Department is too prone to follow, with a tear in one eye and official dignity in the other, the meanderings of the corporations, instead of showing authority and putting a stop to what are not the best of practices. We do not advocate the dramatic methods of the State insurance departments in the neighboring Republic, but feel that a little more life might be shown by the Ottawa department to the benefit of policyholders, shareholders and investors.

A QUESTION REPEATED FOR SIR RODOLPHE

We ask again whether Sir Rodolphe Forget considers, in view of the recent publicity respecting his bank and other enterprises, that it is good taste for him to remain as a member of the parliamentary banking and commerce committee, which shapes the financial legislation of this country?

BUSINESS FAILURES

The statistics of business failures published by the mercantile agencies will repay analysis by our business men. Bradstreet's have just published a record of failures in Canada and the United States during 1912, and they reveal some excellent morals. The accumulated experience of many years has been shown by Bradstreet's to demonstrate that the large majority of failures occur because of the deficiencies of the traders themselves, rather than because of the influence of happenings beyond their immediate control. Eight leading causes are grouped under the first heading, while only three are credited as existing apart from the individuals themselves. These causes class as follows:—

A.—Due to faults of those failing—
    Incompetence (irrespective of other causes).
    Inexperience (without other incompetence).
    Lack of capital.
    Unwise granting of credits.
    Speculation (outside regular business).
    Neglect of business (due to doubtful habits).
    Personal extravagance.
    Fraudulent disposition of property.
B.—Not due to faults of those failing—
    Specific conditions (disaster, etc.)
    Failure of others (of apparently solvent debtors).
    Competition.

In 1912 80.3 per cent. of the number and 80 per cent. of the liabilities were attributed to the shortcomings of those who failed, while 19.7 per cent. of the failures and 20 per cent. of the liabilities were consequent on causes beyond their control. The similarity of the percentages in each case is one feature of the statistics which sets the year apart as one in which the individual himself was found to be the main source of the ill fortune attending his business venture. In 1911 78.9 per cent. of the failures were charged to the individual, while 21.1 per cent. proceeded from the outside. In 1910 the proportions were 82 and 18 per cent., respectively; in 1909 they were 81 and 19 per cent., and in 1908 they were 77.5 and 22.5 per cent., respectively.

The following statistics show the record of failures in Canada for the past two years. Considering the large number of companies in operation and their immense capitalization in the aggregate, the list is small:—

Failures due to	Number		Assets		Liabilities	
	1912	1911	1912	1911	1912	1911
Incompetence	214	226	$1,121 328	$1,317.774	$2,815.349	$2,471,299
Inexperience..	67	41	204,761	93.032	435.468	200.851
Lack of capital.	660	691	2,784.605	2,930 854	5,660.668	6,249,820
Unwise credits........	17	12	148,524	62.250	204,744	130,244
Failures of others....	12	16	77,967	117,125	311,333	188,023
Extravagance.........	11	12	29,460	308.000	65.510	417,900
Neglect................	56	58	172,871	183,610	377.384	332,729
Competition...........	13	15	39,538	33,699	78.958	74,150
Specific conditions....	168	204	659,019	780,504	1,081.139	1,314,687
Speculation	6	13	23,800	123,600	53,600	406.486
Fraud.................	88	113	349,802	469,883	1,271,129	1,300,757
Total	1.312	1,401	$5,611,675	$6.420,331	$12.355,282	$13.086,946

Nineteen hundred and twelve was the most favorable in five years in Canada, both as regards failures and liabilities, and there the individul was charged with the responsibility for 85.3 per cent. of all failures. Lack of Capital is the Dominion's besetting business trouble, with 50.3 per cent. of all failures charged to it, as against 16.3 per cent. due to Incompetence, 6.7 per cent. resulting from Fraud, 5.1 per cent. produced by Inexperience, and 4.3 per cent. attributed to Neglect, Specific Conditions, Fraud, Speculation, Extravagance and Competition were less in their effects than in 1911, while the other personal causes were more hurtful. Specific Conditions were credited with 12.8 per cent. of all failures, as against 14.6 per cent. in 1911. As regards liabilities, Lack of Capital, with 45.8 per cent. charged thereto, compares with 47.8 per cent. in 1911, and Specific Conditions were also less hurtful; but Incompetence, with 22.8 per cent. in 1912, as against 18.9 per cent. in 1911, was more hurtful, as was Fraud, with 10.3 per cent. in 1912, as against 9.9 per cent. in 1911, and Inexperience, with 3.5 per cent. in 1912 and 1.5 per cent. in 1911.

PERILS OF ASSESSMENT INSURANCE

mparison of Position of the Royal Arcanum and the Independent Foresters

(Concluded).

Turning now to the Independent Order of Foresters, ose headquarters are at Toronto, we find that it has not taken so much of a plunge as the Royal Arcanum, but re are strong indications that, unless something is done its next Supreme Court session to strengthen its reserve d, the position will be about the same. Notice the loss of iness during the seven years ending December 31st,, 1911, both societies.

Royal Arcanum.			Independent Order Foresters.	
n Force.	Terminated.	Year.	In Force.	Terminated.
50,918,000	$184,859,000	1905	$248,801,000	$17,814,250
14,130,500	54,605,000	1906	258,695,000	19,106,250
04,943,548	26,213,482	1907	264,960,142	22,756,454
97,018,341	27,111,706	1908	246,027,884	38,950,414
93,306,529	29,714,311	1909	239,241,845	26,481,135
89,897,729	24,598,301	1910	240,170,989	20,033,234
87,992,345	23,304,882	1911	242,093,787	22,216,804

The striking feature of the above table is that while the society is only one-half the size of the other, the loss of iness by withdrawal and death, has been greater in the ependent Order of Foresters than in the twice larger soy during the past four years, as follows:—

	Total in 1908.	Out in 4 years.	Per cent.
esters	$246,027,884	$107,681,587	44
anum	497,018,341	104,729,200	21

An institution or a structure of any sort that is losing stance at a rate of 44 per cent. in four years, can hardly st of much prospect of long life over one which is losing y at half that rate, and which, to-day, has still more than ble the business contributing to its up-keep.

It is fortunate that the Toronto society has an accumued fund in store of $20,489,929, or say $84.60 per $1,000 of tificate, while the Arcanum has not quite seven millions, about $14 per $1,000 with which to face the foe, grim th, common to both. Consequently, even if the Foresters come to the turning point, and, like the Arcanum and Ancient Order United Workmen are both now doing, were wing upon its surplus fund with which to complete each nth's death claims, it would have this great advantage over er of them, that its reserve fund is three times as large as Arcanum's, and nearly ten times greater than that of the rkmen.

nger Is Ahead.

Having said that much as to the superiority of the Toro society's position in comparison with the other two, we it a duty incumbent upon us to say that there are breakers ead, straight for which the Foresters are steering. The akers and the rocks beneath them, are not yet very visible the members. But they are there, as our next table clearly ws. The accumulated fund was making a fairly subntial annual growth a few years ago, but not half as much it should have done. Still it was improving somewhat handely during the years 1907 to 1909, inclusive. But for the past years, 1911 and 1912 inclusive, a perfect blight seems to e fallen upon the contribution made to it in the ordinary rations of the society. No matter what size a reserve fund y be, it should be earning say six per cent. interest upon the ance of the previous year. The following table is made on t basis, so as to show, as it does in the final column, exly how much the members contribute, year by year, to the ilding up of the Foresters' reserve fund.

ich Way is the Vessel now Steering?

c. 31st.	Total Fund.	Increase.	6%.	Contributed.
7	$11,504,200	$ 789,687	$ 579,990	$ 209,697
8	13,015,182	1,778,598	627,372	1,151,226
9	14,687,719	2,136,784	734,088	1,402,696
0	16,755,913	2,384,320	862,290	1,522,030
1	18,842,767	2,086,754	1,005,354	1,081,400
2	20,489,929	1,647,162	1,030,565	617,597

The 6% column, it will be seen, is computed, in each case, on the assets on December 31st of the previous year. When ducted from the whole Increase, the remainder is what is ntributed by the Membership, out of the monthly assessnts, over and above the cost of running the machinery of the der. It can be seen that there must be some powerful inence at work to change an up-grade yearly contribution of m $209,697 up to $1,522,030 into a disastrous down-grade e from that last sum to one of only $617,597. Something ist be done immediately to stop that process.

A down-grade rush that has left a loss, or leakage of arly a whole million of dollars in two short years, instead of an up-grade contribution of $1,192,999 as in the corresponding two years of 1908-9, makes a wonderful difference in the condition of the society at the present time. Not only is this petering out of the contribution to the surplus alarming enough, taken by itself, but when the stand-still in the total membership is given its due weight, the officers must surely see that it would be most advisable to call in an actuary as any alarmingly sick individual calls in a doctor, in order to have expert advice before it is too late. Is the present surplus enough to guarantee solvency, or is it half or quarter enough, to meet the heavy liabilities which the Order has undertaken?

Then and Now.

Another table will show, better than it can be stated otherwise, what is wrong with the Independent Order of Foresters. It compared claims paid in the last two years with those of two years when there was, almost as nearly as possible, the same amount at risk as now, namely; in 1903 and 1904. It is plain to be seen, from this table alone, that any officer of the society who makes the broad statement that "The outlook for the Order was never as bright and encouraging as it is to-day," taking upon himself a serious responsibility.

In Force and Claims Paid.

In 1903 and 1904.		In 1910 and 1911.	
In Force.	Claims Paid.	In Force.	Claims Paid.
$238,124,000	$1,658,109	$240,170,989	$2,489,559
242,896,000	1,848,484	242,093,787	2,689,651
$481,020,000	$3,506,593	$482,264,776	$5,179,210
Deduct the claims paid in 1903-4			3,506,593
Showing an increased mortality of			$1,672,617

This statement reveals the weakness. It shows what is happening, now that all the old members of 1903 and 1904 are seven years older than they were then, if still living, and shows why the outlook is far from being either bright or encouraging. If more evidence of the nature of the rocks ahead is needed, it will surely be revealed in the unfortunate experience of the past twelve months. Instead of $1,753,298, which was the "claims paid" average for 1903-4, or of $2,589,605, which was the average for 1910-11, the corresponding item for the year just closed is no less than $3,080,481. This is nearly double what it was eight years ago upon about the same amount at risk. This accounts very well for the small contribution of $617,597, above what the interest produces, to the reserve fund during 1912, whereas it was more than twice as much ($1,522,030) for the year 1910. If this is "bright and encouraging" what will it be next year and the year after if death claims continue to mount year by year, each greater than the year preceding? Something should be done, and that quickly, to conserve the accumulated fund, and to preserve the Order from catastrophe.

◆

ICE COMPANY'S STOCK ISSUE

An issue of $200,000 cumulative seven per cent. stock of the Ice Manufacturing Company, Limited, is to be offered in Montreal. The stock is to be offered at par but with each two shares will go what is termed a "participating certificate." Holders of these certificates will be entitled to participate in the surplus profits of the company, above dividend requirements, and to this extent the certificates contain the principal feature of an offering of bonus common stock with a preferred stock issue. The similarity, however, ends there. The participating certificates for one thing carry no voting power and for another they create no capital liabilities, two important features of the new plan of financing. The company will have no bonds and the capital will consist only of the seven per cent. cumulative stock of which $500,000 is being issued at the outset, $200,000 to comprise the public offering to be made shortly. Every dollar of capitalization will, therefore, have a dollar in cash back of it, and no nominal or other value is placed on the participating certificates. Another feature of the plan is that in the event of the company passing into other hands, the stock will be redeemable at 120, should the profits arising from the sale permit it, before the participating certificates would be entitled to share in any distribution. The company estimates gross profits of $90,378 from its first year's operations. After deductions of $35,000 for dividend on the seven per cent. stock, a surplus of $55,378 would be available for the participating certificates.

◆

The government owned telephone system of Alberta yielded a surplus of receipts over operation and maintenance expenses during 1912 of $62,283, while the earning capacity of the system on a basis of the capital expenditure amounted to 12.1 per cent. In the six years, 1907-1913, the system has yielded a profit of $407,592.

PRACTICES OF THE WORLD'S BANKS

What Happens at Home and Abroad When a Stringency, Crisis or Panic Occurs

BY M. P. LANGSTAFF, A.I.A., F.A.S.

VI.—When a Stringency, Crisis, or Panic Occurs.

(a) The Bank of England.

The Bank of England resorts to the variable rate of discount to protect its reserve, raising its rate in times of danger in order to restrain the extension of credit and check the outflow of specie.

In the case of a serious crisis, the Peel Act would be suspended. That is to say, the Issue Department would be authorized by the government to issue a further amount of notes secured by government securities. Notes would still be redeemed in the regular course of business, and the inability of the Issue Department to continue the redemption of an indefinitely enlarged issue of notes would be the only discernible limit to the relief. This limit would be too distant to have any practical bearing and hence the quieting effect produced by the measure on the public mind would be of as much real assistance to the Banking Department as the actual addition of cash to its resources.

(b) The Banks of Scotland.

The rate of discount announced by the Bank of England from time to time serves as a guide to the other banks throughout England and Scotland in fixing their rates for loans and deposits. And in case of a money stringency, these banks would protect their reserve by raising the rate of discount and restraining the extension of credit.

(c) The Bank of France.

By the force of circumstances, the Bank of France under ordinary conditions holds a vast store of specie, and in times of stress is thus enabled to meet with comparative ease, demands that would otherwise prove a serious strain. In this respect it is in a more advantageous position than its neighbors in England or Germany. Unlike them it does not resort to a variable rate of discount. When hard pressed it buys gold at a premium. It also enjoys the advantage of possessing the legal right to make in silver any payments which it does not care to make in gold and can thus protect itself against any dangerous demands for the latter.

In times of serious crises, the Bank has been authorized to refuse payment of its notes in specie, and to make its notes a legal tender for debts public and private.

(d) The Reichsbank of Germany.

Like the Bank of England, the Reichsbank resorts to the variable rate of discount to regulate its reserve.

The Reichsbank is, however, in a better position than the Bank of England to meet demands during times of commercial pressure. For while there is a limit set for its uncovered note issue, yet it is not hampered by a rigid line like that drawn by Peel's Act, but it is allowed to increase this limit, any excess being taxed at such a rate as to render an increase prohibitive except in times of actual necessity.

(e) The National Banks of United States.

In times of money stringency, the national banks strengthen their reserves by bringing in loans lent on "call," raising their rates for loans, and restraining the extension of credit. They have at times also received important aid from the Treasury.

During severe crises the banks have resorted to the method of "combined reserves"; stamping cheques, wherever possible, "good through the clearing house"; and even, as a last extremity, declaring "bank holiday" which virtually amounts to suspension, temporary or otherwise.

(f) Canadian Banks.

As in the case of the National Banks, the Canadian banks take precautions to strengthen their reserves in times of financial stringency. Canadian banks, however, are more conservative in their system of loaning, than are the National Banks, and have adopted the pronounced policy of restraining speculation as much as possible. Hence in times of financial stress, there is not the same sudden and drastic recall of loans, nor the same liability of a panic. Thus in the year 1907, there was no bank suspension in Canada. In this year, the Government did, indeed, offer a loan as a help to the movement of crops. The amendment to the banking law providing for an "emergency" circulation during the crop season will tend to avoid the necessity of resorting to this expedient hereafter.

With their flexible note circulation, Canadian banks are, indeed, in an enviable position during periods of stress when we compare them with the National banks laboring under their severe note-issue regulations, the rigidity of which is, in fact, the principal defect of their system.

COMPETITION IN SUDBURY NICKEL FIELD

Holdings of Dominion Nickel Company Said to Ha Been Purchased

The statement is made in an engineering contempor y that Dr. F. S. Pearson, who has been closely identified w Sir William Mackenzie in his hydro-electric power enterpri s in Canada and Mexico, has taken over the holdings of e Dominion Nickel-Copper Company. It is believed, howev , that Dr. Pearson and his former associates will not be cal d upon to do the financing, rumor having it that the mo y will be put up by the Rothschilds. The Dominion Nick - Copper Company, controlled by J. R. Booth and M. . O'Brien, has large and important holdings in the Sudb y range.

The Monetary Times, endeavoring to confirm this - port, communicated with the Dominion Nickel-Copper C - pany at Sudbury, whose general manager merely stated t t he was "unable to give any information regarding e report."

Price to be Paid.

Discussing the matter, the Canadian Mining Jour , which repeats the fact that the report is not yet fully c firmed, states that the price to be paid is still, so far as public is concerned, a matter of conjecture; but it alm t certainly will exceed $5,000,000. "It is a fair assumptio it continues, "that the new owners will establish large sm - ing and refining plants, and that they are already assured a market commensurate with their output. It is probab , also, that the bulk of the production will be use in industr directly or indirectly under the domination of the purchas themselves. No doubt their own growing needs have inci them to make this huge investment. In any case, there no reason to think that the step has not been long and ca - fully deliberated upon.

International Nickel Company.

"On the other hand, it is totally superfluous to imag that the International Nickel Company, or any of its s - sidiary organizations, will suffer from the advent of Rothschilds. Sooner or later such an event was inevitab . International Nickel, so far as we are aware, has made attempt to pre-empt the Sudbury nickel ore field, thou quite naturally, the men at the helm have taken pains to sa - guard the enormous industry of which they are the pionee . On them has devolved the titanic task of developing a wor - wide market for nickel and its alloys. Whilst they poss a practical monopoly of that market, possession has be forced upon them by circumstances. The Sudbury depos are so extensive and so accessible as to prohibit competiti from other countries. No other organization has been, the - fore, in a position to supply the increasing demand for nick or, for that matter, systematically to foster and enlarge t market. In brief, the record of International Nickel's acti ties comprises the commercial history of the metal.

"As with all human concerns, so with Internatio Nickel there has been much criticism and abuse levelled its devoted head. The fact remains, however, that the ch item harped upon is the fact that the company refines all matte in the United States instead of in Canada. This h been so often explained that it is almost offensive to rep that there is a United States duty of 6 cents per pound all refined nickel entering that highly protected count Were this duty removed it is possible that other trade co siderations might still compel the company to refine in t States. But it may be safely taken for granted that refini will always be carried on, either by International Nickel by any other concern, exactly at those points where it c be performed with most profit.

As to Competition.

"It has taken about twenty-five years of continuous fort to build up the industry that centres at Copper Cliff. this year of grace, the International Nickel Company is firm entrenched. Its position could hardly be stronger. It fu nishes about 70 per cent. of the world's supply of nickel, i ore reserves are sufficient for many decades to come, and is about to double its mining and smelting equipment. fact the whole plant may attain three times its present cap city before a new concern can possibly become a producer.

"For these and other reasons we believe that it is besi the point to look upon any new organization as a rival, even as a competitor, of the International Nickel. Wi larger production the price of nickel may be, we hope will lowered. This is a function of the market and of improve metallurgical methods.

◆

Mr. P. J. Wright, manager at Havelock branch of t Bank of Toronto, has been transferred to the management the Waterloo branch of the bank.

RICHELIEU AND ONTARIO'S REORGANIZATION

New Officers Were Elected — Quebec and Ontario Boards—English Shipping Interests Included

Monetary Times Office,
Montreal, February 19th.

The most important annual meeting held by the Richelieu nd Ontario Navigation Company was that which took place n Montreal Wednesday.

As may be known, plans have been in progress with respect to the reorganization and the future of the Richelieu nd Ontario for months past, and it was understood that the ew control would assert itself at the annual meeting and lect its own slate. Matters occurred much as expected, ave that, instead of the slate handed in being declared lected, a vote was called for. The meeting took place at oon and the voting and counting of the votes was a matter f so much importance that an adjournment took place till ive in the evening. It was then found that the slate, as proosed by the new control, had been elected.

ew Officers Were Elected.

The honorary president of the company is Sir Trevor awson, of London, England, deputy chairman and managng director of Vickers, Limited.

The new president is Mr. James Carruthers, of Montreal, ho is a large owner in the Chicago and St. Lawrence Steam avigation Company, and who is well-known as a grain exorter.

The vice-presidents are: Mr. William Wainwright, of ontreal, and Mr. James Playfair, of Sarnia. The board of irectors includes: Sir Montagu Allan, of Montreal; Messrs. . D. Matthews, Toronto; W. Grant Morden, London, Eng.; . D. Binning, Montreal; Claude G. Bryan, London, Eng.; . B. Smith, Owen Sound; H. Richardson, Kingston; C. A. arnard, K.C., Montreal; Sir Rudolphe Forget, M.P., Montreal; F. A. Magee, Hamilton, Ont.; D. O. Lesperance, uebec, and Wm. Honson, Montreal.

Sir Rudolphe Forget, who was formerly president of the ompany, expressed his desire to retire from the directorate, ut he was included in the slate and the voting places him gain on the directorate.

mportant English Shipping Interests.

Some discussion has been heard of the intention of a ortion of the old board to break away and form an indeendent company. How serious are the intentions in this espect is difficult to say. Presumably, the provisions made y the new control for a Quebec board as well as an Ontario oard will meet the situation. This matter is to be arranged t a meeting of the directora. It is thought that the Quebec oard will represent, in a sense, the old Richelieu and Onario holdings, and the names of Mr. W. Molson McPherson mentioned as chairman, and Sir George Garneau, Senator asgrain, Frank Carrel and others are spoken of in this conection, while at the head of the Ontario board may be Sir enry M. Pellatt, who will also be president of the Niagara avigation Company, and Mr. Edmund Bristol and Mr. lbert Dyment.

Owing to a point being raised over the election of Mr. dmund Bristol, it was decided to substitute temporarily the ame of Mr. J. D. Steedman.

It will be observed that Messrs. W. Grant Morden and laude G. Bryan and associates have succeeded in drawing gether many interests which should contribute largely to e future success of the Richelieu and Ontario. Included re the Northern Navigation, Inland Navigation, Niagara avigation Company, and Richelieu and Ontario lines, and, s will be seen from the personnel of the directorate, associted with these are now representatives of important English hipping interests, such as the Furness-Withy Company and ickers. As to the future programme, nothing is yet reealed, but it is stated that the coming season will be spent ainly in bringing the different parts of the company into loser working relationship.

◆

Western Canada Power Company.—Mr. C. H. Cahan ecently stated that his recent mission to England was ccessful. He stated that a contract had been entered into ith the British Columbia Electric Railway Company, Limit-, for the sale of a large quantity of electric power to that mpany on satisfactory terms.

The contract commences with a supply of a maximum of 200 horsepower on September first next, increasing to a aximum supply of about 40,000 horsepower upon the comletion of the Western Canada Power Company's second inallation.

FOOD CONSUMPTION IN CANADA'S WEST

Opportunities in Winnipeg District for Producers—New Industry—Electric Railway Returns

Monetary Times Office,
Winnipeg, February 18th.

Winnipeg's yearly increasing population demands more fresh vegetables, milk, butter, cream, poultry, eggs, beef, mutton and pork, and other products. Indeed, so great has the demand become that a remarkable state of affairs exists at the capital of Manitoba, at the present time. Situated in a district, the Red River Valley, which has most fertile soil, Winnipeg annually imports from the United States and ships from Eastern points, thousands of dollars' worth of these comestibles.

Some interesting figures have been compiled by the Winnipeg Industrial Bureau, from the receipts of local wholesalers and the railway companies' records. It is ascertained from these sources that the butter receipts at Winnipeg from Eastern Canada and the United States for 1912 was 68 cars, or approximately 2,000,000 pounds, valued at $560,000. Dressed poultry received in Winnipeg during the same year required for shipment 54 cars, and weighed 1,620,000 pounds, valued at about $243,000. Local creamery companies in 1912 paid $120,000 for milk and cream from St. Paul and Minneapolis alone. Customs returns from the department at Ottawa show that during the fiscal year ending March, 1912, Manitoba imported 1,596,480 dozen eggs valued at $314,141; bacon and hams, 4,988,859 pounds, worth $573,569; 696,788 pounds of fresh meat, not including another 192,939 pounds of mutton and lamb and 92,709 pounds of salted meats. The figures for live stock show 15,666 sheep and 239 head of cattle imported during the same period. Over 3,500 horses were imported by the province in the same fiscal year. The figures for vegetables imported during the same period are equally remarkable, as follows:—Tomatoes, etc., in cans, 238,292 pounds; 18,722 bushels of potatoes, valued at $28,092, and fresh vegetables of other kinds to the value of $76,233. The possibilities in mixed farming and market gardening in the Winnipeg district are almost unlimited, representing an extremely profitable industry in which comparatively few are engaged. Winnipeg for many years will continue to grow faster than the supply of these products and forms an ideal and easily accessible market, situated in a district of surpassing richness.

Electric Stove Factory for Winnipeg.

Mr. George A. Hughes, president of the Hughes Electric Heating Company, manufacturers of electric stoves, ranges, heaters, of Chicago, Ill., has been at Winnipeg for several days in connection with the opening of their Canadian branch here.

The Hughes Electric Company has leased space for the present in the new Brown power building, and their factory superintendent has arrived, clearing through the customs their first carload of factory equipment to be installed. About fifty hands will be employed at the start in the new factory until such time as it is deemed advisable to purchase and erect a separate factory for their business.

Electric Railway Receipts.

The financial statement of the Winnipeg Electric Railway for the year 1912 shows that the revenue was behind that of 1911. For 1912 the gross earnings were $3,765,364.05, while in 1911 the gross earnings were $3,829,749.67. The four quarterly dividends paid amounted to $720,000, or 12 per cent., and in addition to that the surplus of $474,463.12 was transferred to the credit of profit and loss account, making the total of the credit of this account on December 31, 1912, $2,091,236.37.

The board of directors was re-elected, consisting of Sir William Mackenzie, Sir Donald Mann, Sir William C. Van Horne, Sir William Whyte, A. M. Nanton, D. B. Hanna, F. Morton Morse, Hugh Sutherland and R. J. Mackenzie.

At a subsequent meeting of the board, the following officers of the company were elected for the year: Sir William Mackenzie, president; Sir William Whyte, vice-president; and F. Morton Morse, secretary-treasurer.

The territory recently added to Manitoba is said to be rich in mineral deposits, and it is anticipated, when the Greater Manitoba of the future acquires the control of its natural resources, that the authorities will initiate a vigorous policy of development of this buried wealth.

◆

Brazilian Traction Company.—The gross earnings of the Brazilian Traction Company for the first week in February were $462,114. The previous record week was that ended December 21st last, when earnings were $427,425.

GOOD PROFITS FOR RICHELIEU NAVIGATION

Financial Statement is Satisfactory—Comparison of Assets and Liabilities

Net profits of $976,512 are shown in the annual report of the Richelieu and Ontario Navigation Company for 1912. On the paid-up capital stock at the end of the year, that sum is equal to 10 per cent. On the average paid-up stock of the year, the net profits were equivalent to nearly 14 per cent. The statement includes earnings, expenses, etc., of the company's subsidiary lines, namely: The Northern Navigation Company, Limited; Inland Lines, Limited; Niagara Navigation Company, Limited; Richelieu & Ontario Navigation Company of the United States; St. Lawrence River Steamboat Company, Limited; Thousand Islands Steamboat Company.

Carried to Surplus.

The gross receipts were $4,495,157.48, and operating expenses $3,345,953.12, the net earnings being $1,149,204.36. Deducting fixed charges, interest, etc., of $172,691.44, there were net profits of $976,512.92.

The income account is as follows:—

Surplus, December 31st, 1911	$439,249
Net profits, 1912	976,512
	$1,415,762

After meeting dividend requirements, adding $36,000 to insurance fund and writing off steamers $75,817, the company carried forward out of the year's profits $269,531 to surplus, bringing the total surplus up to $708,780.

The statement of the company's assets and liabilities shows some important changes owing to the readjustment that took place with the acquirement of subsidiary companies during the year. Total assets of the company now amount to $12,760,706, as compared with $7,352,045. The amount given under property account, including steamers, wharves, real estate, etc., remains virtually unchanged, although in the case of real estate particularly, there must have been a large appreciation in the market value during the year.

Assets and Liabilities Compared.

As compared with $455,800, which the company had out in call loans at the end of 1911, there is this year on the debit side an item of $300,000 for bank loans. This and an amount of $224,478 which the company had in 1911 under the head of "accounts receivable" are more than offset by a new item in the statement of assets showing advances to and balances due from the subsidiary companies amounting to $1,029,640. The assets and liabilities at the close of 1912 compare as follows with the statement for the previous year:—

Assets.

	1912.	1911.
Steamers, etc.	$4,785,736	$4,774,396
Stock subsidiary companies	6,143,060	1,507,956
Bonds, treasury	102,686	13,560
Traffic balance	216,190	......
Due by subsidiaries	1,029,640	......
Stores	70,676	74,974
Unexpired insurance	22,500	......
Cash	60,236	24,921
Insurance fund	329,978	275,958
Accounts receivable	....	224,478
Collateral loans	....	455,800
	$12,760,706	$7,352,045

Liabilities.

	1912.	1911.
Stock	$9,963,400	$5,311,875
Bonds	1,376,780	1,233,633
Accounts payable	58,763	72,233
Unclaimed dividends	174	174
Accrued charges	20,561	18,939
Accrued dividend	1,884	......
Bank loans	300,000	......
Insurance fund	330,361	275,939
Surplus	708,779	439,249
	$12,760,706	$7,352,045

Insurance Fund Investments.

During the year the required number of debentures of the company have been cancelled, and interest and sinking fund requirements of all subsidiary companies have been paid. The insurance fund has been credited with $36,000 out of the year's earnings, and $330,361.90 now stands to the credit of this account and is invested in first mortgage bonds. This reserve fund is in addition to the general insurance carried with the insurance companies on shore properties, steamers, etc.

The directors reported the purchase of shares of the companies recently acquired. An order has been placed with the Western Dry Dock and Shipbuilding Company, of Port Arthur, for a new steamer.

◆

GRAND TRUNK IN STATES

Railway Claims that What Purports to be Signature of Charles M. Hays is Not Binding on Company

Grand Trunk matters continue to attract considerable attention in certain of the United States. At Concord, N.H., the Grand Trunk Railway Company filed in the Superior Court a bill in equity to test the legality of the incorporation of the Southern New England Railway Company. The bill quotes the articles of incorporation filed at the office of the Secretary of State, and says that what purports to be the signature of the Grand Trunk Railway Company of Canada by the late Charles M. Hays, the president, is not the legal and binding signature of the Grand Trunk Railway Company, but was his unauthorized act and that it was beyond the power of the railway company to bind itself to the purchase of the shares of the capital stock of the alleged railroad and that the act is therefore null and void.

Not Legally Subscribed.

It is further alleged that the full amount of the capital stock, $1,000,000, was never legally subscribed in good faith by responsible parties, and that the subscription of the Grand Trunk Railway Company was not the legal subscription of that company.

The complainants ask that the Southern New England Railway, its officers and agents, be enjoined from taking any action for the purpose of establishing the corporation as a permanent railroad corporation and that the subscription as levied against the Grand Trunk Railway Company and the other complainants be declared null and void.

New England Trouble.

Federal Judge Mayer, at New York, has granted the application of Mr. Edson J. Chamberlin, president of the Grand Trunk Railway, for the appointment of a commission to go abroad and take the testimony of certain London bankers and of British directors of the Grand Trunk for use of the defence in the Government prosecution of Chamberlin under the anti-trust law.

◆

NEW BRUNSWICK'S AGRICULTURAL IMPROVEMENTS

(Special correspondence.)

St. John, N.B., February 19th.

The programme for the improvement of agriculture in New Brunswick this year promises to be of great benefit to farmers generally. An agricultural school will be opened at Woodstock and another at Sussex. The buildings will be erected in the spring on the new Dominion experimental farm at Fredericton, and the farm equipped for service. A department for instruction in horticulture and other branches of agriculture will be established at the provincial normal school. Special field instructors will tour the province and give the farmers advice as to drainage and the use of fertilizers.

The headquarters of the poultry expert will be removed to the agricultural department's offices at Fredericton. In the dairy department an official will be appointed to give his entire time to a general oversight of creameries and assisting generally in improving the dairying industry. All dairy herds will be tested by officials from the live stock branch at Ottawa. Ditching machines for drainage work will probably be secured to reclaim areas in some parts of the province not now fit for profitable farming. Assistance will also be given to secure a number of hulling machines, so that farmers may provide their own supply of clover seed, which is now almost wholly imported.—M.

◆

The business of the Security Loan Company, the Provincial Securities Company and the Sterling Loan and Securities Company has been merged with that of the Sterling Trusts Corporation, which is now capitalized at $1,000,000. The board of directors were elected at the annual meeting as follows: Mr. E. D. McCallum, president; Mr. A. H Tasker, first vice-president; Mr. T. J. How, second vice-president; directors, Hon A. E. Forget, Banff; Messrs. W. M. Martin, M.P., Regina; H. L. Johnson, Vancouver; Wm. McBain, Toronto; Aleck Clark, Regina; A. W. Snider, Swift Current; N. B. Peart, Regina; J. F. Anderson, Regina; J. W. Scott, Listowel, Ont.; Chas. Jackson, Regina and Geo. H. Bradshaw, Regina.

USE OF SHARE WARRANTS

int Stock Companies Act Requires Revision, Opines Canada's Finance Minister—Facilities for European Financing

"I think that the Joint Stock Companies Act will require vision at a comparatively early date, but in the meantime does not provide for the issue of share warrants," remark- Hon. W. T. White, Minister of Finance, during a discuson on a companies' bill. "In the course of my experience have had brought to my attention the desirability, almost cessity, of granting companies the right to issue share arrants, especially those companies which derive their funds om Europe.

"In this country the transfer is by book shares on the oks of the company or scrip certificates which pass from nd to hand by endorsement, and, so far as the financial orld of Canada is concerned, they serve the purpose very ell.

"For example, a man holds a certificate for 25 shares, in particular company, he endorses that before a witness and passes from hand to hand until some holder desires to ave the shares transferred into his name.

"By virtue of the power of attorney endorsed in blank nd which he fills in, the transfer is accomplished. The scrip rtificate which passes from hand to hand here is not known continental Europe, and its place is taken by what are nown as share warrants, which are practically bearer cerficates, entitling the bearer, upon giving notice under cerin conditions, to receive the dividends as and when they re declared.

n Lieu of Share Certificates.

"A number of companies incorporated in Canada which esire to sell their shares, or, in other words, to raise a part r the whole of their capital upon the continent of Europe, nd it very desirable they should have the advantage of issug share warrants in lieu of share certificates, as we undertand them in Canada.

"The point has been made that the Companies Act does ot at present permit that, and that, therefore, there should ot be any special legislation authorizing companies incororated under the general Companies Act to issue share arrants. I can appreciate that point of view. But the reision of the Companies Act is a work of some magnitude, nd should not be undertaken except after very careful conideration. In the meantime some companies might suffer eriously in respect to their financing abroad, if they are not ermitted to come to Canada and obtain this special legislaion under which they may issue share warrants for sale on he continent of Europe."

What Share Warrant Says.

In reply to the query of Mr. Nesbitt, is there anything o show on the face of the share warrant of what the conditions of its issuance are? the minister of finance said: "The share warrant states that the bearer is entitled to so many shares of the common or preferred stock, as the case may be, of such a company, incorporated under the laws of Canada. The share warrant is merely a document of title, showing that for the time being the bearer is entitled to a certain number of shares; it is precisely the same as if he held an ordinary stock certificate, stating that he is the owner of so many shares.

"The only difference is that the share warrant is to bearer, and passes from hand to hand like a bond payable to bearer. The reason it is favored on the continent of Europe is that no question arises as to the authenticity of the signature to the power of attorney on the back of the scrip certificate.

Facilities Ought to be Granted.

"Nearly every company that carries on business on the continent of Europe adopts the share-warrant-to-bearer system, and a number of companies in this country, which desire to obtain money for their enterprises on the continent of Europe, have adopted the same expedient.

"If it is desirable that a company should be allowed to obtain money from Europe, then I think, if it could be safely done, as it can without doubt," added Mr. White, "facilities ought to be granted for the purpose of enabling it to sell its shares on the continent of Europe in the form the people there desire to have them sold."

◆

The number of directors of Messrs. Currie-Livock, has been increased from five to seven.

A gas well with great pressure has been struck in Albert County, New Brunswick. The Mackenzie and Mann interests have fifty men at work developing the oil shales on heir property in Albert County.

MORE UNITED STATES BRANCH PLANTS

American Creosoting Company to Build Large Plant at Trenton, Ontario—Other Companies Eyeing the Dominion

Several other United States firms are considering the early establishment of branch plants in Canada. There are almost 200 branches and warehouses in Canada of United States manufacturers. The American Creosoting Company and the United States Wood Preserving Company jointly control the stock of the Canada Creosoting Company, a new incorporation which will erect a branch plant and conduct business at Trenton, Ontario, for the two United States companies.

The Roberts Filter Company, of Philadelphia, manufacturers of mechanical filters, may also in the near future establish a branch factory in Ontario. The General Vehicle Company, of Long Island City, N.Y., may within the next two years have a branch plant in Walkerville, Ontario, or Sherbrooke, Quebec. This firm manufactures electric commercial vehicles.

Canada Creosoting Company.

The plans of the Canada Creosoting Company are matured, and forty acres of land on the river front at Trenton have been purchased by the company, which will erect a large plant for creosoting timber of all kinds. About one-third of the shareholders of this company will be residents of Canada, as a block of the stock of the company is being sold privately here. The remainder of the stock is held by the two United States companies mentioned above.

The head sales office of the new company will be at Montreal, where a tank station will be erected. Creosoting oils will be brought to the Montreal station in tank steamers from Europe. A small tank steamer, specially constructed for going through the St. Lawrence canals, will carry oil from the Montreal station to the Trenton plant. Mr. E. S. Clements, of the United States Wood Preserving Company, will be the Canadian manager, with headquarters at Montreal. President Hunt, of the American Creosoting Company, will be the president of the Canadian company. Mr. A. B. Clements, vice-president and general manager of the United States Wood Preserving Company, will be the vice-president.

Business of the Company.

The plant will be served by the Canadian Northern, the Canadian Pacific Railway, and the Grand Trunk Railway, and also has the waterfront. A large private dock will be built at the river front. The plant will be between the Canadian Northern and the Canadian Pacific Railroads, with sidings from both these roads running into the plant, and a siding of the nearby Grand Trunk Railroad will also be built into the plant.

The company will treat, principally, railroad ties and wood paving blocks, by the vacuum-pressure method. Approximately 150 men will be employed at the start. A plant costing in the neighborhood of $200,000, and with storage space for a million ties, will be erected at once. The company has purchased enough ground to be able to treble the initial capacity of the Trenton plant, and within a year the capital of the Canadian company will probably be increased and the plant enlarged.

The Trenton plant will be practically a duplicate of the United States Wood Preserving Company's Toledo (Ohio) plant, which is said to be the most modern and best-equipped wood preserving plant in the United States. Three cylinders, each 190 feet in length, will be constructed at once for the creosoting process.

Railroads and Their Ties.

The railroads save large sums by having their ties creosoted, as it adds but little to their cost in comparison to the many years which it adds to the lifetime of the ties. Bridge timbers, piling, sheeting, shop and factory floors and wood for many other purposes can be profitably creosoted.

The American Creosoting Company has a plant at some point on the line of each large railroad company in the United States, with few exceptions, and the United States Wood Preserving Company has sold large quantities of paving blocks to New York City, Boston, Baltimore, Springfield, Toledo, Indianapolis, Chicago, and many other cities.

◆

The Carbon Oil Works, Limited, will hold their annual meeting in Winnipeg on the 28th inst.

The English shipbuilding firm, Messrs. Swan, Hunter and Wigham Richardson, whose president, Mr. W. G. Hunter, is now in Montreal, will submit tenders for work on the Georgian Bay Canal, if that project is proceeded with, and for the construction of ships for the Hudson Bay line.

NEW COMPANIES IN FIVE PROVINCES

Toronto Corporation Has Largest Capital — Realty Companies in New Brunswick

Four of the one hundred and thirteen companies incorporated this week have a capitalization of one million dollars and over. They are: Dominion Manufacturers, Toronto, $3,000,000; Cheddite Limited, Montreal, $1,000,000; British American Manufacturing and Power Company, Vancouver, $1,000,000; Tobacco Buyers Association, Montreal, $1,000,000. The total capital of all the companies receiving charters is $18,598,900. Grouping the new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	No. of companies.	Capitalization.
Ontario	33	$ 6,115,000
Quebec	25	5,328,500
Manitoba	25	4,182,500
British Columbia	24	2,765,000
New Brunswick	6	207,900
	113	$18,598,900

The following is a list of charters granted during the past week in Canada. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Hillier, B.C.—Cameron Farmers' Exchange, $100,000.

Cariboo County, B.C.—Quesnel Telephone Company, $50,000.

Fernie, B.C.—Silverbrook Timber and Development Company, $250,000.

St. John, N.B.—Realties, $100,000. S. A. Thomas, W. S. Allison, W. E. Anderson.

Birtle, Man.—Birtle Rink Company, $5,000. A. Neale, G. Mitchell, E. J. S. Wheeler.

Brandon, Man.—Brandon Tannery, $100,000. W. Crouch, J. Cornell, J. S. Gibson.

St. Thomas, Ont.—Eaton Cigar Company, $40,000. A. Eaton, H. J. Roberts, J. J. Lutz.

Quebec, Que.—Tourville Realty Company, $20,000. A. Legrand, T. Goulet, A. Morissette.

Nicolet, Que.—Union Optical Company, $250,000. S. Richard, Jr., S. Trahan, P. Thibodeau.

Moncton, N.B.—W. G. Jones Realty Company, $9,000. W. G. Jones, F. Jones, Miss H. M. Jones.

Pilot Mound, Man.—Louise Land Company, $60,000. E. P. Cavers, J. C. Stewart, J. A. Rothwell.

Durham, Ont.—Rob Roy Cereal Mills, $100,000. W. A. McGowan, C. R. McGowan, J. McGowan.

St. Prime, Que.—L'Aqueduc de St. Prime, $20,000. L. A. Rainville, J. E. Laberge, T. L. Laberge.

Grand Mere, Que.—Grand Mere Realty Company, $49,000. E. Bournival, F. Desilets, E. Langlois.

Sturgeon Falls, Ont.—Standard Lumber Company, $100,000. A. G. Robertson, J. J. Kew, E. R. Maltby.

The Pas, Man.—Ross Navigation Company, $100,000. C. A. Crawley, C. H. Locke, G. F. De C. O'Grady.

Hampton, N.B.—St. John Construction Company, $9,000. C. M. Lingley, R. W. Wigmore, W. J. Brown.

Thorold, Ont.—Rocmac Manufacturing, $100,000. F. H. Keefer, E. M. Powley, H. A. Keefer, Port Arthur.

Vineland, Ont.—Vineland Canning Company, $300,000. W. G. Lumbers, F. Marshall, N. Brethour, Toronto.

Trenton, Ont.—Canadian Pearl Button Company, $100,000. A. W. Holmested, W. L. Carr, C. J. F. Collier.

Walkerville, Ont.—Essex Real Estate Company, $100,000. F. C. McMath, W. Pope, G. E. Roehm, Detroit.

Portneuf, Que.—Compagnie Industrielle de Portneuf, $49,500. S. L. Lamplaugh, J. E. Papillon, R. Ford, Sr.

Souris, Man.—Mackenzie's, $50,000 (grocers). T. Indridarson, Winnipeg; D. A. Mackenzie, H. Riddle, Souris.

Hudson, Que.—Hudson Heights Development Company, $50,000. J. Wilson, A. H. Vipond, E. S. Jaques, Westmount.

Cananoque, Ont.—Folding Bath Tub Company, $50,000. R. H. Parmenter, A. J. Thomson, W. S. Morlock, Toronto.

Crystal City, Man.—Crystal City Hotel and Investment Company, $15,000. W. Baker, J. E. Macartney, S. B. Lynes.

Morrisburg, Ont.—Hoyle Lumber Company, $120,000. G. L. Brown, A. Brown, Morrisburg; W. A. Brown, Chesterville.

Simcoe, Ont.—Grover C. Murdoch and Company (dry goods), $50,000. G. C. Murdoch, A. L. Sovereen, H. A. Pursel.

Hamiota, Man.—Central Manitoba Farm Lands Development Company, $100,000. W. J. Stevens, R. S. Hodge, E. D. Hudson.

Maisonneuve, Que.—Courchaine, Lawrence and Company, $30,000 (fruits). D. A. Courchaine, L. Lawrence, R. Routhier.

Ste. Anne, Man.—Rosewood and Ste. Anne Rural Telephone Company, $2,500. T. F. Morris, W. C. Morris, E. F. Morris, Rosewood.

Hillsborough, N.B.—Albert Lumber Company, $60,000. J. Nelson Smith, Lower Coverdale; J. L. Peck, Hillsborough; W. E. Golding, St. John.

Fort William, Ont.—F. A. Guy Grain Company, $200,000. A. Snelgrove, J. F. Robertson, M. S. Guy. Mount McKay Building and Realty Company, $100,000. A. Touchette, N. B. Gerry, J. P. Tonolli.

St. Andrews, N.B.—Canadian Stores, $20,000. J. W. Scovil, St. Stephen; G. D. Grimmer, St. Andrews; H. M. Murchie, St. Stephen. Quoddy Coal Company, $9,900. P. P. Russell, T. Burton, D. G. Hanson.

Ottawa.—Ottawa River Driveway Land Company, $40,000. F. X. A. Chevrier, E. J. Menard, Embrun; J. A. Brisson, Casselman. Ottawa West Land Company, $500,000. N. D. Porter, G. Burn, W. C. May.

Victoria, B.C.—German-American Copper Company, $50,000. Yeoman and Pillington, $30,000. Victoria Mutual Loan and Building Society, $25,000. Johns-Turpel, $75,000 (real estate). Union Taxi Cab Company, $10,000. North American Securities.

London, Ont.—London Lumber Company, $40,000. F. E. Harley, R. Hoare, F. Harley. Richards-Wilcox Canadian Company, $70,000. W. R. Yendall, W. H. Fitch, L. E. Mitchell, Aurora. Canada Carton Company, $40,000. A. Le B. Woonton, E. G. de Wolf, C. Brown.

Vancouver, B.C.—Howe Sound Mills and Logging Company, $150,000. Sechelt Gravel and Construction Company, $170,000. Canadian Oriental Manufacturing Company, $500,000. English Fisheries, $50,000. Kennett, Tinney and Company, $10,000. Lillyburt Townsite Trading, Development, Hotel and Transfer Company, $25,000. Mutual Lumber and Shingle Company, $50,000. British Columbia Neckwear Company, $50,000. Pacific Box Company, $50,000. Westminster Shingle Company, $25,000. British American Manufacturing and Power Company, $1,000,000. P. and B. Company, $25,000 (billiard rooms). West Canada Dolarway Paving Company, $50,000. Canadian Willamette Company, $10,000 (iron founders). San Francisco Exposition Tour Company (Western Canada), $10,000.

Toronto.—Berwick Land Company, $40,000. J. M. Prentiss, D. B. Gilles, F. P. Megan. Rocmac Roads, $40,000. G. R. Forneret, G. W. Morley, D. A. MacRae. Mercantile Advertisers, $40,000. P. Thompson, J. G. Wright, E. B. Wright. Canadian Academy of Music, $100,000. G. H. Sedgewick, A. G. Ross, E. V. Macmillan. Blundall Piano Company, $100,000. E. Blundall, C. Cameron, E Peppiatt. Reynolds Products Company, $40,000 (steam and electrical appliances). G. Grant, D. I. Grant, B. Williams. Masterson Wrench Company, $45,000. R. McKay, G. Grant, G. A. Urquhart. Anglo-American Investors, $40,000. A. K. Goodman, D. G. M. Galbraith, H. McKean. Canada Stamp and Stencil Company, $40,000. J. H. Hunter, A. H. Cox, R. G. Roberts. M. S. Boehm and Company, $200,000. G. W. Morley, H. E. Manning, H. E. McKittrick. Brown and Cooper, $40,000. J. J. Brown, R. J. Cooper, A. C. Brown. Milligan and Russell, $50,000 (real estate). H. E. Grosch. T. Crosthwaite, E. M. Dillon. Toronto Investments, $40,000. E. R. R. Heyland, J. A. Jackson, J. G. Love. Bayview Land Company, $200,000. J. H. McDonald, J. A. Kent, R S. McCormick. Dominion Manufacturers, $3,000,000. H J. Elliott, L. A. David, L. J. M. Dugas, Montreal. McFarlane-Pratt-Hanley, $50,000. R. S. McFarlane, J. Hanley, D. S. Pratt, Midland.

Winnipeg, Man.—Hudson's Bay Construction Company, $750,000. S. M. Battram, J. F. Fisher, B. W. Thompson. Buchan Steel Construction Company, $100,000. C. H. McFadyen, G. R. Buchan, G. A. E. Bury. Sutherland Construction Company, $100,000. J. Sutherland, L. F. Borrowman. J. N. Sutherland. Standard Securities, $300,000. E. L. Taylor, C. D. H. MacAlpine, D. H. Ross. Western Canada Provincial Investments, $500,000. J. R. Young, T. F. Hubic. T. O. Williams. Joseph Tetley and Company (Western), $20,000 (produce). J. Tetley, W. T. Jones, J. Lecky. United Mortgage and Security Company, $250,000. F. de Vere Bentinck, C. R. J. Bentinck, J. Forbes. Independent Sick Benefit Society of Canada. J. Vogel, E. Rosenberg, I. Kestenbaum. Seven Oaks Land Company, $40,000. C. N Jamieson, A. H. Warner, H. J. Riley. Western Canada Bond Company, $500,000. K. W. Thomson, M. Anderson, C. S. Brown. Opasquia Hotel Company, $25,000. M. S. Donovan, G. A. MacLean, W. J. MacDonald. Western Elevator Holding Company, $500,000. A. Reid, J. S. Daniel, D. C. MacLachlan. Winnipeg General Investments, $200,000. E. J. Lewis, W. R. Lewis, H. Raike. Winnipeg Wholesale Tobacco Company, $10,000. M. Goldenberg, E. Glusman, S. Olfman. Burton-Fairbanks Company Limited, $5,000 (fancy goods). E. H. Goddard, W. J. Donovan, A. M. Doyle. British Empire Loan and Investment Company, $400,000. A. Paling, U. S. Stome, W. C. Bravender. Moncrieff Box Comy, $50,000. C. C. Moncrieff, R. H. Richardson, H. G. ncrieff.

Montreal.—Lasalle Realty Company, $250,000. W. Bond, J. B. Johnson, J. McBride. L'Imprimerie Popue, $500,000. A. Mercier, E. Hurtubise, J. O. Beaudet. npagnie des Pharmacies de Familles, $10,000. P. O. lombe, A. Comire, P. Routhier. Jacksen and Savage, o,000 (boots and shoes). W. Bovey, R. Fleet, J. A. leureux. Magor Son and Company, $100,000 (manufacers' agents). J. H. Magor, N. A. Magor, Westmount; E. Busteed, Montreal. Metropolitan Realty and Investment npany of Canada, $100,000. G. A. Langlois, A. Demers, H. Poulin. Sales Company of Canada, $50,000. G. R. nnan, H. W. Jackson, F. G. Bush. Cheddite, $1,000,000 plosives). L. P. Goyette, L. Fauteux, A. Leblanc. Doion Chain Company, $50,000. W. R. L. Shanks, F. G. h, G. R. Drennan. International Industrial Corporation, o,000. A. Flynn, Morrisburg; L. J. Dunbar, P. F. Mcfrey. Webster and Sons, $100,000. G. M. Webster, J. Blair, C. A. Hale. Federated Press, $500,000. T. A. l, W. E. Markham, P. E. Lamarche. Tobacco Buyers' ociation, $1,000,000. G. L. Alexander, D. A. David, M. J. Dugas. S. B. Townsend, $500,000 (liquors). S. B. wnsend, A. Mathieu, L. T. Marechal. Citizens' Security npany, $45,000. J. A. Davir, E. Pitt, P. J. Lorrain. mmobiliere d'Outremer, $90,000. A. St. Cyr, A. P. Fri-, G. Gonthier. Beausoleil, $95,000. T. Rinfret, R. Gen- J. E. Billette. Co-operative Real Estate, $20,000. S. sner, I. Borodoff, M. Lichterman.

◆

HUDSON BAY INSURANCE COMPANY

With the end of the past year, the Hudson Bay Insurance npany was able to show a net cash surplus of $103,639 total security to policyholders of $986,139. The balance et does not state what were the losses during 1912, but se in course of adjustment total $10,215.

Among the assets of the company amounting to $1,122,-, first mortgages, bonds, debentures and other interest ring securities carried at market value, account for o,949. Real estate, including head office premises, to- $92,694, and cash on hand and in banks, $96,483. There a sum of $37,712 due from agents after deduction of all rges. Re-insurance due from other companies approxites $15,303. The assets are broadly divided as follows: al cash assets, $425,880; and uncalled subscribed capital k, $696,570.

The company has reserve deposits of re-insurance npanies amounting to $38,838. The reserve for taxes acing is $1,852, and the re-insurance fund, $85,404.

The Hudson Bay Insurance Company, which has been business for eight years, has its head office at Vancouver l is making good progress. The Ontario branch office is charge of Mr. William Walker, 706 Lumsden Building, ronto. The company has no unpaid adjusted losses. Mr. R. Berry is president, and Mr. C. E. Berg, general nager.

JANUARY BANK STATEMENT

Money market conditions are clearly reflected in the uary bank statement. Nearly all the principal accounts ibit decreases greater than is usual at this time of the r. The following table shows the figures of leading ns and the change during January:—

	Jan. 31, 1913.		Changes during month.
d-up capital	$115,327,032	+	$ 445,118
culation	94,575,644	—	15,472,713
mand deposits	354,518,964	—	25,258,255
ings deposits	635,000,065	+	2,358,725
posits elsewhere	83,284,404	—	3,765,728
ll loans in Canada	71,376,510	+	720,849
ll loans elsewhere	92,387,847	—	13,568,254
rrent loans in Canada	874,705,616	—	6,626,365
rrent loans elsewhere	40,098,146	—	891,980

Call loans abroad were reduced by more than $13,000,- and current loans in Canada by over $6,000,000. Ciration declined by $15,000,000 and demand deposits by 5,000,000. The statement in detail will be printed in The netary Times next week.

◆

Buffalo Mines Company.—The Buffalo Mines Company of balt has declared the regular quarterly dividend of 5 per nt. and an extra dividend of 15 per cent. payable April 1st. so an extra dividend of 3 per cent., payable May 15th. The idend will call for a distribution of $200,000. A strike of is announced on vein No. 7 of the Buffalo on the 64-foot el.

PERSONAL NOTES

Mr. E. F. B. Johnston has been elected as a director of the Standard Loan Company.

Mr. H. F. McNichol, accountant at the King and Bathurst Streets branch, Toronto, of the Bank of Toronto, has been appointed manager of the Havelock branch, Ontario.

Mr. J. Gardner Thompson has been elected president of the Canadian Railway Accident Insurance Company in succession to the late Sir Edward S. Clouston. Mr. J. W. Binnie becomes vice-president.

Mr. William Cranston who has for some time past been Ottawa manager for Great Northwest Investments, Limited, has been promoted to the management of Ontario, with offices at 250-1-2 Confederation Life Building, Toronto. The company will in future be represented in Ottawa by Messrs. Cranston and Havey.

◆

CEDARS RAPIDS MANUFACTURING AND POWER COMPANY

The Montreal Power and Shawinigan Companies have offered to their shareholders $8,400,000 of 5 per cent. 40-year first mortgage bonds of the Cedars Rapids Manufacturing and Power Company at 90 with 25 per cent. bonus in common stock.

On February 20th warrants will be sent to the shareholders of both companies specifying the amount of bonds to which each shareholder is entitled to subscribe. Shareholders of both companies are on exactly the same footing so that every shareholder will hold the same number of rights as he has shares. There being no distinction between the two companies the rights will be called "Cedars Rapids Rights."

The following is a table compiled by Messrs. J. and L. M. Wood, of Montreal, showing the number of rights it will be necessary to hold, in order to take up on the above terms the amount of Cedars Rapids bonds and stock set opposite:—

No. Rights.	Par Value Bonds.	No. Shares Stock Bonus.
3 1-3	$ 100	¼
6 2-3	200	½
10	300	¾
13 1-3	400	1
16 2-3	500	1¼
20	600	1½
26 2-3	800	2
30	900	2¼
33 1-3	1,000	2½
66 2-3	2,000	5
100	3,000	7½
133 1-3	4,000	10
166 2-3	5,000	12½
333 1-3	10,000	25

Take, for example, a holder of 25 shares of either Montreal Power or Shawinigan stock. He can either sell his 25 rights or buy or sell sufficient rights to make up an amount in the above table. The same rule will, of course, apply to shareholders having larger or smaller amounts of stock. We will adjust fractions of stock at $60 per share, either buying or selling at that price.

We submit the following table showing what the cost of the bonds will be at a market price of from 1 to 5 for the rights, and taking a fixed cost of 60 for the stock. Transactions having taken place in the stock at prices over 60, we consider this a fair estimate of its present value:—

Cost of Rights.	Cost of Bonds.	Cost of Stock.
1	78 1-3	60
1½	80	60
2	81 2-3	60
2½	83 1-3	60
3	85	60
3½	86 2-3	60
4	88 1-3	60
4½	90	60
5	91 2-3	60

The present market quotation of the rights is 1½-2½.

◆

Twin City Rapid Transit Company.—The earnings on the common stock of the Twin City Rapid Transit Company for 1912, after deducting the seven per cent. preferred dividends and before allowing for the depreciation reserve, were equal to 11.30 per cent. as compared with 10.98 per cent. the year before. In view of the margin over dividend requirements, it has been reported that the six per cent. rate on the common would be increased, but there is official authority for the statement that this will not be done at present, at least.

BANK RATES OF INTEREST

Position of Small Banks—Capital Needed for New Banks—Unit Versus Branch System

Discussing the question of bank rates of interest and discount in the House at Ottawa, Hon. W. T. White, Minister of Finance, said he had not known that loans were made at a rate of interest as high as 12 per cent. "If that is so," said the Minister, "I have no hesitation in saying it appears to me to be extortionate." With regard to the 7 per cent. rate mentioned by members of the House he was told upon making inquiry, that the banks in the new districts compete with each other for business, and in one of the papers he read with regard to the matter he observed the statement that in some places in the West of one hundred or two hundred inhabitants there were two banks competing for business. He was told further that these branch banks require a considerable sum of money at the outset for their establishment, the cost of building, construction, and the expenses of management being large, and some considerable time elapses before a branch bank becomes profitable.

Might Make Law Too Drastic.

A very serious question arose as to whether, if that clause were made too drastic, the banks would open branches in the smaller towns; in other words, whether we might enact legislation that would really defeat itself. That was, he thought, a matter for consideration. The clause limiting the banks to 7 per cent. is in the act; the high rate of interest mentioned seemed to him to be extortionate, and how to meet the situation wisely so that on the one hand all the different sections of the country should receive ample accommodation, and on the other hand that the public should be protected against extortionate rates of interest, was a matter for careful consideration.

Much had been said with regards to small banks. Mr. White had never held the view that the small banks could not render as good a service as the large institutions. He had expressly stated this would depend entirely upon the manager. He did not consider a capital of $250,000 too large to make for success if the banks went into the business of banking and carried it out properly. If they paid no attention for a year or two to the question of what the stock was selling at, and earnestly took up the question of banking, he did not doubt that they would meet with success if they carried on their business properly and realized that they were seriously engaged in the business of banking. As far as the small bank was concerned, he was not in disagreement with the views expressed during the discussion.

Should Have Quarter Million Capital.

With regard to a smaller capital than $250,000, he pointed out that the provision for $250,000 as a minimum was provided after at least one bitter experience concerning a bank incorporated with a much smaller capital in one of the eastern provinces. This institution carried on business for three or four months, when it was closed, bringing disaster upon a number of innocent people. It has generally been considered since this Bank Act was first brought into effect, that $250,000 is the minimum capital with which a bank should engage in business.

A great deal has been said with reference to the comparative merits of the unit and branch systems of banking. Mr. White had no hesitation in saying that the branch system, which follows the English and Scotch systems, was a better one than the unit system. The fluidity of capital—that of gathering up deposits in the farming communities, for instance, where loans could not be made equal to the deposits, and using the funds in the West for the moving of crops or other purposes—was one of the advantages of the branch system.

Unit Versus Branch System.

The unit system, which was in vogue in the United States—that system which is carried on without branches—had many disadvantages. In the United States they had had a series of panics from time to time in which banks had been obliged to suspend cash payments, and, in a such time of distrust or panic, the result was that the people desired to obtain currency, and the small banks throughout the country called upon their New York correspondents for gold. They might have no immediate need of it, but in order to make themselves a little stronger, they felt they would like to get some of their balances back. The result was that from all parts of the country there came these demands upon New York for gold and panicky conditions were set up. That was one of the phenomena of the recent panic in New York. Mr. White thought that the English branch system and the Canadian system, that is the branch system, was a superior system to the unit system. He did not say that it was the last word in banking by any means, but still, as a system, he believed it was superior to the other.

PRODUCTION AND IMPORTATION OF ZINC

British Columbia is Chief Canadian Producer—Tariff Schedule—Consumption Shows Large Increase

The production of zinc ore in Canada in 1911, as obtained by direct returns from the producers, was 2,590 tons valued at $101,072, the greater part being from British Columbia. The zinc content of these shipments was returned as 2,346,849 pounds, which if valued at the average New York price of spelter during the year would be worth $135,132.

The ore shipped from British Columbia contains also a varying silver content, for which payment is made by the smelters and without which on account of the import duty to the United States and the long rail haul, it would not pay to ship. The Richardson, or Long Lake mine, in Olden Township, Frontenac County, Ontario, did not ship during 1911.

The British Columbia shipments were seriously reduced as a result of the destruction of mills, mine buildings, and railway facilities by the forest fires of 1910, there being only two shippers in 1911.

The British Columbia zinc ore is exported for treatment to Kansas and Oklahoma smelters, and since the smelters demand over 30 per cent. zinc, the maximum rate of the United States customs tariff affects Canadian ores.

Canadian Ores Are Affected.

The present schedule of the tariff on zinc is as follows:

Ores containing less than 10 per cent., free of duty. Ores containing 10 per cent. or more, and less than 20 per cent., ¼ cent per pound. Ores containing 20 per cent. or more, and less than 25 per cent., ½ cent per pound. Ores containing 25 per cent. or more, 1 cent per pound.

All rates being based on the metallic contents of the zinc.

The United States smelters usually pay on a basis of 45 per cent. zinc content. The base price varies with the price of spelter at St. Louis, and a stated amount is added or deducted for every unit of zinc in excess of or less than the base. The silver is settled for at the New York price after making deductions for losses in treatment. Limits are frequently set which lead or iron contents may not exceed.

A typical example is given in the report of Mr. Cosmo T. Cartwright, B.Sc., of the Department of Mines. A certain mine was paid $28.50 per short ton for zinc concentrates carrying 45 per cent. zinc, when spelter was quoted at 5 cents per pound at St. Louis. For every unit above or below 45 per cent. zinc 85 cents was added or deducted. For every increase or decrease of one cent per pound in the price of spelter at St. Louis an increase or decrease was allowed of $7 per ton of 2,000 pounds, and proportionately for fractions thereof. In the case of the silver content, six ounces per ton were deducted and 75 per cent. of the remainder paid for at the New York price.

The sellers paid freight, customs duty, and collection charges.

Imports Including Manufactures.

The imports of zinc taken as an index of consumption, show a fairly steady increase. The total imports of zinc in blocks and pigs and spelter were, in 1880, some 744 tons. In 1889 they had risen to 1,427 tons, and remained fairly stationary until about 1899, in which year the imports were 1,213 tons. In the fiscal year ending March, 1909, they had risen to 4,610 tons, and for the calendar year, 1910, they totalled 7,037 tons, in addition to which there were 4,248 tons of zinc white, and zinc manufactures to the value of $21,829.

For the calendar year 1911, the total imports were 7,534 tons, in addition to which there were 4,269 tons of zinc white, and zinc manufactures to the value of $30,862.

CONSIDERATION OF BANK ACT

Consideration of the Bank Act was commenced by the banking and commerce committee this week. Notices were given of various amendments to the proposed act. Among them were amendments that capital stock increases or decreases shall be subject to the Treasury Board. Mr. W. F. Maclean desires revision of the Bank Act more frequently than every ten years. The Finance Minister intimated that he will amend clause 38 dealing with directors' calls upon shareholders. The clause limiting the rate of interest chargeable by a bank to seven per cent. stood over for further discussion.

Mr. Duncan Ross will move an amendment compelling the banks to set aside a certain percentage of assets as a fund for security of deposits. Clause 46 dealing with the sale of shares under execution, stood over.

The number of directors of the Canada Steel Company Limited, has been increased from five to six.

PRODUCTS, TRANSPORTATION AND POSSIBILITIES

Of Pacific Coast Province—New Railway Proposed—Expenditures and Payments

(Staff Correspondence.)

Vancouver, February 15th.

More accommodation for shipping in Vancouver harbor s beginning to appear. As probable included in the esti- ates for the year submitted at Ottawa is the half million entioned some time ago. This will go a long way toward roviding a public wharf, though the project is being opposed y company interests on Burrard Inlet. Then, too, this week s the announcement of the year's appropriations of the Cana- ian Pacific Railway, which include besides terminal facilities he completion of a new way and extension of the Oriental piers t the west end of the docks. The government has dredges here lready, and a considerable amount is to be spent on plant. his means that fairways in the harbors of Vancouver and ictoria will be greatly improved, as well as navigation on the raser. There has been criticism that there has not been ctivity enough, but beginnings are always slow on big pro- ects. Even if some of the dock schemes do not materialize, ailways will find means to effect their shipping.

More definite information is available concerning the rail- ay which it is proposed to run from Bella Coola on the ritish Columbia mainland coast to Hudson's Bay. It looks atisfactory, so far, in so much that those who are behind it ave spent much money in explorations and other preliminary ork.

overnment Guarantees Required.

The idea is to build first from the coast to Smoky River, lta., and then on to Hudson Bay. There is some fine terri- ry east of Bella Coola. It is perhaps the only point along e coast where there is any activity below the Skeena River, nd a fair amount of ranching is already done in the district, nd this, without any facilities of transportation. Not only oes the territory offer opportunities to agriculturists, but ex- llent mineral properties are reported in the vicinity If this ne receives the support of the government, and is construct- l, it will be a principal factor in development of the north. will not infringe on the territory of the Pacific Great astern or that of the Grand Trunk Pacific. Now that other ilways have received governmental guarantee of their onds, those behind the Pacific and Hudson Bay line state at it is necessary if the bonds are to receive buyers in urope. They think, however, that they have good reasons in king for this support of their plans.

Kamloops expects a busy summer. There will be much tivity in construction, on the Canadian Pacific Railway uble-tracking, Canadian Northern Railway main line, and the new power station work at Barrier River which will st $400,000. The expenditure of a large amount of money ll greatly help in the expansion that has been apparent in amloops for some time. Besides there is mining in the ighborhood of the city, and the Manitoba Gypsum Company s acquired gypsum claims at Grande Prairie and will velop them. The Salmon River Land Company is also ecting a sawmill, since not only is building active but the mber trade generally is good.

greement and Purchases Completed.

The appointment of a commissioner to enquire into the al question in British Columbia seems probable. Just what ect his recommendations will have is another question. For me months there have been difficulties at the Canadian llieries, (Dunsmuir) Limited, which has resulted in a very ich smaller output from the mines, and for that reason the ople are feeling the usual coal stringency much tighter.

The bank clearings in Vancouver on February 3rd were e largest for any day, the record being broken by the fact at large moneys were paid over to the Vancouver Breweries mited, being the purchase date of the properties in Van- uver and on Vancouver Island by the English company. is deal was negotiated some time ago, but formal posses- n was not really consummated until February 1st although tails had been settled some time ago.

The agreement between the Canadian Northern Railway d Vancouver has not been carried through the city council thout considerable opposition, one of the aldermen declar- g that the railway company should pay three million dollars cash besides making all the improvements enumerated. spite this, the agreement has been finally decided upon, d will be voted on by ratepayers in another month, when it expected it will be ratified. When the work is completed will mean a vast improvement in the east end of the city, ere the flats at the head of False Creek have ever been an esore.

INTERNATIONAL BANK'S TREASURY CERTIFICATE

Correspondence Respecting the Organization of the Forget Bank Tabled in the House

According to a return of the papers brought down by Honorable W. T. White, Minister of Finance, in the House this week, respecting the organization of La Banque Internationale and the issue of the Treasury Board certificate, the former government delayed the issue of the certificate, leaving the new government to decide the matter. The deposit soon after being made and the Department of Justice having reported that the application complied with the law, authority to do business was given.

The papers first deal with a meeting of provisional directors of the bank held on April 7th, 1911, when the issue of the stock at two and a half per cent. premium was decided on. At another meeting on May 22 of that year a list of shareholders was produced. The principal of these were Sir Rodolphe Forget, who had 2,500 shares; O. B. d'Aoust, per R. Forget, attorney, 10,000 shares; J. N. Greenshields, 2,500; R. Bickerdike, M.P., 500; Edmund Bristol, M.P., 500. Others among the shareholders of prominence were L. P. Pelletier, 200; Arthur Ecrement, ex-M.P., 250; Hon. H. B. Rainville, 200; Albert Sevigny, M.P., 50; Gerald White, M.P., 50; W. B. Nantel, 50. A great many in the hundreds of shareholders were from France.

Deposit With Bank.

May 23rd, 1911, saw a deposit of $250,000 by the bank in the Bank of Montreal. On June 26, directors were elected:—Sir Rodolphe Forget, Sir G. Garneau, R. Bickerdike, M.P., Hon. L. O. Taillon, St. V. Lamothe, George Martin, S. Badel and R. Souther. A 10 per cent. call was decided on and it was agreed to apply for a certificate to do business. Subscription books were forwarded to Ottawa in connection with the application, and H. T. Ross, Assistant Deputy Minister of Finance, then asked the Justice Department as to the legality of issuing a certificate.

Qualification was Questioned.

T. H. Gisborne, Acting Deputy Minister, questioned the stockholding qualification of Mr. Badel, one of the directors.

On July 6th Badel gave power of attorney to Sir Rodolphe Forget to transfer to him 300 shares, and on the 18th Sir Rodolphe reported $686,331 on deposit to the credit of the new bank. The matter next came before the Treasury Board, but no decision was reached on account of the question as to the qualification of Mr. Badel. On August 28th the shareholders met again and re-elected the same board of directors.

Mr. Ross, of the department, then raised the question as to the d'Aoust subscription of $1,000,000 in trust, and pointed out that d'Aoust was the Paris manager for Sir Rodolphe Forget, and that the stock application was on Sir Rodolphe's paper. The point he raised was that the people from whom the trust was held were not disclosed.

Left for Successors.

On September 27th Mr. Fielding and the Treasury Board again considered the application, but left it over for their successors about to take office. They expressed no opinion, but pointed out that the capital subscribed was unusually large, and that of the $9,239,400 subscriptions $7,136,000 was in foreign countries.

Replying to Mr. Ross on October 11th, Deputy Minister Newcombe stated that on the facts presented he saw no reason why the certificate should not be issued. On October 12, 1911, the new board, under Hon. Mr. White, dealt with the application and had before it the opinion of the Justice Department that all was regular and also reports as to the good financial standing of those behind the enterprise. It was decided, however, to make further inquiry as to the million dollars held by d'Aoust in trust.

The next meeting was held on October 16th. On that occasion Sir Rodolphe Forget, the minutes state, submitted a statutory declaration in regard to the d'Aoust subscription and the standing of those behind the bank. The $250,000 deposit being made and the Justice Department reporting the provisions of the law complied with, the board decided to issue the certificate.

BACK COPIES WANTED

A few copies of The Monetary Times of February 8th, 1913, volume 50, No. 6, are required. Subscribers sending copies in will have their subscriptions extended one month free.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Ottawa Light and Power Company.—The annual statement of the Ottawa Light and Power Company for the year ending December 31st will be available in a few days. The statement will show that the company has obtained substantially large earnings from the Ottawa Electric Company and a small increase in those of the Ottawa Gas Company. The earnings will be at the rate of slightly over 15 per cent. on the common stock, as compared with 13.43 last year. The annual meeting of the company will be held on Monday next. It is understood then that the directors will take up the question of an increased dividend in Ottawa Power Stock.

Shredded Wheat Company.—The net earnings of the Shredded Wheat Company for 1912 were $922,000, which, after allowing $75,000 as dividend on the preferred stock, leaves a surplus of $847,000, or at the rate of nearly 10 per cent. on the common stock. Current assets of the company at the end of 1912 were $1,494,531, an increase for the year of $269,000, the amount of cash on hand being approximately $600,000.

The construction of the large new plant at Niagara Falls would be well under way within sixty days, and it would be only a question of a short time when further extension probably on the Pacific Coast, would be necessary, were statements made at the annual meeting.

Rolland Paper Company.—The Rolland Paper Company, Limited, annual statement for the year ended December 31st last shows earnings of $142,934, compared with $80,428 earned in 1911 and $73,854 in 1910. This means that earnings this year have been more than five times the amount required to meet bond interest. During the last half-year the increase in earnings is most noticeable, the latter amounting to $78,070, or nearly as much as the 1911 earnings.

Assets shown by the balance sheet amount to $1,738,868 of which $1,250,902 are fixed and $487,966 are liquid. Surplus of assets over liabilities amounts to $1,513,279.

The company is capitalized at $1,000,000 made up of $500,000 stock and $500,000 six per cent. bonds. All of this has been issued.

Dominion Steel Corporation.—The nail plant of the Dominion Steel Corporation at Sydney is being steadily enlarged and although the company has been making nails on a commercial scale only a few months it is already becoming a large factor in the market.

A galvanizing plant of modern type is in operation. The only thing needed to complete it is the installation of the permanent power which drives it to replace a temporary steam engine.

The company's wire mill is equipped not only to provide wire for the nail mill and galvanizing plant, but wire for sale as well, including wire already drawn to be made into nails. The new annealing department to supply that part of the wire market is being rapidly pushed forward to completion. This will absorb a considerable tonnage.

Consolidated Mining and Smelting Company.—The Consolidated Mining and Smelting Company of Canada, Limited, ore receipts at Trail smelter for the week ending February 1, and from July 1 to date, in tons:—

Company's mines:	Week end of February.	July 1 to date.
Centre Star	2,568	93,835
Le Roi	1,579	27,081
Sullivan	720	17,075
Molly Gibson	128	1,277
St. Eugene	...	801
Richmond-Eureka	...	778
No. 1	...	153
Other mines	1,371	45,643
Balance	6,366	187,543

Trethewey Silver Cobalt Mine, Limited.—The annual report of the Trethewey Silver-Cobalt Mine, Limited, for 1912 shows net profits of $127,834 on the year's business. Gross receipts from ore were $301,086, and value of ore at smelters in transit and at mine is $71,881. Out of net profits a dividend of $100,000 was paid June 15th. Surplus at the end of the year was $178,743, out of which a further dividend of $100,000 was declared in December and paid January 15th.

Total amount of silver shipped in 1912 was 620,923 ounces. Ore reserves at the end of 1912 are estimated by the consulting engineer—positive ore blocked out, 6,413 tons, averaging 28 ounces; 3,825 tons broken ore in stopes, averaging 26 ounces, and 20,934 tons broken ore on surface dumps, averaging 15 ounces, a total of 31,172 tons.

In the estimates of ore reserves no allowance is made for ore not actually blocked out.

The amount spent on development in the year was $50,790, for which a total of 3,885 lineal feet of development and exploratory work was done. The average rate at which development work placed new ore in sight during the last four months was 2,209 tons per month.

Mount Royal Assurance Company.—The annual report of the Mount Royal Assurance Company presents interesting figures showing the growth of the company.

The net premiums, after deducting all rebates and reinsurances, amount to $207,582.87, an increase over the preceding year of $34,698.23. Interest from investments amount to $30,186.11, thus making the total net income $237,768.98, the largest in the company's history. The losses, after making full provision for all outstanding claims, amount to $88,629.33, showing a loss ratio of 42.71 per cent. of the premium income, against 54.39 per cent., for the previous year.

The total net earnings of the company amount to $76,059.17, of which $45,873.06 is from underwriting account, and after adding $24,152.85 to the re-insurance reserve fund, making same $139,832.06 in conformity with the Government standard, and forming a reserve for plate glass of $3,834.98, also in accordance with the requirements of the insurance department, the balance of $48,071.34 has been transferred to the credit of the profit and loss account, which now stands at $168,829.75.

The invested and other funds of the company now amount to $569,560.79 as compared with $517,638.77 at December 31st, 1911.

The reserve fund with the balance at credit of profit and loss now amount to $312,496.79, equal to one and a half years premium income and, with the paid-up capital of $250,000, affords ample security to the insuring public.

The total amount of losses paid since the commencement of the company's operations in 1903, is $874,483.92.

Shawinigan Water and Power Company.—The fifteenth annual meeting of the Shawinigan Water and Power Company was held on Tuesday.

According to the annual report the net revenue was shown at $72,360, to which was added the 1911 balance of $9,771.82, giving a total of $882,131.93.

Gross earnings for 1912 from all sources were $1,569,671.41. Operating and general expenses deducted $207,414.31, giving a balance brought down of $1,362,257.03.

Out of the net revenue was distributed four dividends, totalling $540,000; transferred to reserve, $189,375; transferred to depreciation reserve $103,475. The surplus undistributed was $24,281.93.

By the issuance of $1,000,000 of new stock in October, 1912, at a $120 per share, there was realized $200,000. This premium was carried directly to reserve fund.

The directors draw attention to the present condition of reserve and sinking funds:

In 1908 these aggregated funds stood at	$ 190,000
In 1909 ” ” ”	252,500
In 1910 ” ” ”	342,575
In 1911 ” ” ”	600,000
In 1912 “ “ “	1,000,000

The gross income for 1912 over that of 1911 shows an increase of $349,814.

The net revenue over that of the previous year shows an increase of $249,706.

The average percentage of operation and general expense to gross income has been, for the past five years, on a basis of 10½ per cent. The ratio for the year 1912 is 9.45 per cent.

In December the shareholders authorized the directors to issue an amount of $500,000 of 4½ per cent. debenture stock. Beyond a small portion disposed of previous to December 31st, these securities will be marketed in 1913.

The plant and equipment of the company has been fully maintained at the recognized standard laid down by the directors. The present directors consisting of Messrs. R. M. Aitken, J. E. Aldred, H. S. Holt, Thos. McDougall, John Joyce, Sir Wm. Mackenzie, Sir M. Mitchell-Thomson, D. Murphy, H. Murray, J. C. Smith, W. R. Warren, and E. R. Wood, were re-elected.

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

Redcliff, Alta.—February 9.—Flour mill. Loss, $50,000. Cause unknown.

Westville, N.S.—February 9.—Court house. Loss and cause unknown.

Ellice, Ont.—February 13.—Mr. R. Hannah's barn. Loss, $6,000. Cause unknown.

Comoplix, B.C.—February 1.—Mrs. Gale's residence. Loss and cause unknown.

Smiths Falls, Ont.—February 13.—Mr. F. Banville's residence. Loss and cause unknown.

Lindsay, Ont.—February 13.—Messrs. Spratt and Killens' store. Loss and cause unknown.

Knowlton, Que.—February 18.—Home for Boys and Girls. Loss and cause unknown.

Brantford, Ont.—February 11.—Hampel box factory. Loss slight. Cause, gas stove.

Davis, Sask.—February 12.—Mr. Renzer's farmhouse. Loss, $4,000. Cause unknown.

Warkworth, Ont.—February 16.—Mr. C. Pomeroy's resi-ence. Loss and cause unknown.

Kingston, Ont.—February 11.—279 Sydenham Street. Loss slight. Cause, overheated pipe.

Cranbrook, B.C.—February 2.—Cranbrook "Prospector" ffice. Loss slight. Cause unknown.

Beebe, Que.—February 12.—Mr. F. Elie's residence. Loss unknown. Cause, overheated stove.

Chatham, Ont.—February 16.—Park & Company's store, King Street. Loss and cause unknown.

Sackville, N.B.—February 10.—Mr. D. Wheaton's residence, Midgic. Loss and cause unknown.

Wadena, Sask.—January 30.—Skating Rink. Loss, $5,000. Insurance, $3,000. Cause unknown.

Haileybury, Ont.—February 17.—Kahle block. Loss, $7,000. Insurance, $6,800. Cause unknown.

Woodstock, Ont.—February 12.—Bank of Commence building. Loss slight. Cause, overheated pipe.

Moose Jaw, Sask.—February 3.—Canadian Pacific Railway freight sheds. Loss, $350. Cause, heater.

Sheguindah, Ont.—February 12.—Messrs. Ferguson and Armstrong's store. Loss and cause unknown.

Yarmouth, N.S.—February 13.—Rear Mr. G. Robicheau's esidence, Water Street. Loss and cause unknown.

Elgin, N.B.—February 9.—Sussex Mercantile Company's tore. Loss, $20,000. Insured. Cause unknown.

Kingsey, Que.—February 12.—Mr. T. Rivard's residence. Loss unknown, includes $50 cash. Origin unknown.

North Bay, Ont.—February 9.—Mr. J. G. Crew's boat works. Loss, $1,800. No insurance. Cause unknown.

Truro, N.S.—February 14.—First Presbyterian Church. Loss unknown. Insurance, $12,000. Cause unknown.

Lynn Valley, B.C.—February 4.—Mr. Jermynn, residence, Peter and Henderson Roads. Loss, $2,000. Cause unknown.

Walkerton, Ont.—February 8.—Mr. A. Bell's residence, owned by Dr. Stalker, Greenock. Loss and cause unknown.

Dorchester, N.B.—February 9.—Residence occupied by Messrs. Belleveau and Hamilton. Loss, $2,000. Cause, unknown.

Richmond, Que.—February 11.—Mr. P. Viger, residence, Upper Main Street. Loss, $1,000. Insurance, $500. Cause unknown.

Peterborough, Ont.—February 12.—Mr. J. O'Neil's residence, Lock and Crescent Streets. . Loss, building, $250; contents, $200. Cause, overheated stove.

Hebron, N.S.—February 13.—Mr. J. M. Perry's residence. Loss, $1,500. Insurance, $1,200. Mr. Perry had two previous losses by fire. Cause, supposed chimney.

Brigden, Ont.—February 12.—Block owned by Mr. R. J. Nicholson; Mr. J. H. Lawson's saddlery store; Mr. Hadden's photo gallery, etc. Loss unknown. Cause, furnace.

Calgary, Alta.—February 8.—Duncan apartments, 25th and 4th Streets. Loss, $50. Cause, spontaneous combustion. Mr. C. A. Sheppard's garage, Elbow Park. Loss, $150. Cause, lighted match.

Ottawa, Ont.—February 12.—Mr. A. E. Kelly's stable, Florence and Lyon Streets. Loss, $1,200. Cause unknown.

February 14.—Scholasticate of the Oblate Fathers. Loss, $20,000. Cause unknown. One death.

Hamilton, Ont.—February 10.—44 Magill Street. Loss, $75. Cause, lighted match. Rear 286 Charlton Avenue. Loss slight. Cause, hot ashes.

February 14.—Messrs. J. J. Smith & Sons' planing mill, Sherman Avenue. Loss, $10,000. Cause, unknown.

Winnipeg, Man.—February 8.—Canadian Pacific Railway box car. Loss unknown. Cause, stove.

February 10.—Mr. M. Dorfmann's store,. 266 Power Street. Loss, $700. Cause, overheated stove.

February 13.—Store, 465 Alexander Avenue. Loss and cause unknown.

Elk Lake, Ont.—February 15.—Conflagration. Losses: Mr. A. Ribble, Matabanick Hotel, $15,000, insurance $10,500; Gowganda Trading Company, $3,000, insurance $500; Lang, Jodouin Company (E. R. Clarkson liquidator), $4,000; Hudson Bay Company, building and stock, $15,000; Charles Fung, restaurant, $500; J. R. Booth, branch office, $200; A. M. Daniels, D.C. clerk, $500. Cause unknown.

St. John, N.B.—February 7.—McLean Holt foundry and A. G. Edgecombe carriage factory. Insurance, McLean, $2,700, amongst Sun Commercial Companies; Edgecombe, $2,000 Dominion, $1,500 Commercial Union, $1,000 British Crown. Cause unknown.

February 10.—Morrow's book store, garden Street. Loss and cause unknown.

February 12.—Federal dredge. Loss and cause unknown.

Montreal, Que.—February 6.—Mr. Labonte, 661 Ontario Street, and Mr. Morin, 659 Ontario Street. Loss, $2,000. Cause unknown.

February 12.—459 St. James Street. Loss slight. Cause, workman accidentally set paper alight.

February 12.—653 Defleurimont Street. Loss, $4,000. Cause unknown.

February 13.—Canadian Rubber Company. Loss, $50,000. Cause, belt friction.

New Westminster, B.C.—February 6.—Mr. S. H. Thompson's motor. Loss, $75. Insurance, $8,000. Cause, switch left on.

February 7.—Westminster Nail Company. Loss, building, $500. Insurance, $500. Cause unknown. Carmon Hall. Loss, building, $2,000; contents, $1,500. Insurance, building, $2,000; contents, $1,000. Cause unknown.

February 8.—Mr. A. Bell's dwelling, Royal Avenue. Loss, $1,000. Insurance, $1,500. Cause, stove pipe.

Fort William, Ont.—February 7.—Canadian Pacific Railway shanty. Loss, $100. Cause, overheated stove.

February 8.—Mr. C. Marcells' residence, 605 Catherine Street. Loss, building, $100; contents, $125. Insurance, stock, $1,000. Cause, defective electric heater.

February 10.—Mr. J. Jugowitz, 630 Prince Arthur Boulevard. Loss, building, $200; contents, $80. No insurance. Cause, defective stove pipe.

February 11.—Gordon, Ironsides & Fare's cold storage. Loss slight. Cause, defective construction around steam pipe.

February 12.—Italian church. Loss slight. Cause, defect in heating apparatus.

Victoria, B.C.—February 7.—Empress Theatre. Loss, $2,500. Cause, defective chimney. Insurance was carried to the amount of $16,000 on the building in the following companies: St. Paul, $2,500; Norwich Union, $2,500; Phœnix of Hartford, $3,000; National of Hartford, $2,000; Queen's, $3,000; Michigan Commercial, $3,000. Insurance on the fixtures to the amount of $2,000 was carried with the National of Hartford. British Columbia Land & Investment Company's block. Loss, $3,000. Cause unknown. The insurance carried was: Ferdinand Quinker, $3,500 in the Liverpool, London and Globe and Manitoba Fire; J. Cochrane, druggist, $7,500 in the Phœnix, Western and Norwich Union; J. L. Forrester, $4,000 in the Phœnix and $4,000 in the Northwestern Mutual; R. A. Brown & Company, $1,000 in the Liverpool, London and Globe, and $4,000 in the British American. The owners of the building carried $20,000 insurance in the Phœnix of London.

Toronto, Ont.—February 11.—189 Bleecker Street. Loss, $5. Cause, dropped candle. Grand Trunk Railway Company, Pulman car. Loss, $1,000. Cause unknown.

February 12.—Mr. W. J. Laing's greenhouse, Mount Pleasant Road and Broadway Avenue, North Toronto. Loss, $1,200. Cause, unknown. Mr. A. Graham's store, 3 McCaul Street. Loss, $75. Cause unknown. 835 King Street West. Loss slight. Cause unknown. 10 Meredith Crescent. Loss, $75. Cause unknown. 31 Brooklyn Avenue. Loss, building, $400; contents, $60. Insured. Cause, overheated furnace. 68 Northcote Street. Loss, $100. Cause, gas leak.

February 13.—Store, 397-9 Queen Street West. Loss, $650. Cause unknown.

February 14.—Grand Trunk Railway shed, Front and Simcoe Streets. Loss, $100. Cause, overheated oil stove.

February 16.—Stable owned by Mr. J. J. Honan, 125 Jarvis Street. Loss and cause unknown. Mr. H. Pearson, 415 Woodbine Avenue. Lost six horses.

February 17.—Mr. C. H. Wilson's residence, 8 Beaumont Road. Loss, $1,200. Cause, supposed electric heater.

February 18.—154 King Street East. Occupants and losses: Main floor, C. P. Godden, hardware supplies, $2,000; second floor, Shepperd & Son, harness supplies, $700; third floor, John Carey, boots and shoes, $500, and the Commercial Trunk and Sample Case Company, $800. The damage to the building, which is owned by the Brooke estate, was placed at $1,000. Cause unknown. 269 Victoria Street. Loss slight. Cause, children playing with candle.

WORKMEN'S COMPENSATION IN ONTARIO

Suggested Classification of Industries — Will Assess Through a Government Commission

The proposal of Sir William Meredith, the Ontario Government commissioner on workmen's compensation, is to group all the industries of the province and to assess through a government commission, on each group a rate upon the payroll sufficient to compensate all industrial accidents in the group.

The Canadian Manufacturers' Association has been asked by Sir William Meredith, to submit a plan of classification and there is reason to believe that any plan submitted will be adopted with little variation. The classification does not determine the rate. There may be several rates in the same class. For instance, in Class 3 the rate for upholstering may be only one-half or one-third the rate for an ordinary furniture factory. But in general the rate, being assessed on the whole group, will rise or fall with the number of accidents in the group. The object of grouping is to provide what will be practically a mutual insurance amongst allied industries. It is anticipated that voluntary organizations corresponding with the different groups will ultimately be formed to carry on activities in the prevention of accidents, thus reducing the rates.

Classification of Industries.

The following is the classification of industries suggested by the Canadian Manufacturers' Association:—

Class 1.—Lumbering; logging, river-driving, rafting, booming; saw-mills, shingle-mills, lath-mills; manufacture of veneer, excelsior; manufacture of staves, spokes, heading.

Class 2.—Pulp and paper mills.

Class 3.—Manufacture of furniture, interior woodwork; organs, pianos, piano actions; canoes, small boats; coffins; wicker and rattan ware; upholstering, mattresses, bedsprings.

Class 4.—Planing mills, sash and door factories, manufacture of wooden and corrugated paper boxes, cheese boxes; mouldings, window and door screens, window shades, carpet sweepers, wooden toys, articles and wares; baskets.

Class 5.—Mining; reduction of ores and smelting; preparation of metals and minerals.

Class 6.—Quarries; sand, clay, shale and gravel pits, lime kilns; manufacture of brick, tile, terra-cotta, fireproofing, paving blocks; manufacture of cement, asphalt and paving material.

(Differential for blasting).

Class 7.—Manufacture of glass and glass products; glassware, porcelain; pottery.

Steel and Iron Manufacture.

Class 8.—Iron, steel and metal foundries; rolling-mills; casting, forging and manufacture of heavy engines, locomotives, machinery, safes, anchors, cables, rails, shafting, wires, tubing, pipes, sheet metal, boilers, furnaces, stoves; structural steel, iron and metal.

Class 9.—Car shops.

Class 10.—Metal wares; manufacture of small castings and forgings; metal ware, instruments, utensils and articles; hardware, nails, wire goods, screens, bolts; metal beds; sanitary, water, gas and electric fixtures; light machines, typewriters, cash registers, adding machines; carriage mountings; bicycles, metal toys; tools, cutlery, instruments; sheet metal products; buttons of metal, ivory, pearl, horn.

(Differentials for stamping machines, punch presses and power hammers).

Class 11.—Manufacture of agriculture implements; threshing machines, traction engines, wagons, carriages, sleighs and vehicles; automobiles; motor trucks; toy wagons and sleighs, baby carriages.

Chemicals and Colors, Etc.

Class 12.—Manufacture of gold and silverware, plated ware, watches. watch-cases, clocks, jewellery, musical instruments.

Class 13.—Manufacture of chemicals and explosives; corrosive acids and salts; ammonia, calcium carbide; gasoline, petroleum and petroleum products; celluloid, gas, charcoal; artificial ice; gunpowder, ammunition.

Class 14.—Manufacture of paint, color, varnish, oil, japans, turpentine, printing ink, printers' rollers; tar; tarred, pitched and asphalted paper.

Class 15.—Distilleries and breweries; manufacture of spirituous and malt liquors, alcohol; wines, vinegar; mineral water, soda waters.

Class 16.—Manufacture of non-hazardous chemicals; drugs, medicines; dyes; extracts; pharmaceutical and toilet preparations; soaps, candles; perfumes; non-corrosive acids and chemical preparations; shoe-blacking, polish.

Class 17.—Milling; manufacture of cereals; cattle foods, warehousing and handling of grain; operation of grain elevators.

Class 18.—Packing houses, abattoirs, manufacture and preparation of meats and meat products; glue.

Class 19.—Tanneries.

Class 20.—Manufacture of leather goods and products; belting; saddlery, harness; trunks, valises; boots, shoes, gloves; umbrellas; rubber goods, rubber shoes, tubing, tires, hose.

Class 21.—Manufacture of dairy products; butter, cheese, condensed milk and cream.

Class 22.—Canning and preparation of fruit, vegetables, fish and food stuffs; pickle factories; sugar refineries.

Class 23.—Bakeries; manufacture of biscuits and confectionery; spices, condiments.

Class 24.—Tobacco, cigars, cigarettes and tobacco products.

Class 25.—Cordage; ropes; fibre; brooms, brushes; work in manilla and hemp.

Class 26.—Manufacture of textiles, fabrics, spinning, weaving, knitting; manufacture of yarn, thread, hosiery, cloth, blankets; carpets; canvas; bags, belting, shoddy; felt, flax mills.

Class 27.—Manufacture of men's and women's clothing; whitewear; shirts, collars, corsets, hats and caps; furs, robes.

Class 28.—Laundries (power); dyeing, cleaning and bleaching.

Class 29.—Printing; photo-engraving; engraving, lithographing, embossing; manufacture of stationery, paper and cardboard boxes; bags; wall-paper; book-binding.

Constructional Divisions and Classes.

Class 30.—Heavy teaming, drayage and cartage; safemoving and moving of boilers, heavy machinery; building stone and the like; warehousing storage.

Class 31.—Stone-cutting and dressing; marble works; manufacture of artificial stone.

Class 32.—Steel building and bridge construction; installation of elevators, fire-escapes; installation of boilers, engines and heavy machinery.

Class 33.—Brick-laying, mason work, stone-setting, concrete work, plastering; manufacture of concrete blocks.

Class 34.—Structural carpentry.

Class 35.—Painting, decorating and renovating; sheet metal work; roofing.

Class 36.—Plumbers, sanitary and heating engineers, operators of passenger and freight elevators, theatre stage and moving picture operators.

Class 37.—Sewer construction, deep excavation, tunnelling, shaft-sinking, well-digging.

(Differential for blasting).

Public Utilities and Development.

Class 38.—Construction, installation and operation of electric power lines and appliances, power transmission.

Class 39.—Telephone and telegraph, construction and operation.

Class 40.—Road-making and repair of old roads with machinery.

Class 41.—Railroad construction.

(Differential for blasting, etc.)

Class 42.—Steam railroad operation.

Class 43.—Electric railroad operation.

Class 44.—Shipbuilding.

Class 45.—Navigation.

Class 46.—Dredging, sub-aqueous construction, piledriving.

◆

EDMONTON DEBENTURES SOLD

Fifty thousand dollars of Edmonton debentures bearing five per cent. have been sold by the Imperial Bank at 96 net, and the bank is requesting the privilege of selling the remainder of the million and a quarter issue at 96 net for five per cent. and a corresponding figure for the four and a half per cent. debentures.

◆

The Wallace Realty Company, Limited, has increased its capital stock from $100,000 to $500,000.

The capital stock of the Barrie Tanning Company, Limited, has been increased from $100,000 to $300,000.

The number of directors of the Calgary Clay, Coal and Coke Company, Limited, Calgary, has been increased from three to five.

The name of the National Weekly Indemnity Company has been changed to the Merchants' and Employers' Guarantee and Accident Company.

MANY BRITISH HOLDERS OF UNION LIFE STOCK

nterlocking of Union and Home Life Directorates—What is to be the Company's Policy Regarding Amalgamation?

Late in 1911 the control of the Home Life Association Canada passed to the Union Life Assurance Company. r. H. Pollman Evans, president of the latter company, be- ame also president of the former. Messrs. W. H. Carrie d Harry Symons, K.C., G. E. Millichamp, and Lieutenant-olonel G. E. Allan Jones, directors of the Union Life, are so directors of the Home Life. There is, therefore, a close terlocking of the directorates, and it seems apparent that e policy of the Home Life Association is dictated by the nion Life interests.

It was stated more than a year ago that an amalgama- on of the two companies would probably take place. Al- ough the change of control occurred about September, 911, the amalgamation has not yet been consummated. No fficial announcement has been made as to the policy in re- ard to this matter, and the lengthy silence in that direction as caused some comment. The position of the Union Life as analyzed in a recent issue of The Monetary Times. It ould appear to be in the interests generally of shareholders, olicyholders and the public to know the proposals of Mr. . P. Evans and his associates.

ow the Stock is Held.

The stock held by the directors of the Home Life As- ociation as at December 31st, 1911, was as follows:—

Name of director.	Amount subscribed.	Amount paid in cash.
H. P. Evans	$ 2,500	$ 500
H. P. Evans and H. Symons (trustees)	578,800	131,830
G. E. Millichamp	2,500	500
H. Symons	2,500	500
W. H. Carrie	2,500	500
J. M. McCutcheon	2,500	500
Lieut.-Col. Jones	2,500	500

Messrs. C. Turnbull, J. W. Lyon and D. D. Broadfoot ere directors of the Home Life Association as at February 5, 1912. Their names, however, do not appear as share- olders of the company as at December 31, 1911.

nion Life Directors.

The following table gives similar details respecting the nion Life Assurance Company:—

Name of director.	Amount subscribed.	Amount paid in cash.
H. P. Evans	$2,500	$2,500
W. H. Carrie	2,500	250
Lieutenant-Colonel Jones	2,500	250
C. J. Harvey	2,500	250
F. G. Hughes	2,500	250
H. Symons	2,500	250

The National Agency Company, of Toronto, holds 982,500 of the stock of the Union Life Assurance Company, n which $98,250 is reported to have been paid.

ntroduction of British Capital.

An interesting change in the complexion of the list of hareholders of the Union Life has occurred during recent ears. On December 31st, 1907, the following were the only hareholders of the company:—

Name.	Amount subscribed.	Amount paid up in cash.
W. H. Carrie	$ 2,500	$ 250
H. Pollman Evans	2,500	250
Charles J. Harvey, F.I.A.	2,500	250
F. G. Hughes, L.D.S.	2,500	250
G. E. Allen Jones	2,500	250
G. E. Millichamp, M.B.	2,500	250
National Agency Co., Ltd.	982,500	98,250
Harry Symons, K.C.	2,500	250
	$1,000,000	$100,000

At the end of December, 1911, the amount subscribed ad increased to $1,645,200, the amount paid up being $745,- 00. The shareholders of 1907 still appear as shareholders f the same amounts as held at the end of 1911. The ad- litional amount subscribed, namely $645,200, has practically ll been subscribed by British investors, and in practically very case, they not only subscribed to stock, but also paid p in full. Has their 1913 guaranteed dividend been paid?

The holding of the National Agency Company places the control of the Union Life with that company. According to the eleventh annual report of the National Agency for the year ended December 31st, 1910, the president is Mr. H. Symons, the vice-president Mr. F. G. Hughes, while Mr. H. P. Evans, Lieutenant-Colonel Jones, and Mr. G. E. Millichamp are among the directors.

◆

WESTERN COMMERCE

Retail and Wholesale Trade Conditions—New Western Mortgage Company—Winnipeg Stock Exchange

Monetary Times Office,
Winnipeg, February 18th.

Business men from all parts of the west were in the city during Bonspiel week. They take this opportunity of placing orders, and attending to other business with their wholesale houses, who report active trade. Local retailers also report an improvement in trade.

The wholesale hardware houses report a fairly active demand for spring lines. Retail trade is quiet, but merchants throughout the country are preparing for the opening of spring business. Winnipeg jobbers are confident that there will be a brisk call for builders' supplies as soon as the winter is over.

The industrial commissioner is receiving many inquiries for information regarding the industrial outlook from eastern and southern manufacturers. Mr. Roland predicts great industrial activity in the spring.

New Western Mortgage Company.

Winnipeg is to be the headquarters of a new mortgage and investment company, to be known as the Canada National Mortgage and Investment Company. The compay was incorporated on January 11th, 1913, and since then the work of organization has proceeded. The capitalization allowed under provincial charter is $500,000, and of this $226,500 has already been subscribed locally. Negotiations are under way to have $250,000 underwritten in the old country as preferred stock, and the balance of $100,000 is now being placed in the Canadian West, a premium of ten per cent. being asked. Of all stock sold so far twenty per cent. has been paid in cash.

The company purposes dealing largely in mortgages and agreements of sale, and to some extent in good central revenue-bearing city property. The provisional board of directors is as follows:—President, Mr. L. E. Mackenzie, member of the firm of Mackenzie and Banning, real estate agents; vice-president, Mr. Peter H. Ross; third vice-president, Mr. J. Robinson, of Robinson and Company; secretary-treasurer, Mr. A. F. Mackenzie, president Western Canadian Construction Company; Mr. A. W. G. Vassar, C.E., retired; and Mr. Herbert H. Graham, barrister. The solicitor is Mr. Herbert H. Graham; and the bankers, the Imperial Bank of Canada.

Winnepeg Stock Exchange.

Trading on the Winnipeg Stock Exchange has been generally quiet recently, although several transactions were put through on some days. A few days ago Standard Trust touched the bid of 200, but no stock was offered. This is a new record for the company. Last week South African warrants were asked for, and $800 was bid. It is said there was none to be had.

Northern Crown has been fairly active lately at prices ranging from 97½ to 98½. Several shares changed hands at 97½. Home Investment and savings has been in some demand at 135, but none could be had at less than 140. Great West Permanent sold last week at 124½. Previous to that bids were weaker, although the stock was held at 125. Union Bank has been strong at 151 bid and 153 asked.

Lucky Jim mining shares have reached a new low level, and a few days ago 10,000 were transferred at 12. Following this some was disposed of at 10, and 1,000 sold at 8¾.

◆

MORE FOR THE UNDERWRITERS

Eighty per cent. of the recent issue of New Zealand £3,000,000 four per cent. loan in London has been left on the underwriters' hands.

◆

The Beaver Fire Insurance Company will apply for a Dominion charter. Messrs. Munson, Allan, Laird & Davis, Winnipeg, are solicitors for the applicants.

Sir Edmund Osler and Mr. H. V. Meredith were elected the Canadian directors on the board of the Mackay Companies at the companies' annual meeting.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED

Abbotsford, B.C.—December 28.—Mr. H. Alanson's hardware store. Loss $9,000. Insurance, $1,500 Hudson Bay, $1,000 Canadian Phoenix, $1,000 Equity. Cause unknown.

Ruby Creek, B.C.—Mr. J. Laidlaw's granary and root house. Loss, building, $215; contents, $290. Cause, smoking. Insurance, $500, London and Lancashire. Adjusted by J. S. Rankin, Vancouver.

CANADA'S STAKE IN MEXICO

Millions of British Money in the Republic is under Canadian Supervision. Trade with the Mexicans.

Canada has considerable interest in the revolution in the republic of Mexico Within forty-eight hours' railroad journey, serious disturbances are placing in some jeopardy the enterprises of British and foreign capital, many of them being under the supervision of Canadian financiers. For many years, transportation, light and power companies, backed by Canadian men, enterprise and charters, have been operating in the republic. Several new companies of a similar nature have recently been chartered by the Canadian government. The result is that about $200,000,000 of British capital have been diverted to Mexico by Canadian companies. In addition, two of our banks have branches in the republic. Even if the revolution does not seriously affect existing undertakings in Mexico, the inflow of foreign capital naturally will cease entirely until better or complete order is restored.

Canadian Enterprise in Mexico.

Many Toronto men, in addition to Sir William Mackenzie and Sir Donald Mann, are interested in the Canadian companies operating in Mexico and the South. These include Messrs. Miller Lash, Walter Gow, Z. A. Lash, E. R. Wood, S. J. Moore, D. B. Hanna, Sir Edmund Walker, F. Nichols, Hon. G. A. Cox, Sir Henry Pellatt, J. H. Plummer, Edmund Bristol, and T. H. Kilgore. Several Montreal men are also associated with the same and other undertakings, including Sir William Van Horne, E. B. Greenshields, Sir Rodolphe Forget, E. Hanson, and Hon. C. J. Doherty. There are also directors in London, New York, Paris, Brussels, and Rio de Janeiro. The directorate of the Pachuca Light and Power Company, controlled by the Mexican Light and Power, is entirely made up of residents of Mexico.

Big bond and stock capitalization is a feature of these companies. The details may be summarized as follows:—

Authorized stock and bonds	$301,600,000
Issued stock and bonds	240,080,900

There is a noticeable interlocking of the Mexican companies. The Mexican Light and Power, for instance, guarantees the payment of the principal and interest of the Mexican Electric's bond issue. The second mortgage bonds of the Mexican Light and Power are all held by the Mexico Tramways Company. The principal and interest of the Pachuca Light and Power Company's bond issue are unconditionally guaranteed by the Mexican Light and Power Company.

Republic's Trade Position.

Notwithstanding the disturbed political conditions which have continued to exist in Mexico during the past year, with their attendant interruptions to traffic and general business, Sir Edmund Walker recently pointed out that the country's foreign trade returns reflect activity. For the fiscal year ended in June, 1912, the exports reached $208,000,000 (Mexican currency), an advance of $4,000,000. The imports, which are given as $182,660,000 for the year, show a decrease of $23,000,000 (or 11.28 per cent.), and are $50,000,000 less than the record figures of 1906-7. This is a natural condition under the circumstances, especially as the decline is largely confined to articles of luxury and wearing apparel.

In considering the export figures it must be borne in mind that while they are satisfactory under existing conditions, the favorable showing is due largely to the phenomenal rise during the year in the prices of metals, which form the country's chief item of export, amounting last year to $186,000,000 out of a total of $298,000,000, or 62.41 per cent. of the whole. For example, it is estimated that the production of silver and copper, which are the metals most largely exported (apart from gold, the exports of which were last year valued at $50,000,000) has declined since January last by about 10 and 20 per cent., respectively, while the relative prices have advanced during tthe same period by 20 and 40 per cent. Lead, too, which comes next on the list, has increased in price during the year from £15 to £21 per ton, while the reduction in output is about 20 per cent. In all instances, therefore, these figures leave a substantial improvement in the value of the output in the face of a curtailed production.

The advances in the price of copper, lead and zinc are natural reflections of increased activity in manufacturing, etc., but with silver the situation is different, and, since Mexico is the largest silver-producing country in the world (contributing in the year 1911—87,000,000 ounces out of the reported total world production of 251,000,000 ounces—a trifle over 34 per cent.), she has a vital interest in the always fickle market for this commodity. It is a question how long the prices now ruling for this metal can be maintained, and, figuring on the present annual production of about 70,000,000 ounces in Mexico, a drop to the price level of three years ago would mean a difference of about 15,000,000 pesos to the country.

Big Oil Industry.

The oil industry is rapidly developing in Mexico, and this has now begun to assume proportions of such magnitude and is destined to be so far-reaching in its effects on the world's commerce generally that it is worthy of closer attention.

The total investment in this industry is now upwards of $80,000,000 gold, and its development has practically all taken place within the last five or six years. Broadly speaking, the petroliferous zone has been found to extend for 250 miles along the Gulf coast and fifty miles inland (12,500 square miles), with the port of Tampico near the centre. The present production (though many wells have been closed after testing, pending the development of transportation facilities) is conservatively stated at 214,000 barrels, of forty-two gallons each, per diem. Not 10 per cent. of the wells drilled have failed to show oil, and the average yield per well is 2,000 barrels per day, as against 42.56 barrels in California, which is the largest of the United States oil fields. It is true that the average yield is greatly increased by the production of a few very large wells, but these latter are situated many miles apart with innumerable "strikes" between, so that this average will probably be maintained as development progresses.

World's Total Production.

The world's total production in 1911 was 345,000,000 barrels of forty-two gallons, or 53,000,000 tons. The present potential production in Mexico is 78,110,000 barrels, and this from not more than a hundred wells. According to the latest figures to hand, Mexico has jumped from a production of 1.02 per cent. of the word's total in 1910 to a potential production during the present year equal to over 22½ per cent. of the total for 1911. This is second only to that of the United States and 8,000,000 barrels more than Russia produced in 1910. In accomplishing this less than 1 per cent. of the proven oil area has been prospected, and the country has only to increase its production threefold to become the largest producer in the world, a position which, with the same success as has been experienced in the past two years, she may very speedily attain, and even then not have tapped one-twentieth of her petroliferous zone.

The chief difficulty in the way of this development lies in the lack of transportation facilities. The total number of oil tankers registered at Lloyds is below three hundred, whereas, allowing for the present ratio of increase, it is estimated that it will soon take three times that number to transport the oil supply of the Gulf coast alone. In anticipation of this most of the shipyards in Europe are congested with tankers under construction.

Trade With Canada.

The principal articles exported by Canada to Mexico last year were as follow: Breadstuffs, $201,082; coal, coke, etc., $159,345; drugs, etc., $10,405; gunpowder and other explosives, $6,781; jewellery, $1,853; metals etc., $40,168; paper, $16,006; spirits, etc., $16,498; wood, etc., $22,436. The total exports are $495,495.

The principal articles imported from Mexico by Canada last year were: Asphalt, $30,309; coffee, $83,941; chicle or Sappato gum, crude, $208,700; hemp, dressed or undressed, $29,705; oranges and shaddocks or grape fruit, $10,662; manilla grass, $566,807; hides and skins other than fur, $33,139. The total imports are $1,009,717, of which $15,045 are dutiable and $994,672 are free.

Revolution Is a Habit.

The revolutionary state of Mexico, as The Monetary Times has previously pointed out, is practically the normal. The period of President Diaz, during which peace was fairly well preserved, was abnormal. Diaz held the presidential reins for thirty years. In 1911, although his position seemed particularly secure, he was overthrown, partly by armed force and partly by public opinion. While Diaz has the reputation of a strong ruler there were defects in his qualities. The strength of the former president was largely concentrated in the attraction of foreign capital to Mexico. Franchises granted to Canadian, United States, English and other capitalists were well protected, and little or no fear existed for the safety of their properties. Devoting most attention in this and other ways to the upbuilding and development of Mexico, Diaz naturally enough became known as the friend of the capitalists. He neglected the general welfare of the Mexican people, and did very little to improve social and educational facilities. Discontent arising, the long reign of President Diaz terminated abruptly.

De la Barra then became provisional president, and was in due time succeeded by Madero, who was defeated by the revolutionaries this week. Apparently he took presidential office with the idea that the Mexican nation, a large proportion of which are Indians, could be governed by love, good-will and nothing more strenuous. The vital necessity of a strong army was overlooked, with the result that the revolution gradually assumed considerable proportions.

Standard of Living.

The Mexican army has been strengthened, probably due to the influence of Madero, the Minister of Finance, and cousin of the president. The army was said to be working harmoniously with the government, a novelty for Mexico. The president's cousin is impressed with the knowledge that the maintenance of law and order is of prime importance. Little damage to property until recently had been done by the rebels, who confined their attentions to warfare. The Finance Minister, however, has fallen with the rest, having been arrested this week.

The standard of living in Mexico is extremely low. The average Mexican is content with low wages, an abode, the only solid part of which is the roof, and poor food, eaten not at regular intervals, but only when hunger demands. The Indian in Mexico works only enough days each week to satisfy his wants. This is due to a care-free spirit rather than to sheer indolence. This, generally speaking, is the picture of the masses of Mexico, rich in natural resources and an ideal climate. The Mexicans have arts of their own, and are expert leather workers.

Makings of a Nation.

In short, in Mexico are the makings of a splendid nation. Diaz, as president, was unbalanced. De la Barra, provisional president, has stood in the background, an enigma. Madero, the president, does not possess the iron hand or the resourcefulness necessary to govern. General Diaz, leading the rebels, will try and prove it by arms.

Mexico's need is a well-balanced, strong man as head of the country, working in partnership with an able cabinet and a powerful military body. The object in view should be the raising of the living standard in Mexico; the education of the people; the encouragement of arts, manufacture and commerce; the maintenance of order; the attraction of capital. Well-informed men assert that such a government for Mexico cannot be found. It should not be impossible. The hour should find the men.

Madero, the president's cousin, is a strong man. As Minister of Finance, he has maintained the reputation of Mexican finance, which has been one of the few outstanding points of strength in the country. The national finances are in good condition, and the exports exceed the imports. But the latest revolution seems to have overwhelmed his opportunity.

THE ONTARIO LOAN AND DEBENTURE COMPANY

Not the least satisfactory feature of the forty-second annual report of the Ontario Loan and Debenture Company was the large increase in profits derived from the operations of the past year. They amounted to $238,543. Adding to that $42,332, there was a total of $280,875 for disposal. Dividends at the rate of 8 per cent. per annum absorbed $140,000 of that sum, and, following the wisely conservative policy of the company, $100,000 was transferred to the reserve fund. That account now stands at $1,450,000 as compared with paid-up capital stock of $1,750,000. There was a balance of $40,875 carried forward.

The revenue account shows that the interest earned on mortgages, rents, etc., for the past year totalled $480,691. Interest was paid on sterling debentures to the amount of $75,320; on currency debentures, $60,188; and on deposits, $38,534. The expenses of management were $32,082. Shareholders received dividends of 8 per cent. for the year.

The assets of the company are principally in mortgages, etc., on real estate. These stand at a net sum of $7,473,235. Municipal debentures and stocks amounting to $137,128 are owned, and the freehold office premises are valued at $69,000. Cash with banks totals $116,837.

Mr. J. McClary, president of the company, reported that increased immigration, a bountiful harvest and the general development of the business of Canada continue to maintain a strong demand for money. The funds of the company have been fully employed at remunerative rates, with an excellent class of first mortgage securities readily obtainable. Under the care of the representatives in Edinburgh, the sterling debentures continue to enjoy the confidence of discriminating investors in Great Britain, as indicated by increased amounts being invested therein. The Ontario Loan and Debenture Company is making good progress under its directorate and the prudent and progressive management of Mr. A. M. Smart."

WILL NOT TAKE OVER QUEBEC RAILWAY

A Montreal despatch states that a new corporation, in which Sir William Mackenzie, president, and Sir Donald Mann, vice-president of the Canadian Northern Railway, are interested, has been formed to take over the whole group of utilities forming what is known as the Quebec merger, in the city and district of Quebec. These include the Quebec Railway, the Quebec Light, Heat and Power Company, the Quebec and Saguenay Railway, and the Quebec, Montmorency and Charlevoix Railway. Under the new arrangement, it was said, Sir Rodolphe Forget ceased to control the group.

Sir William Mackenzie, shown this despatch by The Monetary Times, said: "There is nothing in it. We do not intend to take over the Quebec Railway."

NEW BOND COMPANY

Better to handle their growing investment business, which has made rapid strides during the past ten years, Messrs. Baillie, Wood & Croft, bankers and brokers, Toronto, have organized a separate company. This has been incorporated, and is known as the Bankers' Bond Company, Limited, with capital of $1,000,000. The Monetary Times is informed that associated with the new company are several prominent Canadian bankers, who have not only invested money in the company, but who will also give it the benefit of their experience and knowledge of Canadian affairs.

Mr. F. W. Baillie has accepted the presidency and Mr. F. P. Wood the vice-presidency in the new company, assuring to the new company continuance of the policy adopted by Messrs. Baillie, Wood & Croft in their investment business, this firm in future maintaining a stock exchange business only.

The Bankers' Bond Company will, in addition to the usual bond and preferred stock business, go farther than has been customary in encouraging worthy industries, business men and others to expand by financing the needed capital in small or large amounts. The company have leased the ground floor of the new Imperial Life Building, 20 Victoria Street, Toronto.

LONDON LIFE INSURANCE COMPANY

It is good to note the statement of the London Life Insurance Company that the reserve standard for the company's industrial business is the highest in use on the continent. This factor and that of expenses are especially important when a corporation writes industrial insurance. The London Life Insurance Company closed the past year with satisfactory records and a net surplus of $201,374.

The company's assets, consisting chiefly of first mortgages on real estate, amount to $4,059,376, an increase of $469,578. All bonds, stocks and debentures are held at a valuation below the prevailing market price. The rate of interest earned, without allowance for head office rental, was 6.74 per cent.

Sixty-six per cent. of all the company's business is being valued on a 3 per cent. basis, the remaining thirty-four per cent. being valued on a 3½ per cent. basis. Business formerly valued on a 4 per cent. basis has this year been raised to the 3½ per cent. standard. The total reserve on all business in force amounts to $3,693,637. The total liabilities, including special funds and all profits due or accruing at credit of policies, amount to $3,858,001.

Applications for insurance amounting to $8,206,070 were accepted and policies issued therefor last year, an increase over 1911 of $836,886. The insurance in force at the close of the year aggregated, after deducting all re-insurances, $23,264,820, an increase of $3,026,835 for the year.

The total premium and interest receipts of the year were $1,134,472, an increase over 1911 of $175,387. The payments to policyholders or heirs for cash profits, annuities, surrender values, matured endowments and death claims aggregated $209,918, an increase over the previous year of $59,982. The total disbursements amounted to $680,820. The company's statement generally is a satisfactory one.

Discussing the report, Mr. J. McClary stated that the past year "was notable in the company's history for three events of interest and importance. In the first place the cash income exceeded $1,000,000 by the comfortable margin of $134,000. In the second place you will note that the highest interest rate used in the valuation of the company's policy liabilities is 3½ per cent., that section of the business formerly valued on a 4 per cent. basis having been placed on a 3½ per cent. basis as at 31st December last. In the third place the earnings of the company have been such as to enable the directors to authorize a scale of profit distributions to policies under existing rates 30 per cent., on the average, in excess of estimates quoted when such business was written. This series of achievements in a single year will prove most gratifying to all interested in the company's welfare."

MANY MUNICIPAL BONDS WERE SOLD

According to the valuable comparative table of that in-
esting compilation "Municipal Bond Sales in 1912," there
re no less than 4,605 issues made in the United States
ring the past year aggregating $613,127,177. These is-
es are arranged alphabetically and particulars as to inter-
: rate, term of years, amounts, price and basis are given.
her tables and summaries make this a useful reference
ok to those interested in municipal bond issues.

Municipal Bond Sales in 1912, $5; Bond Buyer, 25 West
oadway, New York.

OMINION POWER AND TRANSMISSION COMPANY

The annual report of the Dominion Power and Trans-
ssion Company for the year ended December 31, being a
mbined statement of results of operations of the company
d its subsidiary companies, shows:—

oss earnings	$2,563,371.38	
erating expenses	1,359,549.34	
		$1,203,912,04
nd interest and interest		352,152.75
rplus earnings		$ 851,759.29

It states that the year was a good one and that prospects
r 1913 are also good. The sales of power exceed that of
y previous year.

The physical condition of the properties is excellent and
ntinues to improve, large sums having been expended to
at end, particularly to the power house and the street rail-
ıy.

A third transmission line has been built from Hamilton
the power house on our right of way.

Brantford and Welland have passed by-laws committing
e municipalities to competition with the company in the
wer and lighting business.

Application has been made to parliament for an exten-
on of the charter of the Brantford and Hamilton railway to
able the company to extend that railway to the town of
alt.

The following were elected directors for the ensuing
ar: Colonel Sir John Morrison Gibson, Colonel J. R.
oodie, Messrs. James Dixon, John Knox, William South-
n, J. W. Sutherland, Lloyd Harris and William C. Hawk-
s. Mr. C. C. Scott was re-appointed auditor.

EDMONTON'S CIVIC INSURANCE

Edmonton's civic insurance carried to October 31st amounted to $770,620; the premiums for some aggregating $14,897.86, as shown by statement appended.

It is not proposed to continue the present method of insurance, was a statement of City Clerk Cox in his recent annual report, which does not seem well adapted to the requirements of the city at this time, and an improved system will be put in operation for the coming year.

The insurances carried were:

Power house and machinery, $119,500; premium, $3,266.92.

Street railway, buildings and rolling stock, $281,030; premium, $6,367.07.

City halls and contents, $17,000; premium, $124.87.

Isolation hospital and nurses' home, $18,000; premium, $86.

Fire halls, $29,000; premium, $253.80.

Stock in warehouse, $15,000; premium, $615.

Children's home and contents, $33,000; premium, $169.50.

Telephone exchanges and apparatus, $186,500; premium, $1,151.09.

Sundry, $71,590; premium, $1,363.61.

Total insurance, $770,620; total premiums, $14,897.86.

SASKATOON BANK CLEARING HOUSE ASSOCIATION

The second annual meeting of the Saskatoon Clearing House Association was held recently. The total clearings for 1912 amounted to $115,946,481.70, as against $63,557,144.49 for 1911, or an increase of $1,000,000 per week. The increase of clearings for 1912 over 1911 was 82.42 per cent.

The election of officers for the ensuing year resulted as follows:—Chairman, Mr. G. A. C. Weir, Bank of British North America; vice-chairman, Mr. T. K. McCallum, Royal Bank of Canada; committee, Messrs. E. S. Martin, Bank of Montreal; W. P. Kirkpatrick, Canadian Bank of Commerce; and S. S. Sterns, Bank of Nova Scotia.

Messrs. Monk, Monteith and Company, Limited, have been appointed general agents for Vancouver Island of the Travellers' Life Assurance Company of Canada.

BRITISH COLUMBIA MAY HAVE GOVERNMENT MUNICIPAL DEPARTMENT

A new ministerial department of the government to supervise municipalities generally in the direction of uniformity in administration and increased economy is one of the recommendations in the report of the Royal Municipal Commission of British Columbia. The appointment is advised of a commission with ample powers to enforce reasonable action in all such cases, notwithstanding the powers granted the corporations interested under their private acts, such a tribunal being either permanent or from time to time appointed by the government, to deal with specific cases as they arise.

W. H. KEARY,
New Westminster.

A. E. BULL,
Vancouver.

H. A. MACLEAN, K.C.,
Victoria.

The commissioners were Messrs. W. H. Keary, New Westminster; H. A. Maclean, K.C., Victoria; and A. E. Bull, Vancouver. Their portraits appear above. A detailed summary of their report appeared in The Monetary Times of February 1st.

ONTARIO'S PIG IRON PRODUCTION

Nine Blast Furnaces Produced Five Hundred Thousand Tons—Steady Growth of Smelting Business

Ontario's iron and steel industries have received considerable attention since the intention of the United States Steel Corporation to build a plant to cost $20,000,000 at Sandwich, Ontario, was made public. It is probable that the corporation will erect a number of blast furnaces in addition to wire, rail, structural and bar mills.

At present there are nine blast furnaces in Ontario for the production of pig iron. The Algoma Steel Company, at Sault Ste. Marie, has three, the Canada Iron Corporation, Midland, two; the Steel Company of Canada, Hamilton, two, and the Atikokan Iron Company, Port Arthur, and the Standard Chemical Company, Deseronto, one each, reports Mr. T. W. Gibson, deputy minister of mines in the 21st annual report of the bureau of mines. In all, these plants turned out 526,610 tons of pig iron, valued at $7,716,314, an average of $14.65 per ton.

In 1910 eight furnaces produced 447,351 tons of pig iron, worth $6,975,418.

At Sault Ste. Marie the whole, and at Hamilton a part, of the pig iron product is converted into steel, the former making Bessemer and open-hearth steel, and the latter basic open-hearth.

Much the greater part of the steel output of the Algoma Steel Company is rolled into "standard tee" rails, of which the production last year was 243,703 tons, the remainder, 24,617 tons, being in the form of merchant bars, tie plates, angle splice bars, light rails, bolts and nuts.

United States Supplies

The supplies of ore for the use of blast furnaces in Ontario continue to come mainly from the United States.

The product of the Helen and Atikokan mines went to the smelters at Sault Ste. Marie and Port Arthur respectively, and part of the output at Moose Mountain was shipped to Hamilton; but the entire quantity of Ontario ore actually charged into the furnaces was only 67,631 tons, out of a total of 916,445 tons smelted, or a trifle over 7 per cent.

Only once—in 1901—did the iron ore supplied to the furnaces from mines situated in the province amount to more than one-half, and for a period of sixteen years did not reach one-quarter, declining to 7.3 per cent. in 1911. Of the whole quantity of iron ore raised from the mines of Ontario during this time, 2,462,807 tons, a little over one-half went to furnaces in the province, and the remainder was exported.

This fact goes to show that even if iron ore of domestic origin were being produced more freely than it is, a considerable proportion would probably find its way to the other side of the border.

Mixture of Ores Required

Blast furnaces require a mixture of ores for the proper regulation of the charge, or to produce iron of a particular quality, hence part of the ore exported from Ontario to the United States may be regarded as in reality exchanged for ores of composition better suited to the purpose in hand.

In the tremendous deposits of Minnesota and Michigan, with their highly developed system of water transportation, iron-masters in the lake and other regions of the east have a variety of choice and an assured continuity of supplies which the mines of Ontario do not as yet afford.

So far, the extensive iron formation rocks which characterize many parts of northern and northwestern Ontario have provided a few large bodies of workable ores, among them the Helen, Moose Mountain, Atikokan and Magpie, and in many other localities there is reason to believe that further exploration will be similarly rewarded.

There are numerous deposits of banded magnetite and other types of silicious ore which at some future time will undoubtedly be utilized by suitable processes of concentration, but which under present conditions must remain dormant.

Ninety-five Per Cent. Imported

In the fact that the raising of iron ore has lagged behind the making of pig iron and steel, Ontario is typical of the Dominion of Canada as a whole. Out of a total Canadian production of pig iron in 1911 of 917,535 tons, no less than 875,349 tons, or 95 per cent., was smelted from imported ore.

The business of iron ore smelting has experienced a steady growth since 1896. The blast furnace established at Hamilton in 1896 began the production. Deseronto followed suit in 1898, Midland in 1900, Sault Ste. Marie in 1904, and Port Arthur in 1907. The Hamilton, Midland and Sault Ste. Marie plants have all increased their capacity since their establishment, there being now a total of nine furnaces in operation.

Shipments from the Helen mine began in 1900, and this property has furnished the greater part of the production of ore since that time.

For the year 1911 the extent of the blast furnace and steel making operations is as follows:—Ontario ore smelted, 67,631 tons; foreign ore smelted, 848,814 tons; scale and mill cinder, 18,476 tons; limestone for flux, 275,628 tons.

The following figures show Ontario's pig iron production, etc:—

Coke for fuel ....tons	577,388
Value of ditto	$2,367,704
Charcoal for fuel ....bush.	1,666,897
Value of ditto	$158,354
Pig iron product ....tons	526,610
Value of ditto	$7,716,314
Steel product ....tons	361,581
Value of ditto	$9,505,013
Workmen employed ....No.	3,633
Wages paid	$2,927,573

The Electro Metals, Limited, Welland, have developed a considerable business in the manufacture of ferro-silicon produced in electric furnaces, of which there are seven. The silica is supplied by flint, sandstone and sand of suitable composition, and is fused with iron ore. The ferro-silicon contains about 50 per cent. silicon. Experimental quantities of ferro-titanium (10 per cent. titanium) were also made.

◆

MONTREAL CITY AND DISTRICT SAVINGS BANK

A good statement has been presented by the Montreal City and District Savings Bank to the shareholders. It shows net profits of $232,433, an increase of $8,778 over profits in 1911, and equal to 23.24 per cent. on the paid-up capital stock, as compared with 22.36 per cent in 1911. The profit and loss statements of the two years compare as follows:—

	1911.	1912.
Balance	$ 32,393	$ 51,049
Profits	223,655	232,433
	$256,049	$283,482
Deductions—		
Dividends	$155,000	$160,000
Reserve	50,000	100,000
Carried forward	$ 51,049	$ 23,482

The balance sheet showed total deposits of $30,713,948, as compared with $28,147,732 in 1911. Total assets at the close of 1912 were $31,015,036, as compared with $33,162,524 at the close of last year. The reserve fund stands at $1,250,000, compared with paid-up capital of $1,000,000.

The retiring directors were re-elected, the board consisting of: Hon. J. A. Ouimet, Hon. Robert Mackay, Richard Bolton, G. N. Moncel, Robert Archer, Hon. R. Dandurand, Hon. C. J. Doherty, Sir Lomer Gouin, Donald A. Hingston and F. W. Molson. At a subsequent meeting of the board Hon. J. A. Ouimet was re-elected president, and Hon. Robert Mackay vice-president.

◆

CANADIAN GUARANTY TRUST COMPANY

The business of the Canadian Guaranty Trust Company, which has its head office in Brandon, during the past year made considerable strides. This is all the more satisfactory in view of the statement of Mr. A. C. Fraser, the company's president, at the third annual meeting of shareholders, that the directors' policy has been to avoid everything of a speculative character, and to confine operations only to the class of business and investment that was absolutely safe, even if earnings were small. The financial statement for the year ended December 31st, 1912, shows that the company has among its assets mortgages on real estate amounting to $73,685; bonds and debentures, $16,216; interest and commission accrued, $20,551. These and smaller items come under the heading of capital account. Under trusts, guaranteed and agency accounts, there is a total of $214,500; and under trusts, estates and agencies, $331,013, making total assets of $665,088. The company has subscribed capital of $543,000, of which $108,600 is paid. Management expenses last year were $14,022. A dividend of 6 per cent. absorbed $6,058, and there was a balance of $3,044 carried forward.

Comparing the past year's statement with that of 1911, it is noted that substantial increases were made in every department of the company's business. Mortgage loans increased 61 per cent.; trusts, guaranteed and agency accounts, 57 per cent.; unrealized assets of estates under administration, 72 per cent.; and net profits 88 per cent. The company's investments consist entirely of first mortgages on improved farm lands and first-class municipal and school district debentures. As security for the $287,600 loaned the company hold first mortgages on property valued by their own inspectors at $757,620, a fraction over 37 per cent. of the value having been advanced. The average rate which these funds are earning is 7½ per cent.

The company's statement is a satisfactory one. The directors will make another call of 10 per cent. on the subscribed capital stock.

MATERIALS USED IN CANADIAN BUILDINGS

Include Granite, Limestone, Marble, Sandstone and Slate—Increases and Decreases are Shown

Stone production in Canada as given below is classified under granite, limestone, sandstone, marble, and slate.

The production of granite and trap-rock in 1911, according to returns from forty-seven active firms reporting, was valued at $1,119,865, as compared with a production by thirty-three firms, valued at $739,516, in 1910; showing an increase of $380,349, or 51.4 per cent.

There was a particularly large increase in the value of granite used for building purposes and in the production of crushed stone.

Quebec province was again the largest producer, the value of sales in 1911 being $462,678, as compared with $356,257 in 1910. The value of sales in British Columbia in 1911, however, approached very closely to that of Quebec, being $460,851, as against $244,767 in 1910.

Ontario produced granite to the value of $131,816 in 1911, as compared with $109,678 in 1910.

Increased Production is Shown

Both New Brunswick and Nova Scotia showed an increased production, the value of the New Brunswick output being $37,994.

Much of the rough stone quarried in New Brunswick, as well as stone imported from Redbeach, Maine, and Mt. Johnston, Quebec, is worked up into finished monumental and ornamental stone at mills at St. George, the value of the finished product here in 1911 being $86,658.

Limestone is Valuable Product

The value of stone burned into lime by the quarry operators and that used in the manufacture of cement is not included in the following figures. With these exceptions, the total value of the production of limestone in Canada in 1911 was $2,594,926, as compared with a value of $2,249,576 in 1910, or an increase of about 15 per cent.

There was a decrease in the production of limestone for building and monumental purposes and for curbstone and paving, but an increased production of crushed stone and rubble. The production of furnace flux was slightly less in tonnage, but of increased value.

Returns are Compared

The production during 1911 of limestone for building purposes was valued at $664,148, as against $695,729 in 1910. The value of crushed stone in 1911 was $1,066,559, as against $701,556 in the previous year.

Curbstone and paving blocks were produced to the value of $36,902 in 1911, as compared with $125,637 in 1910. The value of rubble in 1911 was $374,327, as against $295,168 in 1910. The production of furnace flux in 1911 was 874,224 tons, valued at $452,990, as compared with 896,677 tons, valued at $431,486, in 1910.

No Marble in Eleven Years

From 1886 to 1896 there was a small production of marble, aggregating, however, only $4,167 in value for the eleven years. During the next eleven years—1897 to 1907—there is no record of any production.

But the opening up of the quarries at Philipsburg, Quebec, by the Missisquoi Marble Company, Limited, together with the development of quarries in Ontario and British Columbia, has resulted in a considerable production of marble during the past four years.

The total value of the production in 1911 was returned as $162,783, as compared with $158,779 in 1910, and $158,441 in 1909.

Marble quarries were operated during 1911 at Philipsburg and South Stukely, Quebec; Dungannon and Hungerford townships in Ontario, and Marblehead, British Columbia.

Quebec Heads Provinces

The value of the Quebec production was $135,187, as compared with $151,000 in 1910, and $130,000 in 1909. Ontario produced marble to the value of $25,996, as against $4,100 in 1910, and $3,441 in 1909.

British Columbia production was $1,600, as compared with $3,679 in 1910, and $25,000 in 1909.

With the exception of the Philipsburg and Bancroft quarries, the operations were practically confined to the development of quarries.

The imports of marble during the calendar year 1911 were valued at $384,252, as compared with $267,215 in 1910, and $182,147 in 1909.

Sandstone for Building Purposes

The value of sandstone production in 1911 was reported as $451,183, being a slight falling off as compared with the production in 1910, which was valued at $502,148. The greater part of the sandstone quarried is used for building purposes, though small quantities are also used as rubble and for paving purposes.

Of the production in 1911, building and ornamental sandstone was sold to the value of $391,784, or 86.8 per cent. of the total sandstone sales. This amount comprised $86,502 in rough stone and $305,282 in dressed stone sold by the quarry operators. The production of building and ornamental stone in 1910 was valued at $454,220, comprising $118,364 in rough stone and $335,856 in dressed stone.

Fifty Per Cent. Less Slate

The production of slate in 1911 is reported as 1,833 squares, valued at $8,248, which is a little less than one-half the production of 1910, which was 3,959 squares, valued at $18,492.

The output was, as usual, obtained from the New Rockland quarries, in Melbourne township, Richmond county, Quebec. A quarry was opened up during the year at Botsford, Temiscouata county.

In Ontario some development work was undertaken on a slate property near New Liskeard, in Hudson township.

NEW FIRE PREVENTION ASSOCIATION

With the object of checking the fire waste, which, according to the records of The Monetary Times, amounted in Canada during 1912 to $22,900,712, the Ontario Fire Prevention Association was organized at a meeting held in the offices of the Canadian Manufacturers' Association.

The fire prevention organization is the sequel to an address delivered some months ago by Mr. Franklin H. Wentworth, secretary of the United States Association for the Prevention of Fires, to the Canadian Manufacturers' Association, the Toronto Board of Trade, the Canadian Credit Men's Association, the Insurance Institute of Toronto, and other bodies. It will be similar to the United States association, the object of which is to promote the science of fire protection and fire prevention by spreading among the people some knowledge of the tremendous fire waste that takes place every year, amounting in Canada and the United States to something like $300,000,000, or $50 a minute.

Officers have been elected, and a membership campaign will be inaugurated at once. The annual fee, for the purpose of carrying on educational work, has been fixed at $2, and all interested in the suppression of the fire waste may become members of the association.

The officers are: President, Mr. W. H. Shapley; secretary, Mr. W. Walker, Toronto; treasurer, Mr. J. M. McIntosh.

Executive committee: Messrs. Percy Robertson, Dean Fernow, Chief Thompson, A. R. Clarke, John Hunter, A. C. Lewis, John F. Ellis, J. C. Scott, E. P. Heaton, J. B. Laidlaw, Paul von Szeliska and others to be named.

CRITICIZES UNITED STATES BANKING SYSTEM

Sir Edmund Walker, of Toronto, president of the Canadian Bank of Commerce, before the United States currency reform committee of the House, declared the defects of the United States banking system were a lack of flexible currency, fixed reserves, which dissipated needed cash in times of stress, and the absence of a rediscount bank, states a Washington despatch.

Sir Edmund declared that the banks of the United States had not grown in relation to the great industries of the country, and that they were now "behind the times." He recommended a system of regional banking organizations to strengthen the individual banks, but said that he "was not in favor of the Aldrich plan without qualifications."

In these regional divisions he said the banks should be allowed to issue asset currency in bank note form, which would appear as it was needed and disappear when the need for it had passed. The national bank note system, he said, should be continued and perfected.

The witness thought that in addition to maintaining the national banking system, the "individual banking system" should be aided by the government. He recommended that permission be granted to private bankers to establish large banks in the large cities of the country, with branches in foreign countries.

He said that bad banking could not be prevented by government guarantee of deposits.

The Dominion Bond Company has decided to establish a branch office in Winnipeg, of which Mr. W. F. Irwin, present manager of the British Columbia branch at Vancouver takes charge. Mr. J. A. McGill, assistant local manager of the Montreal office, takes charge of the Vancouver branch, and Mr C. Ross Dobbin succeeds Mr. McGill at Montreal.

Mr. Joseph Irvine, who headed the International Cement Company at Hull, and an active spirit in the company whose organization was talked of last spring, has, it is said, enlisted new interests in his venture. Hon. Clifford Sifton is among them. Mr. Irvine and Mr. Sifton have both been in London endeavoring, it is understood, to enlist the support of English capital for the new company, whose capitalization is mentioned as $10,000,000.

LONDON MARKET IS CLOGGED

Underwriters May Decline Fresh Business for a Time —City of Edmonton Underwriting an Issue

Several London financial papers express wonder that underwriters continue to accept blocks of securities which experience shows the public is not wanting. The colonial market particularly, declares the Westminster Gazette's financial editor, has been swamped, and no one need be surprised if the underwriters combine in declining fresh business till the present undigested mass has been assimilated.

Underwriters in London are having a thoroughly bad time, says a cable message to the Montreal Star, but this is by no means confined to Canadian issues. Entre Rios Railway £750,000, fives, issued at 95, have only attracted the public to the extent of 20 per cent., yet borrowers remain importunate.

Underwriters are showing something like revolt against the flood of new issues. The London Times says the present system has dangers in times like the present, and urges that in the existing conditions of politics and commerce that no new issues be underwritten, except those absolutely necessary.

Efforts are being made among leading underwriters to refuse facilities for further issues until the conditions are more propitious.

New Zealand Government agents are now underwriting 3½ millions sterling, fours, to be issued at 98, and the State of Sao Paulo is underwriting £7,000,000, the issue being largely required to fund treasury bills.

City of Edmonton's Loan.

The city of Edmonton is negotiating for a loan of £350,000, fives, while the Southern Pacific is underwriting a £25,000,000 issue as a sequel to the United States Supreme Court decision.

It is understood that these loans are being hurried forward, because when the Balkan war is over very heavy continental borrowing is expected, and the underwriters would rather face the music now and attempt to distribute holdings than await the further swamping of the market by the outpouring of new European government issues.

Winnipeg's Stock Issue.

The recent issue in London by Winnipeg of £750,000 sterling 4½ per cent. stock at par was marketed by the Bank of Montreal.

The total of the money by-laws passed by the city of Winnipeg for which stock should be issued is $7,007,504, made up as follows:—

Extension of well water system	$1,000,000
School board debentures	1,000,000
New Exhibition site	400,000
Public baths	50,000
Power plant (including equipment, extension of plant and extension of distribution system)	1,950,000
Local improvements, (street work)	1,707,501
Waterworks mains extensions	100,000
High pressure extensions	125,000
Suburban police stations and police signal and fire patrol service	80,402
Additional amounts added to former by-laws for hospitals, bridges, high-pressure plant, fire alarm system and conduits, first estimates having been exceeded	544,597

Applications have been received by the London Stock Exchange to list the following issues: City of Toronto, £1,075,000, fours; Grand Trunk Pacific, £1,136,980, fours; Grand Trunk Pacific, £1,136,980, fours; Grand Trunk, £425,544, guaranteed fours and £850,500 perpetual fours.

NEW ACCIDENT INSURANCE COMPANY BEGINS BUSINESS

With an authorized capital of $500,000, the North American Accident Insurance Company, with head office in Montreal, has commenced business. It transacts personal accident, sickness, plate glass, workmen's compensation, and all branches of liability insurance.

The officers and directors of the company are as follows: President, Douglas K. Ridout, of Toronto, president of the Toronto Furniture Company and vice-president of the Murray-Kay, Limited; vice-president, A. E. Dyment, of Toronto, director of the Royal Bank; directors, W. T. Bradshaw, of Toronto; J. D. Montgomery, of Toronto, solicitor; W. D. Strickland, of Toronto; J. J. Meagher, of Montreal, solicitor, vice-president of the Wray Financial Company; and Mr. Rufus C. Holden, of Montreal, financier.

The managing director of the new company is Mr. [illegible] F. Dale, an expert in the casualty, accident and liability business.

HAS A BRANCH IN QUEBEC PROVINCE

The business of Cluett, Peabody and Company, which has a branch factory at St. Johns, Quebec, has been re-organized. The capitalization is now as follows:

	Authorized.	Outstanding.
Seven per cent. cumulative preferred stock	$10,000,000	$ 8,000,000
Common stock	18,000,000	18,000,000

The business of Cluett, Peabody and Company was established as a co-partnership in 1851 and is the largest of its kind in the world. The business of the company comprises the manufacture and sale of collars, cuffs and shirts for men and boys; the bleaching of cotton goods; manufacture of boxes and operation of a printing plant. It employs more than 8,500 people. The principal factory is located at Troy, N.Y. The company owns and operates, in addition to the one at St. Johns, factories at Corinth, N.Y., and South Norwalk, Conn., and leases plants at Rochester, N.Y., and Leominster, Mass. The company also owns and operates a bleachery at Waterford, N.Y., with a yearly bleaching and finishing capacity of more than forty million yards of white cloth. The annual production of the combined plants is more than seven million dozens of collars and more than four hundred and fifty thousand dozens of shirts. The product of the company is distributed through branch stock and salesrooms located in the following cities:—New York, Chicago, Philadelphia, San Francisco, New Orleans, Boston, St. Louis, Cleveland, Cincinnati, Pittsburg, Baltimore, Minneapolis, Seattle, Buffalo, Los Angeles, Denver, Kansas City, Detroit, Troy, London, England.

An offering of 7 per cent. cumulative preferred stock of the company has just been made by the following financial houses:—Messrs. Lehman Brothers, New York City; Messrs. Goldman, Sachs and Company, New York City, Chicago and Boston; and Messrs. Kleinwort, Sons and Company, London, England.

JANUARY FIRE LOSSES

The losses by fire in the United States and Canada during the month of January, as compiled from the records of the New York Journal of Commerce, aggregated $20,193,250, as compared with $35,653,150 in January last year. The following figures give a comparison of the fire losses for January this year, with those of the same month in 1912 and 1911:—

	1911	1912.	1913.
January	$21,022,450	$35,653,150	$20,103,250

Canada's fire losses as compiled by The Monetary Times amounted to $3,013,385 and the loss of fourteen lives.

MANITOBA'S INSURANCE COMPANIES

mendment Proposed to Provincial Act—Corporations and Changes During Past Year.

Manitoba's inspector of insurance, Mr. A. E. Ham, recomends the following amendment to that province's insurance t, viz.:

That every underwriters' agency whose policies are guarnteed by a company holding a license from the Dominion of nada or this province, for the transaction of insurance in the ovince of Manitoba, shall pay an annual license fee of 00.00 and file appointment of attorney and furnish the spector of insurance with a sworn statement of all premiums the said underwriters' agency included in the returns made the provincial treasurer of Manitoba, under the Corporation axation Act, of the company guaranteeing their policies.

In his seventh annual report for the year ending December st, 1912, respecting the various insurance companies and iendly societies constituted to undertake contracts for life, e, hail, inland marine, accident and fraternal insurance, sick d funeral benefits, Mr. Ham shows that at December 31st, 12, there were 68 licensed insurance companies doing busiss under the Manitoba Insurance Act, classified as follows:—

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144 tons, valued at $1,437,196; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 20,360 tons; in 1909, 29,941 tons; in 1910, 34,041 tons; in 1911, 25,080 tons; 1912, 21,509 tons.

Dominion Trust Company Limited

Offices—VANCOUVER, VICTORIA, NEW WESTMINSTER, NANAIMO,
CALGARY, REGINA, WINNIPEG, MONTREAL,
LONDON, Eng., ANTWERP, Belgium

ANNUAL REPORT OF THE DIRECTORS

Submitted at the Ordinary General Meeting at the Head Office of the Company, Vancouver, B.C., February 25th, 1913

It affords your directors much pleasure to submit to the shareholders the annual statement of the business of the Company for the past year duly certified by the auditors.

The net profit for the year, after deducting expenses of management, interest on depositors' accounts, and all expenses, amounted to $335,063.61.

This sum added to balance from 1911 of $643.67 ($13,992.38 less adjustments), and premiums on shares sold during the year, $81,160.50, makes the total available for distribution $416,867.78, being the largest amount for that purpose in the history of the Company.

During the year an office was opened in Antwerp, Belgium, under the management of Mr. C. W. Twelves, one of your directors, who for years occupied the honorable position of Chairman of the British Chamber of Commerce on the Continent.

Late in the year a very desirable location was secured in the city of Winnipeg, and a branch office opened there the first of 1913, which, while not strictly coming into a report on 1912, is yet worthy of mention.

The accounts of the Company have been audited; moreover, while such procedure is not required by law or by our Articles of Association, yet all securities belonging to estates or trusts of any kind held by your Company have been examined by your auditors and found to be ear-marked and segregated from those belonging to the Company, and in order. As further evidence of the policy of your directors in this matter, I might state that our application to the Dominion Parliament for a charter for Dominion Trust Company contains clauses making the ear-marking and segregation of trust securities compulsory.

Your directors recommend that the amount available for distribution be allocated as shown on the debit side of revenue account.

Respectfully submitted,
WM. H. P. CLUBB,
President.

ANADA NATIONAL FIRE INSURANCE COMPANY

The Canada National Fire Insurance Company, one of progressive institutions of Western Canada, with headrters at Winnipeg, has been able to present a strong ement to its shareholders early in the company's history. income account had a substantial foundation in the bale brought forward from 1911, amounting to $226,399. To was added during the year a sum of $23,163, being net mium on capital stock. The profits from first mortgages, ks, debentures and other sources amounted to $68,946 insurance premiums to $181,840. This made a total me of $500,349. The expenditure was considerably less half that amount. Salaries, rents and commissions lled $67,754; reinsurance premiums, $48,801; net losses, ,168; general expenses, $25,479. There were other small ns, the net result being that the company was able to y forward the balance of $329,993.

A comparison of a few of the accounts as they stood in and 1912 gives an idea of the progress of the Canada ional Fire Insurance Company during the past year:—

	1911	1912
Total assets . .	$811,7[illegible]	$1,115,[illegible]58
Surplus to policyholders .	588,180	998,524
Total income . . .	311,716	500,349
Profits from mortgages, etc	21,954	68,946
Insurance premiums income.	37,401	181,840

The company has $2,055,400 subscribed capital, of which [illegible],654 is paid. The most important item in the assets is he shape of first mortgage loans on real estate and acd interest amounting to $8[illegible].

EMPIRE LOAN COMPANY

There was no lack of demand last year, especially in Western Canada, for the funds of loaning companies. This situation was not overlooked by the Empire Loan Company of Winnipeg, which at the end of 1912, had loans out on first mortgages, valued in the assets at $750,264, including accrued interest. Among the company's other assets are:—Real estate, $1,654.52; cash on hand and in Union Bank, Winnipeg, $13,500.80; cash in Parr's Bank, London, $1,494.86; office furniture, $770.00; accounts receivable, $787.97; debenture costs, divisible over term, $5,000; its total, with loans, being $773,472.63.

The net profits during the year amounted to the substantial sum of $35,176. The shareholders received $25,664 of that sum in dividends, and the reserve fund was enlarged by $8,000. That account now totals $30,000, a satisfactory amount compared with subscribed capital of $505,600 of which $356,172 is paid up. The company has authorized capital of $500,000. A balance of $407 was carried forward.

The following table shows at a glance the company's progress:—

Year.		Assets.	Reserve.
1905		$127,5[illegible]	$ 1,115.[illegible]
1907		105,[illegible]4.58	[illegible]
1909	....	259,005.15	12,000.00
1910		[illegible],084.57	[illegible]
1911	......	581,13[illegible]	[illegible]
1912	..	773,472.63	30,000.00

A dividend of 8 per cent. has been paid every year since 1905.

* * *

Application will be made by the [illegible] Company of Canada, Limited for a Dominion charter. The intended amount of capital stock is $2,000,000, to be divided into 20,000 shares of $100 each, and the head office will be at Winnipeg. The applicants are as follow: Messrs. Donald Hogart McDonald, Winnipeg, banker; Albert Leslie Gordon, Regina, barrister-at-law; J. Roy Colwill, Regina, barrister-at-law; Francis George Wheat, Regina, student-at-law; Charles H. Shrimpton, Regina, accountant; of whom Donald Hogart McDonald, Albert Leslie Gordon and J. Roy Colwill are to be the first or provisional directors of the company.

REPORT OF THE SECOND ANNUAL MEETING O

THE SECOND ANNUAL MEETING of the Shareholders was held at the Head Office of the Company, Bank of British North America Building, 436 Main Street, Winnipeg, Man., on Wednesday, February 12th, 1913, at 4 o'clock p.m.

The following Shareholders were present:

Captain William Robinson; D. E. Sprague, Esq.; E. D. Martin, Esq; E. L. Taylor, Esq., K.C.; E. S. Popham, Esq., M.D.; S. D. Lazier, Esq.; F. H. Alexander, Esq.; H. Sandison, Esq.; J. F. A. Stull, Esq., Prince Albert; James F. Stuart, Esq.; P. Earp, Esq.; G. Briercliffe, Esq.; Frank S. Nugent, Esq.; W. W. McKeague, Esq.; H. W. Dearman, Esq.; John Hamilton, Esq.; W. W. McDonald, Esq., Fleming, Sask.; A. H. Collins, Esq., Gladstone, Man.; Chas. Pope, Esq., Kenora, Ont.; W. H. Gunn, Esq.; Thomas A. West, Esq.; R. S. Wainwright, Esq.; Robert Gunn, Esq.; H. Keech, Esq.; J. W. Quinn, Esq., Brandon, Man.; W. E. Fudger, Esq.; H. G. Mussen, Esq.; George Early, Esq., and R. H. McCallum, Esq., Russell, Man.

The President, Capt. William Robinson, acted as Chairman, and Mr. F. H. Alexander was appointed Secretary for the Meeting.

The Secretary, at the request of the Chairman, then read the Notice convening the Meeting, also the Minutes of the last Annual Meeting, held February 14th, 1912. These Minutes were approved by the Shareholders and signed by the Chairman.

The Secretary then read the Directors' Report to the Shareholders for the year 1912, also the Financial Report, accompanied by the Auditors' Statement, as follows:

SECOND ANNUAL REPORT OF THE DIRECTORS OF THE CANADA NATIONAL FIRE INSURANCE COMPANY

To the Shareholders:

It is with much pleasure that your Directors beg to present for your consideration their Second Annual Report, accompanied by the Statement of Assets and Liabilities and Income and Expenditure duly certified by the Auditor of the Company.

In reviewing the business of the Company for the past year your Directors are indeed pleased to report that substantial and satisfactory progress has been made.

In order to facilitate the business of the Company in the larger centres, Branch Offices have been opened in the cities of Toronto, Regina, Edmonton, Calgary, Vancouver and Victoria, and during the past year many new Agencies have been established in both Western and Eastern Canada, including the Maritime Provinces. The Company has also extended its operations into Newfoundland. It shall be the policy of your Directors to gradually increase the number of Agencies and thereby more widely distribute the Company's risks, which is recognized as a most important feature in Fire Underwriting. The number of Agencies already established, amounts to about 500, and will be considerably augmented during the present year. The number of policies in force at the close of the year was 8,779, and the Fire Insurance liability amounted to the large sum of $11,062,237, or an increase of $8,847,002.00 over the previous year. The average amount of these policies is $1,260.00. The valuable connections enjoyed by this Company, combined with the energetic policy pursued by the Board of Directors and the Management, are very largely responsible for the large increase in the volume of business during the past year, and your Directors have every reason to believe that the same satisfactory progress will continue.

Great care has been exercised in selecting the risks as is evidenced by the fact that during the year the net fire losses, amounting to $26,168.55, were less than 20% of the net premium income. This is a very low ratio, and is deserving of especial comment.

The Subscribed Capital remains at the same figure, namely, $2,055,400.00, and the amount paid thereon at the close of 1912 was $766,654.92, or an increase of $386,610.79 over the previous year. The First Mortgage Loans on productive Real Estate now reach $872,363.08, being an increase over the net amount of 1911 figures of $529,437.18.

The amount to the credit of Stocks and Debentures Account was $132,029.73, an increase of $26,031.53 over 1911. Agents and Branch Offices' balances amount to $16,021.73, or an increase of only $7,529.86 over the previous year, and, considering the very large increase in business during the year, this is a very gratifying showing. Cash on Hand and in Banks at the close of the year amounted to $73,963.98.

The total assets amounted to $1,115,258.37, or an increase of $506,029.29 over the net amount of assets for 1911.

The amount required by the Dominion Government t
to the Reserve for unearned premiums reached at the c
year the sum of $98,123.89. This fund, while affording
tection to the Policyholders and constituting a great
strength to the Company, is a very large amount for the
to set aside from its premium income, but it is readily ac
from the fact that a large proportion of the Company
consists of three-year risks, on which a much larger pe
required to be set aside as a Reserve than is the case
business. The three-year business is, however, much s
by fire companies in view of the profitable nature of th
business, and its resulting low loss ratio.

In respect to income, the amount carried forward t
of this account from last year was $226,399.95, made up of
Dominion Government Reserve for unearned premiums,
and net surplus to Shareholders, $208,145.11. Other
the heading of income are premiums on Capital Stock,
Profits from first mortgages and other sources, $68,946
showing an increase of $46,991.34 over last year's fig
insurance premiums, less cancellations, etc., $181,840.09,
gain of $144,439.03 over 1911.

Out of these profits provision has been made for all
management, commissions, rents, fire losses, depreciat
ture and fixtures, etc., adjustment expenses, license and
fees and amounts due re-insuring companies. There
balance of $329,993.33, made up of Government Reserve,
and net surplus to Shareholders, $231,869.44, which sur
30% of the Paid-Up Capital Stock.

With the great development which is taking place
the Dominion, especially in Western Canada, the scope
Insurance Companies is growing year by year, and yo
feel confident that, with the large Paid-Up Capital a
valuable business connections in the various Provinces
with an energetic yet conservative policy, which has
been characteristic of this Institution, the Company w
continue to make uninterrupted progress, but strengthe
in the insurance world, and enjoy the liberal patronage
dence of the public which has been so freely and gen
tended to the Company since its inception.

Your Directors wish to express their hearty apprecia
painstaking effort and efficient services of the Officers an
well as the loyal and hearty co-operation of the many Agen

I have audited the books of the Company for the year ending December 31st, 1912, and I certify that the foregoing Balance Sheet is, in my opinion, properly drawn up so as to exhibit a true and correct view of the Company's affairs as shown by their books. I have also examined the Securities and found them correct.

Winnipeg, February 11th, 1913 (Signed) D. A. PENDER, C.A.

The president, Capt. William Robinson, in a comprehensive address, then moved the adoption of the Report. In his remarks he referred to the regrettable absence of the Managing Director, Mr. W. T. Alexander, occasioned by serious illness, but was pleased to be able to report to the shareholders that Mr. Alexander was now convalescent, and expected that he would be with us again in the near future. He spoke of the very gratifying progress made by the Company, and stated that owing to the valuable connections enjoyed by the Company, and in view of the financial prestige occasioned by the large Paid-Up Capital and Reserve which inspired confidence in the insuring public, the Company would undoubtedly continue to receive, even to a greater degree, that hearty support and liberal patronage which has been accorded the Company since its inception.

Mr. D. E. Sprague, one of the Vice-Presidents, in a very appropriate address, seconded the motion.

Before putting the motion to the Meeting, the Chairman enquired if there were any Shareholders who wished to ask any questions in connection with the Report. Short addresses followed by Messrs. H. Sandison, R. Cunningham, F. S. Nugent, G. Briercliffe, J. F. A. Stull, A. H. Collins, H. W. Dearman, W. W. McDonald, Charles Pope, and others.

The motion to adopt the Report was then put to the Meeting and carried unanimously.

On motion, the management was instructed to have the Report printed and distributed among the Shareholders for their general information.

Mr. D. A. Pender, C.A., the retiring auditor, was re-appointed Auditor for the Company for the ensuing year.

The election of Directors was then proceeded with, and it was moved by H. Sandison, Esq., and seconded by P. Earp, Esq., that the following qualified Shareholders, Captain Wm. Robinson, E. F. Hutchings, N. Bawlf, D. E. Sprague, E. D. Martin, Dr. E. S. Popham, W. T. Alexander, D. R. Dingwall, E. L. Taylor, K.C., S. D. Lazier, F. H. Alexander, F. N. Darke (Regina), Andrew Gray (Victoria), and Jonathan Rogers (Vancouver), be elected Directors of the Company for the ensuing year, and that the Secretary cast a ballot for them as Directors.

The Motion was then put to the Meeting, when the Chairman reported that the result of the ballot was that the aforementioned Shareholders were elected Directors for the ensuing year.

Mr. E. D. Martin, on rising to thank the Shareholders for the hearty confidence they had again displayed in re-electing the Directors for another year, stated that, on behalf of his fellow Directors, he wished to thank the Shareholders most cordially for their expression of confidence.

At the request of the Chairman, E. L. Taylor, K.C., Solicitor for the Company, addressed the Meeting at some length, and during the course of his remarks referred to the high class of securities held by the Company. He stated that the securities were comprised of First Mortgages on first-class productive Real Estate as well as Debentures and Stocks of companies of high repute.

With a few fitting remarks Mr. P. Earp moved that a hearty vote of thanks be tendered the Directors, Officers, Staff and Agents of the Company for the efficient manner in which they had conducted the Company's affairs during the past year, and for the splendid financial report which had just been presented to the Shareholders.

The Motion was seconded by G. Briercliffe in a very appropriate manner, and was carried unanimously.

Dr. E. S. Popham, in a few well chosen remarks, responded to the vote of thanks.

On Motion, the Meeting then adjourned.

At a subsequent meeting of the newly-elected Directors, Capt. Wm. Robinson was elected President, N. Bawlf, D. E. Sprague and F. H. Alexander, Vice-Presidents, and W. T. Alexander, Managing-Director.

AMONG THE LIFE UNDERWRITERS

Calgary Life Underwriters' Association held their annual banquet recently. The insurance men of the city took this opportunity to honor Mr. E. W. Owen, of the Sun Life Insurance Company, who is leaving Calgary to manage the company's Detroit agency. The chairman at the banquet was Mr. J. A. Johnson, of the Mutual Life Company. Among the speakers were Messrs. Darker, A. H. Clarke, K.C., and Mayor Sinnot, who remarked that the position of the insurance business to-day had reached a stage where it had become a great benefit to the interests of the community.

In reply to the toast, Our especially honored Guest, Mr. E. W. Owen said: "When I cross that imaginary line to the south and take up my work in that great republic, I will not feel like a stranger in a strange land because I know a warm reception awaits me, and in the city and state to which I am going I shall strive to do honor to the country which I am leaving. One of my deepest regrets is that I am leaving this great country in the making."

E. W. OWEN,

Calgary Representative of the Sun Life Assurance Company, who has left the western city to assume the management of the company's Detroit agency.

Among those present were, Mayor Sinnot, Judge Stuart, Dean Braithwaite, Messrs. E. M. Saunders, A. H. Clarke, K.C., A. Price, Wm. Egbert, J. W. Keith (Dominion Life), J. A. Johnson, (president of the association), Ernest W. Owen, John A. Clark, E. G. Pescod, T. W. Tyache, F. N. Norton, (Federal Life), B. W. Somers, (Crown Life), Rev. J. A. Clarke, R. A. Darker, (Canada Life), Max Weil, (New York Mutual), J. W. Glenwright, (Prudential), and others.

The annual meeting of the Cape Breton Life Underwriters' Association was held in the office of the Confederation Life Association, Sydney, when the following officers were elected: Mr. A. R. McIsaac, president; Mr. J. W. Betcher, vice-president; Mr. T. H. Kitchen, secretary-treasurer. In addition to the officers the following were appointed on the executive: Messrs. E. C. Hannahan, C. W. Semple, Edward Durkee, D. J. O'Connell, and G. E. Archibald.

◆

BRANDON'S INCREASED FIRE LOSS

Fire Chief Melhuish, of Brandon, in his annual report says:—

[illegible] to $23,610, being $5,555.50 more than the previous year, this being due entirely to the loss of the Maple Leaf elevators the fire being beyond control before alarm was [illegible] of the above sum.

[illegible]

During the year, in connection with said fires, the de- [illegible] twenty-one times.

THIS COMPANY TO COME TO CANADA

The United States Steel Corporation reports unfilled orders on hand January 31, 1913, at 7,827,368 tons, as against 7,932,164 tons on December 31, a decrease of 104,796 tons. Unfilled tonnage November 30, 7,852,883 tons; October 31, 7,594,381 tons; September 30, 6,551,507 tons, and January 31, 1912, 5,379,721 tons.

◆

DOMINION TRUST COMPANY

The operations of the Dominion Trust Company of Vancouver, are extending far and wide. Last year, an office of the company was opened in Antwerp, Belgium. The company already has a branch office in London, England, and branches throughout the Dominion.

Its operations last year resulted in net profits of $335,063. This sum added to balance from 1911 of $643 ($13,992 less adjustments), and premiums on shares sold during the year, $81,160, makes the total (omitting cents), available for distribution $416,867, being the largest amount for that purpose in the history of the company.

The assets of the company, an important factor, are as follows:—Mortgages and secured loans and accrued interest, $2,264,798; municipal and other bonds and debentures and interest, $1,102,150; shares in other companies, $579,184 (upon which there remains uncalled $97,404); sundry investments, $30,750; sundry debtors, $483,601; cash in hand and in banks, $149,120; guaranteed first mortgage investment securities, $363,556.

The accounts of the company have been audited, and while such procedure is not required by law or by the articles of association, yet all securities belonging to estates or trusts of any kind held by the company have been examined by auditors and found to be ear-marked and segregated from those belonging to the company, and in order.

◆

TORONTO MORTGAGE COMPANY

One has become accustomed to look for a conservative, progressive and profitable statement every year from the Toronto Mortgage Company. The annual report and balance sheet for 1912 does not disappoint. The company's gross earnings, including the balance of $24,614.91 brought forward from 1911, amount to $205,730.58. This is after deducting cost of management, interest on debentures and deposits, and all other charges, amounting in all to $103,600.13. There was a net profit of $102,130.45. Out of that dividends at the rate of 7 per cent. per annum on the capital stock were paid, amounting to $50,718.50, leaving a surplus of $51,411.95. From the surplus there was transferred to the reserve fund, the sum of $25,000, leaving a balance to be carried forward to 1913 of $26,411.95. The reserve fund is now equal to 60 per cent. of the capital stock.

Debentures matured during the past year amounting to $305,900, to renew which, and for new moneys, new debentures of the company were issued to the extent of $443,353. Loans were made amounting to $572,300, and mortgages aggregating $269,000 were renewed for further terms, after due examination of the present values of the properties in question. The revenue taken credit for consists of actual cash receipts for interest and net renewals.

Sir William Mortimer Clark, the company's president, in commenting upon the report, noted that the company's business showed substantial increases over that of the previous year, namely:—In sterling debentures, $97,000; in currency debentures, $41,000; in liquid assets, $67,000; in mortgage loans, $81,000; and in total assets, $148,000.

The revenue of the company again exceeded that of any previous year. The net earnings of the company also surpassed those of any former year, amounting to 10.70 per cent. on the capital, as compared with 10.47 per cent. in 1911. The chairman once more drew the attention of the meeting to the important fact that the revenue was a stricly cash one, the policy of the directors being that interest must not be capitalized, nor taken credit for, unless actually paid.

Sir William also pointed out that it was a harder matter to increase the sale of the currency debentures in a new and rapidly developing country like Canada, where capital is so eagerly sought for at high rates of interest. At the same time, he drew the attention of trustees and executors, who may [illegible] at 4¼ per cent. the present rate paid by the company there- [illegible] account.

VANCOUVER'S JANUARY FIRE LOSS

Vancouver's fire department record for the month of January shows the estimated total damage done by fire during the month of January was $33,520; the insurance loss was about $27,890, leaving the loss above insurance paid $5,630. The value of property involved was $244,125. The department responded to 54 alarms during the month, 27 of which were for actual fires where damage resulted, 9 were chimney fires, 5 false alarms, 10 were small fires where no oss occurred and 3 were for fires outside the city limits. 18,oo feet of hose was laid and 2,401 gallons of chemical used t the fires. A complete list of alarms where damage occured follows:—

January 3.—Alarm from Box 36 at 5.40 p.m. Fire in lothing and second-hand store at 161 Powell Street, caused y stove being set too close to woodwork. Building owned y P. Walsh and occupied by A. Hyams. Damage $1,050, overed by insurance.

January 4.—Telephone alarm at 9.52 a.m. Fire on roof f building at 1789 Georgia Street, caused by an overheated tovepipe. Building owned and occupied by Mrs. McPhee. Damage $10. Alarm from Box 35 at 11.08 p.m. Fire at 712, 12½ and 716 Main Street. The blaze started in 712½ from leaking gas tube and burned through the partition to 712 nd also spread to the adjoining building at 716 before it vas extinguished. 716 was owned by A. Roy, and 712 and 12½ by Mrs. Penhill. 712 was occupied by D. Kyreacos and sed as a fruit store, and 712½ was occupied by Miller and Berger and used as a clothing store. Damage $2,600, partly overed by insurance.

January 8.—Telephone alarm at 11.15 p.m. Fire in tore at 2253 Powell Street, owned by Mr. Noble and occupied by Miss Webber, caused by an overheated stove. Fire ut before the arrival of the department. Damage $125.

January 9.—Telephone alarm at 2.51 p.m. Small fire in ign shop at 401 Harris Street, caused by upsetting coal oil amp. Building owned by Mr. Patty and occupied by Hopps nd Duker. Damage $10, covered by insurance. Alarm rom Box 6 at 6.06 p.m. Some overalls on fire in shack at 47 Granville Street, caused by drying clothes. Building wned and occupied by Stock and Black. Damage $5.

January 10.—Telephone alarm at 12.05 p.m. Fire in partition at 24 Broadway East, caused by an overheated furnace ipe. Building owned and occupied by Mrs. R. H. Duke and sed as a dwelling. Damage $125, covered by insurance.

January 12.—Telephone alarm at 3.34 a.m. Fire in twotory brick building at 56 Water Street, owned by Mr. Thompson and occupied by Charles Freeman and used as a lothing store. Cause of fire unknown. Damage $1,687, overed by insurance. Alarm from Box 328 at 7.40 p.m. ire in residence of G. A. Roedde, 1415 Barclay Street. The laze started in the dining room and was caused by a Christmas tree being accidently knocked over, considerable damage resulting to both building and contents. Damage $2,57, covered by insurance.

◆

WILL MAKE TIRE DUCK AT WELLAND

A new mill for the manufacture of automobile tire duck will be erected at Welland by the Empire Cotton Mills, Limited, a subsidiary of the Smart-Woods, Limited. The cotton company has 36 acres of land and a small fixed assessment for a period of 20 years. The new duck plant will obtain power from the cotton company at $10 per horse-power. Through this company also it will obtain free storage sheds and free heating and fire protection, all of which will go a long way towards reducing overhead expenses.

The new concern will be under the supervision of Mr. C. T. Grantham, who is well-known as the Canadian pioneer in the cotton duck industry, which he started in Yarmouth, N.S. Mr. Grantham is also well-known in Hamilton, where he organized the Imperial Cotton Company a number of years ago.

The company's present paid-up capital is $1,100,000 7 per cent. cumulative preferred and $1,100,000 common stock, and the new mill will necessitate the issue of $400,000 of each class of stock, which will bring both preferred and common stocks up to the amount of capital authorized. This preferred stock has all been placed.

I have audited the books and accounts of the London Life Insurance Company for the year 1912. All Journal entries are of a proper nature, all payments are verified by vouchers and all postings have been checked. The Policy Reserve Liability has been duly certified by the Actuary. The Securities have been examined and found in order.

The above statement is a correct abstract of the Company's business for 1912, and is in accordance with the books.

London, January 24th, 1913 JAMES McMILLAN, C.A., *Auditor*

The Annual Report embraces the following particulars:

New Business—Applications for insurance amounting to **$8,206,070.00** were accepted and policies issued therefor, an increase over 1911 of **$836,886.50**

Insurance in Force—The insurance in force on the Company's books at the close of the year aggregated, after deducting all re-insurances, **$23,264,820.83**, an increase of **$3,026,835.95** for the year.

Profits—The mortality rate has continued so favorable and the rate of interest earnings has improved so steadily that a material increase in the apportionment of profits to Policyholders has been authorized for 1913. The scale adopted exceeds estimates under present rates by fully 30%.

Assets and Interest—The Company's assets, consisting mainly of first mortgages on Real Estate, amount to **$4,059,376.13**, an increase of **$469,578.53**. All bonds, stocks and debentures are held at a valuation considerably below the prevailing market price. The rate of interest earned, without allowance for Head Office rental, was **6.74** per cent. on Insurance Department's basis of computation.

Liabilities—Sixty-six per cent. of all the Company's business is now being valued on a 3% basis, the remaining thirty-four per cent. being valued on a 3½% basis. Business formerly valued on a 4% basis has this year been raised to the 3½% standard. The total reserve on all business in force amounts to **$3,693,637.00**. The total liabilities, including Special Funds and all profits due or accruing at credit of policies, amount to **$3,858,001.87**

Surplus—Calculating the liabilities on basis called for by the Insurance Act, the Surplus on Policyholders' Account is **$481,512.00**. Deducting from this the amount required to place the business on the Company's own standard of valuation and the sums provided in special funds for various purposes, the net surplus is **$201,374.26**

THE

Montreal City and District Saving Bank

SIXTY-SIXTH ANNUAL REPORT

Montreal, February 10th, 1913.

To the Shareholders:

Gentlemen:

Your Directors have pleasure in presenting the Sixty-Sixth Annual Report of the affairs of the Bank, and the results of its operations for the year ending December 31st, 1912.

The net profits for the year were $232,433.04, and the balance brought forward from last year's Profit and Loss Account was $51,049.22, making a total of $283,482.26. From this amount have been paid four quarterly dividends to our Shareholders, and $100,000 has been carried to Reserve Fund, making the latter $1,250,000, leaving a balance at credit of Profit and Loss of $23,482.26 to be carried forward to next year.

In the appalling disaster to the S. S. "*Titanic*" the Bank suffered the loss of its Vice-President, the late Mr. H. Markland Molson, whose business ability and extensive banking experience were of much benefit to the Bank.

The late Mr. Molson's place on the Board has been filled by the election of Mr. Fred. W. Molson, and Honorable Robert Mackay has been elected Vice-President.

As usual, a frequent and thorough inspection of the books and assets of the Bank has been made during the year.

The report of the Auditors and the Balance Sheet are herewith submitted.

J. ALDRIC OUIMET,
President.

Winnipeg, 11th February, 1913

I beg to report to the shareholders that I have audited the Books and Accounts of the Empire Loan Company for the year ending 31st of December, 1912, and hereby certify that the foregoing accounts and Balance Sheet are, in my opinion, properly drawn up so as to exhibit a full and fair view of the Company's affairs, as shown by the Books of the Company. The Securities have been inspected by the Committee appointed specially for such purpose, and are certified to as in order, while the cash and bank balances have been verified by Certificates.

(Signed) JOHN SCOTT,
Chartered Accountant.

Member of the Institute of Chartered Accountants, Scotland and Manitoba.

Comparative Statement.

	Assets.	Reserve.	Dividend.
1905	$127,860.22	$ 1,115.13	8 per cent.
1907	195,034.58	3,782.99	8 per cent.
1909	259,005.15	12,000.00	8 per cent.
1910	396,084.37	16,000.00	8 per cent.
1911	581,130.29	22,000.00	8 per cent.
1912	773,472.63	30,000.00	8 per cent.

At the annual meeting of the Shareholders of The Empire Loan Company, held on Tuesday, February the 11th, the Directors' report with the above statement was presented and adopted.

After the usual routine business and several addresses by the Officers and Shareholders of the Company expressing satisfaction at the gratifying increase in the Company's business, the election of Directors was proceeded with. The Board for the coming year will be composed of the following:

Chas. M. Simpson, C. W. Clark, H. H. Beck, Wm. Brydon, A. N. McPherson, R. H. McKenzie and W. W. Watson. John Scott, C.A., was re-appointed auditor.

At a subsequent meeting of the Board Mr. Chas. M. Simpson was again elected President, Mr. Wm. Brydon was elected Vice-President, and S. T. Jones was re-appointed Secretary-Treasurer.

RAILWAY BILLS

Several bills relating to traction interests are under con- deration at Ottawa. They include those permitting the nperial Traction Company to build an extension of its al- ady authorized line from Smithville, Ontario, to Bridge- irg and from Hamilton to Toronto, and giving the com- any two years to begin construction and five years to com- ete the work. Extending the time for completion of its ne by the Canadian Western Railway Company five years, nd extending the time for completion of the British Colum- a and White River Railway Company.

Another bill incorporates the Manitoba-Ontario Railway ompany with a capital of $1,000,000 and authorizes the nstruction of a railway from Fort William, on Lake Super- r, to the Lake of the Woods and to Winnipeg, with a branch a point on the international boundary between Ontario nd Minnesota, and another branch to Kenora on the Na- onal Transcontinental.

A bill has been introduced on behalf of the Canadian acific Railway, authorizing it to construct five branch lines s follows: From Snowflake, Manitoba, westerly nine miles; om the terminus of the Gimli branch northerly 60 miles; om Cayley, southerly to Burmis; from the Kleinburg-Sud- ury branch westerly to a point on the Ontario and Quebec ailway near Campbellville, and from Montreal, northerly L'Epiphanie, P.Q. Five other small branch lines are also uthorized in the West.

The annual meeting of the Paton Manufacturing Company of Sherbrooke, will be held in Montreal on the 26th inst.

That Lethbridge, benefitting through its vast coal deposits, can produce power for manufacturing purposes the cheapest of any city on the North American continent, and has a great industrial future, is the opinion of experts who have recently made a thorough investigation of the power situation. Mr. A. E. Ross, the Montreal power and electrical expert, stated that power can be produced at Lethbridge at $15 per horse-power per annum.

CANADIAN GUARANTY TRUST CO.

Report of the Proceedings of the Third Annual Meeting of Shareholders

The Third Annual General Meeting of the shareholders of the Canadian Guaranty Trust Company was held in the Company's Board Room, 1031 Rosser Avenue, Brandon, on Wednesday, the 5th day of February, 1913.

Those present were: Alex. C. Fraser, J. B. Beveridge, John R. Little, John A. McDonald, Lieut.-Col. A. L. Young (Souris), J. F. Middlemiss (Wolseley), G. S. Munro (Reston), H. L. Adolph, F. N. Darke (Regina), John E. Smith, J. S. Maxwell, Alex. A. Cameron (Oak Lake), M. G. Abey, Robert Darrach, W. P. Middleton, John Bate, Andrew G. Smith, H. A. Wood, A. K. McDonald, J. W. Rathwell, D. A. Reesor, John D. Ross, Geo. W. Hadley, Allan Leslie (Chater), John Clarke, A. E. McKenzie, R. B. Thompson (Beresford), R. A. Cox (Beresford), Clifton Watkins (Forrest), John T. Clarke, Henry Meredith, J. C. B. Inkster, Joseph Cornell.

The president, Mr. Alex. C. Fraser, was on motion, called to the chair, and Mr. John R. Little, the managing director, acted as secretary to the meeting.

The secretary read the Third Annual Report of the Directors, the Financial Statement, and the Auditor's Report as follows:

CANADIAN GUARANTY TRUST COMPANY

To The Shareholders of Canadian Guaranty Trust Company:

Your directors beg to present to you their Third Annual Report, being that for the year ended December 31st, 1912, and have pleasure in advising the payment of a dividend at the rate of six per cent. per annum.

As will be seen by the Annual Financial Statement, every department of the Company's business shows a very large increase compared with the business of the previous year. The policy of your directors has been to avoid everything of a speculative character and to confine operations only to the class of business and investment that was absolutely safe, even if earnings were smaller. This, we believe, is the policy that will commend itself to the shareholders and to our clients.

A. C. FRASER, President.

Auditor's Certificate

I hereby certify that I have made a monthly audit of the books of accounts of the Company, and that the above Balance Sheet and Profit and Loss Statement are true, correct and full statements of the condition of the affairs of the Company as on December 31st, 1912, as disclosed by the said books of accounts.

The cash and bank balances have been verified and the mortgages found duly certified as valid by the Company's solicitor. The trusts and estates are in good order and are being well and carefully administered.

J. B. BEVERIDGE, Auditor.

Brandon, Man., January 8th, 1913.

In moving the adoption of the Report, the president said:

"Gentlemen: I beg to move, seconded by Mr. Little, that the Financial Report of the directors for the year ending 31st December, 1912, be received and adopted.

"The managing director will in his address cover all matters of importance pertaining to the business of the Company for the past year. I shall therefore only make a few remarks of a general character. I would like to draw the attention of the shareholders to the valuable asset the Company has in its managing director. Mr. Little has been indefatigable in his efforts to advance the interests of the Company. His long experience as a banker and his special knowledge of the conditions pertaining to a Trust Company's business especially in the economical and efficient management of the estates committed to our charge, has been of great advantage both to our Company and to our clients.

"This department of our business is one that I think will develop to a great extent as the years roll by and the satisfaction given in connection with the administration of these estates so far has brought us in a great deal of new business. As the financial statement shows, our business is making substantial progress in every department, and I have the fullest confidence in the future of the Company."

The managing director, in seconding the adoption of the report, said:

"Mr. Chairman and Gentlemen: Before commenting on the statements which I have just read, I should like to express the gratification it gives us to meet you in the commodious and well appointed premises which we now occupy. As you will see, we now have every facility for the handling of our rapidly increasing business.

"We have received a number of congratulatory letters from shareholders who are unable to be present personally with us, on the result of the year's business, and we shall be glad to have a free discussion of the Company's affairs today. You have had the financial statement before you for some time and doubtless have analyzed it before coming here, so that it will not be necessary for me to enlarge upon it to any great extent. You will have noticed upon comparing it with last year's statement that there has been a substantial increase in every department of our business.

"Mortgage loans have increased 61 per cent.; trusts, guaranteed and agency accounts 57 per cent.; unrealized assets of estates under administration 72 per cent., and net profits 88 per cent. These results have been obtained by the practice of rigid economy and unremitting care on the part of your board of directors, and the hearty co-operation our shareholders. I might just mention in this connection at we have probably the largest list of shareholders of any stern company, and their co-operation is a great factor in r success. We believe that it may be greatly extended and would urge the importance of every individual shareholder ing his influence to attract business to us.

"I should add a few words concerning the character of r investments, which, as you are aware, consist exclusively first mortgages on improved farm lands and first class muni- pal and school district debentures. As security for the $287,- o.oo loaned we hold first mortgages on property valued by r own inspectors at $757,620.00; just a fraction over 37 r cent. of the value having been advanced. You will admit,' hink, that your funds are pretty safely invested. The erage rate which these funds are earning is 7⅓ per cent. might have secured higher rates, but our policy has been accept only first-class business and eliminate all risk of s.

"We bring the same careful policy into the administra- n of Trust funds in our care. Our first consideration in ery estate is to conserve the assets to the utmost by not owing any portion thereof to be sacrificed. To do this is often necessary for us to advance our own funds tem- rarily to tide over an emergency (a thing a private execu- is very seldom able to do), thereby often saving hundreds dollars to the estate. Our Company is steadily becoming re widely and favorably known. During the year, thirteen ates have been committed to our care and a very large mber of wills have been drawn in which we have been nam- as executor. We pride ourselves particularly on the class service we are able to give in this department, and we are confident that as the public become more generally aware of the advantages of having us act for them in this capacity, our business will increase very much.

"We are establishing a real estate department under the management of Mr. J. C. B. Inkster, who has sound judgment and a good knowledge of values.

"We have a well established business and an excellent connection, and in order to meet the growing demands of that business and to give a further measure of security to those who place funds with us for investment, it has been decided to make another call of 10 per cent. upon Subscribed Capital Stock. This will materially strengthen us. Our aim from the beginning has been to develop along sound principles and to proceed along carefully thought out lines, and I can assure you that you have a good, safe investment which should yield fair returns and steadily grow in value."

The motion for the adoption of the report was then put and carried unanimously, many of the shareholders having in the discussion expressed their gratification with the Company's progress.

The scrutineers reported the following elected as directors for the ensuing year: Alex. C. Fraser, Lieut.-Col. A. L. Young, John R. Little, Hon. Geo. W. Brown, Wm. Ferguson, H. L. Adolph, E. O. Chappell, J. S. Maxwell, John A. McDonald, G. S. Munro, W. M. Martin, M.P., John E. Smith, F. N. Darke, J. F. Middlemiss, Alex. A. Cameron.

At a subsequent meeting of the Board of Directors, Mr. Alex. C. Fraser was elected president, Lieut.-Col. A. L. Young, vice-president, and Mr. John R. Little, managing director.

ARITIME TELEGRAPH AND TELEPHONE COMPANY

The directors of the Maritime Telegraph and Telephone mpany, Limited, under the authority of an order granted the Nova Scotia Board of Commissioners of Public Utilities ted February 4th, 1913, have resolved to issue 35,000 addi- nal preferred shares of the par value of $10 each. These l be offered at par to all holders of common and preferred ares of the company of record on January 15th last, in the oportion of seven new shares for each thirty old shares com- n, and or preferred, held by any shareholder. Payment for ares will be due and payable as follows:—25 per cent. with plication not later than March 1st, 1913; 25 per cent. on ril 1st, 1913; 25 per cent. on July 1st, 1913; 25 per cent. on tober 2nd, 1913.

Payment of all calls can be made in advance at the option the shareholders, on any of the above dates. All payments account of stock will bear interest at the rate of 6 per cent. r annum from and after the dates mentioned.

◆

MONTREAL'S FIRE RECORD SHOWS IMPROVEMENT

There was a decrease in the number of Montreal fires the month of January, as compared with the figures for corresponding month of 1912. A great part of the credit the reduction is given to the fire inspection department. ief Jean Naud in his monthly report to Chief Tremblay, the Montreal Fire Brigade, states that eighty-three spec- inspections were made, the majority of which were in the siness district. Chief Naud states that in many of the ces he visited, he found the buildings in a delapidated te, with rubbish and waste paper scattered all over the oms and basements.

Captains of the various stations completed no fewer than inspections, with the result that several occupants of ildings have been brought before the recorder's court and ed.

The fire department made 239 runs, as compared with for the corresponding month of 1912, or a decrease of . The whole report is much better than for the year 1912, ere being but eleven false alarms, as compared with 33 for nuary, 1912. During the past month, 67,050 feet of hose re used, as compared with 113,000 for the month of Janu- , 1912, while there were only 5,757 feet of ladder used dur- January, 1913, a decrease of 5,454 feet over the corre- onding month of the year previous. There has also been a increase in the number of alarms, while only 152 streams re used, as compared with 267 for the same month a year o, a decrease of 115.

Chief Naud stated that the record would have been even tter had the people living in houses in the north end been ore careful and not endangered their lives by placing heat- in a position to set the flooring or walls on fire. "Our partment," said Chief Naud, "had no time to inspect pri- e houses, otherwise these people would have been punish- for their carelessness."

CONTINENTAL FIRE INSURANCE COMPANY

In analysing the position of the Continental Fire Insurance Company in last week's issue of The Monetary Times, it was stated that "at the end of the past year, there were losses of $250,000 under adjustment." Such a large amount was obviously incorrect. It should have been $250. The unintentioned error is regretted.

◆

NORTHERN LIFE ASSURANCE COMPANY

A good year's business was enjoyed by the Northern Life Assurance Company, of Canada, which has its headquarters in London, Ont. The directors presented to the shareholders a satisfactory financial statement for the year ended December 31st, 1912. The amount of insurance written during the year was $2,219,528. This exceeds the amount written during the previous year by $285,583. The largest amount of insurance in force added in any year was added last year, being $1,152,814, making the total insurance in force $9,008,780.

The total assets are $1,816,713. being an increase of $190,827. The reserve for the security of policyholders amounts to $1,273,655. The sum of $185,366 has been added during the year. After making provision for the reserves and all dividends there remains the sum of $524,969, which represents the paid-up capital, $464,177.50, and a surplus of $60,791.54.

The total income amounted to $404,963, of which the sum of $315,330 was derived from premiums, and $87,886 from interest on investments. The capital stock of the company paid up amounts to the sum of $464,177, upon which a dividend of 3 per cent. for the half year, ended June 30th, was paid, and a dividend of 3¼ per cent. for the half year ended December 31st, was paid.

The following table indicates the gradual and substantial growth of the Northern Life Assurance Company during the past few years:—

Percentage of	1910.	1911.	1912.
Increase gained to insurance written	41.1	42.7	51.9
Increase gained to insurance in force last year	9.5	12	14.7
Income paid to policyholders	14.2	11.6	16.4
Assets invested in mortgages	67.9	67.6	63.3
Assets invested in bonds, etc.	23.8	23.6	27.2
Assets invested in policy loans	8.3	8.8	9.5

The company has paid $363,900 to policyholders during the past sixteen years.

◆

The institute of chartered accountants of Saskatchewan held their annual meeting recently when the following officers were elected:—President. Mr. O. I. Godfrey, Indian Head; vice-president, Mr. C. V. Gladwell, Regina; secretary-treasurer, Mr. T. Grant, Regina; council, Messrs. J. C. Pope, W. G. Hodge, J. N. Ailson, J. C. Rooke; representative to Dominion Council, Mr. O. J. Godfrey.

THE ONTARIO LOAN AND DEBENTURE COMPANY

The Forty-second Annual General Meeting of the Shareholders of this Company was held on Wednesday afternoon at the Company's Offices, London, Ontario, and was attended by Messrs. John McClary, William J. Reid, Thomas H. Smallman, Lieutenant-Colonel William M. Gartshore, John M. Dillon, Moses Masuret, Thomas P. McCormick, Dr. A. O. Jeffery, K.C., Richard A. Bayly, Lieutenant-Colonel A. M. Smith, Professor James H. Bowman, George C. Gunn, James T. Moses, J. F. Kern, W. T. Westby, A. B. Greer and others.

The chair having been taken by the President, Mr. John McClary, the Manager, Mr. A. M. Smart, who acted as Secretary, read the notice calling the meeting and the minutes of the last Annual Meeting, which, upon motion, were confirmed.

The Annual Report was then presented, as follows:

London, Canada, 28th January, 1913.

To the Shareholders:

The Directors have much pleasure in presenting the forty-second Annual Report, together with the Statement of the Affairs of this Company to the 31st December, 1912.

Doubtless it will be gratifying to the Shareholders to note a considerable increase in profits derived from the operations of the past year.

As set out in detail in the Revenue Account appended hereto, after defraying Expenses, Taxes, Interest and all other charges and making ample provision for any losses which may be anticipated, the

Net Earnings for the year 1912 are		$238,543.05
Balance brought forward from previous year		42,332.70
From this Total available		$280,875.75
Dividends (Quarterly) at the rate of 8% per annum have been paid	$140,000.00	
Transferred to the Reserve Fund	100,000.00	
		240,000.00
Balance carried forward		$ 40,875.75

Increased immigration, a bountiful harvest and the general development of the business of Canada continue to maintain a strong demand for money. The funds of your company have been fully employed at remunerative rates, with an excellent class of first mortgage securities readily obtainable.

Under the care of our valued representatives in Edinburgh our Sterling Debentures continue to enjoy the confidence of discriminating investors in Great Britain, as indicated by increased amounts being invested therein.

The Certificate of the Auditors (elected by the Shareholders) attesting the correctness of the accounts and securities is presented herewith.

Your Directors gladly record their appreciation of the efficient discharge of their duties by the officials of the Company.

All of which is respectfully submitted.

JOHN McCLARY, President.

Trustee & Transfer Agent, **Crown Trust Company** Bankers, **Molsons Bank**

Registrar, **Prudential Trust Company, Limited, Montreal**

The object of the Company is to manufacture and deliver to Montreal householders ABSOLUTELY PURE ICE

MONTREAL'S ICE CONSUMPTION

is already close to 300,000 tons a year, and to supply this demand with natural ice it is necessary to harvest an extra 100,000 tons to cover shrinkage during the long hot season. As this demand is rapidly increasing, the Ice Manufacturing Company's annual output of 50,400 tons, referred to below, would find a ready market even if it were no better than natural ice.

ARTIFICIAL ICE MUCH SUPERIOR

Frozen as needed, from pure artesian well water, in cakes of convenient size for handling, and delivered into the ice-chests of the consumers, the Company's product will naturally be preferred by the public. This is amply proven by the enthusiastic reception given the Company's plans by the citizens, and by the number of contracts already closed.

FACILITIES FOR MANUFACTURE

The Ice Manufacturing Company has already erected a plant on Frontenac St., of 80 tons daily capacity, which will be ready for operation in a few weeks, in time to supply customers this summer. A similar plant will be built in the West End, and a third in a central location. The combined output of the three plants, which should all be in operation early next year, will be 240 tons a day.

ECONOMY OF OPERATION

Under conditions obtaining in Montreal, a ton of this absolutely pure ice, loaded on a delivery waggon, will cost less than would a ton of natural ice which had been cut, hauled, stored subject to shrinkage, brought out of storage, cut to convenient size and loaded on the delivery waggon.

The strategic location of the three plants, each serving a section of the City, will cut down the heaviest expense item, delivery, to a minimum.

EARNINGS AND EXPENSE

The earnings from the three plants have been conservatively estimated as follows.

Output		Tons.
160 days operation at full capacity		38,400
80 days operation at half capacity		9,600
40 days operation at quarter capacity		2,400
Total annual output		50,400
Sales		
50,400 tons at average price of $5.50		$277,200
Expense, based on above output.

THE TORONTO MORTGAGE COMPANY

The Directors of the Toronto Mortgage Company beg to submit the usual Financial Statement of the Company's affairs, for the year which ended on 31st December, 1912.

The gross earnings, including the balance of $24,614.91 brought forward from 1911, amount to	$205,730.58
After deducting cost of management, interest on debentures and deposits, and all other charges, amounting in all to	103,600.13
There remains a net profit of	$102,130.45
Out of which dividends at the rate of 7% per annum on the Capital Stock have been paid, amounting to	50,718.50
Leaving a surplus of	$51,411.95
From which there has been transferred to the Reserve Fund, the sum of	25,000.00
Leaving a balance to be carried forward to 1913 of	$26,411.95

The Reserve Fund is now equal to 60% of the Capital Stock.

Debentures matured during the past year amounting to $305,900.00, to renew which, and for new moneys, new Debentures of the Company have been issued to the extent of $443,353.00.

Loans were made amounting to $572,300.00, and Mortgages aggregating $269,000.00 were renewed for further terms, after due examination of the present values of the properties in question.

The Revenue taken credit for consists of actual cash receipts for interest and net rentals.

The Office Staff have performed their duties to the satisfaction of the Directors, and the books and accounts, and all securities held by the Company, have been regularly audited.

All of which is respectfully submitted.

WM. MORTIMER CLARK, President.

WALTER GILLESPIE,
Manager.

We have audited the Books and Accounts of the Toronto Mortgage Company for the year ending 31st December, 1912. We have examined the Vouchers and Securities relating thereto. All our requirements as Auditors have been complied with. We find the Books carefully kept, and hereby certify that the foregoing Statements are correct.

E. R. C. CLARKSON, F.C.A.,
J. HARDY, F.C.A.,
Auditors.

Toronto, January 8th, 1913.

The annual general meeting of the shareholders of the Toronto Mortgage Company was held at its offices, No. 13 Toronto Street, at 12 o'clock noon, on Wednesday, the 12th day of February, 1913.

There were present: Sir Wm. Mortimer Clark, Alexander Smith, Robert Wardrop, George Martin Rae, George Murray, H. R. Shuter, W. J. Dickson, C. S. Gzowski, Edward Galley, Dr. H. B. Yates, Charles Niehaus, Wellington Francis, William Martin, Herbert Langlois, H. E. Hamilton, Edward R. Greig, and others.

On the motion of Dr. Yates, seconded by Mr. Gzowski, the President, Sir William Mortimer Clark, took the chair, and the manager acted as secretary.

The secretary read the notice calling the meeting.

The minutes of the last annual meeting were confirmed.

The secretary read the financial statement and profit and loss account for 1912, and the annual report.

Before moving the adoption of the report, the chairman congratulated the shareholders on the favorable condition of the company's affairs, which he stated had never been in better shape than they were at present. He expressed the pleasure of the directors at their being able to present such a satisfactory statement.

The business of the company shows substantial increases over that of the previous year, viz.:—

(1) In Sterling Debentures an increase of	$ 97,000.00
(2) In Currency Debentures an increase of	41,000.00
(3) In Liquid Assets an increase of	67,000.00
(4) In Mortgage Loans an increase of	81,000.00
(5) In Total Assets an increase of	148,000.00

The revenue of the company has again exceeded that of any previous year. The net earnings of the company have also surpassed those of any former year, amounting to 10.70% on the capital, as compared with 10.47% in 1911. The chairman once more drew the attention of the meeting to the important fact that the revenue was a strictly cash one, the policy of the directors being that interest must not be capitalized, nor taken credit for, unless actually paid.

As a result of the year's business, the chairman pointed out that, after payment of all charges, the board had been able to transfer $25,000.00 to the reserve fund, and to increase the balance of undivided profits carried forward to $26,411.95.

Notwithstanding the stringency in money which has prevailed in this country, in common with all other countries, it affords much gratification to the Directors to be able to report that, for the sixth year in succession, not a single property was in the company's hands for sale. Also, that at the close of business on 31st December last, the arrears amounted to only one-eleventh of one per cent. on the assets, while, at the date of this meeting, they have been reduced to the insignificant sum of $269.04. This sufficiently indicates the care exercised in the management of the company's affairs.

The president stated that there had been a good demand for mortgage and bond investments, at satisfactory rates of interest, and that this demand still continues. He emphasized, however, the great care required in the selection of new business. He mentioned that over three quarters of the new loans made by the company during 1912 had been directly to owners, on their own homes. Experience has shown that this class of loan forms a very safe and desirable security.

In referring to the steady increase in the sale of the company's sterling debentures, the chairman said that 82% of those debentures which matured during 1912 had been renewed, and £38,575 of new money taken, by our esteemed and energetic Scottish agents, who well deserved the hearty thanks of the shareholders.

The chairman pointed out that it was a harder matter to crease the sale of the currency debentures in a new and pidly developing country like Canada, where capital is so gerly sought for at high rates of interest. At the same ne, he drew the attention of trustees and executors, who may seeking to obtain "gilt-edged" securities, to the debenres of this company, which, by Order-in-Council, are a legal vestment for trust funds, and which, at 4½%, the present te paid by the company thereon, yield a much better return an bank interest on a deposit account.

Reverting to the main item in the balance sheet, that of ortgage loans, the president said that the policy of the ectors, in requiring gradual and periodical repayments of incipal, had proved of great benefit to lender and borrower ke, and would continue to be rigidly adhered to.

The president closed his remarks by stating that, the serve fund having reached an amount equal to 60% of the pital, and being further strengthened by a contingent fund, directors, having thus amply secured the bond-holders, lieve that the time has arrived when the dividend can be fely increased to eight per cent. per annum, payable arterly, as heretofore.

The chairman concluded by again informing the meeting at it was the settled policy of the directors to continue to engthen the reserves, as well in the interest of the shareIders, as of those who had lent money on debentures.

Moved by the president, seconded by the vice-president, at the annual statement and report, as read, be adopted. rried.

Moved by Mr. George Murray, seconded by Mr. Edward lley, that the thanks of the shareholders are due, and are reby tendered to Messrs. Allan, Buckley Allan & Company, vocates, Aberdeen; Messrs. J. and A. F. Adam, W.S., Edinrgh, and Messrs. Fraser, Stodart and Ballingall, W.S., linburgh, the British financial agents of the company in otland, for the valuable services they have rendered this mpany during the past year. Carried.

Moved by Mr. Alexander Smith, seconded by Mr. H. E. milton, that Messrs. E. R. C. Clarkson, F.C.A., and James rdy, F.C.A., be appointed auditors for the current year, at salary of $300 each. Carried.

Moved by Mr. H. R. Shuter, seconded by Mr. W. J. Dickn, that a poll be opened for the balloting of votes for the ection of directors, to be closed, if, at any time, three nutes should elapse without any votes being polled. Also, at Messrs. E. R. Greig and Wm. Martin be appointed rutineers for the occasion. Carried.

REPORT OF SCRUTINEERS.

Toronto, 12th February, 1913.

We hereby certify that the following gentlemen have been animously elected directors of the Toronto Mortgage Comny, at the fourteenth annual meeting held at the offices of said company, this day at twelve o'clock noon.

Sir Wm. Mortimer Clark, K.C., Wellington Francis, K.C., iomas Gilmour, C. S. Gzowski, Herbert Langlois, George artin Rae, and Henry B. Yates, M.D.

(Signed) WM. MARTIN,
(Signed) EDWARD R. GREIG,
Scrutineers.

At a subsequent meeting held by the board, Sir Wm. ortimer Clark, LL.D., W.S., K.C., was re-elected president, d Mr. Wellington Francis, K.C., vice-president.

MORE IMPERIAL LIFE CHANGES

Mr. J. K. Pickett, general manager of the Imperial Life ssurance Company, has resigned that position in order to into partnership with Mr. R. W. E. Burnaby, of Toron, in the real estate business. Mr. Pickett became connect with the company at its inception in October, 1897, and nce then has passed through the various departments of e company's service, and finally was promoted to the posion of general manager.

Mr. J. F. Weston has been appointed general manager the company. Mr. Weston is well known in the insurance orld, having been formerly connected with the Manufacturs Life Insurance Company, as superintendent of agencies, nd has had a wide experience in the practical side of life surance.

Mr. G. Cecil Moore, A.I.A., will continue to occupy the osition of actuary and assistant general manager and have harge of the office work of the company and of the actuarial epartment.

There has been a rapid succession of important staff hanges in the Imperial Life Assurance Company during the ast twelve months or so.

ANNOUNCEMENT

A NEW SERIES OF ARTICLES
ON
LIFE INSURANCE

Commencing next week, The Monetary Times will publish the first of a series of thirty articles on life insurance. They will interest not only insurance men, in head office and field, but also business men and others who carry life insurance and those who ought to have invested in it long since.

The articles will deal with numerous phases of life insurance and with the various policies. They will show the manifold and practical advantages of life insurance. In short, they will appeal at once to the man who sells and the man who proposes to buy life insurance.

The articles, which have been carefully prepared, are from the pen of Mr. C. A. Hastings, of Toronto, an experienced insurance man, who knows fully the merits of life insurance and the obstacles frequently met by the agent in selling his wares, excellent as they are. He treats these topics in an intimate and forceful way.

The series will commence in The Monetary Times on March 1st and will continue, one each week, for some time. The first is entitled

'How to Become One's Own Master'

The Directors believe that the Stock of this Company is a good investment. The Capital of $2,000,000 is divided into 2,000 shares, par value $100 each, which is being sold at a premium of $15, making the selling price $115 per share.

The terms of subscription are $40 per share, which shall include the $15 premium, upon application and allotment, the balance subject to call of not more than $10 per share in any one year. Purchaser has the option of paying in full at any time.

The Company, in addition to the usual powers of a Trust Company, can buy and sell agreements of sale, which at this time is a very profitable business. The main objects of the Company are loaning money on mortgages on improved farm and city property, and to act as Trustees and Executors.

Prospectus and application forms will be mailed on application to

D. J. YOUNG, Managing Director,
410 Maclean Block, Calgary.

THIRTEENTH ANNUAL REPORT

of the Directors of The

STANDARD LOAN COMPANY

The Standard Loan Company of Toronto held its thirteenth annual meeting of shareholders on Wednesday, ebruary 19th, in the offices of the Company, at corner of Adelaide and Victoria Streets, Toronto. The following report as submitted and approved:—

Your Directors have much pleasure in submitting herewith their Thirteenth Annual Report and Statement iowing the result of the Company's operations for the past year, accompanied by the Balance Sheet to December 31st, 12.

Interest on deposits and debentures, and cost of management, together with two half-yearly dividends of three per ent. each, being six per cent. for the year, have been paid; $90,000.00 has been carried to Reserve Fund, which now nounts to $250,000.00; $2,535.00 has been written off office furniture, and $3,272.81 placed at credit of Profit and Loss ccount.

Both interest and instalments of principal on mortgages and securities of the Company have been promptly met, oving the soundness of the Company's investments.

The books and accounts, and all securities held by the Company, have been regularly audited, and the Auditors' eport is presented herewith.

The officers and staff of the Company have performed their duties to the entire satisfaction of your Directors.

All of which is respectfully submitted.

J. A. KAMMERER,

A. C. NEFF & CO.,
Chartered Accountants. (Auditors).

W. S. DINNICK,
Vice-President and
Managing Director.

AUDITORS' CERTIFICATE

We have audited the Cash and Bank Account, with the Books and Vouchers, and have verified the Securities of the ndard Loan Company, Toronto, for the year ending December 31st, 1912, and we hereby certify that the above lance Sheet and Profit and Loss Account are a true and correct statement of the Company's affairs at the date named.

The books are well kept. The loans are in good condition, and all required information has been freely and fully en.

Toronto, February 1st, 1913.

A. C. NEFF & CO.,
(Chartered Accountants) Auditors.

After adopting the Report, the Shareholders elected the following Directors for the ensuing year:—Rt. Hon. Lord athcona and Mount Royal, G.C.M.G., E. F. B. Johnston, J. A. Kammerer, W. S. Dinnick, Hugh S. Brennan, R. H. eene, David Ratz, W. L. Horton.

The capital stock of the Lake Simcoe Ice Supply and Storage Company, Limited, has been increased from ,000 to $600,000 by the creation of 6,000 shares of new of $50 each.

Fort William fire department answered ten alarms during January. The fire which did the greatest damage was the one at the car barns on January 13, which caused nearly $1,500 loss to the company.

D. W. BONGARD.
Treasurer, Co. Prince Edwar

Picton, February 14th, 1913.

Five new fire stations to cost approximately $[illegible]00,000 will probably be added to Montreal's fire fighting equipment this year.

The railway legislation brought down at Victoria has made clear the Canadian Northern Railway plans for the Fraser River. This legislation guarantees bonds of the Canadian Northern Pacific Railway up to $21,865,000, of which $10,000,000 will be for the construction of terminals
Vancouver, New Westminster, Port Mann, Steveston, Vi
toria, and Union Bay, and $11,865,000 for new mileage at th
rate of $35,000 a mile. Fifteen miles of this will be betwe
New Westminster and Steveston, and eleven miles betwe
New Westminster and Vancouver. Construction on the
lines must start within six months from the passing of th
act and be completed by July 1st, 1914.

The value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

DIVIDENDS AND NOTICES

T. & N. O.	26,633	31,814	— 5,181

◆

Mr. R. H. Matson, one of the oldest insurance men in Toronto, who organized and founded the National Life Insurance, died at the residence of his son-in-law, Mr. D'Arcy Hinds, No. 78 Indian Road Crescent, Toronto. Mr. Matson was managing director of the National Life for six years after it was started in 1899 until he retired. Mr. Matson was recognized as one of the most expert insurance men Canada has produced. He had a reputation for autonomy of management and conservatism in government which stood by the National Life in its early stages. He was born seventy-one years ago in the north of Ireland, coming to Toronto when a boy. He lived here practically all his life except for three years when he was a resident of Galt. He came back to Toronto four months ago.

MONTREAL TO FLOAT LOAN NOW

Criticism of the City's Hesitation in Marketing its Debentures

Montreal, as well as Toronto, is being criticized in London regarding its financial arrangements. "The action of leading Canadian banks and others doing business for Canada," says the financial editor of the London Observer, "in curtailing accommodation and forcing big borrowers into the market has undoubtedly cleared the air as regards financial affairs of the Dominion.

"It is natural in a young country, with great possibilities and a disposition to go ahead that inflated ideas of its value and importance should be current.

Warnings on Deaf Ears.

"It became evident that the country was becoming overfinanced and warnings, though first falling in Canada, on deaf ears, were clearly noted by the banks, which stea brought pressure to bear.

"Had their advice been taken earlier, neither Toro nor Montreal would have been faced with their recent ficulty in placing money on easy terms. The banks saw difficulties coming and see new difficulties occasioned b rush of new issues after the war.

Fail to Grasp Situation.

"Partly for their own sake and partly for the sake important borrowers they have urged these issues to be ma Montreal apparently still delays.

"The days of the 4 per cent. issue, near par, are o for the time being. We can well understand that great cit like Montreal and Toronto may not like the fact but that probably because their civic rulers fail to grasp the posit of European money markets."

The Monetary Times understands that the Montr civic board of control are making arrangements to float loan of £500,000 in London immediately.

TWO GOVERNMENT INVESTIGATIONS

The United Shoe Machinery Company has had the oubtful pleasure of being investigated as an alleged ombine by the governments both of Canada and of he United States. While nominally the companies are istinct, in reality the Canadian concern is a subsidiary f the Boston firm. The Canadian investigation was eported in some detail at the time in these columns. The atter has received additional interest in view of the ecent decision of the Supreme Court at Washington, hich held, in effect, according to a despatch from that ity, that the Sherman anti-trust law does not forbid he mere combining of non-competitors in an industry. The company was held to be a legal concern.

In Canada, two of the investigating boards concluded that the United Shoe Machinery Company of anada was a combine. They reported on October 18th, 912, their conclusions as follows:—

"Such advantages as are claimed by the company or its system of doing business, when they are not inconsistent with the existence of competition, are not vital o a consideration of whether competition is unduly restricted; neither are any complaints made by the manufacturers where the ground of these complaints would isappear if the way were open to competition.

"Eliminating from consideration all those elements f the relations between the company and its customers, ve find that:—

"The United Shoe Machinery Company of Canada s a combine, and by the operation of the clauses of the eases, quoted in the foregoing, which restrict the use of the leased machines in the way therein set forth, competition in the manufacture, production, purchase, sale and supply of shoe machinery in Canada has been and is unduly restricted and prevented.

"In view of all the circumstances of the case, however, we consider it necessary that the delay of ten days prescribed in clause 23 of the Combines Investigation Act be extended to an additional period of six months, and we recommend that such delay be granted."

The representative of the company on the investigating board signed a minority report, stating that, while the facts established by the evidence submitted to the board were set out in the majority report, he differed with the other members of the board with the conclusions that were drawn from those facts. He thought that, considering the company's methods as a whole, they were not against public policy. The company, he added, had been of manifest advantage to the manufacturer of boots and shoes, to the labor operating the machines, and to the consumer.

Discussing the case against the United States company, District Attorney French, who had charge of the government case against the corporation, is reported as saying:—

"The question which has just been decided by the Supreme Court was merely one of criminal pleading. The great and important issue between the people of the United States and the United Shoe Machinery Company is whether or not the latter is a monopoly in violation of the Sherman act, and this depends largely, if not wholly, upon the view which the courts will ultimately take regarding the tying clauses in the leases, or, generally speaking, of the patent question involved. Upon these matters the court expressly declines to pass, apparently for the reason that they were not presented by the record, and says in effect that it must accept without question the interpretation of the lower court, which regarded the indictment as merely referring to the organization of the company, not to the 'tying clause' leases."

The strongest feature of the United States Government's effort to show an unlawful combination in restraint of trade, says Solicitor-General Bullitt for the Government, was the "tying" clause of the agreements, by which it is alleged that the company sought to compel shoe manufacturers to buy machines from it and none other. That question, he declared, was not considered by the court, because the lower court had interpreted the indictments involved in the latest decision as referring solely to the organization of the United Shoe Machinery Company.

The tying clauses were largely the bone of contention in the Canadian case. Mr. Winslow, president of the company, admitted in the Canadian investigation that the purpose of the tying clauses was to give the company that security by preventing the introduction of other machinery into the factory. He stated that if the company were obliged to remove the tying clauses from its leases a change in its system of doing business would be necessary. He was not able to state the basis on which the rates of royalty were calculated, these having been continued from the previous leases. He assigned no reason for the necessity of a change, nor did he indicate what that change would be.

No other evidence was adduced by the company to show what would be the nature of the changes to be made in its system if the tying clauses were eliminated, nor that changes would be necessary for the protection of its interests.

"As indicating that the object of the tying clauses," said the Canadian majority report, "is rather to prevent the introduction of competing machinery than to establish continuity of operation, it may be noted that the company's welter and stitcher will be leased to work in connection with other principal machines obtained from outside sources, that machines corresponding to the machines of the company's general department can be obtained from outside and introduced into the service, and that the company will sell the machines of the general department, in which event the company has not the same interest in keeping the machines in order as exists when machines are leased."

The Canadian investigators found the company to be a combine, and, as the six months' delay recommended and adopted, dates from October 18th, 1912, the company is liable to a penalty not exceeding $1,000 and costs for each day, after April 18th, 1913, during which the company continues to offend. The court procedure in Canada seems to have been far more simple than in the United States, where the government has not yet fired its final shot in the case.

COIN AND BULLION

Of late years Canada's imports of coin and bullion have considerably exceeded the exports. Thus in the fiscal year ended March 31st, 1912, the excess of imports was $18,400,000; in 1911, $3,000,000; in 1910, $3,400,000, and in 1909, $8,400,000. In 1906, 1907 and 1908 the movement was the other way. Thus the exports exceeded the imports in 1908 by $10,100,000; the excess in 1907 was $5,700,000, and in 1906 $2,900,000. In 1903, 1904, 1905 again the imports exceeded the exports, the total excess for the three years being, roundly, $22,200,000.

So, if these figures of imports and exports be taken, without regard to anything else, it would appear that the stock of coin and bullion in the country increased a little over $28,000,000 in the ten-year period. How does this compare with the change in the specie holdings of the Dominion Treasury and the chartered banks between June 30th, 1902, and March 30th, 1912. On June 30th, 1902, the specie in the public treasury amounted to $18,901,639, and that in the chartered banks amounted to $12,409,855. The total visible stock was $31,311,494; and on March 31st, 1912, the Government held $98,892,395 and the banks $36,027,797, the total being $134,920,192. The actual increase in the stock has, therefore, been over $103,000,000 in the last ten years, or more than four times as much as the figures of imports and exports show.

One cause of the discrepancy is found in the export of bullion from the Yukon and other Canadian gold mines. The greater part of the products of the mines has been exported to Seattle or San Francisco. This export movement obviously does not represent loss of coin on our part. It is simply the method by which the mines effect realization of their products. The companies sell the bullion to the banks and receive credit in the banks' books. The banks send the stuff to the United States, and it is ultimately put to their credit in the books of their New York correspondents. Latterly an amount of silver bullion from the Cobalt mines would also appear among the exports of coin and bullion. Some of this goes to England and some to the United States.

It will be seen from the table on the opposite page, dealing with the export and import of coin and bullion to and from each one of the four principal countries here dealt with. Taking France first, it is seen that the movement of specie between Canada and France is practically nil. For the twenty years, 1892-1912, it does not average more than $100 per year. Canada imports from France a much larger amount of goods than she exports to that country; and the necessity of meeting interest on Canadian securities held in France increases the balance of payments against us. The whole is settled through New York and London. In New York we buy sterling exchange, which exchange, when remitted to France, suffices to liquidate the balances against us.

Also between Canada and Germany there is practically no movement of coin and bullion. On trade balance we have important settlements to send to Germany every year; but, as in the case of France, we buy sterling exchange in New York and remit in that way; and if the balance on any occasion should be in our favor the settlement would be made similarly through London. There are two important obstacles in the way of our drawing gold coin from either Paris or Berlin. One is the dissimilarity of their currency system; and the other is the restriction on exports of gold sometimes exercised by the central bank. The Bank of France can pay either in gold or silver. In the last two or three months it has not been paying gold freely. Anyone wanting gold has had to pay a commission, which has been as high as one per cent. All the other banks have thus been forced to pay silver; and it is said that the public is loaded up with silver in all parts of the country. The German Bank also "discourages" exports of gold when its stock is low or when it wishes to increase its coin. When gold is not freely obtainable for export, as is often the case in France and Germany, the exchange rates are affected, and parties having debts to settle in other countries have to pay more than they otherwise would.

The movement of coin and bullion between Canada and the United Kingdom, too, is unimportant. The trade balance is in Canada's favor, but the item of interest on Canadian debt held in Great Britain would probably make us debtor to the United Kingdom on balance each year. We pay by means of securities. Our governments, municipalities, corporations, place new securities by the hundred million in London; and when we are credited with the proceeds there is a balance for us to draw upon. It should be noted that capital investments in Canada by France and Germany also serve to offset in some degree the trade balance owed by the Dominion to those countries. The British sovereign does not fit in handily with our currency; so the banks do not import sovereigns. Nevertheless, there was a considerable importion of sovereigns in the "nineties." British tourists d settlers usually have a supply of sovereigns and half-vereigns, which they put into circulation in Canada. nese coins do not appear in the import statistics. They ll into the hands of the banks and the exchange nkers. The chartered banks put some in their cash serves and send some to the Receiver-General to ex-ange for "big legals." The exchange bankers export e coins, sometimes to New York and sometimes to ngland.

The movement between Canada and the United ates is the only important movement. Although the erchandise balance is heavily against Canada, the ovement of coin and bullion is usually northwards. at is because the proceeds of our security issues in ndon are almost invariably transferred to New York. nen the adverse trade balance with the United States lessened very considerably by the capital investments the Dominion by Americans. So we have a balance our credit in New York which usually reaches large oportions. As the necessity for using it at home arises funds are brought to Montreal.

The process by which Montreal imports coin from United States is as follows. The bank which intends import, say, $1,000,000 will call loans in Wall Street that amount. The funds go to the Canadian bank's dit in one of the big New York banks. The New rk bank is instructed to draw gold coin from the ited States Treasury and ship to Montreal. The New rk bank takes gold certificates to the sub-treasury at w York and receives $1,000,000 in eagles and double eagles. These are packed in boxes and sent by express, all expenses in connection therewith being charged to the Canadian bank. The expenses of shipping gold to Montreal amount to approximately 5-64 of 1 per cent.

SMALL CHANGE.

All we ask is that Judge Leet give a quicker decision in that Caughnawaga kissing case than in the bank case.

* * * *

But suppose R. C. Miller, of Montreal, while in the custody of the sergeant-at-arms, should emulate the Suffragette and refuse his food!

* * * *

The Burns packing plant burned at Calgary is to be rebuilt outside the city and the packing town will be called Burns—a case of tempting the fire fiend.

* * * *

General Huerta, Mexico, was asked to lunch by Gustavo Madero, Finance Minister, of the same address. As dessert, the host was arrested by his guest.

* * * *

The remark here last week that "the ice jam at Niagara is the only brand the Dominion Canners does not handle," brought to this office a can of the company's "Pride of Niagara" strawberries. This makes us hesitate to say that the toot of the horn is the only part of the car which the Russell Motor Car Company does not manufacture.

Months.

PRICES A LITTLE EASIER

The Department of Labor's index number of wholesale es was slightly lower in January, standing at 136.2 as pared with 136.8 in December. Grains and fodders, y products, fruit and vegetables were lower, while nals and meats and fresh fish were upward. Winter at and barley also were upward. Hog products were er. Iron and products of iron showed some advances.

Compared with January, 1912, for which the index num- was 133.2, a rise of three points is shown. The chief eases appear in the groups, animals and meats, fish, s, leathers, boots and shoes, textiles, furs, metals and , with decreases in grains and fodder, dairy products, s and vegetables.

The index numbers are percentages of the average s during the decade, 1890-1899. They are based on 272 modities, representative of Canadian production and sumption.

In retail prices, the feature of the month was the easier ket for dairy products, eggs declining in many cities butter being much easier, while milk declined in two s. Some other lines of food were lower also. A year at this time meats, dairy products and potatoes were ngly upward.

TRADE DISPUTES SHOW DECREASES BOTH IN NUMBER AND MAGNITUDE

There was further improvement in industrial conditions in regard to the number of trade disputes during January. At the end of the year 1912, there were seven disputes in existence of such magnitude as to affect industrial conditions, and two of these were settled during January. Five new disputes occurred, a feature of which was the fact that by none of them were more than one hundred employees affected. Disputes in existence in January were twelve in number as compared with thirteen during December. The number of employees affected also showed a decrease, being 2,298 as compared with 3,850 during December. The number of working days lost during January was about 48,000, which represents a decrease of more than 18,000 as compared with the December record. There were seven disputes left unterminated at the end of the month.

A branch of the Bank of Toronto has been opened at 791 Yonge Street, Toronto, opposite Yorkville Avenue, to be called the Yonge Street North branch, under the management of Mr. J. W. Simpson, formerly on the staff of the main office in Toronto.

PRACTICES OF THE WORLD'S BANKS

Relations With the Money Market — Conditions in America and Europe

BY M. P. LANGSTAFF, A.I.A., F.A.S.

VII.—In Relation to the Money Market.

(a) The Bank of England.

As has been said before, the rate of discount announced by the Bank of England from time to time serves as a guide to the other banks throughout England and Scotland in fixing their rates for loans and deposits. It is, indeed, in a position to compel other banks to raise their rates to the same extent; for, should the London joint stock banks, for example, continue lending at a lower rate, the Bank of England would proceed to borrow all floating money that could be found on the security of consols, and thus create a vacuum, which could be filled only by money from foreign countries.

The Bank of England is the banker of the Government; is the largest issuers of notes, issuing its notes when required in exchange for gold bullion and paying notes in gold coin; and, being the bankers' bank, the weekly returns as to its position form the best possible barometer of the state of trade and credit in the country.

London has often been referred to as the clearing house of the world; for here many of the largest traders make their settlements; here the world's supply of gold finds its natural point of distribution; and here, England herself makes her great loans of capital. The Bank of England, therefore, is the centre of a great system of joint stock and private banks doing an immense cosmopolitan business. These banks keep their chief reserves in the Bank of England, which necessarily, therefore, occupies a position of great responsibility. From the peculiar nature of the business done by these banks, it follows that their liabilities are affected by numerous and sometimes unexpected conditions, whether in England or in any foreign country of importance, and hence they must often find themselves subject to great and sudden demands, which react, of necessity, upon the Bank of England, in which they keep the major part of their reserves. It is seen, therefore, that the Bank of England holds in its charge that on which the solvency of the banks in general, the safety of the commercial public, and the credit of England alike depend.

(b) The Banks of Scotland.

It has been said that in Scotland credit has been systematized to the last degree, and in this connection it will not be out of place to refer to their system of "cash credits." These, while not directly affecting the money market, perhaps, have yet from the fact that they have played an important part in the development of agriculture in Scotland, tended to affect it in their reactionary and future results.

When a borrower obtains a cash credit from the bank he is permitted to draw money as it is wanted up to a certain sum, being charged interest only for the time and on the amount actually used. As a cash credit is not based upon any completed commercial transaction, it is in reality "accommodation paper." For this reason adequate personal security in addition to that of the borrower is required, the bank thus advancing the loan on its knowledge of the character of the borrower and of the responsibility of his endorsers. Owing to this system, many young men of ambition and character have been enabled to attempt praiseworthy enterprises without the necessity of waiting long years to accumulate money from their own earnings.

(c) The Bank of France.

If we consider the vast number of securities discounted by the Bank of France and their small average amounts, it must be at once apparent that the bank is a lender on a large scale to the class of small traders. One reason for this is that the bank discounts a great deal of paper on which advances have already been made by the banking house, which are the immediate customers of the bank.

Owing to the policy of the bank in lending in this way to intermediaries, and also direct to the small borrowers themselves, these latter are enabled to derive much advantage from the relief afforded by the maintenance of a fair rate of interest due to this flow of loans at a steady rate from the bank. The bank has also found by experience that the business carried on with the class of small traders is singularly free from loss and generally steady in its movement. Owing, therefore, to this class of business, and also to the advantage that it enjoys as a debtor, under the bimetallic system of the Latin Union, the Bank of France has become in specie holdings the strongest bank in the world, and is less affected in times of financial stringency than any other bank.

(d) The Reichsbank of Germany.

I have referred before to the elasticity allowed to the Reichsbank in its note issue. Owing to this "elastic limit" it is enabled in a time of financial stringency, when the demand for loans is imperative and the market rate is high, to meet the necessities of borrowers, aud thus quiet the public mind.

Like the Bank of England, the Reichsbank holds a large percentage of the reserves of the other banks. As a consequence, the German banking world is dependent upon it in the event of any extrtaordinary demand. Occupying, as it does, the central position in the German money market, the Reichsbank finds it necessary to be ever on its guard against the dangers of the depletion of its reserve; and a diminution of this reserve is not only regarded with concern by the banking world, but becomes a matter for general uneasiness from the fact that this reserve is regarded as a most important resource for the Empire in time of war. Like the Bank of England, the Reichsbank regulates this reserve by varying its rate of discount, and, as a general rule, seems to have experienced less difficulty than the Bank of England in bringing the outside rates of the general money market up to a close approximate of its own rates.

(e) The National Banks of United States.

Under the operation of the reserve system the cash reserves of the national banks are centred in New York. The great structure of bank credit in the United States, resting as it does in a large measure upon the money reserves of the New York banks, has been analogized to an inverted pyramid upon its apex. Financial conditions throughout the whole country are affected by every important fluctuation in the New York money market; and, similarly, the New York money market is affected by every change of any consequence in the demand for money or credit in any part of the country.

Great economy in the use of money is the result of the central reserve system, the use of which, however, in the United States seems attended by certain dangers; but the reasons for these may be assigned to other features of the United States banking system, among which may be mentioned the dominance of speculative influences in the New York money market, the independent Treasury system, and rigidity of the bank note issues.

(f) Canadian Banks.

To the fact that Canadian banks refuse to encourage speculation to any extent whatever may be assigned the comparative steadiness of the Canadian stock markets.

I have before referred to the tendency towards equalization of the rates of interest in all parts of the Dominion, due largely to the branch system and freedom of note issues of the Canadian banks.

◆

GRAND TRUNK RETURNS

The Grand Trunk Railway Company reports for six months ended December 31, 1912, subject to audit, are compared as follows:—

	1912.	1911.	1910.
Gross	$22,447,705	$20,099,988	$17,981,514
Expenses	16,228,805	15,118,074	13,562,80
Net	6,218,900	4,981,014	4,418,71
Ot inc (db)	423,872	x56,862	x186,624
Total inc	5,795,028	5,037,876	4,605,33
Charges	2,471,695	2,579,688	2,553,444
Surplus	3,323,333	2,458,188	2,051,89
zDeduct	523,402	189,054	175,93
Surplus	2,799,931	2,269,134	1,875,96

zCanadian Atlantic and Detroit, Grand Haven and Milwaukee deficiencies for the six months.

xCredit.

The above surplus of $2,799,931 added to the balance of $41,310 from June, 1912, makes a total amount of $2,841,241 available for dividend, which will admit of the payment of the dividend for the half-year on the four per cent. guaranteed stock, and first and second preference stocks, and a dividend of 2½ per cent. for the year on the third preference stock, leaving a balance of about $61,722 to be carried forward.

The accounts of the Grand Trunk Western Company for the half-year after providing for the deficit of $78,460 at June 30, 1912, show a surplus of $225,990, which amount is carried forward to the current half-year.

◆

BRITISH COLONIAL FIRE INSURANCE COMPANY

The British Colonial Fire Insurance Company in its first annual report shows assets for the security of policyholders to the value of $507,350. Debentures valued at $58,102 have been deposited at Ottawa. The British Colonial Company is a tariff company, and is now organized in all the provinces with the exception of Nova Scotia. Treaties have been closed with some European re-insurance companies, so that it will be seen the company is building for its future on good foundations.

ANUARY BANK STATEMENT REFLECTS CONDITIONS

Deposits on Notice and Call Loans in Canada show Increases—Several Totals are less than in Previous Month

	January, 1912.	December, 1912.	January, 1913.	Year's increase.	Month's inc. or dec.
Deposits on demand	$316,936,962	$379,777,219	$354,518,964	+11.8	— 6.6
Deposits after notice	596,847,174	632,641,340	635,000,056	+ 6.3	+ 0.3
Current loans in Canada	775,972,243	881,331,981	874,705,616	+12.7	— 0.7
Current loans elsewhere	37,118,081	40,990,126	40,098,146	+ 8.0	— 2.1
Call loans in Canada	71,283,166	70,655,661	71,376,510	+ 0.1	+ 1.0
Call loans elsewhere	80,871,118	105,952,101	92,387,847	+14.2	—12.8
Circulation	88,065,521	110,048,357	94,575,644	+ 7.3	14.0

The above are the principal changes in the statement of artered banks as at the end of January, and are clear indi-tion of conditions existing in the financial world. An in-ease of 1 per cent. is shown in call loans in Canada and of 3 in after notice deposits. Declines are shown in deposits demand to the extent of $25,000,000, in current loans in anada, current loans elsewhere, and also to the extent of .8 per cent., or nearly $13,000,000 in call loans elsewhere d 14 per cent., or $15,000,000 in circulation.

The following table shows the course of current and call ans in Canada for the past thirteen months:—

Loans.	Current in Canada.	Call in Canada.
12—January	$775,972,243	$71,283,166
February	793,853,547	71,181,510
March	815,948,308	69,846,338
April	833,242,621	69,243,791
May	837,282,550	68,305,157
June	848,940,088	68,701,855
July	852,256,651	70,407,734
August	852,045,624	75,194,735
September	859,341,193	72,205,261
October	879,676,655	73,959,866
November	874,721,593	70,668,521
December	881,331,981	70,655,661
13—January	874,705,616	71,376,510

Current loans in Canada have declined by 0.7 per cent., d are lower than they have been since October, while call ans have increased one per cent.

The growth of current and call loans in Canada and else-ere during the past few years is clearly seen in the follow-g table:—

n.	Current loans in Canada.	Current loans elsewhere.	Call loans in Canada.	Call loans elsewhere.
09	$511,363,250	$30,586,081	$44,299,554	$92,532,507
10	590,984,344	37,865,549	63,945,539	127,934,880
11	682,506,695	38,362,549	60,200,781	83,796,665
12	775,972,243	37,118,081	71,283,166	80,871,118
13	874,705,616	40,098,146	71,376,510	92,387,847
c.	$363,342,000	$9,512,000	$27,077,000	Dec. $144,000

Domestic current loans now amount to $874,705,616, an increase of 71 per cent., or $363,342,000, while there is an increase of $27,077,000, which is equivalent to 61.1 per cent. in call loans in Canada, the total amount being $71,376,510. Call loans abroad in January, 1909, were $92,532,507, and in January, 1913, $92,387,847, showing a decrease of 0.1 per cent.

The appended table traces the on demand and after notice deposits accounts for the past thirteen months:—

	On demand.	After notice.
1912—January	$316,936,962	$596,847,174
February	321,152,954	600,252,128
March	331,896,238	606,044,932
April	345,365,183	615,370,348
May	376,953,217	625,294,344
June	373,500,189	631,317,687
July	372,012,494	640,592,345
August	360,575,425	643,663,596
September	374,368,917	640,536,652
October	383,814,572	640,097,928
November	376,829,372	635,810,703
December	379,777,219	632,641,340
1913—January	354,518,964	635,000,056

Deposits on demand are the lowest since April, 1912, though an increase of 11.8 per cent. is shown over the deposits of January, 1912.

Deposits after notice showed an upward trend receiving an addition of nearly 2½ million dollars. The deposits accounts for the past four years show a remarkable growth, both those on demand and after notice, as the following table indicates:—

January.	On Demand.	After Notice.	Total.
1909	$193,286,465	$443,170,532	$636,456,997
1910	238,423,785	508,207,804	746,631,589
1911	270,178,480	549,774,479	819,952,959
1912	316,936,962	596,847,174	913,784,136
1913	354,518,964	635,000,056	989,519,020
Increase	$161,232,000	$191,829,000	$353,062,000

The total deposits are $989,519,020 which is an increase since January, 1909, of $353,062,000. The increase of deposits on demand being $161,230,000, and on those after notice $191,829,000.

MARKETS OF WESTERN CANADA

roducts That Are Sold — Winnipeg's Position — Prevailing Financial Conditions

Monetary Times Office,
Winnipeg, Feb. 25th.

The western Canadian provinces are attracting thou-nds of settlers annually, and offer, perhaps, the greatest arket in the world for manufactured goods of nearly every scription. A partial classification of the chief products at go to make up the big bulk of trade handled in Win-peg show: $25,000,000 credited to the agricultural imple-ent and farm machinery dealer, $16,000,000 to the hard-are trade, $15,000,000 in groceries, $17,000,000 in dry oods and textiles, $12,000,000 to the iron and building ades, $6,000,000 to the boot and shoe trade, $5,000,000 for e automobile industry, and then in a lesser degree are rail-ay and municipal supplies, furniture, drugs, electrical pliances, chemicals, confectionery, metal products, leather nes, and household necessities.

Innipeg a Centre of Supply.

Winnipeg is primarily a trade centre for supplying ese products to western points, and the city has taken on e conditions of an important industrial city in addition to s prominence as the largest wheat market in the world.

Close to one of the best market for manufactured goods in the world, Winnipeg has developed industrially along purely natural lines.

Collections in the West are still slow. For some weeks the wholesale merchants and financial houses have been looking for an improvement, but they still report payments only moderate. There is still considerable grain to be marketed, but the situation would seem to indicate that the general tightness of money, both East and West, was influencing those who have money to hold same.

◆

MEXICAN COMPANY'S EARNINGS

The Mexican Light and Power Company, Limited, statement of combined earnings and expenses of the electric light and power services owned or controlled by the company, as advised by cable, for the month of January, 1913:—

	1912.	1913.	Increase.

◆

RICHELIEU AND ONTARIO ARRANGEMENTS

At a meeting of the directors of the Richelieu and Ontario Navigation Company, held at Montreal, final arrangements were made in connection with the management of the company as well as the direction of the subsidiary companies included in it. Mr. James Playfair, vice-president of the company, was appointed managing director, with headquarters in Montreal. Mr. C. J. Smith, former general manager of the Richelieu and Ontario, retires, and his office will be abolished. Mr. Thomas Henry, former traffic manager of the Richelieu and Ontario, will take over the management of the eastern division of the merged companies with jurisdiction from Prescott to the Saguenay. Mr. H. P. Gildersleeve, former manager of the Northern Navigation Company, will have charge of the entire western division of all lines between Prescott and Port Arthur. Mr. Henry will have his headquarters in Montreal, and Mr. Gildersleeve at Sarnia, Ont. Mr. J. Hobson, who formerly was comptroller of the Northern Navigation Company, was appointed to the office of general comptroller and treasurer, with headquarters at Montreal.

At the meeting Hon. J. P. B. Casgrain, formerly a director of the Richelieu and Ontario, was added to the board of directors. The Quebec advisory board authorized at the annual meeting was formally appointed, the members to be as follows:—Mr. W. Molson McPherson, president of the Molsons Bank, chairman; Sir George Garneau, Quebec; Mr. Paul Galibert, Montreal; and Mr. Frank Carrel, Quebec.

IN THE LIFE INSURANCE ARENA

Canada Life Appoints New Assistant Actuary—Mr. Pickett Banquetted—Saskatoon Life Underwriters

Mr. L. K. File, B.A., F.I.A., has been appointed assistant actuary by the Canada Life Assurance Company in place of Mr. W. A. P. Wood, M.A., F.A.S., who has been promoted.

Mr. File, who graduated from the University of Toronto in 1903 at the head of his class, winning the gold medal, began actuarial work in the same year in the office of the Imperial Life Company, where he remained until he joined the Canada Life in 1909. He is one of the few actuaries on this continent who have obtained, by examination, the degrees of Fellow of the Institute of Actuaries of Great Britain and of the Actuarial Society of America. Interesting articles of Mr. File's have frequently appeared in The Monetary Times, the readers of which will, no doubt, join in wishing him success in his new appointment.

MR. L. K. FILE, B.A., F.I.A.,
Who has been appointed Assistant Actuary of the Canada Life Assurance Company.

Mr. A. G. Dalrymple, who has been a member of the Canada Life Company's actuarial staff for ten years, has been appointed chief clerk of that department.

Retiring General Manager Banquetted.

The directors, officers and staff of the Imperial Life Assurance Company of Canada tendered a complimentary banquet to their retiring general manager, Mr. J. K. Pickett, recently. The function was held in the company's new head office building, with President H. C. Cox in the chair. About 70 guests were present, including the newly-appointed general manager, Mr. J. F. Weston.

Mr. Cox expressed the sincere regret of himself, the directors and the staff at the decision of Mr. Pickett to sever his connection with the company, and stated that the occasion arose out of a desire on the part of the staff to convey some intimation of their regard for the guest of the evening.

Advantage was taken of the opportunity to make a presentation to Mr. Pickett on behalf of his old associates.

Saskatoon's Life Underwriters.

Saskatoon Life Underwriters recently held their annual banquet. Several speeches were given on various aspects of the life insurance business. Mr. W. W. Welsh, president, was in the chair.

Among those present were Messrs. T. Price Thomas, J. A. McMillan, L. H. Colwell, E. R. Dame, G. E. Youngmans, W. H. Becker, N. D. Caly, C. G. Locke, J. O. Hettle, A. C. McEown, Rev. C. W. Brown, Dean G. H. Ling and Dr. A. McGillivray Young.

◆

Greater Vancouver, including the whole of the territory between Burrard Inlet and the Fraser River, has a gigantic sewerage scheme in view, involving the expenditure of several million dollars. The bonds will be guaranteed by the provincial government, so that the financial part of the problem will be [illegible] easier.

BUSY BOARDS OF TRADE

Saskatoon, Sask., board of trade's newly elected officers are as follows: President, Mr. M. Ibister; vice-president, Colonel Acheson; treasurer, Mr. T. F. Calder. Executive committee—Messrs. F. R. MacMillan, G. H. Wentz, J. C. Bell, W. A. Coulthard, C. R. Hill, A. F. Lenon, E. S. Martin, J. H. Holmes, C. T. Woodside, Robert McIntosh Alan Sproat and George Sillers.

The Amalgamated boards of trade of the county of Lambton, Ont., has been formed. The different trade associations in the towns of Alvinston, Forest, Thedford, Arkona, Brigden, Petrolea, Courtright, Sarnia, Watford and Wyoming will each send two members to the quarterly meeting, which will be held for the transacting of business. The election of officers for the year, which resulted in Mr. H. F. Holland being elected as president and Mr. Johnson McAdams as secretary-treasurer. An executive was formed, which will consist of one of the members from each town.

The following officers were elected by the Georgetown, Ont., board of trade for the ensuing year. president, Mr. W. N. McKay; vice-president, Mr. S. Kirk; secretary-treasurer, Mr. Elmer C. Thompson; assistant secretary, Mr. Wm. Arnold. Council—Messrs. J. B. McKenzie, Wm. Barber, Joseph Beaumont, J. A. Willoughby, J. M. Moore, C. B. Dayfoot, W. L. Hamilton and W. G. Buck.

Sarnia, Ont., board of trade officers elected were as follows: president, Mr. W. R. Paul; vice-president, Mr. Geo. French; second vice-president, Mr. T. H. Cook; secretary, Mr. J. L. Buchan; treasurer, Mr. R. H. Harvey; board council, Messrs. H. F. Holland, W. J. McCormack, John Newton, Dr. McDonald, E. A. Lebel, F. L. Riggin, J. R. Geddes, C. H. Belton, H. Mueller and J. H. McCrae.

Magrath, Alta., board of trade has elected the following officers for the ensuing year: president, Mr. B. L. Jensen; vice-president, Mr. Davies, of Grant & Davies; secretary treasurer, Mr. F. C. Steele, and the following committees: civic improvement, Messrs. E. Bennion, Harold Wood and Oscar Blumel; finance, Messrs. John Turner, B. Matkin, T. F. Kirby; immigration, Messrs. G. W. Heathershaw, John Bridge; arbitration. J. A. Rasmussen, J. O. Bridge, J. J. Atherton, Dr. Beeman; trade and transportation, Messrs Ira Fletcher, J. A. Ririe, J. L. Gobb. The first named in each committee is chairman.

Duncan, B.C., board of trade's officers for 1913 are as follows. president, Mr. A. Peterson; vice-president, Mr. E W. Carr Hilton; secretary, Mr. E. G. Smith; council, Messrs. Kenneth Duncan (mayor), Anketel Jones (reeve of North Cowichan), A. W. Hanham, W. Marriott, Ormond Smithe, Patterson, Dwyer, Campbell, Gidley, Sillend, Jaynes and Miller.

Burnaby, B.C., board of trade has elected its officers for this year as follows:—Hon. president, Reeve McGregor; president, Mr. T. D. Coldicutt; vice-president, Mr. W. S. Rose; secretary-treasurer, Mr. H. W. Mansfield; executive, Messrs McPherson, Thorpe, Lobley, Hill, Brown, Scott, Stride and Tucker.

AIDING INDUSTRIES

Strathroy, Ont., ratepayers have decided to loan the Royal Motor Car Company $25,000 to start operations. London and Strathroy men are interested in the venture. Fifty hands will be employed on the start, increasing to 150 or 200.

The ratepayers of St. Catharines, Ont., endorsed two factory by-laws, one to grant seventeen acres of land as a site to the B. F. Goodrich Company, of Akron, Ohio, manufacturers of tires and other rubber goods, and the second to aid a company to be formed by Mr. W. H. Brigger, of Hamilton, for the erection of a jam factory.

VALUE OF LIFE INSURANCE

I.

How to Become One's Own Master

BY C. A. HASTINGS.

I think it may be safely said that there is no man who es not hope one day to have a home of his own and enjoy fruits of his labor. Unhappily, the parents of the young not consider that the lack of opportunity, which men are inclined to lament, becomes a truth only when it is too late, l only because opportunity does not hold out a helping nd forever.

It is a fact that it would be most difficult to find any siness, any industry or profession, in which a life policy, ued by a reputable office, could not be made to be a real et in itself directly. Indirectly it is recognized as an as-, solely because the possession of a policy (irrespective of e) sets a man's mind at ease; but the commercial value a life policy is hardly understood in this country. On the er hand, business men in the States make a practice of ing out policies as large as possible, thereby proving to ir business associates that they look beyond to-day and morrow in their business relations, and realize that a policy only creates but maintains confidence.

I propose to point out how a capital can be provided with e by means of a life policy.

Why is it that one so often hears men, who have not mbed up the proverbial ladder, say it is due to the lack of ney? This is entirely an error. The remedy chiefly lies h the parents, but, what I propose to suggest can be fol-ved by men and women of mature years.

A young fellow commences his life's work—maybe in a olesale house, a retail store, or a lawyer's office—it does matter what it is, for if he remains six or seven years h them there is no doubt that he should by then have a y fair knowledge of the business, and a few more years uld find him holding some responsible position.

Now, during these ten odd years, he has learnt to earn iving, but if he, or his parents on his behalf, have looked the future, he will have learnt how easy it is to purchase nmercial independence with a Fifteen Year Endowment icy. I will take the case of a young fellow aged eighteen rs who could buy a $1,000 policy at an approximate rate $66 per annum, which, by the addition of bonuses at the e of 1½ per cent. per annum, will yield, at age thirty-ee, a sum of $1,265. In this way the assured has the fol-ving advantages:—

(1) Absolutely safe investment.
(2) Insured for $1,000 against premature death.
(3) Learns the value of a dollar.
(4) Obtains his accumulated savings at the time he needs m most.

There are hundreds of men in this country to-day quite capable of conducting the businesses in which they are d servants, as the men who are at the head of affairs; , by a little sacrifice at the beginning of their lives these vants could reap the same benefits.

As the "Joint Stock Companies' Journal" very properly nts out: "The benefits which arise are so numerable—so eat—that they need no argument." The main point is t the premiums are perfectly safe in the hands of a first-ss office, which can be best judged by their proportion of oenses to premium income, for then it will never give the icyholder one single moment of anxiety. The practical lity of the endowment policy does not only appeal to se who wish to abandon the role of employee for that of ployer, but it also provides large sums to those already gaged in business on their own account, at a time when it required most and when it is most difficult to find.

(To be continued.)

◆

UNITED STATES BOND SALES

Those persons who for reference require a comprehensive t of United States municipal bond sales will be interested a volume bearing the caption, Municipal Bond Sales, 1912. is has been compiled from official sources, and is said to ntain the complete public sales, alphabetically arranged, by . W. S. Cousins, editor of the American Banker—Daily nd News. Municipal Bond Sales, 1912. W. S. Cousins, urer Publishing Company, New York.

NO COPIES WANTED

No more copies of The Monetary Times of February , 1913, volume 50, No. 6, are required.

DOMINION'S PRODUCTION WAS NIL

Molybdenite, Mercury and Platinum Sources Did Not Give Any Returns—Some Development Work

Although there are numerous occurrences of molybdenite in Canada of more or less undetermined value, there has been very little production of the mineral. In 1902 about 6,500 lbs. of molybdenite, valued at $400, were reported as having been taken from a deposit in the township of Laxton, county of Victoria, by Mr. J. Webber, of Toronto.

Some Mercury Ore Was Extracted.

There has been no production of mercury since 1897. The small production reported in 1895 and 1897 was derived from the deposits at the western end of Kamloops Lake, B.C. These deposits consist of quartz veins containiing pockets of cinnabar. These veins are in a zone of decomposed volcanic rock of Tertiary age.

During 1911 some development work was done by the Mercury Mines, Limited, at Sechart, Vancouver Island. Some ore was taken out but was piled on the dump for future treatment.

Similkameen District Was Chief Source.

Although no production of platinum or palladium is reported for 1910, it seems probable that some recovery of of platinum may have been made from placer mining on the Tulameen River, B.C.

In the former years the chief source of the platinum production in Canada was the placer gravels of British Columbia, principally in the Similkameen district.

The nickel-copper ores of the Sudbury district also carry small quantities of the metals of the platinum group, and from 1902 to 1906 considerable quantities of these metals were recovered from accumulated residues resulting from the treatment of the mattes from Sudbury. This recovery, however, has apparently ceased.

◆

BUILDING ACTIVITIES IN MONTREAL

Monetary Times Office,
Montreal, February 26th.

The secretary of the Montreal Builders' Exchange predicts that the value of buildings which will be undertaken in Greater Montreal, this year, will run into $40,000,000.

He claims that last year the amount of building was $33,000,000. The actual figures as published for the past year were only $19,641,955, but this did not include two wards which have since been included in the city, namely, Cote des Neiges, where the building reached $50,000, and Longue Pointe, with $200,000, while not included in the amount published were municipal buildings with a value of $1,500,000, Harbor Board buildings with a value of $2,225,000, and miscellaneous, $2,500,000. This makes a total of $6,475,000 to be added, making the amount for the city $26,116,955. There was also $7,000,000 worth of building in the suburbs of Westmount, Outremont, Maisonneuve and Verdun.

No fewer than twenty buildings of ten stories each are already planned or under way, and numerous residences, flats, and apartment buildings. There is reason to think that the shortage of building material will be greater this year, and it would seem that the demands will press upon the facilities of the railways to handle, also, it looks as though there would be a shortage of labor.

◆

WM. A. ROGERS COMPANY

A purely Canadian company will be organized to which all rights in Canada will be transferred, and a special meeting of the shareholders will be called immediately to consider the plans which the directors have matured is the interesting statement of Mr. S. J. Moore, president of the Wm. A. Rogers Company in the excellent twelfth annual report of the Wm. A. Rogers Company.

Net profits were obtained totalling $290,683, which was $15,122 less than obtained in 1911. This is accounted for by considerable increase in the cost of raw materials, but the business done was greater in volume than in 1911. The surplus of quick assets over liabilities amounts to $1,399 187, being increased by $252,454. The total assets are valued at $3,316,046.

The company's growth is demonstrated by the following figures:—

	1902.	1912.
Capital stock issued	$1,350,000	$2,400,000
Reserves	81,311	626 839
Total assets	1,602,399	3,316,046
Net profits	102,172	290,683

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Davidson Manufacturing Company.—The balance sheet of the Davidson Manufacturing Company for 1912 shows an increase over the preceding year in earnings. Net earnings for the year exceed six times the bond interest.

Ice Manufacturing Company.—The company has received contracts for over 3,000 tons of ice and are daily adding a large number, said Colonel Labelle, managing director of this Montreal enterprise. Ten additional wagons and 25 extra horses have been made to the delivery equipment. The plant has a capacity of 80 tons, and two additional plants are being built.

National Portland Cement Company.—Shareholders of the National Portland Cement Company, of Durham, held their annual meeting this week, when the financial statement presented to the Durham shareholders was reviewed.

The year proved to be a satisfactory one for the company despite the decline in the price of cement, and it was shown that there was a material reduction in the company's outstanding liabilities.

Manager Calder had with him the proxies of a number of the shareholders resident outside of Toronto.

The net profits for the year were in the neighborhood of $50,000.

La Rose Mines, Limited.—La Rose surplus at the end of January stood at a grand total of $1,602,181.

The January production was 219,977 ounces valued at $134,724 plus sundry income of $3,741, making a total of $138,465.

Mining, concentrator and other expenses were $62,187 leaving a profit of $76,278. Cash surplus was $1,324,290, plus outstanding shipments $223,978, and ore on hand, etc., $53,813, making a total of $1,602,181.

December profits were $95,301, and the surplus at the end of 1912 was $1,866,630.

Standard Clay Products, Limited.—A new plant will be built by the Standard Clay Products, Limited, at New Glasgow, N.S., to supply the increased demand for vitrified salt, glazed sewer pipe and building blocks. This company was re-organized from the old Standard Drain Pipe Company, of St. Johns, Que., and New Glasgow.

The following were elected at the annual meeting for the ensuing year:—Mr. W. C. Trotter, St. Johns, president; Mr. Herbert Molson, Montreal, vice-president; directors, Messrs. S. H. Ewing, Montreal; George McAvity, St. John, N.B.; James Elliott, Montreal; George H. Balfour, Winnipeg, Man.; F. W. Molson, Montreal; T. McAvity Stewart, Montreal; and Colonel G. E. Allen Jones, Quebec, Que.

Granby Consolidated Company.—At special meeting of the stockholders of Granby Consolidated Mining, Smelting and Power Company, an issue of not more than $5,000,000 15-year 6 per cent. bonds "convertible into stock at not less than par," was authorized, also the increase in Granby stock from $15,000,000 to not more than $20,000,000, to provide for conversion of bonds was sanctioned.

At present $1,500,000, known as series "A," will be offered to shareholders pro rata at par, plus accrued interest and remaining $3,500,000 will be issued from time to time at option of directors.

All bonds are redeemable at 105, plus interest, 10 years from the date of issue.

St. Laurent Brick Company.—The St. Laurent Brick Company, Limited, recently held its annual meeting. Mr. Camille Bourdon, president, was in the chair.

Mr. P. Desforge, secretary-treasurer, read the financial statement for the year ending December 21, 1912, by which it appeared that this company has about 4,000,000 bricks to be marketed, and will pay a dividend of 7 per cent. on March 1, 1913.

The election of directors for the current year resulted as follows: Messrs. Camille Bourdon, Wilfrid Bessette, P. Desforges, O. Lemay, W. Bessette, Alex. Hague, and J. O. Martineau.

The output of its plant at Laprairie will be doubled next year, at a cost of $250,000. The financial statement showed a gross profit of $73,020.93, with a net profit for the year of $31,746.09, from which a 7 per cent. dividend will be paid, leaving a balance of $10,816.09 to be carried to profit and loss account.

St. Lawrence Paper Mills Company, Limited.—The annual meeting of the St. Lawrence Paper Mills Company, Limited, which owns mills at Mille Roches, Ontario, and Thorold, Ontario, was held recently. The submitted report to the shareholders was considered satisfactory.

The management reported that the electric power plant which the company has been building at Merritton, Ontario, is ready for operation, and that the new mill which is being built as an addition to its Thorold mill, will be ready for operation about May 1st, increasing the capacity of the mill about twenty tons per day.

The following directors were re-elected:—I. H. Weldon, G. R. Copping, S. F. Duncan, S. B. Monroe, W. M. Loveland, A. B. Connable, A. A. Wheat, James Grant, Charles B. Hays. At a later meeting the following were re-elected:—I. H. Weldon, president; T. A. Weldon, vice-president; and S. F. Duncan, secretary-treasurer and general manager.

J. H. Ashdown Hardware Company.—The net earnings of J. H. Ashdown Hardware Company of Winnipeg for 1912, were $400,000 compared with $288,000 in 1911, an increase of almost 40 per cent. for the year. The net earnings for 1912 were equal to eight times the bond interest. Sales in 1912 were $5,403,000 compared with $4,353,000 in 1911. The company paid 10 per cent. dividend on the capital stock, taking $200,000, and an equal amount was placed to reserve account. The annual report indicates that the recent estimates made by the Dominion Securities Corporation were decidedly conservative and the record of profits for 1912 and previous years shows the 5 per cent. bonds to be a particularly attractive investment, giving a 6 per cent. return.

The earnings since 1909 are as follows:

	Sales.	Profits.
1909	$3,058,301	$244,959
1910	3,993,784	301,112
1911	4,352,901	288,411
1912	5,403,000	400,000

Winnipeg Electric Railway Company.—"Negotiations for the sale of the Winnipeg Electric have been dropped," declared Mr. Hugh Sutherland, a director of the company, after a conference with Sir William Mackenzie and other members of the company's executive at the Canadian Northern Railway offices, Toronto. "The road is a profitable enterprise, and we have decided not to dispose of it, although plans looking to a disposition of our holdings have been developing for a long time past.

"Chief among the considerations were several proposals to make an outlay on new equipment, trackage and other extensions which the growth of Winnipeg appears to justify The city have made several applications for such improvements and we have looked into the matter, but until after we return to Winnipeg we cannot very well make a statement as to what we will do. The difficulties between the company and the city have been adjusted."

The meeting was attended by Sir William Mackenzie, Mr. D. B. Hanna, Mr. F. Morton Morse and Mr. Hugh Sutherland. It was agreed among the directors that this was the company's best year since organization in 1904, and that the outlook was most promising.

International Transit Company.—The earnings of the International Transit Company continue to show satisfactory increases. The income account for the last two years ending December 31st was as follows:—

	1911.	1912.
Gross earnings	$123,668	$143,374
Operating expenses, taxes, etc.	73,834	73,074
Net earnings	$ 40,834	$ 70,300
Bond interest	14,000	13,000
Surplus	$35,834	$57,500

The amount required for bond interest is reduced each year by $1,000, owing to an annual repayment of principal of $20,000, the next payment of that amount being due on July 1st, 1913. This will then leave only $240,000 of the bonds outstanding.

A feature of these bonds, in addition to the earning power of the company, is the fact that repayment of the principal is guaranteed by endorsement on each bond by the Lake Superior Power Company, which is one of the important parts of the Lake Superior Corporation.

Mackay Companies.—The securities of the Mackay comies are held largely in Canada, and the annual report, from ch we copy liberally, will be interesting. The Mackay npanies has no debts. Its outstanding preferred shares o,000,000) have not been increased during the past six rs. Its outstanding common shares ($41,380,400) have not n increased during the past eight years. No bonds, notes stock have been issued and no debts incurred during the r.

The income of the subordinate companies is greater than equired to pay the dividends of the Mackay Companies, its policy is to obtain from its subordinate companies only ugh money to meet those dividends.

The twelve million dollars realized about three years ago n the sale of American Telephone and Telegraph Comy stock is still preserved intact, in cash, and in the highclass of securities, including New York state and city ds, and this fund is ready for emergencies and extensions.

A notable event of the year, in connection with the comies, is an invention of Mr. John Gott, who has been the f engineer of the Commercial Cable Company since its anization in 1884. He has invented a device by which Morse dot and dash signals can be used on long subine cables—that is to say, messages can be sent by the nary land line Morse key and read on a Morse sounder.

At the annual meeting of the Mackay Companies it was d to elect eight trustees to serve during the ensuing year, follows:—Messrs. Clarence H. Mackay, W. W. Cook, rge G. Ward, Edward C. Platt, Henry V. Meredith, Milton Blackmar, George Clapperton, and Sir Edmund Osler. Edmund Osler and Messrs. Clapperton and Meredith are itions to the board.

Canada Foundries and Forgings, Limited.—At the annual eral meeting of the shareholders of Canada Foundries and gings, Limited, held at the company's head office, Brocke, it was reported that net earnings were sufficient to pro for the preferred stock dividend and bond interest, and r making provision for bad and doubtful debts, renewals repairs to plant, depreciation charges, and twenty per. t. of organization expenses, a balance of $25,680 was ied forward to the credit of profit and loss.

During the year the sum of $63,813 was expended on itions to buildings and machinery, which will increase the ducing capacity of the different plants. The demand for he products of the company has been maintained, the sales wing an increase over those of 1911. The recent fire at ada Forge Company's plant was referred to in the direc' report as not involving any loss to the company. Adtage has been taken of the destruction of the old building eplace it by a modern steel structure of considerably larger a. Pending the completion of the new building, operas will be carried on under a temporary structure.

Two new directors were added to the board, these being . G. P. Graham and Mr. Robt. Bowie, of Brockville, Ont.

The directors elected for the current year are the follow:—Messrs. F. C. Billings, Hartford, Conn.; Robert Bowie, ckville, Ont.; John H. A. Briggs, Brockville, Ont.; Geo. Brophy, Ottawa, Ont.; Wm. Henry Comstock, Brockville, .; John T. Dillon, Titusville, Pa.; Thomas J. Dillon, land, Ont.; J. Gill Gardner, Brockville, Ont.; John M. , Brockville, Ont.; Hon. Geo. P. Graham, Brockville, .; J. H. Housser, Toronto; W. M. Weir, Montreal.

At the meeting of directors, Mr. John M. Gill was ted president; Mr. J. H. Housser, vice-president, and Mr. n H. A. Briggs, secretary-treasurer. It was also decided t for the current year dividends on the preferred stock will payable quarterly, commencing May 15th.

La Banque Provinciale.—La Banque Provinciale will ble its present paid-up capital as soon as the money market omes easier. This will bring the capital up to the horized amount, namely, $2,000,000, of which half is now scribed.

Mr. Tancrede Bienvenu, general manager of the bank, ies that the Franch-Canadian bank is contemplating merg with the Hochelaga and National.

BELL TELEPHONE COMPANY

At a special meeting of the Bell Telephone Company's reholders, on Thursday, authorization was granted for the e of $3,750,000 of bonds and debentures of the company, be placed on the market from time to time.

According to Mr. C. F. Sise, the president, the company s not contemplate issuing any of the bonds at the present e, but in order to have a two-thirds vote of the sharedèrs, the matter was placed before them now so that the ds would be obtainable when required.

Two new directors were added to the board, Messrs. [illegible] Bethell and C. F. Sise, Jr.

NOVA SCOTIA STEEL AND COAL COMPANY

Profits Were Somewhat Smaller—Business Transacted Was Large—Contracts for Present Year's Entire Output Received

Monetary Times Office,
Montreal, February 26th.

The directors of the Nova Scotia Steel and Coal Company met here last week, and after a conference announced the earnings for the year 1912. These were somewhat smaller than for the year 1911, owing, apparently, to the low price at which the products of the company had to be sold the early part of the year. However, during the latter part of the year, the company was able to take advantage of the recovery in the iron and steel markets and to make contracts at prices which showed better profits.

The statement of profit and loss for the year, with comparisons with the statement of a year ago, is as follows:—

			Inc. or dec.	Inc. or dec.
Gross profits		$1,000,610		— $18,783
Fixed charges, Int. on bds. and to bank	$352,311		+ $61,142	
Int. debentures	660,000	412,311		+ 61,142
Net earnings		$ 588,299		— $79,925
Transfd. to Res. for depreciat'n	$ 92,196		— $ 3,928	
Sinking fd.	26,105	118,301	+ 1,305	— 2,623
		$ 469,998		$77,302
Written off for bettermts., etc.	61,010		— 12,870	
Ins. fund	10,032		— 545	
Directors	12,500	83,542		— 13,415
Remaining for div.		$ 386,456		— $63,887
Pfd. divs.		82,408		
Bal. remaining for com. divs.		$ 304,056		— $63,887
Com. stock div.		360,000		
Shortage on year's operations		$ 55,944		
Surplus beginning of year		508,544		— 7,943
Carried forward end of year		$ 452,600		— $55,944

Large Volume of Business.

A year ago there remained a balance of almost $8,000 to be carried forward from the year's operations after all appropriations and dividends had been met.

In 1912, however, the earnings were $55,934 short of being sufficient, the result being that this sum had to be taken from the amount at the credit of profit and loss at the beginning of the year. Even then, however, no less than $452,600 now remains at the credit of that account, so that the company is in excellent order for the present year. It will be observed that the smaller surplus of the company was not due to any increase in the write off revealed in the above statement, inasmuch as, so far from the write off being larger, it was about $15,000 less, everything considered.

The volume of business transacted during the year was greater than ever before, so that the company in large part made up for smaller margins of profit in increased output.

Good Outlook Ahead.

During the year the sum of $1,279,569 was expended on capital account, which, less the original cost of the SS. Wobun, which was sold, was added to the property and mines account.

According to the report, the outlook for the coming year is much improved, a better year is already practically assured. The company has disposed of a portion of the ore carried over from last year and has contracted at advanced prices for its entire output for the present year. In addition to this, higher prices are being received for other products and the output of the various departments has been increased.

Reference was also made to the establishing of the Eastern Car Company, the bonds of which are guaranteed by the Scotia Company, and practically the entire capital of which is owned by it. The company will be a large customer of the Scotia Company and should become a good earner for the company both in the purchase of its product and in the profits which it should earn.

BOND TENDERS INVITED

Monetary Times' Weekly Register of Information for Bond Dealers and Municipal Officials

Hamilton, Ont.—The board of education requires $125,000 this year.

Regina, Sask.—Six by-laws aggregating $2,743,000 were carried by the ratepayers.

Edmonton, Alta.—Edmonton electors have endorsed the by-laws calling for expenditures of $5,000,000.

St. Hyacinthe, Que.—Until March 13th for $100,000 5 per cent. 40-year debentures. A. Messier, city clerk.

Fort Frances, Ont.—Until March 8th for $9,691.34 5 per cent. 28-year electric light debentures. J. W. Walker, clerk.

Bruno, Sask.—The village council board has been authorzed to borrow $800 to dig a well. F. Hamm, secretary-treasurer.

Macoun, Sask.—The village has been empowered to borrow $3,500 for cement sidewalks. M. B. Currey, secretary-treasurer.

Montmartre, Sask.—The village has been authorized to borrow $1,500 to pay for balance of cost of water supply. A. J. Boyer, secretary-treasurer.

Mariposa R.M., No. 350, Sask.—Until March 15th for $15,000 5½ per cent. 20-year debentures. A. M. Carlile, secretary-treasurer, Kerrobert.

Ardath, Sask.—The village has been empowered to borrow $3,000 for fire protection, municipal hall and sidewalks. E. G. Sampson, secretary-treasurer.

Springside, Sask.—The village has been empowered to borrow $1,500 for completion of municipal hall, sidewalks and streets. W. Dinsdale, secretary-treasurer.

Scott Rural Municipality No. 98, Sask.—Authority has been granted to the municipality to borrow $8,000 for roads. James Smith, secretary-treasurer, Yellow Grass.

Bow Island, Alta.—Until April 1st, for $40,000 30-year 6 per cent. debentures. W. A. Bateman, secretary-treasurer. (Official advertisement appears on another page).

Grass Lake R.M., No. 381, Sask.—The municipality has been empowered to borrow $10,000 for permanent improvements. J. T. Roper, secretary-treasurer, Salvador.

Decker Consolidated S.D., No. 320, Man.—On March 12th the ratepayers will vote on a by-law to issue $6,000 20-year debentures. J. Andrew, Hamiota, secretary-treasurer.

Revelstoke, B.C.—Until March 15th, for $17,128 5 per cent. 20-year concrete sidewalk debentures. Bruce A. Lawson, city clerk. (Official advertisement appears on another page).

Preston, Ont.—Until March 17th, for $102,300 5 per cent. 20-year, and $8,000 30-year 5 per cent. debentures, H. C. Edgar, town clerk. (Official advertisement appears on another page).

Athabasca Landing, Alta.—Until March 15th, for $40,000 30-year 6 per cent. school debentures. S. R. Farquharson, secretary-treasurer. (Official advertisement appears on another page).

Prince Edward County, Ont.—Until March 11th for $30,000 4½ per cent. 20-year roads debentures. D. L. Bongard, county treasurer, Picton Ontario. (Official advertisement appears on another page.)

Battleford S.D., No. 71, Sask.—Until March 19th, for $100,000 6 per cent. 30-year debentures. F. W. D. Thompson, secretary-treasurer, Postoffice Box 309, Battleford. (Official advertisement appears on another page).

Ponoka, Alta.—Until March 15th for $4,255.30 5 per cent. 20-year sidewalks, and $4,000 5 per cent. 20-year drainage and sewerage debentures. T. W. Hutchinson, secretary-treasurer. (Official advertisement appears on another page.)

Wilkie, Sask.—Until March 8th for $28,000 waterworks; $2,250 electric light, 30-year 5½ per cent. debentures; $8,000 skating and curling rink, and $2,150 fire protection 15-year 5½ per cent. debentures. T. A. Dinsley, secretary-treasurer.

Duck Lake, Sask.—Until April 4th, for $6,000 5½ per cent. 20-year town hall, and $4,000 5½ per cent. 20-year debentures, bonus to Dominion Milling Company. Frank Hopwood, secretary-treasurer. (Official advertisement appears on another page).

New Westminster, B.C.—Until March 22nd for $1,087,000 40-year 4½ per cent. roads, waterworks and shore debentures, and $50,000 15-year 4½ per cent. sidewalk debentures. A. G. Moore, clerk, Edmonds Postoffice. (Official advertisement appears on another page).

London, Ont.—The corporation will apply to the Ontario Legislature for an act authorizing the council to pass a by-law to issue $5,000 debentures for the erection of the Wharncliffe Road Bridge, the amount already provided for not being sufficient. S. Baker, city clerk.

Meaford, Ont.—The town will apply at the next session of the Ontario Legislature for an act confirming the following debenture by-laws:—$15,000 bonus to Meaford Manufacturing Company; $20,000 for bridges and roads; $20,000 bonus to James Randale; $8,250 for sidewalks.

Brantford, Ont.—Application will be made to the Ontario Legislature for an act validating the following debenture by-laws:—$115,000 for Hydro-Electric power; $15,000 for flood prevention purposes; $150,000 for waterworks; $10,000 for collegiate institute; $20,944 for concrete sidewalks; $1,038 for widening Chestnut Avenue; $26,133 for sewers.

◆

CANADA WEST SECURITIES CORPORATION

Net profits amounting to $137,607, or slightly in excess of 17 per cent. of capital, were earned by the Canada West Securities Corporation. The unsettled condition of the money market, states the creditable report of the company, was a factor which had to be dealt with in the year's activities, but adding the balance of the profit and loss account, $4,889, gave a total of $142,497 for disposal. A dividend of 6 per cent. was declared, $50,000 carried to the reserve account, and the balance carried to the credit of the profit and loss account.

Assets of the company total $2,273,986, and are as follows:—Sale contracts, $1,531,773; properties unsold, $477,944; mortgages receivable, $127,595; cash in bank, $56,983; accrued interests receivable, $45,830; accounts receivable, $33,774; suspense items, $86.

The company's unsold properties are situated in Winnipeg and Victoria, B.C. Farm lands to the extent of 5½ sections are also held.

The following officers and directors were elected for the ensuing year:—President, Mr. E. Brown; vice-president, Mr. C. W. N. Kennedy; directors, Messrs. Arthur Wickson, T. H. Johnson, J. B. Henderson, A. D. Chisholm, G. Munro, N. J. Tobin, and J. W. Hayward.

◆

CANADIAN BANK EARNINGS

Most of the banks closed their year in November and December. It is, therefore, now possible to determine how banks generally have fared, in 1912, and to compare with the facts, the prophecy which was made in the November statement, that, "the expectation is that practically without a sing exception, increased earnings will be reported," state Mess A. E. Ames & Company in their monthly letter. The year n be said to have continued without intermission the prosperi which has characterized banking in Canada for several year The only cloud on the horizon was the fear that it would difficult, if not impossible, to meet the requirements of cu tomers. Large crops; extension of industrial activity; heav trade sales, and the disturbance occasioned by the Europe situation, created an unusual money stringency towards t close of the year, which has continued to the present, and likely to be felt for some time yet.

Shareholders will be interested in noting and comparin the record of earnings, dividends, and relation of rest an profit and loss to capital, of some of the banks, whose stat ments have recently appeared.

Bank.	Percentage of Earnings.		Dividends Paid.		Percentag of Rest an Profit and Loss to Capital
	1911.	1912.	1911.	1912.	
Commerce	21.76	19.78	10%	11%	88.47
Dominion	16.50	18.38	12	14	133.76
Hamilton	16.21	16.68	11	11	125.03
Imperial	15.10	16.00	11¼	12	117.04
Merchants	19.65	20.60	9½	10	96.41
Metropolitan	15.33	16.88	10	10	143.18
Molsons	17.81	17.12	11	11	121.54
Montreal	15.80	16.06	10	12	105.01
Nova Scotia	23.00	23.28	13½	14	183.00
Ottawa	17.00	17.04	11	11¾	120.12
Royal	18.58	19.10	12	12	113.02
Standard	19.08	21.08	12¼	13	133.13
Toronto	16.36	16.96	11	12	123.53
Union	14.00	14.20	8	8	67.51

Early this year the Bank of Hamilton increased i dividend to 12 per cent. The above dividends paid in 191 include bonuses as follows:—Commerce, 1 per cent.; D minion, 2 per cent.; Montreal, 2 per cent.; Toronto, 1 pe cent.

BRITISH COLUMBIA PACKERS' ASSOCIATION

rofits Were Equivalent to Twenty Per Cent. of Total Capital—Present Year is Big One on Fraser River

The net profits of the British Columbia Packers' Association r the year ended December 31st were $437,493 after deducon for depreciation. On the basis of the capitalization at e end of the year this represented, after deduction of the vidend on the preferred stock, surplus earnings equal to .8 per cent. on the ordinary shares.

A feature of the statement is that out of profits r the year the company redeemed 3,108 preferred ares, the balance of series b. at a cost of $357,293. At the me time a considerable number of holders of preferred a ares had availed themselves of the privilege of converting eir holdings into common stock. As a result outstanding pital of the company shows the following important changes tween the dates mentioned:

	June 30, 1911.	December 31, 1912.
eferred A	$ 635,000	$ 545,400
eferred B	419,600	....
dinary	1,511,400	1,601,000
	$2,566,000	$2,146,400

s No Bond Issues.

The company has no bond issue and it is expected the eferred A series shares will shortly be all exchanged for dinary shares. The company at the rate of pofit shown in e 1912 statement would be earning 20.3 per cent. on its total oital stock.

On June 30th, 1912, the company had a surplus of $645,-). With the profit for the year this gave a total at the dissal of the directors of $1,083,023. Dividends of 3½ per nt. on the preferred and 3 per cent. on the common for the t half of 1912 took $76,555, and the redemption of preferred ares $357,293. This left a balance of $649,175 at the credit surplus account at the close of the year. The total assets given as $3,689,036, of which $2,502,463 is in plant, etc.

erations of the Company.

The president and general manager reports as follows to board of directors:—

Fifteen canneries were in operation, 10 in Northern itish Columbia, and 5 on the Fraser River; also the cold rage at New Westminster and the saw mill at Alert Bay.

The total pack was 250,624 cases canned salmon and out the usual quantity of mild cured salmon, fresh and zen salmon, halibut, herring, etc.; the catch was an avere one, better than expected on the Fraser River, being rly good for an off year.

Early in the year the demand was good, prices started h and advanced, which interfered with the quantity sold. en the Fraser run proved better than expected, buyers bene alarmed, leaving large stocks unsold. Little has been d since, although prices have declined considerably. Values ced on our unsold stock will probably be realized

The net profit for the year was $437,493.39, after deduct- liberally for depreciation. All dividends have been paid, l 3,108 shares preferred (balance of series "B") have been eemed at a cost of $357,293.53.

ur Hundred Thousand Cases.

As this is one of the big years on the Fraser, the company l operate 14 canneries there and 10 in the north, making 24, l will prepare for a pack of about 400,000 cases. New reguons have been made by the government which, it is feared, y much disorganize the Association's methods and ret in higher prices for fish and materially affect our profits.

The city of New Westminster have terminated the lease which the cold storage is built; under the terms of the se they were entitled to do so by paying for what the Assoion had there. The amount has not been agreed, and will bably be arbitrated upon. A new plant will have to be lt, for which an engineer is now drawing plans and specitions.

The plants are all in good repair and condition, except on the Skeena River, which have been damaged consider- by ice. Repairs will be made as soon as piling and lum- can be obtained.

◆

The directors of the Canada Foundries and Forgings, nited, have decided that, for the current year, dividends on ferred stock, subject to their being earned, shall be pay- as follows: On May 15th, for four months' period end- May 1st. On August 15th, for three months' period end- August 1st. On November 15th, for three months' period ing November 1st.

MUTUAL FIRE UNDERWRITERS

The Mutual Fire Underwriters of Ontario met at Toronto this week. Mr. J. C. Dance, of Kingsmill, presided. Papers were read by Mr. N. A. Galbraith, of Dutton, on "The Method of Settling Fire Losses"; Professor N. H. Day, of Ontario Agricultural College, Guelph, on "Principles of Lightning and Lightning Rods"; and Colonel T. R. Mayberry, M.P.P., of Ingersoll, delivered an excellent address on "Power in Farm Barns, Gasoline and Electrical." Other important subjects were taken by such well-known men as Mr. Frank Haight, of Waterloo; Mr. William Purves, of Columbus; and Mr. A. R. Boswell, K.C., Superintendent of Insurance. The remainder of the session was taken up with appointment of committees and routine business.

The election of officers for the ensuing year resulted as follows:—President, Mr. J. C. Dance; vice-president, Mr. Thomas Hoskin; second vice-president, Mr. E. D. Mitten; secretary-treasurer, Mr. J. J. Stewart; assistant-secretary, Mr. W. J. Willoughby; auditors, Messrs. W. G. Henderson, W. A. Galbraith; executive committee, Messrs. J. N. McKendrick, U. G. Chisholm, Jas. McEwing, Wm. Purves, W. S. McKercher, and Geo. Miller.

◆

WINNIPEG ELECTRIC RAILWAY COMPANY

Winnipeg Electric Railway's annual report was somewhat eagerly awaited by many to see how its progress had been affected by the competition received during the year. The net earnings of the company during the past year were $1,761,236 and this satisfactory result was obtained in spite of the competition for the supply of power by Winnipeg's municipal plant. The net earnings of the company for the four previous years follows:—

1908	$1,117,222
1909	1,303,066
1910	1,629,508
1911	1,928,782

It will thus be seen the effect has been small and that the company has held its position well.

After providing for the percentage on earnings accrued to the municipal authorities and interest on bonds, the directors declared four quarterly dividends, amounting to $720,000, leaving a surplus of $474,463, which has been transferred to the credit of profit and loss account, making a total credit to this account to December 31st, 1912, of $2,091,236.37. The company's assets amount to $19,343,757 and are appended herewith:—

Cost of property: street railway, buildings, plant, and equipment; electric lighting, plant and equipment; electric power, plant and equipment; gas, buildings, plant and equipment	$18,217,689.23
Stores	244,602.54
Accounts Receivable	218,745.64
Cash on hand in office	13,807.26
Conductors' Working Fund	10,642.85
Subsidiary Companies	638,270.16
	$19,343,757.68

During the year the company in pursuance of its active and aggressive plan of extensions laid 9,235 miles of track, 33 motor cars were constructed. In the electric lighting and power distribution system 1,852 new poles were used and 409,066 pounds of wire, with 114 transformers. A transmission line 4½ miles long was constructed, and three motor generator sets were installed. The 1,478 new services were supplied by the gas system, and 79,890 feet of gas mains laid together with increased equipment at the gas works.

The officers and directors of the company are as follows:—Sir William Mackenzie, president; Sir William Whyte, vice-president; Mr. F. Morton Morse, secretary-treasurer; Sir W. C. Van Horne, Sir D. D. Mann, Mr. D. B. Hanna, Mr. A. M. Nanton, Mr. Hugh Sutherland, Mr. R. J. Mackenzie. Mr. Wilford Phillips is manager of the company.

◆

The directors of Western Canada Flour Mills Company, Limited, have declared a dividend of two per cent. for the three months ending 28th February, 1913, payable 15th March, 1913.

The Havana Electric Railway Company's gross earnings for the week ending February 23rd, were $5,394, an increase of $4,610, and from January 1st, $117,267, an increase of $46,110.

BRITISH COLUMBIA

Development on Vancouver Island—Trade Proposals—Railways are Being Hurried

(Staff Correspondence.)

Vancouver, February 24th.

Conditions on Vancouver Island are, perhaps, better than in any other part of British Columbia. One hears little of the coal mining town of Nanaimo, and a visitor gets considerable of a surprise when he visits the spot where the first settlers landed in the Nanaimo district sixty years ago. The building permits of last year amounted to over $300,000. The indication is that during the present year the permits will show another large increase, for houses are at a premium in that city. What will add to the necessity of more houses is the fact that the Western Fuel Company is to greatly increase its working force. This company now has a big mine right in Nanaimo, extending under the harbor to Protection Island, and three shifts of men are operated. A shaft is being sunk on its Reserve mine, and the expenditure in connection with this will come close to a million dollars. It is proposed to add 1,500 men to the working force.

Nanaimo does not depend only on its coal mining, and is looking for development along other lines, in agriculture, etc. With a railway across the Island and a branch north, with a new line to come in from the south, extensive areas will be made more readily available for the many people who are looking for small holdings.

Railways and Lands.

The Canadian Pacific Railway, the Canadian Northern Railway and the Grand Trunk Pacific will all be active one way or another on the southern part of Vancouver Island. Following that will be expansion further up the Island, so prospects are good.

A few days ago Hon. W. R. Ross, minister of lands, detailed his new bill in the House. Its object is to make things easier for the bona-fide settler and the pre-empter.

There are differences in Vancouver over the Canadian Northern Railway agreement, which will shortly be voted on by the people. At the meeting of the board of trade on Tuesday last, a resolution was carried asking that the people vote against the proposition. It is not probable that the board of trade will be seriously heeded in this matter, for the agreement seems to be supported about the city.

The visit of Hon. G. E. Foster to Vancouver and Victoria en route to Austraila was taken advantage of by commercial interests in both cities. Facts were laid before him respecting grain elevators and the fishing and lumbering interests, and the minister gave the assurance that every consideration would be given British Columbia's rights regarding trade and traffic. The opportunities of prospective trade in grain via the new Panama route were pointed out, as well as what might be done with fish and lumber in Australia, particularly the latter, if preference could be secured. Much lumber is shipped to Australia, but American manufacturers on this coast are eager after the trade, and any kind of preference in the Australian market would help increase shipments from Canada.

Through the Middle of the Province.

British Columbia is giving every assistance to the Canadian Northern. By the bills just put through the legislature, the government will guarantee bonds, principal and interest, amounting to ten million dollars, so that the company may make its terminal expenditures in Port Mann and Vancouver. These bonds are to be 4½ per cents. The premier, when speaking on the second reading of the bill, told how rapidly construction was going ahead on the new railway, which is expected to be completed within a twelvemonth. In view of the assistance to be given by the province, it will have a first mortgage on the railway lines, and also on the terminals, as security.

Rapid construction of the Pacific Great Eastern is also promised, and it is stated that Fort George will be reached in two years. The route of this railway has been changed, and it will run some distance west of the Fraser River through a better country than was the route first proposed. It is hardly probable that the new line will be completed to Fort George in two years. If there should be a mid province line inside of two or three years, it would gladden the hearts of many people, not only of those who have interests in the northern interior, but also of those who look with favor on the excellent land in the valleys between Howe Sound and Fort George.

◆

Mr. J. G. Sullivan, chief engineer of Western lines of the Canadian Pacific Railroad, has stated that tenders are being called to close April 15, for a great tunnel 28,000 feet long to cut through the Roger's Pass Hill.

FARMERS BANK REPORT

Blame Placed on Management — Granting of Certificate

"The subsequent management of the affairs of the bank was characterized by gross extravagance, recklessness, incompetency, dishonesty and fraud, and has resulted in the entire loss of the paid up capital and the whole of the deposits, and, after allowing for all that can be extracted from the shareholders on their double liability, a loss amounting to no less than $1,806,437, making a record unparalleled in the history of any bank in Canada, or, as far as I am aware, in any country," is the summing up of Sir William Meredith in the report of the Farmers Bank.

The report begins with a brief history of the organization of the bank prior to the application for a certificate. The commissioner states that it appears from the minutes of the original directors that what was intended was to sell the charter of the bank to Travers and to put him in control of its organization and business, and that the provisional directors should abdicate their functions and act in accordance with his directions.

Was Unjustifiable and Inexcusable.

In regard to the securing of subscriptions by shareholders the report says that there was no doubt that the main reason for accepting promissory notes was that Travers might be enabled by means of them to raise money to make up the necessary cash deposit required to satisfy the treasury board. Of the $250,000 represented to the Finance Department as having been paid in actual cash by the subscribers, $100,000 had been borrowed on the security of promissory notes made by applicants for shares. The action of the provisional directors in this connection, the report says, "was unjustifiable and inexcusable."

The report briefly reviews the evidence given as to the warnings made concerning this irregularity, and finds that the Finance Minister had met them merely by asking for an assurance from Travers that the notes of subscribers were not used to raise money for the deposit with the Treasury Board.

No Power to Recall.

In regard to the protest of the Bankers' Association after the certificate had been granted, the report says that once the certificate had been granted the Finance Department or the Treasury Board had no power to recall it.

"My conclusions as to these matters," add Sir William, "are: (1) That while it is probable that Travers thought that the giving of the credit which he gave to the company would result in such influence as the company could bring to bear upon the provincial treasurer to induce him to make deposits with the bank being used, and that Greenwood knew that Travers so thought, and promised to use that influence, there was nothing in the nature of an agreement that, as a consideration for giving the credit, influence would be used; and there is no reason for thinking that had the promise not been made the credit would not have been granted.

Thought Property of Much Value.

"(2) That if any such promise was made it was not communicated to the Provincial Treasurer, and that he was not made aware that it had been made, and that in making deposits with the bank he acted with nothing in view but the public interest and the making of a fair distribution of government deposits between the banks carrying on business in Toronto. I may add that since the inquiry was entered on, the whole of the indebtedness of the company to the bank has been paid

"It is proper also to say, in conclusion, that Travers appears to have thought the Keeley mine a property of immense value, and that by the sale of it all losses which had been incurred would be met, and that he appears to be still of that opinion."

◆

The annual meeting of the shareholders or the Paton Manufacturing Company was held at Montreal, when the statement presented proved to be of a satisfactory character. The dividend declared was at the rate of six per cent. per annum. The following were elected directors:—Mr. John Turnbull, president and managing director; Hon. Robert Mackay, vice-president; directors, D. Forbes Angus, Jonathan Hodgson, George Hyde, C.A., George M. Loy, Lieutenant-Colonel Frank S. Meighen, Robert Reford, Lord Strathcona and Mount Royal.

Both France and England now have for investment in publicly issued securities sums of upwards of £200,000,000 per annum, and it is apparent that both countries this year will find no difficulty in investing their great savings to unusual advantage. It has also to be borne in mind that Germany is a great lending country, and will doubtless employ its capital in great part in providing for the financial necessities of Austria and of Italy, which will call for large sums, as well as in participating in the loans to the Balkans, writes Sir George Paish to the Statist from Paris.

DECREASED PRODUCTION OF IRON ORE

hown in World's Returns—United Kingdom, United States and Germany Extract Seven-ninths of Total

An interesting white paper was recently issued by the itish Government, containing statistics of the production d consumption of iron ore and pig-iron and the production steel in the United Kingdom and the principal foreign untries in recent years, with additionally the imports and ports of certain classes of iron and steel manufactures. states that the combined output of iron ore in the ten incipal countries dealt with exceeded in 1910 139 million ns, and if the output of the minor countries be added it is obable that the world's total production during that year s about 145 million tons. Complete statistics are not yet ailable for 1911, but the provincial figures show that the rld's total output is unlikely to reach more than 120,000,- tons, the United Kingdom's production figures, however, owing a slight increase.

orld's Supply of Manganese.

The total world's supply of manganese ore in 1910 was out 1,900,000 tons, whereas the available figures for 1911 ow an output of about 1,634,000 tons or a decrease of 266,- tons. Statistics from Spain, France, Greece and Turkey ve, however, not yet come to hand, but it seems doubtful even with these additional figures the 1911 return will ual that for the previous year.

The total quantity of pig iron produced in the world dur- g 1911 is estimated at about 63,000,000 tons, the principal oducing countries being the United States, Germany, and e United Kingdom, which between them account for about ven-ninths of the world's output. Particulars for the first lf of 1912 show that the output of pig iron for the five incipal producing countries during that period was about ,400,000 tons, which compares with 27,600,000 tons during e second half-year of 1911. For the second half of 1912 e United States produced about 15,600,000 tons of pig iron, rmany 9,277,000 tons and Belgium about 1,203,000 tons.

mbined Steel Output.

The combined output of steel in the United Kingdom, rmany and the United States in 1911 exceeded 45 million ns, whilst the world's output is estimated at between 59 d 60 million tons. A comparison of the approximate out- ts of the chief producing countries shows that the United ates produced in 1911, 23,676,000 tons, Germany 14,778,000 ns and the United Kingdom 6,565,000 tons. A noteworthy ature of the returns is the increase of about 24 per cent. in rmany's steel output, whereas that of the United Kingdom d the United States remains practically stationary.

◆

ONTARIO'S SALT SUPPLY

The brine wells of the south-western peninsula of On- rio last year yielded 88,689 tons of salt, the value of which s $430,835. In 1910 the output was 84,071 tons, worth 4,978. The industry gave employment to 216 workmen, ose wages amounted to $121,477. There is a steady de- and for this staple article, mainly for preservative pur- ses connected with food products, etc., but this demand easily satisfied and does not seem to be increasing. Its quirements are small in comparison with the abundant pplies of raw material, which is present in enormous quan- ies. Salt constitutes the basis of a number of products great importance in the industrial arts, connected with e or other of the elements composing it. From chlorine ay be built up hydrochloric acid, bleaching powder and a riety of other articles, while the compounds of sodium, ch as carbonate and bi-carbonate of soda, sodium nitrate, c., play perhaps even a larger part in manufactures, states e statistical review of the Bureau of Mines, compiled by r. T. W. Gibson, Deputy Minister of Mines. A plant for e manufacture of caustic soda and bleaching powder from lt was established at Sandwich by the Canadian Salt Com- ny, and began operations during the last week of 1911. me inquiry has also been made on behalf of a European m of explosives manufacturers as to the availability of salt pplies required for the sodium nitrate used in making eir product, which is finding a market in the mines at balt.

About one-half of the salt made in Ontario is produced the Canadian Salt Company, whose plants are at Windsor d Sandwich. Other makers are the Dominion Salt mpany, Sarnia; Western Canada Flour Mills Company, derich; John Ransford, Stapleton; Ontario People's Salt d Soda Company, Kincardine; Gray, Young & Sparling, ingham; the Western Salt Company, Mooretown; Parkhill lt Company, Parkhill; the Elarton Salt Works Company, rwick; Exeter Salt Works Company, Exeter.

The workmen employed at the salt wells and works mbered 216, and their wages amounted to $121,477.

MINERALS AND MANUFACTURES

Recovery of Cobalt—Northern Aluminium Company Antimony Production

Cobalt is an important constituent of the silver-cobalt-nickel-arsenides of Coleman and adjacent townships, more familiarly known as the Cobalt district, Province of Ontario, and these ores are now said to be the principal source of the world's consumption of cobalt.

With respect to the greater part of the ore shipped in which silver is the chief constituent of value, the purchasing smelters make no allowance for the cobalt content, and the mine owners, therefore, receive nothing for the cobalt.

The recovery of cobalt in Canada so far has been confined to the production of cobalt oxide and mixed cobalt and nickel oxides, by the Coniagas Reduction Company and the Deloro Mining and Reduction Company. During 1911, according to direct returns, there were produced 154,174 pounds of cobalt and nickel oxides and 1,260,832 pounds of cobalt material and mixed oxides of cobalt and nickel, the total value of all these products being $221,690.

No information is available as to the quantities recovered from ores shipped to smelters outside of Canada.

It is also estimated that the total ore shipments from Cobalt during the past eight years have contained upwards of 5,901 tons of metallic cobalt.

Imported Eighteen Million Pounds.

No commercial ores of aluminium have as yet been found in Canada. Aluminium is, however, made in extensive works at Shawinigan Falls, Que., from bauxite ores imported from France, Germany, and the United States, by the Northern Aluminium Company. A wire mill for the manufacture of aluminium wire and cables is also operated by the same firm.

There being but one firm engaged in the manufacture of aluminium, we are precluded from publishing statistics of production.

Imports of alumina, which probably includes bauxite, and exports of aluminium, are, however, published in the reports of the Department of Customs.

During the twelve months ending December 31st, 1911, the imports of alumina were 18,607,200 pounds, or 9,304 tons, while the exports of aluminium in ingots, bars, etc., during the same period, were 4,990,100 pounds, or 2,495 tons, besides manufacturers of aluminium, valued at $1,555. The imported alumina was valued at 2.00 cents per pound, and the exported aluminium at 14.98 cents.

Small Amount of Antimony.

A few pounds of refined antimony were produced at Trail, British Columbia, in 1911, but beyond that there was no production from Canada. The West Gore Antimony Company did not operate during the year.

The total production of antimony in 1910, as reported to this Branch, consisted of 364 tons of antimony concentrates, valued at $13,906, shipped from West Gore, Nova Scotia. In 1909, in addition to the shipment of 35 tons of concentrates, there were produced about 61,200 pounds of antimony metal chiefly at the works of the Canadian Antimony Company, Limited, at Lake George, New Brunswick, a small recovery being also reported from the Consolidated Mining and Smelting Company's refinery at Trail, B.C.

In 1908, customs returns showed an export of 148 tons of antimony ore valued at $5,443.

In 1907 the production was 2,016 tons of antimony ore shipped, valued at $65,000, and 63,850 pounds of refined antimony, valued at $5,108.

In British Columbia, some of the lead ores contain a small percentage of antimony—about one-third of one per cent.—and some refined antimony was recovered at Trail in 1907 and 1909, the recovery being somewhat irregular.

The auriferous antimony property at West Gore, Hants County, Nova Scotia, formerly operated by the Dominion Antimony Company, Limited, was taken over in July, 1909, by the West Gore Antimony Company.

The mine and works of the Canadian Antimony Company, Limited, at Lake George, New Brunswick have not been in operation since 1909.

◆

The Canadian Accountants' Association Bill was passed by the private bills committee at Ottawa. Representative interests are included among the officers and directors of the association as follows: Hon. president, Mr. J. Leslie, comptroller Canadian Pacific Railway; president, Mr. H. R. Mallison, secretary-treasurer Imperial Trust Company and Canada Light and Power; vice-president, Mr. W. W. Finlayson; secretary-treasurer, Mr. F. A Cousins, 707 St. Urbain Street, Montreal. Directors, Messrs. E. B. Manning, J. B. Compton, Geo. Jeffries, F. A. Stewart, F. C. Lariviere, F. J. Walker, J. N. Doyle, C. A. Bourne and J. T. Smith.

MODEL "BLUE SKY" LAW

Investment Bankers' Association Has Drafted a Bill for the Benefit of Reformers

Similar difficulties respecting so-called "blue sky" laws are being experienced in several of the neighboring states as were found in Manitoba, which modelled a law after that of the State of Kansas. The law hurt not only dishonest, but also honest, financial houses. In the case of Manitoba, a conference of the government authorities, bankers, stock exchange members and others interested was held, and the law was interpreted with a moderate application. The Investment Bankers' Association of the United States has drafted a form of bill to regulate the sale of stocks, bonds and other securities, which it believes will correct the evil of illegitimate investment banking.

The form of the bill contains the following provisions:

No dealer in stocks, bonds, or other securities, shall offer for sale in the state securities by personal solicitation, letters or circulars, except to other dealers or banks, or by advertising in any periodical published in the state, until such dealer has filed with the Commissioner of Banking:

What Must be Filed.

(a) A statement under oath showing the name and principal place of business of such dealer, and the names, residences and business addresses of all persons interested as principals, officers, directors or trustees.

(b) Two certificates each signed by different persons who shall be officers of different state or savings banks or trust companies within the state, or of national banks, stating that in their opinion the dealer is of good business repute and financial standing.

(c) If such dealer is non-resident, a designation duly signed which by its terms shall be irrevocable so long as the dealer shall in this state do any of the acts named in this section, designating a resident agent, or the Commissioner, attorney for the dealer for the service of any legal process.

Offering of Securities.

By an order directed to any such dealer the Commissioner may require such dealer, whenever he shall offer any security or securities in this state, except to other dealers and banks, to file with him a statement showing the securities so offered, and the commissioner may by such order require such dealer to mail to him, as soon as any copies are so mailed or shown to any prospective purchaser in this state, a copy of all printed or otherwise reduplicated circulars of any securities the dealer shall offer for sale in this state, including a copy of all advertisements thereof. The commissioner may limit such an order to securities of any particular class or character on which he may deem such information necessary.

The commissioner may at any time order a dealer to file with him evidence, including a statement under oath of assets and earnings or other information in relation to any security the dealer is offering for sale, sufficien to show that the offering or invitation has been and is being made honestly and in good faith, and with disclosure of pertinent facts sufficient to enable intending purchasers to form a judgment of the security. Unless such evidence is filed and is sufficient, as stated, the commissioner may order the dealer not to offer the security for sale.

Violation of Provisions.

Any dealer or agent of a dealer wilfully violating the provisions of this act upon conviction thereof shall be punished by a fine and if such violation is with intent to defraud, by imprisonment.

Dealers have the right to appeal to the courts from the order of the commissioner.

This model bill, which is being distributed to the members of the American Bankers' Association, exempts from its scope Federal, state, municipal and corporation bonds which are legal investments for savings banks in Massachusetts, Connecticut and New York. These eliminations are given as merely suggestive, and it is thought that they might be carried further with a view to concentrating the force of the law upon new or uncertain securities.

As the success of underwriting transactions may depend on secrecy, the bill is drawn so that securities offered only to dealers or banks are exempted.

◆

The Burrard Westminster Boundary Railway and Navigation Company will apply to the Dominion Parliament for an extension of time for completion of the railway; for authority to increase the capital stock from $1,000,000 to $[illegible] and for the extension of the limit of the securities authorized to be issued, increasing the same from $[illegible] to $[illegible] per mile.

CAPITAL REQUIREMENTS OF CITIES

Greater Returns Demanded by the Investor—Among Borrowing Cities

The latest example of American firms purchasing Canadian bonds is the purchase of $1,000,000 of Toronto's four per cent. bonds due July 1st, 1922, by Messrs. N. W. Harris and Company, of Montreal and Boston. This firm will offer the bonds immediately in London, Montreal, Toronto and various large American cities at 93¾ to yield 4.7 per cent. This is the lowest price at which Toronto bonds have sold in twenty years, except during the panic of 1907

Calgary will likely have $4,000,000 debentures for sale this year. Much money has been borrowed on the security of the by-laws already passed, and of these unsold bonds total $2,241,000. This amount is made up as follows:—Unsold from the last debenture sale, $676,000; thirty-year general for purposes provided for in by-laws passed 1912-13, $1,338,000; twenty-year general debentures of 1912 and 1913, $227,000.

In addition, there will be about $2,000,000 in local improvement debentures which are not made up yet. The above do not include the bridge by-law for $900,000, nor $400,000 for electric light extensions, and $165,000 for police stations, both of which latter are being advertized and will be voted on shortly by the ratepayers. On the security of the debentures unsold the city obtianed $175,000 last month, and they are negotiating with the bank for a further advance on this security.

Regina's indebtedness for local improvements amounts to $4,528,289.47. Debentures were issued by the city as far back as 1891, and the date of maturity for some extend to 1952. According to the annual financial statement payment on one debenture issued in 1894 falls due next year. This is for $20,000 issued on the fire hall.

Would Have to Pay.

Presiding at the Anglo-Canadian Finance Company's meeting in London, Mr. J. R. Tennant, a director, referred to the recent unsatisfactory response to Canadian issues in London. "The immense competition for Canadian Government and municipal loans by British financial houses," he said, "was entirely responsible for alleged over-borrowing." Canada had thereby been able to borrow money on the most favorable terms. But he assured the shareholders that competition was now at an end and Canadian cities, except perhaps those of the highest rank, would in future have to pay at least five per cent., which would undoubtedly be considered a reasonable rate with satisfactory security.

It is the opinion in the Canadian section of the London banking fraternity that London is not turning its back to fresh offerings of Canadian municipal bonds. It is true, she will finance the issues only on a higher income basis, demanding 5 per cent. and over instead of 4 to 4¼. There has naturally followed a let-up in such flotations. But it cannot be connected with any discrimination against the borrowers' credit.

Canada is feeling the effect, with the rest of the borrowing world, of the tendency of the investor to ask greater returns. Coupled with this is the congested condition of the London security market.

From all Parts of the World.

As a result of the money tension, numerous issues originating in all parts of the world have signally failed of public allotment and underwriters have been compelled to carry large portions of them.

There is no denying that Canadian municipalities have made heavy drafts on London's savings. They have not, taken as a whole, overstepped the bounds of prudence. The country is expanding in all directions at a prodigious rate. The annual increment of 400,000 souls to her comparatively small population of 8,000,000 affords a fair index of growth. Her capital needs, present and future, are growing commensurately. Generally speaking, values have not taken on inflated proportions. The real estate speculation, sometimes pointed to as justifying some misgiving in regard to Canada's credit, is being kept within limits. To this the traditionally conservative policy of the banks has contributed in no small measure.

Two offers were made for the $7,750 6 per cent. 15-year sidewalk debentures of Ladysmith, B.C. The issue was awarded to Mesrs. C. H. Burgess and Company, Toronto.

Six offers were received for the Sackville, N.B., $23,000 5 per cent. parks, fire, waterworks and permanent streets debentures. The award was made to Messrs. J. M. Robinson & Sons, of Halifax.

◆

The Casualty Company of Canada will apply at the present session of the Dominion Parliament for an act to extend the time within which it may apply for and obtain a license from the Minister of Finance.

EXPRESS COMPANIES' OPERATIONS

how Increases in All Departments — Details of Financial Paper Business

The capital liability of distinctly Canadian Express Com- es, on June 30, 1912, was $4,705,200. There was an in- se of $700,000 as compared with 1911, due to an ad- n of that amount to the capital stock of the Canadian hern Express Company. The total was made up as ws:—

Canadian Express Company	$1,705,200
Canadian Northern Express Company	1,000,000
Dominion Express Company	2,000,000
Total	$4,705,200

In addition to the foregoing, which was represented en- y by common stock, the Dominion Express Company re- ed a liability under the head of funded debt amounting 40,000.

The cash realized from the above issue of common stock put down at $2,865,200. With the exception of $205,200 sted by the Canadian Express Company for real property equipment, it does not appear from the reports received t disposition was made of the remaining capital. It is r, however, that it has not been used for the providing nything tangible in connection with the express business.

Property and Equipment Cost.

The total cost of real property and equipment was re- ed at $2,668,523.82—an increase of $558,966.49 over . This was all for Canadian companies, and, with the ption of the $205,200 to which allusion was made in a eding paragraph, seems to have been wholly provided out ncome, states Mr. J. L. Payne, comptroller of statistics he latest report on Express statistics. The items are as ws:—

estate used in operation		$ 760,200.00
dings and fixtures		1,148,965.94
Equipment:—		
ses	$160,226.26	
icles	219,590.19	
er equipment	379,541.43	759,357.88
Total		$2,668,523.82

The operating mileage in Canada as returned for the was 30,445, as compared with 27,585 in 1911.

In addition 19,120 miles was reported as attaching to ide operations chiefly in connection with ocean going mers.

rating Expenses and Receipts.

The gross receipts from operation in 1912 were $10,- 418.10. They were $9,913,018.31 in 1911.

A deduction of $4,892,242.49 for express privileges—that he amount paid by express companies to railway, steam- and stage lines for the carrying of express matter—left 02,175.61 as the operating revenue for the year.

Operating expenses—a thing quite apart from express ileges—had a total of $4,880,120.00. This left a net ating revenue of $1,222,055.61, to which was added a net nue of $28,440.91 from outside operations, bringing the l up to $1,250,496.52. A deduction of $87,488.58 for s left the net revenue for 1912 at $1,163,007.94.

So far as Canadian companies were concerned the actual revenue, after deducting taxes, was as follows:—

adian Express Company	$283,281.33
inion Express Company	645,288.94
adian Northern Express Company	192,496.25

rly Five Million Increase.

The business done by express companies in financial er during the year 1912 amounted to $56,995,122.78, which $4,829,270.21 greater than for the preceding year. The ils are as follows:—

	1912.	
Financial Paper.	Number.	Amount.
ey orders—domestic	$3,330,997	$45,620,681.99
" " foreign	99,022	2,698,796.91
vellers' cheques—domestic	45,432	1,279,085.66
" " foreign	41,307	1,051,621.00
.D. cheques	....	5,514,821.50
egraphic transfers	....	182,770.07
ters of credit issued	....	142,166.30
er forms	....	505,179.35
	$3,516,758	$56,995,122.78

The number of offices at which financial paper was avail- in 1912 was 6,238. As the total number of express of- in the Dominion was 2,915, it will be seen that the busi- in express financial paper finds numerous outside nnels.

MESSAGES BY THE MILLION

Were Sent Over Canadian Telegraph Lines—Classes of Wire Used—Total Mileage

Canadian telegraph interests have strung nearly two hundred thousand miles of wire over which in one year were sent ten million messages, is shown in the report on telegraph statistics, prepared by Mr. J. L. Payne, comptroller of of statistics. It was not practicable to assign wire mileage to cable lines; but with respect to land lines the figures disclosed by the various reports received represented a total of 168,017.23 miles. This mileage of wire was divided into the following classes:—Galvanized, 116,974 miles; copper—overhead, 50,100 miles; copper—underground, 254 miles; copper—submarine, 689 miles.

There were also reported 36,218 miles of wire, chiefly copper, as being devoted to multiple operation—that is, the duplex and the quadruplex systems. It is not clear, however, that such mileage is actually over and above the figures in the following table.

Average Four Wires Per Pole.

The pole mileage amounted to 40.785. Having regard to the wire mileage, it would seem that each pole represented an average of a little over four wires

The pole and wire mileage was divided up among the provinces as follows:—

Province.	Pole mileage.	Wire mileage.
Nova Scotia	2,828	9,878
New Brunswick	1,867	8,376
Prince Edward Island	14	14
Quebec	7,515	24,249
Ontario	10,514	58,207
Manitoba	3,803	18,184
Saskatchewan	5,382	21,257
Alberta	2,895	14,491
British Columbia	3,467	10,571
Yukon	2,498	2,713
Total	40,785	167,939

The discrepancy of 78 miles between the wire mileage given in a preceding table and the foregoing arose from the impracticability of classifying that number of miles of cable in two of the reports.

Public Service in Canada.

It is manifest that the mileage assigned to Prince Edward Island is wholly inadequate. The reason for the low figures reported is found in the fact that the land lines in that province are almost wholly owned and operated by the Anglo-American Cable Company. Cable companies did not, for obvious cause, report any wire mileage.

The public service of telegraph companies operating in Canada was represented in the transmission of 9,252,540 land messages and 768,559 cablegrams for the year ended June 30, 1912.

◆

FEDERAL LIFE ASSURANCE COMPANY

The net premium income of the Federal Life Assurance Company of Canada during 1912 was $900,961, being an increase over the previous year of $80,909. The total cash income amounted to $1,164,665, a gain over 1911 of $130,808. In the matter of expenditures, the payments to policyholders during the year amounted to $436,176.51, exceeding those of 1911 by $118,339.53.

The percentage of general expenses to premium income showed a reduction of 3.4 per cent. The actual expenditure was less than in 1911, despite increased business in force and larger new business written.

The applications for new insurances for the first time exceeded $5,000,000, amounting to $5,023,638. The new insurances issued and insurances revived amounted to $4,819,129, making the total insurances in force at the end of the year $25,555,267.

The total assets at the end of the year amounted to $4,887,616.95, being an increase during the year of $440,648.30. The average rate of interest earned on the invested funds showed an increase over the preceding year of 25 per cent., and now exceeds 6 per cent.

The following table reveals at a glance the progress of the company during the past three years:—

	1912	1911.	1910.
Insurance in force December 31st	$25,555,267	$23,887,141	$22,300,920
Insurance issued and revived	4,819,129	4,656,265	3,757,065
Income	1,164,665	1,033,857	951,054
Reserve for protection of policyholders	4,406,130	4,046,326	3,681,001

NEWLY CHARTERED COMPANIES

Eastern Amusement Company Has Largest Capital This Week—Two Security Corporations

The total capitalization of the 88 companies receiving charters this week is $13,773,000. Four of them have a capital of $1,000,000 and over. They are as follows:—

Marcus Loew's Theatres, Toronto	$1,750,000
British Canadian Securities Corporation, Toronto	1,000,000
E. D. Smith and Son, Winona, Ontario	1,000,000
North American Securities and Loan Corporation, Winnipeg	1,000,000

Grouping the new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	No of Companies.	Capitalization.
Quebec	31	$3,881,000
Ontario	21	5,210,000
Saskatchewan	21	1,592,000
Manitoba	15	3,090,000
Total	88	$13,773,000

The following is a list of charters granted during the past week in Canada. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Battleford, Sask.—Battleford Motors, $10,000.

Marques, Sask.—Northern Hotel Company, $15,000.

Fort Qu'Appelle, Sask.—Blackfoot Coal Company, $96,000.

Humboldt, Sask.—Kerr and Adams Manufacturing Company, $50,000.

Outremont, Que.—Pariseau Press, $400,000. H. Pariseau, Z. Pariseau, M. Labonte.

Quebec, Que.—Quebec Model City, $500,000. T. Rinfret, J. E. Billette, A. R. W. Plimsoll.

London, Ont.—Gray's, (dry goods), $40,000. J. Gray, Mrs. M. E. Gray, Miss L. E. Gray.

Waterloo, Ont.—Waterloo Club, $30,000. E. Frowde Seagram, W. G. Weichel, S. B. Bricker.

Hamilton, Ont.—Garlock Packing Company, $200,000. A. C. Pulver, A. R. Bell, S. F. Washington.

Prince Albert, Sask.—St. Alban's College, $50,000. Bonas Brothers Construction Company, $100,000.

South Porcupine, Ont.—Union Coal Company, $60,000. D. H. Quinn, A. E. Phillips, Mrs. A. M. Quinn.

Tilbury, Ont.—Anglo-American Land Company, $35,000. C. E. Knister, E. Knister, P. J. Forbes, Comber.

Grand Mere, Que.—Compagnie de Prets et Construction, $20,000. M. Cossette, C. Levack, J. H. Desroches.

Saskatoon, Sask.—Country Club of Saskatoon, $75,000. Western Properties, $50,000. Hill Agencies, $50,000.

Lachine, Que.—Miller and Company, (departmental store), $100,000. A. R. Hall, G. C. P. Couture, L. Fitch.

Berdin, Ont.—Roman Catholic Cemetery Board of Berlin and Waterloo. J. B. Fisher, Rev. H. Aeymans, E. Dehler, Waterloo.

Maisonneuve, Que.—Dejardins and Gelinas, (builders), $20,000. P. Desjardins, Maisonneuve; A. Gelinas, J. Clairmont, Montreal.

Winona, Ont.—E. D. Smith and Son, (food products), $1,000,000. E. D. Smith, A. A. Smith, Saltfleet Township; Miss G. Smith, Hamilton.

Brandon, Man.—W. G. Downing, (boots and shoes), $200,000. J. A. McAndrew, G. H. Kilmer, W. H. Irving. Boyd Electric Company, $50,000. O. L. Boyd, L. A. Boyd, Mrs. O. L. Boyd.

Quebec, Que.—New Liverpool Real Estate Company, $120,000. J. T. Ross, A. C. Dobell, St. Colomban; H. Ivers, Quebec. Companies de Charbons Independente, $49,000. L. N. Petit, L. Picard, F. X. E. Proulx.

Moose Jaw, Sask.—Moose Grain Company, $50,000. Canadian Incandescent Light and Stove Company, $76,000. Hammond Stationery Company, $25,000. Rex Press, $25,000. Moose Jaw Aerated and Distilled Water Company, $30,000.

Ottawa, Ont.—Pure'o Water, $25,000. L. W. Whitney, H. B. Shore, F. H. Mills. Eastern Canada Lumber and Pulp Company, $50,000. G. F. Perley, A. B. Rowan-Legg, R. W. Dawson. Crain Printers, $100,000. R. L. Crain, H. A. Crain, R. S. Crain.

Regina, Sask.—Capital Motor Company, $60,000. Financiers, $100,000. Cumberland Land Company, $100,000. Industrial Realty, $40,000. Regina Unit Brick Company, $50,000. Pearts Investment Company, $500,000. Regina Heating and Sheet Metal Company, $50,000.

Toronto.—Caledonian Investments, $40,000. W. Goodwin, T. M. Mulligan, T. Jones. Central Social Club, $10,000. S. Factor, J. Goodman, M. Goodman. W. B. Proctor and Company, $50,000. H. E. McKitrick, H. Riley, W. R. Anderson. Consumers' Box and Lumber Company, $500,000. H. T. Canniff, P. R. Morris, W. J. Quirmbach. Canadian Lautz Marble and Tile Company, $40,000. A. Lautz, F. J. Lautz, F. E. Allen. Collett-Simpson Fibre Tires, $100,000. N. Collett, C. Collett, F. Le R. Cook. British Canadian Securities Corporation, $1,000,000. W. N. McEachren, W. Le R. McEachren, E. Pepler. Economist Cloak and Suit Company, $40,000. W. J. Brown, J. H. Winters, W. S. Ball. Marcus Loew's Theatres, $1,750,000. J. F. MacGregor, E. Bristol, G. W. Morley. Contracting and Securities, $100,000. W. B. Fleming, E. F. Kift, F. C. Allen. Engineering Specialities Company, $40,000. D. Henderson, W. H. McGuire, G. F. Rooney.

Winnipeg, Man.—Canadian Rotary Engine Company, $500,000. J. McKechnie, W. Brydon, J. F. Stuart. Art Publication Society, $150,000. F. E. Hawkins, G. C. Lindsay, G. Norton. Manitoba Development Company, $100,000. G. F. de C. O'Grady, C. A. Crawley, G. S. Rutherford. Sandy Hook Realty Company, $150,000. R. F. Rorke, H. J. Barnes, J. Brockest. North American Securities and Loan Corporation, $1,000,000. J. Saul, H. A. Walley, J. L. Davis. International Loan Company, $500,000. M. E. Shants, M. W. Argue, G. A. Elliott. Ashley Land and Investment Company, $100,000. A. Bright, F. E. Weldon, J. A. McKerchar. Century Investment Corporation, $100,000. T. R. Slagsvol, G. M. Graham, G. A. Davidson. Harrow Investment Company, $100,000. H. Meckling, A. D. Campbell, J. Geddes. Home Builders, $20,000. O. Crawford, G. D. MacVicar, H. W. Clark. Dominion Wheat Lands, $50,000. A. W. Wilcox, F. G. Warburton, C. W. Jackson. E. V. Tomlinson and Company, (sporting goods), $20,000. E. V. Tomlinson, D. Jillson, A. E. Guedel, Indianapolis. Hambly-Semmens Furniture Company, $50,000. C. H. Manahan, P. C. Locke, W. B. Semmens.

Montreal, Que.—Bernard Kleker and Company, (gener merchants), $50,000. A. H. Duff, W. A. Merrill, H. F Walker. Miller Brothers and Sons, (founders), $250,00 W. de M. Marler, L. H. E. Cholette, J. A. Maucotel. Jacque Cartier Construction Company, $500,000. S. W. Jacobs, A R. Hall, G. C. Papineau-Couture. Metal Products, $25,00 G. L. Kavanagh, A. Ellison, J. Whittsell. Vosberg's, (dr goods), $150,000. H. J. Trihey, E. Lafontaine, P. Bercovitch J. A. Hurteau and Company, (musical instruments), $50,0 J. A. Hurteau, J. J. Marchand, A. Lapierre. Eagle Publishing Company, $45,000. A. R. Hall, S. W. Jacobs, L. Fitch Belgo Canadian Marble and Power Company, $500,000. N Turcot, A. Ecrement, L. Loranger. Process Engineers, $100,000. J. W. Cook, A. A. Magee, T. B. Gould. L. M. Lefebvr (wholesale grocers), $250,000. L. M. Lefebvre, P. O. Lef bvre, A. Lefebvre. Montreal Hay Company, $50,000. W. G Mitchell, R. Chenevert, F. Callaghan. Rice Studio, $50,00 E. G. S. Rice, F. L. R. Shaw, C. P. Rice. Self Acting Pum Company, R. Chenevert, F. Callaghan, H. L. Mitchell. I don and North British Corporation, $40,000. E. E. Howar J. ◆

The British Colonial Fire Insurance Company and th Great North Insurance Company have been registered i Saskatchewan.

Mr. Howard E. Ridout, of Toronto, has been named the chief agent for the Dominion of Canada of the Ne American Accident Insurance Company, whose headquar are at Toronto and not at Montreal, as was stated in la week's issue of this journal.

DAILY FINANCING AT WALL STREET

der Ordinary Stock Market Conditions Day Loans Are Estimated at One Hundred Million Dollars

The New York banks that make day or clearance loans stock exchange brokers and which have always supposed the loans were secured by the stock taken up or "clear- by means of them are put in the position, by a decision he United States Circuit Court, of having no security for h loans, aside from such deposits as the brokers may e with them, except the brokers' general credit. No ney is actually paid out by the banks on these loans unless broker fails, so that the effect is that the only time when y have occasion to fall back on the brokers' credit is the y time at which he has become bankrupt.

Clearance loans, explains the New York Times, are en- ly distinct from the call loans made to brokers on the Stock hange, which are in all cases secured by collateral. The in which clearance loans arise is this:

ntracts of Purchase and Sale.

A broker buys and sells many shares of various stocks ing the day. His contracts both of purchase and sale st be consummated the next morning. He must pay for stock he has bought and deliver the stock he has sold. e stock he has sold is largely pledged as collateral to se- e his ordinary loans or it has been bought by him from er brokers from whom he must take it and whom he must . He must, therefore, obtain enough money or credit to the stock into his possession, when he will be in shape deliver it to those to whom he has sold it, or, if he has not d it, to pledge as collateral for new loans.

nsactions Must be Completed.

The broker, therefore, obtains from his bank authority ssue checks, which the bank certifies, with which he pays the stock he has bought, and takes up the stock he has dged for regular loans. This done, he delivers such stock he has sold, and pledges other stock as collateral for re- ar loans. With the proceeds of these transactions he turns r to his bank enough money to offset his checks which e been certified by it.

This circle of transactions must always be completed ing the day, so that the checks certified by the bank are ays made good by 3 o'clock. The bank, therefore, pays no money of its own, but merely stands in the gap until broker can realize on his sales or loans. The necessity such an arrangement arises from the fact that he must before he is paid. While the bank pays out none of its n money, it does lend its credit, and if the broker fails to ke good his checks before the end of the day the bank to pay out of its own funds.

Formerly banks certified the checks of their broker cus- ners without regard to security, aside from their general dit, relying on them to make the checks good during the as a result of the clearance of their operations of the day ore, and as long as a broker was solvent this was done.

th Bank and Brokers Failed.

This practice, however, was simply overcertification, ich is forbidden by law. The Federal statute declares it awful for any officer of a National banking association to tify any check unless the person drawing the check has deposit with the association an amount of money equal the amount specified in such check, and makes him liable $5,000 fine or from five to ten years' imprisonment.

In June, 1901, the stock exchange firm of Messrs. Henry rquand and Company was unable to make good checks tified for it by the Seventh National Bank, and the result s that both the bank and the brokers failed. One of the icers of the bank said at the time:

"It is the veriest nonsense to blame this bank for a prac- e that obtains in every banking institution of any size in s city. It may not be strictly regular to overcertify a cus- ner's account, but everybody knows that with stock ex- inge firms it is often necessary. I venture to say that ry institution in the financial district is more or less given this practice."

y Loans Without Interest.

Several of those connected with the bank and the broker- house were indicted under the provisions of the law ntioned above, and the practice of overcertification be- unpopular with the banks. A new plan was therefore ised to take care of the needs of the brokers, and it was rights of the banks under this system that were deter- ed by the Circuit Court.

To avoid overcertification, it was necessary that the ser should have money or credit with the bank equal to amount certified. This is now done by means of making him a day loan. Such loans are made without interest are payable at or before the close of business on the day they are made. The loan is made each morning and is passed to the credit of the broker requesting it. The evidence of the indebtedness varies somewhat with the various banks. In some institutions the broker delivers to the bank a demand note. In others a mere request for the loan is made in writing, which is supplemented by a continuing loan agreement made between the broker and the bank.

The loan having been made and the credit given to the broker upon the bank's books, the broker proceeds to the transaction of the day's business, delivering his checks drawn against the proceeds of the loan thus obtained, either to pay off loans and release securities which he is under obligation to deliver or else to pay for securities which he has contracted with other brokers to receive.

Some of Methods Used.

Sometimes a broker may receive and pay for securities with the proceeds of the day loan, and, taking the securities thus acquired, make another loan upon them as collateral and use the proceeds in the further transaction of his business.

As soon as the broker delivers the securities thus released and obtains payment therefor or hypothecates securities purchased and obtains the proceeds of the loan made on them, the checks given either by the customers, the brokers, or the bank making the collateral loan, as the case may be, are deposited in the general account of the broker in the bank with which he has made the day loan.

If in the course of the day's business the broker has received and has deposited in his account checks aggregating an amount equal to or greater than the amount of his day loan, he draws against the account a check for the amount of the loan and delivers it to the bank. For this he receives his note marked paid, and the check, going through the books as a charge, is debited to his account, thus cancelling the credit of the morning and the loan thus paid.

If, on the other hand, the broker's transactions during the day have so depleted his bank balance that he has not in bank an aggregate amount sufficient to repay the loan, the broker takes securities released to him by the use of the money advanced as a day loan and negotiates a straight collateral loan with some other bank or person, or else an independent straight collateral loan is sometimes negotiated with the bank which has made the clearance loan.

Are Really Collateral.

In any event, the collateral loan being made, the broker deposits the proceeds in his account with the bank which has made the day loan, and draws his check for the amount of the day loan against his reinforced balance and delivers it to the bank.

If the broker is unable to make this collateral loan he delivers the securities taken up by him out of the proceeds of the day loan to the bank as security for his indebtedness. The banks prefer that he should make the collateral loan, if possible, rather than turn the securities over to it, for the reason that day loans draw no interest and collateral loans do.

The banks contend that under this system the securities taken up by the broker with the proceeds of the day loan—that is, by means of checks certified by the bank against his credit so established—are really collateral for the day loan, but are left in the possession of the broker in order that he may complete the sale of them and so receive funds with which to pay off the day loan. While it is necessary, they say, for the broker to have financial assistance in the shape of a day loan to pay for stocks delivered to him, it is equally necessary that he have the use of the stocks delivered to him so as to make deliveries himself, and this they permit him to do.

Bank Heard and Acted.

As in the case of overcertification this plan works perfectly, so long as the broker is solvent and cancels his day loans at the end of each day. The difficulty comes when he is unable to do so. The case before the court concerned the failure of Messrs. J. M. Fiske and Company, which went down in the collapse of the Hocking pool two years ago. On the day of the failure Fiske and Company made a day loan of $400,000 from the Mechanics' National Bank, in accordance with their continuing loan agreement. During the forenoon the bank heard rumors that the brokers were in trouble, and stopped certifying their checks. The cashier of the bank went to their offices and obtained from them securities on which it subsequently realized $175,647. Within an hour the suspension of the firm was announced.

The trustees in bankruptcy subsequently appointed brought suit against the bank for the return of the money realized on the sale of the securities it had obtained, contending that their delivery constituted a preferential payment from an insolvent firm. On behalf of the bank it was argued that these very securities were cleared or brought into the possession of the brokers by means of the day loan made by the bank, and consequently the bank had an equitable lien upon them. The Circuit Court of Appeals, however, held that this was not the case, and that the proceeds must be paid over to the trustees in bankruptcy for the benefit of all the creditors.

One Hundred Millions Daily.

So far as security for day loans is concerned, this decision leaves the banks just as they were in the days of overcertification. They are all right until a broker fails, when they are liable for the amount of the checks they have certified.

The banks have not yet decided whether the case should be appealed to the Supreme Court or whether it is possible to work out some other form of agreement with the brokers under which they would be protected against loss.

The amount of day loans made under ordinary stock market conditions is estimated at $100,000,000 a day, and without them brokers would be restricted in their operations to the amount of their own capital.

The banks, however, make no profit directly on the day loans, which bear no interest. A broker who carries a deposit balance of $10,000 is ordinarily accommodated with day loans to the amount of $50,000, although it is not unusual to extend the accommodation further. Messrs. Fiske and Company on the day they failed borrowed $400,000, although their deposit balance was less than $40,000. The banks, of course, are at liberty to loan out of the brokers' balance, less the reserve requirement, and on this they get interest.

The profit on the broker's deposit account, which is the same as the profit on any deposit account, is small in comparison with the liability the bank incurs, under the decision, in making the day loans.

◆

STANDARD BANK OF CANADA

The net profits of the Standard Bank of Canada for the past year, after making provision for bad and doubtful debts, rebate of interest on unmatured bills under discount, exchange, cost of management, etc., amount to $462,079.79, being at the rate of 21.08 per cent. per annum on the average paid-up capital for the year. This amount, added on the balance brought forward from last year, together with premium on new stock, makes the sum of $952,738.37.

This sum was distributed as follows: Four quarterly dividends at the rate of 13 per cent. per annum, $282,052.17; transferred to officers' pension fund, $12,500; written off bank premises, $25,000; transferred to reserve fund from profits, $100,000; transferred to reserve fund from premium on new stock, $429,275; balance of profit and loss account carried forward, $103,911.20; total, $952,738.37.

The bank's reserve fund now totals $3,129,275, as compared with capital of $2,429,275. An examination of the statement of liabilities and assets shows the bank to be in a strong position. Branches and sub-branches were opened during the year at Shannonville, Arthur and Udora in Ontario; city branches at West Toronto, Bloor Street and Ossington Avenue, and Broadview Avenue; Prussia, Sask., and Vancouver, B.C. A branch is also being opened at Edmonton, Alta.

◆

LONDON MUTUAL FIRE INSURANCE COMPANY

An annual statement of interest is that of the London Mutual Fire Insurance Company which shows much improvement over that of a year ago. The company's operations during the past year have resulted in substantial profit and additions to the funds for the security of policyholders, the net profit being $37,462, and the security for policyholders is now as follows: Reserve for unearned premiums, $286,822.40; capital stock, paid and unpaid, $100,000; surplus, December 31st, 1912, $644,338.77; total, $1,031,161.17.

The cash assets show $695,928.04 with liabilities to policyholders and shareholders of $368,334.81, leaving a surplus of $[illegible], an increase of $[illegible].

Including the premium notes, which are available for the payment of losses, the total assets are $1,012,[illegible].58.

During the year there were issued, including renewals, 35,179 policies, on which premiums, amounting to $728,384.12, were collected.

The company is now confining its operations to Canada, and the foreign business on its books has been cancelled or is being allowed to lapse, which entirely accounts for the reduction in the gross premium income and the number of policies issued.

◆

Boyle Concessions, Limited, is reported to have taken over the Northern Light and Power Company and its subsidiary companies operating water, light and telephone systems in Klondike. The company is capitalized at three and one-half millions and is allied to the Treadgolds' Granville Power Company with capital twelve and half millions.

PUBLIC SERVICE OF RAILWAYS

Ten Per Cent. Increase in Number of Passengers Carried and Largest Addition Ever Made in Freight Traffic

The public service of Canadian railways is shown in the following figures from the report of Mr. J. L. Payne, comptroller of statistics.

The number of passengers carried in the year ended June 30th, 1912, was 41,124,181—an increase of 4,026,463, or 10.8 per cent. over 1911.

The number of passengers carried one mile was 2,910,251,636, which was 304,282,712 more than in 1911.

The number of passengers carried one mile per mile of line was $108,888, as compared with 102,597 in 1911. This represented an increase of 6,291 in passenger density.

The number of passengers carried per mile of line was 1,539—an increase of 79 for the year.

The average revenue per passenger per mile was 1.943 cents, which was .001 below the figures for 1911.

The aggregate earnings from passenger service—which included express, mails, baggage, etc.—was $65,048,186.66. This represented a gain over the preceding year of $6,730,188.21.

The earnings directly from ticket sales to passengers were $56,543,663.60, or $5,976,769.62 more than in 1911.

The average number of passengers per train was 62, as compared with 60 in 1911.

Length of Journey, Receipts, Etc.

The average passenger journey was 71 miles—a gain of one mile over the preceding year.

The average receipts per passenger, using only the revenue from ticket sales as the chief factor, were $1.375—a betterment of .015 as compared with 1911.

The mileage of passenger trains was 40,440,393, and of mixed trains 6,473,882—an increase of 3,454,482 miles in the former and of 196,414 in the latter. In preceding calculations these two mileages were combined and used as the total passenger train mileage.

The earnings from passenger train service per passenger train mile—which includes express, mails, baggage, etc.—was $1.387. This was an increase of .039 over 1911.

Canada's Largest Increase.

The volume of freight traffic was 89,444,331 tons, which, as compared with the preceding year showed an increase of 9,560,049 tons, or 11.9 per cent. This was the largest increas in the history of Canadian railways.

The number of tons hauled one mile was 19,558,190,527—a gain of 3,509,712,232 ton miles as against the figures of 1911.

The number of tons hauled one mile per mile of line was 731,776, which represented a betterment in the density of freight traffic, as compared with 1911, of 99,947.

The average revenue from freight per ton per mile was .757 cent, as compared with .777 in 1911.

Revenue from freight proper amounted to $148,03 898.60—a betterment of $23,287,883.29 over the precedin year.

Aggregate Freight Revenue.

The aggregate revenue from freight service for the y was $149,961,140.13, which represented an increase of $2 390,606.61 over 1911.

The gross earnings from freight were equal to $5,610.8 per mile of line—an advance of $626.76 over 1911.

Per ton, gross earnings from freight amounted to $1,655 or .094 better than in 1911.

The average number of loaded cars per freight train was 18.19, or .16 better than the preceding year.

The average number of empty freight cars per freigh train in 1912 was 5.17. The number in 1911 was 5.94.

The average number of tons per loaded freight car was 17.87, showing a gain over 1911 of .96.

The average freight haul was 218 miles, as against 20 miles in 1911 a gain of 18 miles.

The mileage of revenue freight trains was 60,126,02 which included mixed train mileage. This total represente an increase, as compared with 1911, of 6,627,157.

The mileage of loaded freight cars was 1,102,719,54 against 946,946,917 in 1911.

◆

"The mere fact that a corporation has a large ca talization does not necessarily mean that it ought to m a fair average return thereon. The main question is wheth reasonably valued assets represent the capitalization," s Mr. D. S. Kerr, C.A., in a lecture on Mergers and Cons dations before the Accountants' Association at Montreal.

Liquidator's Sale

Of the Assets of Canadian Gas Power and Launches, Limited, Manufacturer of Stationary and Marine Gas and Gasoline Engines, and of Motor Launches, Dufferin St., Toronto.

The assets comprise a magnificent freehold manufacturing site with an area of 75,000 square feet, adjacent to and with shipping facilities over the lines of two large railway systems, modern concrete manufacturing premises, complete equipment of plant and machinery, and stock of marine and stationary gas engines, engine repair parts and raw materials. They will be divided into, and will be sold in separate parcels as follows:

(1) Land and buildings suitable for any manufacturer, but especially for a manufacturer of metals.
(2) General machinery and plant suitable for the mercantile purposes of all machinery dealers.
(3) Special machines, tools, jigs, patterns, drawings, etc., with stock of engine repair parts and raw materials, the acquisition of which will give a monopoly to the purchaser of the valuable repair and supply business arising out of all engines heretofore manufactured and sold by the Company.
(4) The stock of manufactured engines suitable for the mercantile purposes of all dealers in such.

Upon application to the undersigned, interested parties will be furnished with full particulars of the business, assets, and terms of sale, and will be given facilities for the inspection of the property.

Tenders for the purchase of the above will be received by the Liquidator up till 4 o'clock p.m. of the 8th day of March, 1913.

JOHN MACKAY, Liquidator

FIRE HAZARDS IGNORED MAKE FIXED CHARGES

chitect and Builder Must be Made to Recognize This —Everybody Has to Pay Cost of Fire Tax

Architects and builders are slowly entering into a new se of their accountability. Just as the architect, whose nary impulse is that of the artist, has been compelled in interests of his clients largely to master the technic of the der, so both the architect and the builder are now being ed upon to protect their clients in the matter of the fire ard, was Mr. Franklin H. Wentworth's statement recently Brooklyn, where he was lecturing under the auspices of the erican Institute of Architects. The enormous aggregate he American fire waste, which contrasts us so unfavorably European prudence, is beginning to cripple and imerish us, as the natural resources of the country, once eved to be inexhaustible, are ceasing to respond to the nands of our habitual extravagance.

lic Have to Bear Cost.

The common notion that the insurance companies pay the of fires is gradually giving way to an intelligent underding of the fact that they are merely the collectors and ributors of the fire tax. They must recover from the lic the sums they pay out in losses, plus the cost of conting their business and a reasonable interest upon their ital. If they could not do this there would be no business nderwriting, and sufferers from fire would be relieved only direct assessment upon their more fortunate neighbors. s not certain that a year or two of such direct assessment ld not be an admirable educative experiment. At present cost of the fire tax is merged with every thing we eat and k and wear, and the masses of the people are ignorant ie fact that they bear it.

ufacturer Recognizes Facts.

This is no longer true of the manufacturing classes, how- The manufacturer now realizes that he pays a tax tly related in amount to the character of the building he pies and the nature of his manufacturing processess; and in addition to this he pays for the carelessness of all his hbors. If he cannot shift this burden by passing it along to the users of his products, merged quietly in the selling price of his goods, then he must pay it out of his profits, which cripples him in the competitive struggle.

The manufacturer now clearly sees this and expects the architects and builders he may employ to see it also. If, after his factory is completed, he finds that points respecting the fire hazard have been ignored, and that in consequence of some structural qualification, now too late to alter, he is doomed to pay a fire tax which forethought, with perhaps no additional expense, might have avoided, he may be considerably disturbed by it. Oftentimes structural defects (not mechanical, but from the standpoint of fire hazard) or the unwise location of hazardous factory processes cannot be overcome by the addition of special fire protection after the completion of the building. In such cases these defects operate as a fixed charge upon the property and contents as long as the building stands.

Common Sense is Chief Quality.

Fire protection engineering is coming to be a profession by itself, but, after all, its chief distinguishing quality is common sense. The principal demand is that the architect and builder should have a consciousness of the fire hazard, for up to this time very few of them have thought much about it. With the thought of the importance of this item in their minds, no grievous blundering is possible, and technical advice on specific features can generally be had without charge from fire protection engineers in the service of the various underwriters' inspection departments having jurisdiction.

◆

INDUSTRIAL ACCIDENTS

There were 491 industrial accidents recorded by the Department of Labor during January, of which 100 were fatal and 391 resulted in serious injuries. Compared with the record for December, the above is an increase of three fatal and 34 non-fatal accidents. The figures for January, 1912, were 103 fatal and 531 non-fatal accidents. The greatest number of fatalities were recorded under the headings of Mining and Railway Service, there being 15 workmen killed in the mining industry and 43 in railway service. Of the non-fatal accidents, the greatest number occurred in steam railway service and the metal trades, the figures being, respectively, 114 and 87. Two fatal and 28 non-fatal accidents occurred to workmen in the building trades.

20th ANNUAL REPORT OF THE

WINNIPEG ELECTRIC RAILWAY COMPANY

For the Fiscal Year Ended December 31st, 1912

Submitted at the 20th Annual Meeting, held on the 12th day of February, 1913

REPORT OF THE PRESIDENT AND DIRECTORS

For the Year ending 31st December, 1912.

To the Shareholders:

Your Directors beg to submit a statement of the past year's business showing gross earnings of $3,765,384.06, as compared with $3,829,749.67, last year.

After providing for the percentage on earnings accrued to the City and interest on bonds, your Directors declared four quarterly dividends, amounting to $720,000.00, leaving a surplus of $474,463.12, which has been transferred to the credit of Profit and Loss Account, making a total credit to this account to December 31st, 1912, of $2,091,236.37.

All the properties of the Company have been efficiently maintained.

In accordance with the plan of extensions adopted at the last annual meeting, the following improvements and additions to the Company's equipment and system have been made in the various departments.

TRACK AND ROAD-BED

9.235 miles of track was laid as follows: 6.92 miles with 80 lb. rails with concrete foundation and asphalt pavement; 2.157 miles with gravel ballast; 0.158 mile with creosote block pavement.

ROLLING STOCK.

33 large double truck closed motor cars with wide vestibules equipped with air brakes and all other modern appliances to insure the comfort and safety of passengers and trainmen, were constructed in the Company's Winnipeg Shops and put in service. Two new snow sweepers and one 5,000 gallon pneumatic Street Sprinkler were purchased and put in service.

ELECTRIC LIGHTING AND POWER DISTRIBUTION SYSTEM.

1852 new poles were erected and 409,066 lbs. of wire with 114 transformers put up in extension of the Company's light and power distribution system.

Transmission line 4½ miles long with necessary transformers to serve the plant of the Canada Cement Company and the new industrial town site in the Municipality of Assiniboia was constructed.

Three new motor generator sets were installed, one in the St. James Sub-station, one in the new Sub-station on Logan Avenue and one in the Assiniboine Avenue power house.

GAS DISTRIBUTION SYSTEM.

79,890 feet of new gas mains were laid, and 1,478 new gas services were installed in extension of the Company's gas distribution system. In addition to the extensions to the Exhauster House and the Purifying House at the Gas Works, the necessary equipment to increase the capacity of this portion of the Gas Works by 2,000,000 cubic feet per day was installed.

CONSTRUCTED.

Gas Works—Extension to Exhauster House, Extension to Purifying House.

Stores and Offices at South Main Street Car Barns, of steel and brickwork with concrete foundations.

Sub-station on Logan Avenue of steel and brick with concrete foundation.

6 track addition to North Main Street Car Barns to house 22 additional cars. Construction is of brick and steel with concrete foundation. 5 tracks are constructed with pits for convenience when repairing or adjusting cars.

Offices and Employees' Waiting Room constructed at North Car Barns.

20 horse Stable on Kylemore Avenue, Ft. Rouge, 2 storeys in height. Upper storey used for hay loft and grain and for storage of wagons.

Construction is of reinforced concrete with brick veneer exterior.

4 Storey Warehouse on Assiniboine Avenue in course of construction of reinforced concrete and brick veneer exterior.

Addition to the St. James Sub-station.

AUDITORS' REPORT

Winnipeg, Manitoba, February 7th, 1913

To the President and Shareholders,
Winnipeg Electric Railway Company, Winnipeg.

Gentlemen:

We beg to report that we have made a monthly audit of the accounts of your Company and also of its subsidiary Companies, viz.:—Winnipeg, Selkirk and Lake Winnipeg Railway, and the Suburban Rapid Transit Company, for year ending 31st December, 1912, and that our requirements as Auditors have been complied with.

STATEMENTS.

The accompanying statements, viz.:—

WINNIPEG ELECTRIC RAILWAY COMPANY. Assets and Liabilities. Receipts and Expenditures. Profit and Loss. Capital Account.

WINNIPEG, SELKIRK & LAKE WINNIPEG RAILWAY COMPANY. Assets and Liabilities. Receipts and Expenditures. Profit and Loss. Capital Account.

SUBURBAN RAPID TRANSIT COMPANY. Assets and Liabilities, Receipts and Expenditures, Profit and Loss, Capital Account, have been examined by us, and we are of opinion that the said statements are properly drawn up so as to exhibit a true and correct state of the Company's affairs according to the best of our information and as shown by the books of the Company.

RECEIPTS.

The cash in the hands of the Cashiers was counted on the afternoon of the 31st of December last and found to agree with the day's receipts as entered in the cash books. The working funds held by the Cashiers were checked and duly accounted for.

The Bank Accounts of the three Companies have been examined, and it has been found that all sums received were deposited daily and that the balances in the Bank Pass Books, after deducting the outstanding cheques, agree with those shown in the Cash Books.

The Supplementary Cash Books have been checked daily with the Cashier's tickets. The Incandescent Power and Gas Bills have also been checked, and only authorized discounts have been allowed.

The postings in the Customers' Ledgers have been verified, as also have the entries in the General Cash Book.

EXPENDITURE.

Vouchers duly approved by the General Manager have been produced for all disbursements of the Companies and the entries in the Ledgers agree with those in the books of original entry. Each month's pay rolls have been checked and it has been found that all amounts unpaid were deposited to the credit of Unpaid Wages Account, with the exception of November and December, which have been deposited since the first of the year.

TICKETS.

On the 1st of January last the stock of tickets on hand was examined by us and found to agree with the stock as shown in the Stock Books.

CAPITAL STOCK.

The returns of the transfer agents were examined quarterly, and the number of shares stated therein agreed with the amount of Paid-Up Capital.

DIVIDENDS.

The Dividend Sheets for the four quarterly dividends paid during the year have been audited and found correct.

All of which is respectfully submitted.

(Signed) W. A. HENDERSON & CO.,
Chartered Accountants.

CANADA AND THE EMPIRE'S WHEAT

Wheat Area of United Kingdom, Australia, Canada and New Zealand Has Increased 78 Per Cent. in Ten Years

There was a marked increase both of wheat area and population of the British Empire between 1901 and 1911. The extension of the wheat area, moreover, has been much greater than the increase of the population in each of the great Dominions of the Empire. Thus, in 1901 there were about 35 million acres, or one-eighth of an acre for each of the 283 million inhabitants, while in 1911 there were 50 million acres, or about one-sixth of an acre for each of the 302 million inhabitants.

Do Not Eat Wheat.

If the whole of this acreage produced as much as do the two million acres of the United Kingdom, it would nearly suffice for the total requirements of the present population. If India—where a large proportion of the people do not eat wheat—be eliminated, it is found that in the United Kingdom, Australia, Canada and New Zealand the wheat area has increased from 11¼ million acres in 1901 to 20 million acres in 1911, or by 78 per cent., while the population has increased from 51½ millions to 58 millions, or by 13 per cent., in the same period.

For about a decade the wheat area of the United States has remained practically stationary. This is corroborated by the marked decline in her wheat exports. So far as the United Kingdom—the chief wheat buyer of the world—is concerned, it is expansion in the great wheat-selling countries that is of main interest. The continuance of a large surplus over home requirements in those countries is of vital concern to the Motherland.

Population and Exports.

The important question for the not far distant future is the rapidity with which the increasing demands of their own population will allow these countries to maintain the exportation of these supplies. Compared with 1901, the increase of wheat area in the Empire (five countries) in thousands of acres was 45.5 per cent., compared with a 6.6 per cent. increase of thousands in population. In 11 European countries the figures were 17.1 per cent. and 15.6 per cent. respectively, and in six other countries 19.9 per cent. and 20.6 per cent., the total for the whole being 22.9 per cent. increase of wheat area and 13 per cent. increase of population.

British Point of View.

These figures take into account the majority of the wheat-growing territories and most of the wheat-eating peoples of the world. Thus there is no reason to doubt the correctness of the genral conclusion to be drawn from the table—namely, that the supply of wheat is at present keeping pace with the increasing demand for it. From the British point of view it is especially interesting to note that the expansion of the wheat area within the Empire has been much more in excess of the growth of population than in other parts of the world.

DOMINION LIFE ASSURANCE COMPANY

Progress is satisfactorily evidenced by increases appearing in the annual report of the Dominion Life Assurance Company, which also shows a net surplus over all liabilities of $403,986. The company's assets amount to $2,873,000. Included amongst these are mortgages, $2,298,157; debentures and bonds, $188,552; policy loans, $171,145; real estate, $21,500.

The rate of interest earned by the company on investible funds, computed as last year on the formula adopted by the government, is 8 per cent., a slight advance on last year's rate. All interest is well paid up, the amount in arrear being less than a year ago. In the twenty-four years of its history the company states there has been no loss of invested funds. Business in force reached the total of $1[illegible]6,365.

During the past year 1,402 applications were received by the company for life insurance amounting to $3,067,810, and they issued thereon 1,[illegible] policies for $2,900,310. Adding to this bonus additions, revivals and increases of $56,825, total new business was $2,057,135.

Policies were terminated during the year as follows: By death, $55,730; matured endowments, $21,645; surrenders, $77,135; lapse, $661,570; change and decrease, $79,-[illegible] taken, $356,[illegible], a total terminated of $1,251,437. Subtracting this from the total issue of $2,957,135, there is a net gain of $1,705,698.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended February 21st: Drummond, 67,000; Chambers-Ferland, 64,000; La Rose, 131,941; Cobalt Townsite, 211,007; McKinley-Darragh, 152,387; Kerr Lake, 61,282; total, 687,617 pounds, or 343.8 tons. The total shipments since January 1st are now 5,652,778 pounds, or 2,826 tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144 tons, valued at $1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 29,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons; 1912, 21,509 tons.

REINSURANCE RATES AND ATLANTIC TRADE

High rates of reinsurance are now being paid on two large steamers bound from the United States to Europe. On the British steamer Armstor, bound from New Orleans for Aalborg, 45 per cent. is being quoted, and on the German steamer Therese Horn, bound from Port Arthur for Rotterdam, 30 per cent., states the London Times. The Armstor is understood to be laden with cotton cake, while it is believed in the insurance market that the Therese Horn is carrying a general cargo, including, it is feared, a quantity of lumber on deck.

It will be remembered that high rates have lately been paid on a large number of steamers bound on Atlantic voyages, including the Snowdon Range, while the Whittingham, which left Baltimore for Rotterdam on November 20th with a cargo of oats, has long been regarded as lost. The vessel represents, with her cargo, roughly £100,000. The result of all this disturbance is that underwriters are now asking considerably higher rates of premium on grain cargoes from the United States. The bulk of this business is placed originally in the United States, but a large proportion of it is reinsured in London, while some portion is insured originally in London. The rates vary according to underwriters' opinions of the vessels, but there is a general feeling in the market that the losses lately have been so severe that for the remainder of the winter season better terms should be obtained. A considerable quantity of the grain is brought in liners of the highest class. It happens that owing to the large crops in the United States and Canada unusually large shipments are coming forward, while very little is now being sent from the Black Sea ports.

Cotton is insured largely on annual contracts, so that there is not the same opportunity for advancing rates.

TRADE DISPUTES LAST YEAR

A prominent feature of the current issue of the Labor Gazette is a comprehensive statement dealing with trade disputes in existence in Canada during the year 1912. The total number of strikes and lockouts during the year was 150. The prevailing trade prosperity considerably increased the movement for higher wages. It is worthy of note, however, that a great proportion of the disputes of 1912 were of comparatively small importance, no less than 111 of the number that commenced during the year affecting less than 300 employees, while 85 affected less than 200 employees. There were altogether 40,511 employees involved in trade disputes. A considerable decrease was seen in the loss of time to employees. The number of working days lost in 1912 was approximately 1,000,208 which is only slightly more than one-half the number lost during 1911. In this connection it will be noticed from the tables that two disputes of railway construction laborers in British Columbia and one of garment workers at Montreal accounted for the cessation of work on the part of 13,500 employees and for the loss of 584,500 working days.

An important feature of the 1912 record was the fact that fifty-two disputes involved workers in the building trades. The majority of these were strikes pending the arrangement of new schedules, and were of comparatively short duration. Sixty-six disputes occurred in Ontario, twenty-four in Quebec, sixteen in Saskatchewan, thirteen in Alberta, ten in British Columbia, seven in Manitoba, six in New Brunswick, and five in Nova Scotia. In more than one hundred disputes the wage question was involved, sixty-five occurring from actual demands for higher wages. The trade union question and its different phases entered into fourteen disputes, and in twenty cases the disputes related either wholly or partly to hours of labor. Tables containing a list of the strikes and lockouts during 1912, arranged according to industries and trades, and showing the locality in which the various disputes occurred, the principal causes, method of settlement and result, dates of commencement and termination, approximate number of establishments and employees affected and approximate loss of time in working days, accompany the statement, which is published in the Labor Gazette for February, 1913.

ANNOUNCEMENT of a NEW BOND COMPANY

Of interest to financial men and to the public generally is the formation of the Bankers Bond Company, Limited, with a capital of One Million Dollars, headquarters at Toronto.

The President of the Company is Mr. F. W. Baillie, the Vice-President, Mr. F. P. Wood, and, in addition, a group of prominent Canadian banking men are interested both as investors and advisors.

The Bankers Bond Company will conduct the customary bond and preferred stock business, and aims to be of special service to the public in other ways.

It will assist worthy industries, business men and others who have not access to the customary channels for capital, to expand by financing the needed money. Canada has many industries only needing capital to become large and prosperous concerns.

Directed by men experienced in both investments and banking, the Bankers Bond Company should render valuable service to investors and business men. This should especially apply in a country such as Canada, so replete on one hand with opportunities for investment wherein judgment and foresight are needed, and, on the other, with opportunities for business expansion, provided financial assistance is forthcoming in either small or large amounts at crucial periods.

The Bankers Bond Company is the outcome of steady and important growth of the investment business done by the firm of Baillie, Wood and Croft, Bankers and Brokers, Toronto, during a period of ten years. The latter firm will hereafter confine themselves to Stock Exchange business.

The Bankers Bond Company, Limited, have engaged as premises the ground floor of the Imperial Life Building, Victoria St., Toronto.

BANKERS BOND COMPANY
LIMITED
TORONTO, CANADA.

The Federal Life Assurance Co.
of Canada

HEAD OFFICE - HAMILTON, ONT.

Directors' Report for 1912

The Directors have pleasure in presenting their report of the business for the year ending 31st of December, 1912.

ASSURANCES.—The applications for new Insurances for the first time exceeded Five Millions, amounting to $5,023,638.

The new Insurances issued and Insurances revived amounted to $4,819,129; making the total Insurances in force at the end of the year $25,555,267.

INCOME.—The net premium income was $900,961.71, being an increase over 1911 of $80,909.36.

The total cash income amounted to $1,164,665.97, being an increase over that of 1911 of $130,808.60.

ASSETS.—The total assets at the end of the year amounted to $4,887,616.95, being an increase during the year of $440,648.30.

The average rate of interest earned on the invested funds showed an increase over the preceding year of .25% and now exceeds six per cent.

RESERVES.—The Reserves for Policyholders' protection now amounts to $4,406,130.00, being an increase during the year of $359,804.00.

SURPLUS.—The surplus earned during the year amounted to $107,050.90. After paying profits and dividends, etc., the sum of $66,386.30 was added to the total net surplus, increasing it to $266,359.95.

The deduction from reserves allowable under the new Insurance Act was not taken advantage of. Had this been done the total surplus (including paid-up Capital Stock) would have amounted to $483,931.00; or, excluding paid-up Capital Stock, to $353,931.00.

EXPENDITURES.—The payments to Policyholders during the year amounted to $436,176.51, exceeding those of 1911 by $118,339.53.

It is particularly pleasing also to point out that the percentage of General Expenses to Premium Income showed the very large reduction of 3.4%. The actual expenditure was considerably less than in 1911 despite increased business in force and larger new business written.

PROGRESS.—The following table of results for the last three years illustrates the steady progress being made:—

	1912.	1911.	1910.
Insurance in force December 31st	$25,555,267	$23,887,141	$22,309,929
Insurances issued and revived	4,819,129	4,656,265	3,757,065
Income	1,164,665	1,033,857	951,054
Reserve for Protection of Policyholders	4,406,130	4,046,326	3,681,001
Assets	4,887,616	4,446,968	3,996,215

The Directors desire to express their appreciation of the efficient services of the Officers and Office Staff and of the splendid results accomplished through the earnest and enthusiastic service of the Agency Force during the year.

M. H. AIKINS,
President.

AUDITORS' REPORT.

To the President and Directors of the Federal Life Assurance Company:

Gentlemen: We have carefully audited the books and records of your Company for the year ending 31st December last and have certified to their accuracy.

The Cash and Journal Vouchers have been closely examined and agree with the entries recorded.

The Debentures, Bonds, etc., in the possession of the Company have been inspected, while those deposited with the Government have been verified by certificate, the total agreeing with the amount as shown in the Statement of Assets

The Accompanying Statement, viz., Revenue and Ex penditure, Assets and Liabilities, show the result of year's operations and also financial position of the Compa

Respectfully submitted,

EDWARDS, MORGAN & CO.
CHARLES STIFF, C.A.
Auditors.

Hamilton, 31st Jan., 1913.

Splendid Showing by ritish Columbia Life Assurance Company

The fourth annual meeting of the British Columbia Life rance Company was held at the head office of the com-, Vancouver, B.C., on Wednesday, February 12, at the of 3 o'clock in the afternoon, at which a large number hareholders were present.

The president, Mr. Jonathan Rogers, occupied the chair, the secretary, Mr. C. F. Stiver, acted as secretary of the ting.

The following report of the directors was read by the eral manager, Mr. Sanford S. Davis:

DIRECTORS' REPORT.

The directors have pleasure in submitting the fourth ial report of the British Columbia Life Assurance Com-.

The year 1912 was the first full year of the company's ations since our license to write business was only is- in May, 1911. In view of this fact, your directors take ecial pride in presenting the following figures and state-ts, which evidence rapid progress on sound lines.

The new business applied for during 1912 was $1,955,- and insurances were issued (excluding revival) amount- to $1,860,358.

The total business in force now amounts to $2,259,870, an increase of $1,278,675 over last year. We are glad to report that the business issued in 1911 was renewed in 1912 in a very satisfactory manner. This is a proof that our policyholders believe thoroughly in the future of the company.

The rapid progress indicated by the above figures was accompanied, we believe, by the best possible conditions affecting the general welfare of the company. This will be sufficiently clear from a consideration of the following facts:

1. No death claims have yet been reported. (This fact speaks for itself.)

2. A very high interest yield has been received from the investments; the company's funds are being invested with absolute security, at over eight per cent.

3. The expenses of management for the year have been kept down to the lowest point consistent with the growth of the business.

The British Columbia Life Assurance Company was organized in the hope that it would some day become an important factor in the financial development of Western Canada. Your directors are confident that this aim will soon be realized and that shareholders and policyholders alike will have every reason to be proud of their company.

JONATHAN ROGERS,
President.

ritish Columbia Life Assurance Company

THE STANDARD BANK OF CANADA

Thirty-Eighth Annual Meeting

The thirty-eighth annual meeting of the Standard Bank of Canada was held at the Head Office, 15 King Street West, at twelve o'clock noon on the Nineteenth of February, 1913.

There was a large attendance of shareholders.

The President took the chair and the following report was presented:

The report of the affairs of the Bank at the close of its Thirty-eighth year ending the 31st January 1913, reflects a substantial growth in all branches and indicates that its funds have been employed at remunerative rates during the year.

The net Profits, after making provision for Bad and Doubtful Debts, Rebate of Interest on unmatured Bills under discount, Exchange, Cost of Management, etc., amount to $462,079.79, being at the rate of 21.08 per cent. per annum on the average paid-up Capital for the year. This amount added to the balance brought forward from last year, together with Premium on New Stock, makes the sum of $952,738.37 which has been appropriated as follows:

Four quarterly dividends at the rate of 13 per cent. per annum	$282,052.17
Transferred to Officers' Pension Fund	12,500.00
Written off Bank Premises	25,000.00
Transferred to Reserve Fund from Profits	100,000.00
Transferred to Reserve Fund from Premium on new stock	429,275.00
Balance of Profit and Loss Account carried forward	103,911.20
	$952,738.37

You will be asked to approve of By-laws increasing the amount set apart for the remuneration of Directors and the annual contribution to the Officers' Pension Fund.

It is with the deepest regret that your Directors have to report the death during the year of Mr. Frederick Wyld, for thirty years a Director and occupying the position of Vice-President since 1902. Mr. G. P. Scholfield was elected to the vacancy on the Board and Mr. W. Francis, K.C., succeeded to the Vice-Presidency.

Branches and sub-branches of the Bank were opened during the year at Shannonville, Arthur and Udora in Ontario; City branches at West Toronto, Bloor Street and Ossington Avenue, and Broadview Avenue; Prussia, Sask., and Vancouver, B.C. A branch will also be opened about the first of March next at Edmonton, Alberta.

Adequate and most desirably located new premises have been secured recently at Winnipeg and Vancouver.

The usual thorough inspection of the Head Office and Branches has been made during the year and the staff have discharged their duties faithfully and efficiently.

W. F. COWAN,
President.

Toronto, 31st January, 1913.

GEORGE P. SCHOLFIELD,
General Manager.

Toronto, 31st January, 1913.

The President referred to the satisfactory condition of the business, and the progress of the Bank during the year, and the usual resolutions were moved and carried.

The following directors were elected for the ensuing year: W. F. Cowan, W. Francis, K.C., W. F. Allan, T. H. McMillan, H. Langlois, F. W. Cowan, G. P. Scholfield, T. H. Wood.

At a subsequent meeting of the Board, W. F. Cowan was elected President, and W. Francis, K.C., Vice-President.

STEEL CORPORATION'S ACTIVITY

Keen activity is apparent among the representatives of the United States Steel Corporation at Windsor in connection with the proposed $20,000,000 Canadian plant. While nothing definite is being given out, it is known that the local representatives are making frequent trips to New York.

It is understood that a name for the new city, below Sandwich, Ont., had been decided upon, and was to have been inserted in the bill for incorporation, which is now before the Ontario legislature, but a message to stay proceedings is said to have come from headquarters.

Both the Ontario Parliament and the Canadian Parliament are to take action upon bills for the United States Steel Corporation. The bill at Toronto has to do with the incorporation of the city and the one at Ottawa for the incorporation of the company itself.

Mr. F. C. McMath, president of the Canadian Bridge Company, of Walkerville, who was largely responsible for the purchase of the site for the plant, is having soundings made of the Detroit River, opposite the acquired property for the purpose of locating the docks, it is said.

◆

CROWN TRUST COMPANY

A satisfactory statement was presented at the four annual meeting of the Crown Trust Company, Montreal.

The report covered fourteen months, ended December 31st, 1912. Last year the company's financial year was changed to end in December instead of October 31st. At a special general meeting held on January 20th, the shareholders authorized an increase in the company's capital to $500,000. The new stock is being issued at 110.

The company moved during the year from 86 Not Dame Street West to 145 St James Street, Montreal

The old board, consisting of Messrs. R. Reford, W I. Gear, Tancrede Bienvenu, G. M. Bosworth, S. H. Ewin A. G. Gardner and Thos. F. How, with Lieut.-Col. Jo Carson, Lieut.-Col. F. S. Meighen, Lieut.-Col. James Ross, were all re-elected and the following gentlemen we added to the board: Messrs. John McKergow, H. B. He wood, Alex. McLaurin, B. B. Stevenson, F. N. Southa Lieut.-Col. E. W. Wilson.

At a subsequent meeting of the directors Mr. Rob Reford was elected president. Mr. William I. Gear, fir vice-president, and Lieut.-Col. John Carson second vic president and managing director. The appointment of second vice-president creates a new office. Mr. Irving Rexford was re-appointed manager.

CHOOL DISTRICTS EMPOWERED TO BORROW MONEY

The following school districts have been authorized to ow money. The particulars are given in order, name and ber of school district, amount required and name of etary-treasurer:—

Saskatchewan.

Holbein, No. 641, $500. F. Pepper, Holbein.
Rainbow, No. 1091, $1,200. R. Wikoss, Hanley.
Union, No. 1288, $2,000. B. C. Greer, Gerowville.
June Rose, No. 722, $1,600. J. M. Bowles, Simpson.
Gaspers, No. 792, $1,600. W. H. Cooper, Moundville.
Krasny, No. 1121, $1,500. W. J. Mather, Windthorpe.
Copenhagen, No. 941, $1,700. J. A. Taylor, Glenside.
Russelton, No. 778, $1,500. E. C. Winter, Russborough.
East Lynn, No. 1229, $1,100. T. W. L. Swain, Wynyard.

◆

SASKATCHEWAN'S NEW FIRE COMMISSIONER

A fire commissioner for Saskatchewan, in the person of R. J. McLean, has been appointed by the provincial rnment. Among the powers of the fire commissioner will he holding of investigations into the cause, origin and mstances of fires with a special view to ascertaining her they are the result of negligence, carelessness, lent or design. For the purposes of such investigation he othed with all the powers of any court of civil record. fire commissioner shall report the result of such investiga- to the Attorney General for the taking of such action as ees fit.

The fire commissioner is also empowered to enter into lings where a fire has occurred or in which there is on to believe some dangerous condition liable to cause exists. In the event of finding any combustible material onditions dangerous to the safety of the building he may r such combustible material to be removed or such erous conditions to be remedied. Failure to comply with order will leave the owner or occupant of the building e to a fine of not less than $10 and not more than $50 for day's neglect to comply therewith.

The fire commissioner will also keep records of all fires rted together with all facts, statistics and circumstances erning such fires. Such records will at all times be open ublic inspection.

The supervision and authority of the fire commissioner nds over any and all fires occurring in the province, in- ing such fires as may be started by railroads.

◆

OTTAWA LIGHT HEAT AND POWER COMPANY

In an excellent report the net earnings of the Ottawa tric Company and the Ottawa Gas Company, the two com- es forming the Ottawa Light, Heat and Power Company, shown to be as follows:—

	1912.	Increase.
Ottawa Electric Company	$243,425	$27,542
Ottawa Gas Company	54,617	1,760
	$298,042	$29,302

The gross receipts of both companies were $779,972, be- in excess of last year's to the extent of $68,272. Mr. Ahearn, the president, pointed out the advantage he combination of the gas and electric systems, and the lts of the working together of the two systems as shown the earnings of the combined companies. Dividends of and three-quarters per cent. per quarter and [illegible] per cent., making a total of 8 per cent., were paid during year. The directors have decided to increase the dividend wo per cent. quarterly and to leave the question of distri- on of a bonus for later consideration. Active construc- of the modern new gas plant will go on during the year, Mr. Ahearn, and that it is probable that an issue of ,000 new stock at par to the present shareholders will be e.

During the year 946 customers were added to the gas pany's list and new installations of gas stoves to the ber of 1,117 were made. In addition to the gas stoves 200 other gas appliances were installed.

The electric company expended $262,397 on equipment on tal account, this being rendered necessary by the growth he business, these extensions, etc., show the gratify- progress being achieved by this company.

The officers and directors of the company are:—Presi- . Mr. T. Ahearn; vice-president, Hon. E. H. Bronson; etary-treasurer, Mr. D. R. Reed; Messrs. J. Travers is, C. J. McCuaig, John Manuel, James Manuel, H. illard, Warren Y. Soper, Thomas Workman, Geo. P. hy, L. Crannell.

LEGAL NOTICES

THE CROWELL SHERMAN STALTER COMPANY, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 15th day of January, 1913, incorporating James Steller Lovell accountant; William Bain, bookkeeper, and Robert Gowans, Joseph Ellis and John Joseph Dashwood, solicitors' clerks, all of the City of Toronto, in the Province of Ontario, for the following purposes, namely.—(a) To carry on the business of general contractors and engineers, to construct, erect, execute, equip, improve, make, repair, raise or develop public works or conveniences of all kinds, including railways, tramways, roads, tunnels, harbors, docks, slips, shipping places, piers, breakwaters, dams, jetties, wharves, quays, canals, reservoirs, channels, conduits and embankments, and including the erection, repair or improvement of sewage, drainage, sanitary, water, gas, electric light, telephonic, telegraphic and power supply, plants, works, houses and stations, and to dredge and deepen any waterways or channels and generally to do any construction or development or improvement work in connection with harbors, shipping and navigation routes and channels, and to construct tunnels under contract with any person, corporation or corporations possessing the right to construct such tunnels, and to construct any works in connection with any such tunnels, or with the railroads authorized to be constructed, maintained or operated through such tunnel or tunnels, and for any and all of the purposes aforesaid, to maintain and operate tracks, sidings and switches in or about any works or conveniences being so constructed, erected, executed, equipped, manufactured, made, repaired, raised or developed, and in or about any such waterways or channels or tunnels, and in or about any works being carried on by the company; (b) To construct offices, warehouses and other buildings, public and private, and all other works or conveniences of public utility; (c) To manufacture, buy, sell and deal in iron and iron ore and steel and other ores and metals; to purchase, lease or otherwise acquire any mines, mining rights and lands and any interest therein, and to explore, work and develop the same, and to quarry, smelt, refine, dress, amalgamate and prepare for market ores, minerals and metals of all kinds; (d) To acquire by purchase or otherwise and to hold and deal in lands, timber limits or licenses, water lots, water falls, water privileges and concessions and powers and rights and interests therein, and to build upon, develop, irrigate, cultivate, settle and otherwise improve and utilize the same, and to lease, sell and otherwise deal with or dispose of the same; (e) To sink wells and shafts and to make, build, construct, erect, lay down and maintain reservoirs, waterworks, cisterns, dams, culverts, main and other pipes and appliances and to execute and do all other works and things necessary or convenient for obtaining, storing, selling, delivering, measuring and distributing water for the purposes of irrigation and for the creation, maintenance and development of hydraulic, electrical or other mechanical power, or for any other purpose of the company; (f) To purchase, lease or acquire water powers and water privileges, and to develop therefrom any power, electrical or other energy, and to use the same in connection with the business of the company, and to transmit the same and sell, lease or dispose of water powers and water privileges or power, and to enter into working arrangements with any other companies, persons, firms or corporations for the use thereof, and to establish, operate and maintain any lighting, heating or power plants, and to sell and dispose of light, heat and power, provided always that the rights and privileges hereby conferred upon the company to generate, sell and dispose of electric energy for light, heat and power, when exercised outside the property of the company, shall be subject to all provincial and municipal laws and regulations in that behalf; (g) To manufacture and deal in logs, lumber, timber, wood, metal and all articles into the manufacture of which wood or metals enter and all kinds of natural products and by-products thereof, and goods, wares and merchandise; (h) To build, buy, sell, equip, operate and own steamships, steamboats, sailing vessels, barges and lighters, not as a common carrier, but as an incident to its business; to buy and sell, hold and operate wharves, water rights, powers, bulk-heads and appurtenant property in such places as the business of the company may seem to require, or as may be necessary or convenient in connection therewith; (i) To manufacture or produce, purchase, take upon lease or in exchange or otherwise acquire, whether for any of the hereinbefore mentioned purposes or not, machinery and plant of all kinds and any other articles, products or things used in connection with any of the company's business, and to buy, sell, supply and deal in the same; (j) To apply for, purchase or otherwise acquire or obtain any contracts, decrees or concessions for or in relation to the construction, execution, carrying out, equipment, improvement, management, administration or control of public works and conveniences or otherwise incident to any of the objects herein specified, and to undertake, execute, carry out, dispose of or otherwise turn to account or sell or dispose of the same; (k) To sell, exchange or lease any real or personal property of the company or any rights, easements, privileges or interest in, to, over, under or concerning the same; (l) To purchase or otherwise acquire any patents or patent rights, licenses, concessions and the like conveying any exclusive or limited right to use any invention which may seem capable of being used for any of the purposes of the company or the acquisition of which may seem calculated directly or indirectly to benefit the company, and to use, exercise, develop or grant licenses in respect of or otherwise turn to account the property and rights so acquired; (m) To purchase and otherwise acquire and undertake and assume all or any part of the assets, business, property, privileges, contracts, rights, obligations and liabilities of any person, firm or company carrying on any business which the company is authorized to carry on, or any business similar thereto, or possessed of property suitable for the purposes of this company's business, and to issue in payment or part payment for any property, rights or privileges secured by the company, or for any guarantees of the company's bonds, or for services rendered, shares of the capital stock of the company, whether subscribed for or not, as fully paid and non-assessable or bonds, debentures or other securities of the company; (n) From time to time to apply for, purchase or acquire by assignment, transfer or otherwise, and to exercise, carry out and enjoy any statute, ordinance order, license, power, authority, franchise, concession, right or privilege which any government or authority, supreme, municipal or local, or any corporation or other public body may be empowered to enact, make or grant, and to pay for, buy in and contribute towards carrying the same into effect, and to appropriate any of the company's stock, bonds and assets to defray the necessary costs, charges and expenses therein; (o) To draw, make, accept, endorse, discount, execute and issue promissory notes, bills of exchange, bills of lading, warrants and other negotiable or transferable instruments; (p) To raise and assist in raising money for and to aid by way of bonus, promise, endorsement, guarantee or otherwise any corporation in the capital stock of the company holds shares, or with which it may have business relations and to act as employee, agent or manager of any such corporation, and to guarantee the performance of any contracts by any such corporation, or by any person or persons with whom the company may have business relations; (q) To purchase, subscribe for, acquire, hold, sell or otherwise dispose of shares or stock, bonds, debentures or other securities in any other corporation and evidences of indebtedness in any such corporation (including bonds, debentures or other securities of the Dominion of Canada or of any of the Provinces of the Dominion of Canada or of any municipal corporation), notwithstanding the provisions of section 44 of the said Act; (r) To enter into partnership or into any arrangement for sharing profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise with any person or company now or hereafter carrying on or engaged in any business or transaction which this company is authorized to carry on or engage in, and to promote or assist or join in the promotion of any such company; (s) To procure the company to be registered, licensed and recognized in any foreign country and to designate persons therein, according to the laws of such foreign country, to represent this company, and to accept service for and on behalf of this company of any process or suit; (t) To amalgamate with any other company having objects similar to those of this company; (u) To do all acts and exercise all powers and carry on all business incidental to the due carrying out of the objects for which the company is incorporated and necessary to enable the company to profitably carry on its undertaking; (v) The business or purpose of the company is from time to time to do any one or more of the acts and things herein set forth; (w) To do all or any of the above things as principals, agents and attorneys. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "The Crowell Sherman Stalter Company, Limited," with a capital stock of fifty thousand dollars, divided into 500 shares of one hundred dollars each, and the chief place of business of the said company to be at the city of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 16th day of January, 1913.

NINETEENTH ANNUAL REPORT OF THE DIRECTORS

For the Fiscal Year ending December 31st, 1912

Board of Directors.

. AHEARN, Esq., President; Hon. E. H. BRONSON, President; GEO. P. BROPHY, Esq., J. TRAVERS IS, Esq., K.C., L. CRANNELL, Esq., HONORÉ LLARD, Esq., WARREN Y. SOPER, Esq., THOMAS KMAN, Esq.

D. R. STREET, Secretary-Treasurer.

o the Shareholders—

our Directors have pleasure in submitting their Annual t accompanied by the Financial Statements covering peration of the Company for the fiscal year just ended. he Revenues from all sources aggregate $538,799.97, crease over the previous year of $43,290.52.

he Expenses of management, operation and mainice, together with bond and bank interest, amount to 374.50, being $15,748.63 in excess of last year. This ase is almost wholly accounted for by the increase in interest alone, the expenses of operation being only .38 more than the year previous. The ratio that the se of operation and maintenance bears to the gross ue is 44⅓ per cent.

he net surplus of Revenue over Expenditure, including and bank interest for the fiscal year, is $243,425.47.

he sum of $262,397.08 has been expended on Capital nt, which includes work upon our new steam plant, ruction of underground lines, construction of pole lines ircuits, and the purchase of additional equipment, all red necessary by the growth of our business.

he balance at credit of Profit and Loss after the addif this year's surplus was $270,273.53. From this four erly dividends at the rate of 7 per cent. per annum, a bonus additional of 1 per cent., amounting in all to 00.00, have been paid; $100,000 has been carried to ve Account, and, after writing off the difference be- the par value and selling price of bonds disposed of g the year, and after making ample provision for bad oubtful debts, there remains $29,717.32 at the credit ofit and Loss.

ll of which is respectfully submitted.

T. AHEARN,
President.

THE OTTAWA GAS COMPANY

ANNUAL REPORT OF THE DIRECTORS

For Fiscal Year ending December 31st, 1912

Board of Directors.

T. AHEARN, Esq., President; JOHN MANUEL, Esq., Vice-President; J. ROBERTS ALLAN, Esq., D. MURPHY, Esq., R. H. HAYCOCK, Esq., JAMES MANUEL, Esq., WARREN Y. SOPER, Esq.

D. R. STREET, Secretary-Treasurer.

To the Shareholders—

Your Directors have pleasure in submitting their Annual Report accompanied by the Financial Statements covering the operation of the Company for the fiscal year just ended.

The Revenues from all sources aggregate $241,173.43, being an increase over the year previous of $24,982.13.

The Expenses of management, operation and maintenance, together with bond and bank interest, amount to $186,556.37, being $23,222.54 in excess of last year. This increase of Expense is due largely to the disadvantages of operating the present Plant to the limit of its capacity. The obstacles in the way of economical manufacture will, of course, disappear when we move into our new Plant, now in course of construction.

The surplus of Revenue over Expenditure is $54,617.06, a net gain over the year previous of $1,759.59.

The marked growth of our business has been maintained. Seven miles of new mains have been laid, we have added 946 customers to our list. New installations include 1,117 stoves, 21 water heaters, and 171 smaller fuel appliances.

The sum of $155,370.05 has been expended on Capital Account, the greater part being in the purchase of a site for our new Gas Plant, the extensions to our mains and services, and the purchase of equipment necessitated by the new business secured.

The amount at credit of Profit and Loss Account last year was $12,629.96, which, with the addition of this year's surplus, makes a total of $67,247.02. From such total quarterly dividends on a basis of 7 per cent. per annum, with an additional bonus of 1 per cent., aggregating $40,000, have been deducted, and $2,411.73 has been set aside to provide for bad and doubtful debts, leaving $24,835.29 at the credit of Profit and Loss.

All of which is respectfully submitted.

T. AHEARN,
President.

THE BRITISH COLONIAL FIRE INSURANCE COMPANY

ANNUAL MEETING OF SHAREHOLDERS

The first Annual General Meeting of the Shareholders of the British Colonial Fire Insurance Company was held at the Company's Offices, 2 Place d'Armes, Montreal, on Wednesday, the twelfth day of February, 1913.

Hon. Chas. Dubord, President of the Company, was in the chair, and Mr. Theodore Meunier, General Manager, acted as Secretary.

The following report was submitted :

Your Directors beg to submit a report on the Company's business, and the result of the operations for the period of seven months, ending 31st December last.

The Company received its license on the first day of June last, being permitted to do business throughout the Dominion, but to comply with the Provincial laws, a license has to be taken out in each Province before any business can be transacted. This procedure involves considerable time, and, consequently, the majority of the policies were issued in the Province of Quebec. However, we have the satisfaction of informing you that the Company is now organized in all the Provinces, with the exception of Nova Scotia, which will be organized shortly.

Three inspectors have been appointed, one for the Maritime Provinces and Quebec, one for the Province of Ontario and one for the Western Provinces.

As is well known, the British Colonial is a tariff Company.

One of your Directors went to Europe and succeeded in closing treaties with large European Re-insurance Companies, which enables you to issue policies for larger amounts, for your benefit and that of your representatives.

Debentures of a total value of $58,191.98 are deposited with the Insurance Department at Ottawa.

The surplus assets amount to $106,499.76 and the total assets for security of Policyholders to $507,359.01.

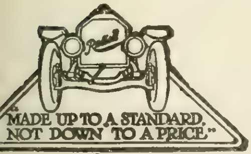
The rapid increase in the wealth of our people, the great industrial and commercial expansion and the enormous progress in the building operations everywhere; with the certainty of an ever increasing growth ; the improved facilities for the proper classification of risks and the many safeguards adopted assure the prosperity of your Company.

The first issue of stock made by the provisional Board of Directors having been disposed of, we shall ask you to make a new issue and increase the number of your Directors.

The Vice-President, who has had considerable experience in fire Insurance, gave a very precise outline of the operations of the Company, explaining to the Shareholders that the British Colonial Fire Insurance Company was very prosperous, and that, as organized and administered, the shareholders had the right to expect satisfactory results.

A vote of thanks to the Board of Directors and the Officers and Staff for their efficient and painstaking services in the interests of the Company was passed.

H. W. THOMSON, Manager.



"MADE UP TO A STANDARD, NOT DOWN TO A PRICE."

THE Russell-Knight "28" attains so great a degree of efficiency, and comfort, and so much that is beautiful in appearance, that we can hardly conceive of any one purchasing a car without having first investigated it.

LONDON MUTUAL FIRE INSURANCE COMPANY OF CANADA

DIRECTORS' REPORT.

Your Directors herewith submit to you the Fifty-third Annual Statement and Balance Sheet, duly certified by the Auditor, showing the receipts and expenditures for the year, as well as the Assets and Liabilities of the Company as at December 31st, 1912.

The Company's operations during the year 1912 have resulted in a substantial profit and a considerable addition to the funds for the security of Policyholders.

During the year there were issued, including renewals, 35,179 policies, on which premiums, amounting to $728,384.12, were collected.

The Company is confining its operations to the Dominion of Canada, and the Foreign business on its books has been cancelled or is being allowed to lapse, which entirely accounts for the reduction in the Gross Premium Income and the number of policies issued as compared with the previous year.

The Cash Assets show $695,928.04 with liabilities to Policyholders and Shareholders of $368,334.81, leaving a surplus of $327,593.23, an increase of $63,037.30.

Including the premium notes, which are available for the payment of losses, the total Assets are $1,012,673.58, the Surplus $644,338.77 and the Security for Policyholders $1,031,161.17.

The retiring Directors are Sir Samuel Faire, Leicester, Eng.; G. H. Williams, Winnipeg; and F. D. Williams, Toronto; all of whom are eligible for re-election.

Your Directors desire to express their appreciation of the support accorded to the Company by its Agents and to all branches of the Staff for their loyal co-operation in helping to attain the results achieved.

All of which is respectfully submitted.

A. H. C. CARSON,
President.

TWENTY MILLIONS FROM WALL STREET

On account of the stringent conditions prevailing in Montreal and Toronto during December and January, the statement of Canadian banks has been awaited with considerable interest. Whenever there is an extraordinarily heavy liquidation of bank liabilities in Canada one naturally looks for a reduction of the reserve carried in New York and London.

Montreal and Toronto bankers called loans in New York to the extent of $13,600,000 in January. This reduction follows one of about $6,000,000 in December. So in two months Canadian institutions withdrew nearly $20,000,000 from Wall Street borrowers.

No doubt the withdrawal of these funds helped to bring about a great expansion of loans on the part of the New York Clearing House institutions, states the Journal of Commerce, which served to cut down the surplus of New York banks.

The current bank statement also gives indications of heavy purchases of sterling exchange in the New York market by Canadian banks.

Public discounts poor paper

Of all concerns which *must* use just the right stationery a bank, broker or financial house is under the greatest necessity to make a careful choice.

The public largely discounts the standing of a concern whose correspondence is not above criticism—whose letter paper is less than 100% right.

Crown Vellum

is the choice of many of our biggest men—and it's worthy of their approval. Fine, substantial, even textured paper—with the "feel" and "look" that begets confidence.

We can supply if your regular stationer will not.

MONTREAL COTTONS, LIMITED

tement Shows Increased Sales—Policy to Ensure Dividends—Exchanging Shares

Monetary Times Office,
Montreal, February 26th.

The fortieth annual meeting of the Montreal Cotton pany, now owned by the Montreal Cottons, Limited, was and an excellent report was presented of the busi- and earnings of the past year. The manufacturing ts showed an increase of $91,656, or over 30 per cent,, ompared with those for the year 1911, an increase on of less than $200,000. Other sources of income, how- showed a slight decrease. On the whole, after dividends been paid, the company carried forward $110,101 from year's operations, as compared with $20,118 a year ago. owing is a statement for the year, with comparisons:

			Inc. or Dec.
ufacturing profits		$382,933	+ $91,656
rents, etc.		11,654	— 4,813
l net income		$394,587	+ $86,843
interest and bad debts	$44,586	......	— $10,539
lends	240,000	......	+ 7,500
	$284,586	$284,586	— $ 3,039
lus earnings over all charges for year		$110,101	+ 89,882

parison of Manufacturing Account.

The manufacturing account for the year, as compared that for the year 1911, was as follows:—

	1911.	1912.
sales	$3,048,084	$3,229,666
in process	1,024,885	805,361
	$4,072,969	$4,035,027
stock, beginning of year	1,117,662	1,024,885
	$2,955,307	$3,010,142

Out of this came the cost of the raw cotton and the s, supplies, etc., amounting to $2,123,315, which was st the same as the previous year, as well as the salaries, which decreased, and the taxes, which increased, as as the depreciation, which amounted to the same as the ous year, namely, $115,000, leaving gross profits of 933.

The company is in a much better position as regards relation between current assets and liabilities. The to- urrent liabilities amount to $562,870, or $248,425 less a year ago. Working assets amount to $2,843,932, or 373 less than those of the last report, leaving the com- better off by $110,052. At the time mentioned, also, was a rather larger supply of raw cotton and cotton in ess on hand.

lte Competition and Prices.

At the meeting, the president reported that the company experienced a good year's business and that the pro- s were good for the future. The company's sales nted to $180,000 more than a year ago, notwithstand- he fact that the price of cotton was high and the com- on from Europe was keen. Provincial legislation, also, compelled a further curtailment of the hours of labor.

The company adopts the somewhat unusual provision aintaining insurance policies of $400,000 to secure divi- s in the case of fire.

About twelve months ago the shareholders were offered xchange of two shares in the Montreal Cottons, Limit- or each share they held in the Montreal Cotton Com- . The $240,000 shown as dividends paid in the forego- statement was paid to the Montreal Cottons, Limited, was paid out again in $210,000 dividends on the preferred of the company, and $30,000 in the common stock. statement of assets and liabilities shows an issued al of $2,910,000 of preferred stock and the same of com- making the total issued capital of the Montreal Cot- Limited, $5,820,000.

This financial statement was received with rather more usual interest inasmuch as cotton stocks have been cting much attention of late and the above is an indica- of what may be looked for from cotton earnings.

Auditors' Report—I beg to report to the shareholders that I have audited the books and accounts of Canada West Securities Corporation for the year ending 31st December 1912. In my opinion the attached Balance Sheet and relative Profit and Loss Account is drawn up so as to exhibit a true and correct view of the Company's affairs as shown by the books and records of the Company. I have verified the Cash and Bank Accounts, and Investments, by the examination of mortgages, contracts, etc.

THOMAS ANDERSON, Chartered Accountant.

Winnipeg, Manitoba, 20th January, 1913.

Winnipeg, January, 30th, 1913.

To the Shareholders of Canada West Securities Corporation

Your Board of Directors beg to submit herewith the annual report for the year ending 31st of December, 1912.

POLICY—Owing to the unfavorable and unsettled condition of the money market your Directors have deemed it wise to go cautiously in the way of new investments, on account of which the business of the Company has not been as active as during the previous year.

PROFITS—The profits for the past year are largely represented by interest earnings, and we are of the opinion that the business of the Company should in the future be largely confined to this class of securities. After deducting all charges the net profits amount to $137,607.89, or a sum slightly in excess of 17% of the capital.

DISTRIBUTION—Adding to the net profits as above the balance at profit and loss account, viz., $4,889.21, we have a total of $142,497.00 to be disposed of. We recommend that a dividend of 6% be declared, that $50,000.00 be carried to reserve account, and that the balance, viz., $44,497.80, be carried forward at the credit of profit and loss account.

CAPITAL AND RESERVE—During the year the capital has been increased by an issue of $100,000 at par to the shareholders, so that the paid up capital of the Company is now $800,000.00. Adding to the reserve account already created the item of $50,000.00 from the past year's earnings, we find that the total capital and reserve is $1,050,000.00.

UNSOLD PROPERTIES—Your Company has now only four properties remaining unsold. Two of these are central properties in the City of Winnipeg; one a very valuable property in the City of Victoria, B.C.; the other is some five and a half sections of farm lands.

These properties appear in our statement at actual cost, and the increase in value of same since they were purchased represents a very large item indeed.

EXPENSE—You will be pleased to know that our fixed policy of small expense has been well maintained during 1912, as the entire profits have been earned on an outlay of $11,506.34.

AUDIT—The books of the Company have been duly audited. The report which is submitted herewith is a very full record of the Company's affairs.

All of which is respectfully submitted.

EDWARD BROWN, President

The following were elected Directors for the ensuing year:

OFFICERS:

President: EDWARD BROWN, Esq., Winnipeg.
Vice-President: C. W. N. KENNEDY, Esq., Winnipeg.
Secretary-Treasurer: D. R. MOORE.

DIRECTORS:

Arthur Wickson, Esq., Winnipeg.
Thos. H. Johnson, Esq., M.P.P., [illegible]
J. B. Henderson, Esq., Winnipeg.
A. D. Chisholm, Esq., Winnipeg.
George Munro, Esq., Winnipeg.
M. J. Tobin, Esq., Vinton, Iowa.
J. W. Hayward, Esq., Vinton, Iowa.

WM. A. ROGERS, Limited

The Annual General Meeting of the Shareholders of Wm. A. Rogers, Limited, was held at the Head Office of the Company in Toronto on Wednesday, February 26, 1913, at 12 o'clock noon.

The President, Mr. S. J. Moore, occupied the chair.

The Board of Directors presented the following Report:—

The Directors beg to present the Twelfth Annual Report, with accompanying statement of Assets and Liabilities, as at December 31st, 1912.

Balance brought forward from 1911 ..		$134,237.98	
Bonus Dividend of 10% on Common Stock, paid February 15th, 1912.		121,550.00	
			$ 12,687.98
Net Profits for the year			290,683.11
Premium on Sale of $162,950 of Common Stock			81,475.00
			$384,846.09
The Appropriations were:			
Dividends on Preference Stock Nos. 45, 46, 47, at the rate of 7% per annum	$ 47,250.00		
Reserved for Dividend No. 48, payable January 2, 1913	15,750.00		
		$ 63,000.00	
Dividends on Common Stock Nos. 41, 42, and 43, at the rate of 12% per annum	$125,006.13		
Reserved for Dividend No. 44, payable January 2, 1913	45,000.00		
		170,006.13	
			233,006.13
Balance carried forward to 1913			$151,839.96

The balance of the authorized Ordinary Capital of the Company, amounting to $162,950, was offered to the Share holders and was fully subscribed and paid for. The premium received amounted to $81,475, as shown in the Profit and Loss Account. All of the authorized Capital Stock of the Company has now been issued.

Your Directors have decided that the time has arrived when a factory should be established for the manufacture and sale of the Company's goods in Canada; and they propose to call a special meeting of Shareholders at an early date to authorize the sale of all Canadian rights, trademarks and goodwill to a Canadian company. The Directors propose that Shareholders of this Company, Common and Preferred alike, shall have the first right to subscribe to the stock of the Canadian company.

By Order of the Board,
S. J. MOORE, President.

Statement of Assets and Liabilities, Dec. 31st, 1912.

Audited and found correct,
CLARKSON & CROSS,
Toronto, 15th February, 1913. Auditors.

The President, Mr. S. J. Moore, spoke as follows:—

"The business done in 1912 exceeded in volume that of 1911, but the Profits were less by $15,122.49. This is accounted for by considerable increase in the cost of raw materials. For example: Silver which was selling under fifty-eight cents per ounce in January, 1912, was in excess of sixty-six cents per ounce in December, and for the year the average increase in cost exceeded 10%. Other metals advanced—some more and some less proportionally than silver—while prices for our products could not be advanced proportionately.

Notwithstanding these adverse conditions, our Profits were equal to 32% on the Preferred Stock and to 16% upon the average amount of outstanding Common Stock, after allowing for the 7% Dividend on Preferred.

The balance of Profits carried forward is $151,839.96 made up of $12,687.98 from previous year, $57,676.98 from this year's surplus and $81,475 from premium on Common Stock.

The Balance Sheet reveals an exceedingly satisfactory condition. Our Surplus of Quick Assets over Liabilities has increased $252,454.40 and amounts to $1,399,187.04 as follows:

Cash	$ 165,816.56	
Accounts and Bills Receivable ..	304,066.01	
Stock in Trade	1,218,510.76	
		$1,688,393.
Debts Payable	$ 228,456.29	
Dividends Payable	60,750.00	
		289,206.2
Surplus of Quick Assets		$1,399,187.0

This is equivalent to $155 per share of Preferred Stock against $127 a year ago.

The Company's growth is seen in the following table of comparison for the years 1902, 1907 and 1912:

	Dec. 31, 1902	Dec. 31, 1907	Dec. 31, 191
Capital Stock Issued.	$1,350,000.00	$1,650,000.00	$2,400,00
Reserves, including Profit and Loss Surplus	81,311.45	462,498.47	626,83
Total Assets	1,602,399.53	2,417,051.46	3,316,04
Net Profits	102,172.16	195,649.32	290,68

It is interesting to note that in the ten years in question the following increases were made:

Capital Stock Increased	....	77%
Reserves "	....	671
Total Assets "	....	108%
Net Profits "	....	184%

CANADIAN BUSINESS:

For some time the Directors have had under consideration the extension of the Company's Canadian business. The growth of the business in the United States has been so steady that the capacity of our factories has been required almost exclusively for that market, so that—while we have some Canadian trade—we have not been in a position to take full advantage of our opportunities in Canada. It is now proposed to establish a plant in this country. A purely Canadian Company will be organized for the purpose, to which all rights in Canada will be transferred. A Special Meeting of Shareholders will be called immediately to consider the plans which the Directors have matured.

I have much pleasure in moving, seconded by Mr. Kilgour, the adoption of the Report."

After being seconded by Mr. Robert Kilgour, the motion for the adoption of the report was submitted to the meeting and carried unanimously.

The Secretary was authorized to cast a ballot for the election of the following Board of Directors:—S. J. Moore, Hon. Chas. H. Duell, Robert Kilgour, William A. Rogers, Hon. W. Caryl Ely, Hon. H. S. Duell, and Wm. A. James.

Messrs. Clarkson, Gordon & Dilworth were appointed Auditors.

The meeting then adjourned.

Yorkton Board of Trade —

The value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

DIVIDENDS AND NOTICES

UNION BANK OF CANADA

FIRE INSPECTORS APPOINTED

rofessor E. J. Zavitz, provincial forester of Ontario, has appointed by the railway commission, provincial fire in-r of the board. Subject to the supervision of the chief nspector of the commission, Professor E. J. Zavitz will the enforcement in Ontario of the railway fire regula-of the board. Mr. W. J. C. Hall, chief of the forest pro-n branch of the Quebec Government, has been appointed imilar position in that province by the commission. Co-tion with the New Brunswick and Nova Scotia Govern-will probably also be sought by the railway commission.

◆

WARNINGS AGAINST FIRES

On account of the large amount of rain during the ner of 1912, the growth of vegetation was unusually , and the fire danger along railway lines is likely to reat during the early spring of 1913 and the ensuing ner, unless prompt and vigorous action is taken, states cular issued by the railway commission. The work of ng or otherwise disposing of combustible matter on s-of-way should accordingly be begun at the earliest ble date in the spring and prosecuted vigorously until leted. Such supervision of burning must be provided ll prevent fires from spreading beyond the strip being d. Experience has shown that along portions of some right-of-way clearings can be handled satisfactorily by the employment of extra gangs. It is essential that company take whatever steps are necessary to ensure pt and efficient compliance with the requirements of ailway Act."

second circular states that the board has in view an dment to its original order providing for the posting instructions to railway employees in regard to pre-n of fire, and submits a draft of such instructions.

BRITISH COLUMBIA LIFE ASSURANCE COMPANY

The British Columbia Life Assurance Company's youth and aggressiveness is shown in the result obtained during the year recently terminated, which was the first full year of insurance operations. The annual statement shows a surplus (excluding capital) of $36,999, while assets amount to $176,938, and are made up as follows: Debentures, $57,574; mortgages on real estate, $54,190; cash in hand and bank, $15,697; accrued interest, $2,434; outstanding and deferred premiums, less commissions due, $13,841; balance due for premium on capital stock, $28,506; office furniture, etc., $4,693. The total business in force amounts to $2,259,870.

Mr. Jonathan Rogers, the president, makes the following important statements in the directors' report: (1) No death claims have yet been reported; (2) a high rate of interest has been received from the investments, being over 8 per cent.; (3) the expenses of management for the year have been kept down to the lowest point consistent with the growth of the business.

The officers and directors of the company are: President, L. W. Shatford, M.P.P.; vice-presidents, T. E. Ladner and L. A. Lewis; directors, Messrs. F. C. Wade, K.C., D. G. Williams, J. T. Phelan, J. J. Bonfield, J. N. Ellis and E. A. Cleveland. Mr. Sanford S. Davis, the general manager, has brought the company through the period of formation to its present activity in the insurance world.

◆

Mr. E. C. Pratt has been appointed assistant general manager of the Molsons Bank.

The British Columbia government proposes to double the royalty on timber, to take effect on January 1st, 1916. Timber owners already complain that the rental of timber lands is abnormally high.

BOND NOTES

C. H. Hyndman, manager of the London Agencies of Edmonton, has submitted an offer to the municipality to pay 96 net for the entire issue of 1913 debentures, amounting to about $10,000,000. The interest rate is fixed at 5 per cent., the debentures running from eight to forty years. The company also offers to buy the 4½ per cent. debentures at a price yielding 90 net to the city.

For the $190,000 4½ per cent. 20-year debentures of the city of Hamilton, five bids were received from Toronto bond firms. The offer of Messrs. Wood, Gundy and Company was accepted.

◆

Messrs. William A. Read and Company, of New York, have purchased and are offering through their Philadelphia office $4,000,000 equipment trust 4½ per cent. gold certificates of Canadian Northern Railroad, dated March 1st, 1913, due serially 1914 to 1923. The certificates are being offered at price to net 5 per cent. on investment.

SCHOOL DISTRICTS EMPOWERED TO BORROW MONEY

The following school districts have been authorized borrow money. The particulars are given in order, name a number of school district, amount required and name secretary-treasurer:—

Alberta.

Rustle, No. 2720, $1,400. D. Porter, Leo.

Wilmot, No. 2844, $800. J. J. Hewitt, Lochinvar.

Dufferin, No. 2806, $1,400. H. J. Dufty, Brunetta.

Fruitland, No. 2719, $800. W. A. Dunlop, Ohrnville.

Selz, No. 2775, $1,500. T. C. Thompson, Bow Island

Pakowki, No. 2717, $1,500. W. F. Weeks, Fourways.

Many Island, No. 2848, $1,500. B. E. Smith, Tarv via Walsh.

Gooseberry Plains, No. 2777, $1,600. J. T. Dral Lougheed.

TIGHT MONEY

Tight money is a reality, not only in Canada, but ughout the world. Both in Europe and America, heavy ands for capital have continued. This occurred, de- the warlike complications and political unrest in ope and the trouble in Mexico. These at least are s that at its foundation, the situation is substantial. h money rates are likely to prevail abroad for some to come. That will have its effect in this country. ed, there are indications that tight money has already e for a fairly lengthy stay. The January statement ur chartered banks to some extent reveals the posi- . Demand, or business, deposits during that month pped $25,000,000, or 6.6 per cent. Domestic credit curtailed by about $7,000,000, or 0.7 per cent., and ulation declined sharply by $16,000,000, or 14 per . Even more striking were the withdrawals of funds ad by our banks. Call loans, largely in New York, e reduced $13,000,000, or 12.8 per cent. Every im- ant account, however, showed a large increase over figures of January, 1912, and the people's savings inued to increase slightly, despite the stringency.

The effect of present money market conditions will ably be to make Canadian borrowings in London, cult, even at high rates of interest. It will probably ten industrial and business activity in Canada during spring and summer months. In the meatime, we shall be figuring again as to what sort of crops Provi- e and the Ontario and Western farmers will give year.

BANK MANAGEMENT

The personal factor, after all, is one of the most, if not the most important in business. In the Farmers Bank, that factor was extraordinarily weak. Not only was the general manager dishonest, but subordinates were either dull-witted or afraid of losing their jobs. The bank tottered and crashed.

In his report of the investigation of the bank's affairs, Sir William Meredith places the blame for the failure upon the management.

"The subsequent management of the affairs of the bank," said Sir William, "was characterized by gross extravagance, recklessness, incompetency, dishonesty and fraud, and has resulted in the entire loss of the paid-up capital and the whole of the deposits, and, after allowing for all that can be extracted from the shareholders on their double liability, a loss amounting to no less than $1,806,437, making a record unparalleled in the history of any bank in Canada, or, as far as I am aware, in any country."

The two chief lessons to be learned from this failure, it would seem, are that greater safeguards must be taken at the time of a bank's organization, and that it should be possible for a suspected bad management to be visited by the proper authorities, without notice and without apology. These matters are dealt with by provisions in the proposed bank act, and without doubt should become law. Incidentally, the personnel of a bank cannot be too carefully chosen.

THE MONEY TRUST

While several of the Opposition at Ottawa are dramatically inquiring, "Is there a money trust in Canada?" the Pujo Committee at Washington has found that such a trust exists in the United States. The committee was appointed to investigate the matter, and their report has just been presented. The majority report is signed by seven democrats. Two minority reports are signed by four republicans. The seven democrats agreed to the existence of the trust; three republicans dissented, but admitted a dangerous concentration of credit in New York, Boston and Chicago; and the remaining republican totally disagreed with the recommendations and findings of the majority.

The majority report, after declaring the existence of a money trust, said that "the increased concentration of control of money and credit had been effected principally as follows:—

"(1) Through consolidations of competitive or potentially competitive banks and trust companies, which consolidations, in turn, have recently been brought under sympathetic management.

"(2) Through the same powerful interests becoming large stockholders in potentially competitive banks and trust companies. This is the simplest way of acquiring control, but since it requires the largest investment of capital, it is the least used, although the recent investments in that direction for that apparent purpose amount to tens of millions of dollars in present market values.

"(3) Through the confederation of potentially competitive banks and trust companies by means of the system of interlocking directorates.

"(4) Through the influence which the more powerful banking houses, banks and trust companies have secured in the management of insurance companies, railroads, producing and trading corporations, and public utility corporations, by means of stock holdings, voting trusts, fiscal agency and contracts or representation upon their board of directors, or through supplying the money requirements of railway, industrial and public utilities corporations, and thereby being enabled to participate in the determination of their financial and business policies.

"(5) Through partnership or joint account arrangements between a few of the leading banking houses, banks and trust companies in the purchase of security issues of the great interstate corporations, accompanied by understandings of recent growth—sometimes called 'banking ethics'—which have had the effect of effectually destroying competition between such banking houses, banks and trust companies in the struggle for business or in the purchase and sale of large issues of such securities."

To help cure these evils, the committee suggested two bills, one forbidding the use of the mails to stock exchanges which fail to observe prescribed stringent regulations as to the conduct of their business, and the other prescribing rigid rules for the conduct of national banks, their officers, and clearing house associations to which they belong.

An examination of the position in Canada indicates that we have not a money trust dominating the situation. There is a certain amount of interlocking of directorates. That is natural, and applies the world over. A money trust would likely have its birthplace in banking spheres. In this country, we have nearly thirty chartered banks, and there is undoubtedly keen competition among them. The recent amalgamations of financial institutions have occurred largely as one of the results of that competition. When a business man with highly speculative or unsound ideas is refused further credit by his banker, we hear bitter complaints of a money trust. When a business man pits one bank against another to gain his ends, and wins, we hear little of a money trust. There are innumerable people in every part of the country who can relate experiences as to the lengths of competition to which the chartered banks of the Dominion go. In some cases, indeed it is a serious question as to whether or not that competition has been carried to extremes.

The frequent changes of control of important industrial and other corporations are further signs that there is not a money octopus in Canada. At present there are sufficient financial groups, divided in business sentiment divided by feuds, by many other severances, to preven any undue or harmful concentration of money power in Canada.

TROUBLES IN MEXICO

President Wilson is a man to whom pacific methods will appeal in dealing with the Mexican situation. Armed intervention by the United States would be an exceedingly dangerous experiment. The Mexican patriots would sacrifice everything for the preservation of independence The United States would find itself engaged in a lengthy war, costly, too, measured in men and money. Presiden Wilson, therefore, will undoubtedly use every known peaceful way to protect United States interests in Mexico The belligerent tone in many of the English papers i ill-advised. If Great Britain, France and other European countries make it known to the Mexican government tha law and order must be restored whatever it may cost hinting that otherwise the United States, under the Monroe doctrine, may have to intervene, it might have the desired result.

Many of those who have followed closely recent events in the turbulent republic feel that General Huerta is likely to remain president only until extreme martial government has had its effect on blazing revolutionary sentiment. That when dampened, it will smoulder only to flare again, is also probable. With quieter conditions will come the necessity of another president. There are many aspirants to the office, but De la Barra seems to be the most likely. He has already acted as provisiona president of Mexico, filling the short gap between the presidency of the overthrown Diaz and the lately assassinated Madero.

After Madero had become president, De la Barra received enthusiastic receptions at Vera Cruz and Mexico City. His relations with General Huerta, the interim president, also appear to be cordial. While De la Barra declined to comment publicly on the Madero administration, it was understood at the time that he had told his close friends that the task of extricating the country from its troubles rested upon the Madero administration, and moreover, that he had no political axe to grind. On the contrary, it is understood that he told them that he would support any lawfully constituted government which guarantees to protect life and property. His elevation to the presidency, therefore, would not be surprising. Then we may expect peace for a while at least, and later, more revolution, which still seems to be the normal state of Mexico.

SMALL CHANGE

Let the Suffragettes man the Canadian navy.

* * * *

Vote for harbor improvements on Canada's Pacific Coast.

* * * *

Graft is an ugly weed, and the people of Canada propose to root it.

* * * *

Vancouver should commence a persistent campaign for new industries.

* * * *

One day the high cost of living will get hit in a vita spot by an airship.

Money generally whispers, but when it does talk, it ually says "Farewell!"

* * * *

Opportunity knocks at every man's door, but it never nes disguised as a mining stock.

* * * *

Good roads should be built of good materials and engineers; not of patronage and by politicians.

* * * *

Mr. R. C. Miller, Canada's State prisoner, can at st claim that he went to the steak for his cause.

* * * *

Those Arctic lands to be explored for the Canadian ernment may be useful in satisfying gift-seekers at awa.

* * * *

President Wilson, Senator Root and Sir Edward y will now show ex-President Taft some Panama kbone.

* * * *

Pity the newly-found blonde Eskimo, who does not know the joys of a Canadian stock issue with a bonus common.

* * * *

A Toronto Liberal paper, writing of Dr. Clark, of Deer, refers to "Red Deer Clark," probably meaning iamentary venison.

* * * *

While the Canadian Senate is drawing fashion plates the Privy Council, that body continues to interpret law regardless of local politics.

* * * *

If Mr. W. F. Maclean, M.P., should sleep a little, the Bank Act revision may be finished before 1915.

* * * *

Even if Medicine Hat has a diabolical weather factory, it also has many other industries which give it a good claim to being an industrial centre.

* * * *

A deaf-mute was charged at Berlin, Ontario, with selling worthless stock to another unfortunate. He probably fingered as the average prospectus talks.

* * * *

Frequent train wrecks in Canada constitute another phase of our national carelessness. The Dominion Railway Board should give the subject more of their attention.

* * * *

Because *The Monetary Times* refused to print the prospectus of a certain company, the company cancelled its subscription to the paper. It really is hard to satisfy the modern promoter.

* * * *

A business man wanted credit and gave his banker a statement of liabilities and assets. Included in the latter was an "automobile, $5,000." "The only incorrect thing in this balance sheet," said the banker, "is that the automobile is on the wrong side."

A statistician figures that if all the debentures awaiting sale by Canadian municipalities were placed end to end, they would make a girdle reaching around the London underwriters' necks one hundred times, from the collar stud to the point of strangulation.

RAILROAD EARNINGS

The following are the railroad earnings for the week d February 14th:—

	1913.	1912.		Increase. or decrease.
adian Pacific	$2,200,000	$1,982,000	+	$218,000
d Trunk	866,864	777,236	+	89,628
adian Northern ...	306,200	276,900	+	29,300
iskaming & Northern Ontario	23,161	22,036	+	1,125

The following are the railroad earnings for the week d February 21st:—

	1913.	1912.		Increase or decrease.
dian Pacific	$2,337,000	$2,127,000	+	$210,000
d Trunk	945,099	818,729	+	126,370
dian Northern ...	389,100	325,500	+	65,600
iskaming & Northern Ontario	26,058	27,778	—	1,520

The following are the railroad earnings for the week d February 28th:—

	1913.	1912.		Increase. or decrease.
dian Pacific	$2,617,000	$2,466,000	+	$151,000
d Trunk	1,084,033	882,765	+	201,268
dian Northern ...	409,500	341,000	+	68,500
iskaming & Northern Ontario	27,066	24,397	+	2,669

The Grand Trunk's January statement shows net pro- s follows: Grand Trunk proper, increase £19,900 sterl- Canada Atlantic, decrease £2,050; Grand Trunk West- increase £800; Grand Trunk Keewatin and New Haven. ase £200; whole system, increase £18,850.

For January, 1913, the gross earnings of the Canadian ic Railway were $9,679,607; the working expenses, $8,- 33; net profits, $1,662,374. For the seven months end- anuary 31, 1913, the figures are as follows: Gross earn- $83,205,799; working expenses, $54,412,273; net pro- $28,793,526. In January, 1912, the net profits were $1,- 58, and for the seven months ending January 31st, 1912, et profits were $25,553,105. The gain in net profits is fore for January, $579,516, and for the seven months g January 31st, $3,240,421.

s a result of February being one day shorter this year last, the comparative statement of earnings for the last d of the month, issued by the Canadian Pacific Railway, shows the smallest increase of the company's current year —$151,000.

The Canadian Northern's January gross earnings were $1,513,400, increase, $285,300; January net earnings, $270,100, increase, $46,500. For the seven months gross earnings were $16,756,300, increase $1,190,500; and the seven months net were $3,723,200, increase $554,400.

◆

GUELPH AND ONTARIO INVESTMENT AND SAVINGS SOCIETY

A noteworthy annual report is the thirty-seventh of the Guelph and Ontario Investment and Savings Society.

The society's net profits for the year amounted to $104,628.

The reserve fund was increased by $50,000, and now amounts to $436,000, which is equivalent to 83.20 per cent. of the society's paid-up capital.

After adding the balance brought forward from the previous year, viz., $10,492, to the net profits there was a total of $115,120 available for distribution. Dividends were paid amounting to $52,400, and $12,720 carried forward in addition to the amount added to reserve fund.

British investors own debentures of the society to the extent of $170,787.

The total assets of the society are shown as $3,156,265, and are as follows: Mortgages and other securities, $3,051,055.48; office premises, $20,000; cash in Bank of Montreal, $74,580.56; cash in National Bank of Scotland, Limited, $2,071.33; cash on hand, $8,307.71; rents accrued, $250; and the amount of the liabilities was $2,157,344, which are as follows: Savings deposits, $528,190.76; currency debentures, $1,418,673.44; sterling debentures, $170,787.50; interest accrued on deposits and debentures, $39,692.48. Leaving surplus assets $998,920.90, composed of: Fixed and permanent stock subscribed, $900,000, on which has been paid $524,000; dividend payable 2nd January, 1913, $26,200; reserve fund, $436,000; balance profit and loss account, $12,720.90.

Messrs. Pope, Rooke and Grant is a new Regina firm of chartered accountants. The partners are Mr. J. C. Pope, who has been provincial auditor of Saskatchewan for many years. Mr. G. C. Rooke has been practising two years as a chartered accountant in Regina, and Mr. Thomas Grant has been chief auditor of the Saskatchewan telephone department for several years.

INAUGURAL ADDRESS OF UNITED STATES PRESIDENT

An Historic Document—Problems to be Faced—Day of Dedication

President Wilson's inaugural address is a tribute to his originality and apperception. He goes right to the root of things, interpreting and elucidating popular political developments of recent years and pointing out the obvious lesson which they convey. His address is masterful and sweeping. It is dictated by a vision splendid and a broad statesmanlike grasp of the duties of the office which is to be his throughout the coming four years. It is not the speech of a partisan or of a party leader; it is pre-eminently the speech of a far-seeing, courageous and patriotic American, says Financial America.

The address, in part, was as follows:—

"We see in many things that life is very great. It is incomparably great in its material aspects, in its body of wealth, in the diversity and sweep of its energy, in the industries which have been conceived and built up by the genius of individual men and the limitless enterprise of groups of men. It is great, also, very great, in its moral force. Nowhere else in the world have noble men and women exhibited in more striking forms the beauty and the energy of sympathy and helpfulness and counsel in their efforts to rectify wrong, alleviate suffering, and set the weak in the way of strength and hope. We have built up, moreover, a great system of government, which has stood through a long age as in many respects a model for those who seek to set liberty upon foundations that will endure against fortuitous change, against storm and accident. Our life contains every great thing, and contains it in rich abundance.

Count the Human Cost.

"But the evil has come with the good, and much fine gold has been corroded. With riches has come inexcusable waste. We have squandered a great part of what we might have used, and have not stopped to conserve the exceeding bounty of nature, without which our genius for enterprise would have been worthless and impotent, scorning to be careful, shamefully prodigal as well as admirably efficient. We have been proud of our industrial achievements, but we have not hitherto stopped thoughtfully enough to count the human cost, the cost of lives snuffed out, of energies overtaxed and broken, the fearful physical and spiritual cost to the men and women and children upon whom the dead weight and burden of it all has fallen pitilessly the years through. The groans and agony of it all had not yet reached our ears, the solemn, moving undertone of our life, coming up out of the mines and factories and out of every home where the struggle had its intimate and familiar seat. With the great government went many deep secret things which we too long delayed to look into and scrutinize with candid, fearless eyes. The great government we loved has too often been made use of for private and selfish purposes, and those who used it had forgotten the people.

Ought to be Altered.

"We have itemized with some degree of particularity the things that ought to be altered, and here are some of the chief items:—A tariff which cuts us off from our proper part in the commerce of the world, violates the just principles of taxation, and makes the government a facile instrument in the hands of private interests; a banking and currency system based upon the necessity of the government to sell its bonds fifty years ago and perfectly adapted to concentrating cash and restricting credits; an industrial system which, take it on all its sides, financial as well as administrative, holds capital in leading strings, restricts the liberties and limits the opportunities of labor, and exploits without renewing or conserving the natural resources of the country; a body of agricultural activities never yet given the efficiency of great business undertakings or served as it should be through the instrumentality of science taken directly to the farm, or afforded the facilities of credit best suited to its practical needs; water-courses undeveloped, waste places unreclaimed, forests untended, fast disappearing without plan or prospect of renewal, unregarded waste heaps at every mine. We have studied as perhaps no other nation has the most effective means of production, but we have not studied cost or economy as we should either as organizers of industry, as statesmen or as individuals.

Service of Humanity.

"Nor have we studied and perfected the means by which government may be put at the service of humanity, in safeguarding the health of the nation, the health of its men and its women and its children, as well as their rights in the struggle for existence. This is no sentimental duty. The firm basis of government is justice, not pity. These are ma ters of justice. There can be no equality of opportunity, t first essential of justice in the body politic, if men and w men and children be not shielded in their lives, their ve vitality, from the consequences of great industrial and soci processes which they cannot alter, control or singly co with. Society must see to it that it does not itself crush weaken or damage its own constituent parts. The first du of law is to keep sound the society it serves. Sanitary law pure food laws, and laws determining conditions of lab which individuals are powerless to determine for themselv are intimate parts of the very business of justice and leg efficiency.

"This is not a day of triumph; it is a day of dedicatio Here muster, not the forces of party, but the forces humanity. Men's hearts wait upon us; men's lives har in the balance; men's hopes call upon us to say what we w do. Who shall live up to the great trust? Who dares fa to try? I summon all honest men, all patriotic, all forwar looking men, to my side. God helping me, I will not fa them if they will but counsel and sustain me."

◆

HELPS TO AGRICULTURISTS

More than $2,500,000 is expended annually by the D minion department of agriculture in carrying on work in tl interest of the farming community. This large amount money is divided among several branches to carry on tl special duties with which they are intrusted. The exper mental farms seek to solve problems in all phases of agr culture, including grain growing, live stock husbandry, hort culture, agriculture, etc.; the seed branch works to encourag the use of only good seed; the live stock branch endeavors increase the profits of the stock raiser; the health of anima branch aims to protect our herds and flocks from disease; tl dairy and cold storage branch does much to help the dairyme and fruitgrowers, while the tobacco division endeavors to fir out and teach which are the best kinds of tobacco and the be ways of treating the crop in Canada.

By the use of reports and bulletins the several branches the department give out the results of their work so that a who wish to do so may profit by it. The publications are se out to all persons who apply for them or to be put on tl mailing list. In each case surplus copies are printed to me the popular demand so as not to deprive any who desire receive them.

◆

UNITED STATES RAILWAY BUSINESS IN 1912

During a period of expanding business profits at fir usually rise more rapidly than expenses. That this has n been the case with the railways of the United States durin the recent high tide of traffic is shown by their returns for th calendar year 1912. The total operating revenues are the total receipts from freight and passenger traffic, from carr ing mail and express and from miscellaneous source Operating income is the amount which after all expenses hav been paid remains for rentals, interest on bonds, appropria tions for betterments, improvements, new construction an for dividends.

The total receipts of the railways of the east were $1,5 per mile higher than for 1911, but operating income gaine only $240. The total receipts of the railways of the south in creased $492 a mile for the year, but operating incom suffered a loss of $109. The railways in the West gained $2 per mile in operating income, which offset the loss of approx mately the same amount in the previous year. If the closin six months of 1912 be alone considered the situation was no so unfavorable but even for this period of mounting traffic th increase in expenses outran the increase in receipts.

That the funds available for developing and extendin the railways have not kept pace with the growth in traffic o the increased expenses of operation is shown by the followin percentages. For the railways of the east the total operatin revenues increased 7.2 per cent., operating expenses 8.3 pe cent., and taxes 8 per cent., leaving an increase in operatin income of 4.3 per cent. For the railways of the south tota operating revenues increased 4.9 per cent., operating exp 8.4 per cent., and taxes 2.8 per cent., leaving a decrea operating income of 4 per cent. The unusual traffic of West enabled the railways of that section to obtain an incr of 8.4 per cent. in operating income, which just about bal the losses sustained during 1911.

The foregoing figures are all upon the mile of line b and were compiled by the United States bureau of rail economics from the reports made to the interstate comm commission by the railways having total annual opera revenues of one million dollars or over. These include a ninety per cent. of the steam railway mileage of the Unite States.

PENMANS, LIMITED

Satisfactory Annual Statement—Figures for Year Compared—Directors Are Conservative

Monetary Times Office,
Montreal, March 5th.

Penmans, Limited, made an excellent showing in the anual statement presented at the meeting of the shareholders eld at Montreal. The profits of the year were $404,359, eing $63,011 more than those of the previous year. After all harges and appropriations of the year had been met, the ompany was able to carry forward from the operations of he year the sum of $36,693. As this was $58,929 more than year ago, it will be evident that in 1911 the company had to all upon its profit and loss surplus for the difference.

The following summary shows the figures for the year 911, with comparisons:—

rofits		$404,359	Inc.	$63,011
ld machinery broken up	$15,507		Inc.	2,780
ad debts	1,635		Inc.	1,302
		17,142	Inc.	$ 4,082
		$387,217	Inc.	$58,929
ond interest		100,000		
		$287,217		
ransferred to reserve account		100,000		
vailable for dividends		$187,217	Inc.	58,929
reference dividends		64,500		
vailable for common dividends		$122,717	Inc.	58,929
ommon stock dividends		86,024		
urplus earnings over all charges in 1912		$ 36,693	Inc.	58,929
urplus at beginning of year		410,414	Dec.	22,236
otal surplus		$447,107	Inc.	$36,693

ay Retire Stocks.

It will be seen from the above that the company had a eserve at the credit of profit and loss at the end of the year nounting to $447,107, and that in addition to this it had rried $100,000 to the credit of reserve fund. This brought e total amount at the credit of the latter account to $500,o.

Because of the showing made by the company, there is lk in local financial circles to the effect that the directors ay have in view the intention of retiring the preference ock. This amounts in all to $1,075,000, issued, the common ock issue amounting to $2,150,600. In addition to this the ompany has an issue of bonds amounting to $2,000,000 five er cents.

With respect to the relation between current assets and abilities, the concern continues in good standing. The urrent assets now amount to $2,260,778 while the current abilities amount to $1,255,756. The cash position at the nd of the year was good, there being a balance of $45,560 the bank.

onservative Policy Shown.

Penmans has been long paying 4 per cent. on its common ock and every now and again the report gains circulation at it is the intention of the company to increase the vidend. That a dividend of 6 per cent. would be possible not doubted, although to pay such dividend it would be ecessary to reduce some other appropriation—such, possibly, the transfer to reserve account which amounted, as may be een, to $100,000, being the same as a year ago. On the asis of the above showing, the company earned just 5.7 per ent. available for dividends on the common stock, so that a atter of $8,000 more would have sufficed to have met the per cent. Notwithstanding the good results shown from ear to year, however, the directors of the company have folwed the conservative course of applying large sums to reerve rather than pay it out in dividends to shareholders, and feeling of security has been their reward during the periods less remunerative business which the concern, in common ith all industrial concerns, occasionally encounters.

◆

Mr. G. M. Todd, manager of the Westmount branch of e Royal Bank, has joined the Montreal stock exchange firm Messrs. J. and L. M. Wood.

PERSONAL NOTES

Mr. Avern Pardoe, Jr., has been elected a member of Toronto Stock Exchange.

Mr. A. T. Shaughnessy has been elected a member of the Montreal Stock Exchange.

Mr. Adam Reid, managing director of the Western Life Assurance Company of Winnipeg, was a visitor at the office of The Monetary Times this week.

Mr. A. N. Mitchell, who has been acting as general manager, has been appointed general manager of the Federal Life Assurance Company. He went to Hamilton from the Manufacturers' Life, Toronto.

Mr. Hedley C. Wright, formerly with the London Guarantee and Accident Company, Limited, has been appointed agency superintendent for the accident branch of the Norwich Union Fire Insurance Society, Limited.

Mr. A. M. Mackay, head of the advertising department of the Sun Life Insurance Company, and editor of the company's publications, died at Westmount, Montreal. He joined the Sun Life staff fourteen years ago and had lived in Montreal since then.

Mr. James H. Scott, who recently retired from the position of general manager of the Gresham Life Assurance Society, Limited, was entertained to luncheon by the members of the board, and presented by the directors with a handsome piece of silver plate.

Mr. J. S. Floyd has been appointed auditor and comptroller for the districts of Oak Bay, B.C., and Esquimalt, B.C., Victoria's suburbs. Mr. Floyd has been filling the office of clerk of Oak Bay successfully, and in his new capacity the districts under his supervision should receive careful and conservative management.

Mr. R. O. Johnson and Mr. R. D. Bell have been admitted as partners in the firm of Messrs. Greenshields and Company, Montreal. They have been with the firm since its inception. The other partners are Mr. Melville Greenshields and Mr. Gordon Greenshields. Before joining Greenshields and Company, Mr. Johnson was a member of the New York staff of Messrs. Laidlaw and Company. Mr. Bell similarly came to Montreal from New York, where he was a member of the financial staff of the "Sun."

◆

MONTREAL CITY AND DISTRICT SAVINGS BANK

Upwards of two million dollars were withdrawn during a run on the Montreal City and District Savings Bank, started apparently on some groundless rumor.

The City and District Bank is the receiver in Montreal for the government gold, and it is claimed that upwards of $50,000,000 in the yellow metal was actually in the headquarters while the run was on there, and at the different branches. Some $2,500,000 gold was placed at the disposal of the bank by a wire from the Finance Minister, this representing government securities held by the bank. In addition to this, the bank received assurances from the Montreal, Royal and Merchants Banks, and others. Another announcement was to the effect that the bank received no less than $5,000,000 cash through the government, the amount being advanced by cable on the bank's London securities.

◆

PACIFIC BURT COMPANY

Growth and progress in the company's activities are exhibited by the financial statement of the Pacific Burt Company.

Increased net profits are shown, the total being $79,669. The balance carried forward from 1911 was $21,236, making $100,905 available for distribution, as follows:—

Dividends on preference stock Nos. 6, 7, and 8, $34,125; reserved for dividend No. 9, payable January 2nd, 1913, $11,750; dividend on common stock No. 3, $6,500; reserved for dividend No. 4, payable January 2nd, 1913, $6,500—$13,000; transferred to real estate and plant reserve account, $10,000; balance carried forward to 1913, $32,405.33.

The total assets are $1,428,821, of which the company has in real estate, buildings, plant, patents, goodwill and investments, $1,187,746; stock in trade, $87,066; accounts and bills receivable, $124,754; cash at bankers and in hand, $29,254.

The officers for the ensuing year are: President, Mr. S. J. Moore; vice-presidents, Mr. F. N. Burt and Mr. H. T. Scott. The general manager is Mr. Horace P. Brown.

FEBRUARY FIRE LOSSES

Heaviest on Record for Second Month of the Year—Largely Result of Careless Individuals

The Monetary Times' estimate of Canada's fire loss during February amounted to $2,037,386, compared with January loss of $3,913,385 and $1,640,153 for the corresponding period of last year. The following is the estimate for February losses:—

Fires exceeding $10,000	$1,377,750
Small fires	393,890
Estimates for unreported fires	265,746
	$2,037,386

This is the heaviest loss on record for February.

The largest loss was at Point Hawkesbury, N.S., where the North Atlantic Fisheries plant was destroyed. Winnipeg also had heavy loss. There were twenty-six large fires during the month.

The following are the monthly totals of the losses by fire during 1909, 1910, 1911 and 1912.

	1909.	1910.	1911.	1912.
January	$1,500,000	$1,275,246	$2,250,550	$3,002.650
February	1,263,005	750,625	941,045	1,640,153
March	851,690	1,076,253	852,380	2,261,414
April	720,650	1,717,237	1,317,900	1,355,055
May	3,358,276	2,735,536	2,564,500	2,251,815
June	1,360,275	1,500,000	1,151,150	4,229,412
July	1,075,600	6,386,674	5,384,300	1,741,371
August	2,582,915	1,667,270	920,000	1,164,760
September	1,615,405	894,125	1,123,550	883,949
October	2,208,715	2,195,781	580,750	1,416,218
November	935,191	1,943,708	1,506,500	1,184,010
December	1,433,813	1,444,860	2,866,950	1,769,905
	$18,905,538	$23,593,315	$21,459,575	$22,900,712

Many Heavy Losses.

The fires at which loss was estimated at $10,000 and over were as follows:—

Cobden, Ont.	Business block	$ 10,000
Vienna, Ont.	Business section	25,000
Ottawa, Ont.	Store, etc.	15,000
Ottawa, Ont.	Business block	125,000
Winnipeg, Man.	Business block	235,000
Ottawa, Ont.	Scholisticate	20,000
Hamilton, Ont.	Planing mill	10,000
Elk Lake, Ont.	Hotel, etc.	28,000
Gull Lake, Sask.	Business block	75,000
Montreal, Que.	Factory	50,000
Souris, Man.	Store	50,000
Essex, Ont.	Stores, etc.	10,000
St. Thomas, Ont.	Business block	48,000
Campbellton, N.B.	Business block	19,000
Campbellton, N.B.	Business block	25,000
Pt. Hawkesbury, N.S.	Fisheries plant	250,000
Toronto	Canoe club	20,000
Toronto	Conflagration	35,000
Scotstown, Que.	Store, etc.	50,000
Bassano, Alta.	Coal chute	10,000
Sandwich, Ont.	Store	10,000
Halifax, N.S.	Business section	25,000
Bancroft, Ont.	Corundum mills	125,000
Orillia, Ont.	Store, etc.	66,000
Brantford, Ont.	Store	26,750
Winnipeg, Man.	Business block	15,000

The fire waste in each province for the first two months of this year has been estimated as follows:—

Alberta	$2,051,605
Ontario	1,407,866
Manitoba	730,565
Saskatchewan	583,895
Nova Scotia	402,054
Quebec	297,504
British Columbia	192,168
New Brunswick	165,202
Prince Edward Island	20,012
	$5,950,771

Many Homes Were Destroyed.

The structures damaged and destroyed were 117 residences, 43 stores, 14 blocks, 14 barns and stables, 11 factories, 6 hotels, 4 churches, 4 educational institutions, 4 sheds, 4 workshops, 4 garages, 3 children's homes, 2 skating rinks, 2 business sections, 2 flour mills, 2 elevators, 2 [illegible] buildings, 2 steamships, 2 newspaper offices, 1 planing mill, 1 foundry, 1 station, 1 greenhouse, 1 railway tower house, 1 hospital, 1 barracks, 1 bank, 1 fishery plant, 1 theatre, 1 granary, 1 corundum mills,

There were destroyed 16 horses, 15 cows, 22 pigs, 1,320 chickens, 16 sleighs, 18 sets harness, 3 freight cars, 1 box car, 1 engine, 2 automobiles, 4,500 bushels wheat, 200 bushels potatoes.

Evidence of Individual's Carelessness.

Of the presumed causes, 13 were attributed to defective chimneys and flues, 32 overheated stoves and furnaces, 12 matches, 10 overheated stovepipes, 9 defective stoves and furnaces, 8 thawing pipes, 9 electrical defects, 7 hot ashes, 5 heaters, 4 spontaneous combustion, 4 gas jets, 3 sparks, 3 cigar stubs, 3 candles, 3 lamps exploded and upset, 3 gasoline, 2 defective stovepipes, 2 lighted torches, 1 clothing left near stove, 1 locating gas leak with light, 1 children set pillow alight, 1 incendiary, 1 gas stove, 1 friction, 1 upset gasoline stove, 1 hot journal, 1 smoking in bed, 1 coal oil stove ignited straw, 1 salamander set cotton alight.

Deaths Show Increase.

During February twenty-one lost their lives through fire, which is an increase of seven over January. Burning accidents were numerous.

The following are the monthly totals compared with 1909, 1910, 1911 and 1912:—

	1909.	1910.	1911.	1912.	1913.
January	16	27	27	27	14
February	8	15	12	11	21
March	16	20	18	24	..
April	18	37	20	15	..
May	21	15	28	18	..
June	16	52	13	6	..
July	4	15	110	9	..
August	17	11	22	16	..
September	10	10	13	6	..
October	26	16	17	21	..
November	34	19	20	22	.
December	33	19	17	28	.
Totals	219	256	317	203	35

The fires at which fatalities occurred were:—

Sandwich, Ont.	Burning building	1
Toronto, Ont.	Playing with matches	1
Belleville, Ont.	Railway engine	1
Minaki, Ont.	Burning building	2
London Twp., Ont.	Set clothes alight	1
Ottawa, Ont.	Burning building	1
Elk Lake, Ont.	Burning buildings	3
Kaslo, B.C.	Burning building	1
Pelee Island, Ont.	Set clothing alight	1
Port Robinson, Ont.	Set clothing alight	1
Eyebrow, Sask.	Coal oil explosion	2
Batiscan, Que.	Burning building	2
Shebashekong, Ont.	Burning building	1
New Westminster, B.C.	Set clothing alight	1
Adamston, Ont.	Set clothing alight	1
Kingston, Ont.	Set clothing alight	1

◆

WESTERN LIFE ASSURANCE COMPANY

The first annual financial statement of the Western Life Assurance Company shows clearly the advances made by this young but energetic institution. It has insurance in force to the extent of $1,183,349.

During the year $210,000 of business was declined or deferred, and one death claim only was made, this for $1,000. These facts are indications of the company's careful underwriting, and of its conservative management.

In moving the adoption of the report the president, Mr T. W. Taylor, M.P.P., remarked: "All our resources have been conserved in such a manner as to build and strengthen our institution. Less than five dollars per share is all that it has cost to secure the amount of stock already sold."

The total value of assets owned by the company is $124,000, and include those invested in first mortgages totalling $25,350, premiums outstanding and deferred $21,060, cash in bank and on hand $11,572

Liabilities amount to $93,694, leaving a net surplus or undivided fund of $30,306.

The security for policyholders, including policy reserves, net surplus and capital stock, is $123,197, in addition to which is capital stock subscribed but not called amounting to $286,720, bringing the total to $409,916.

Mr. A. Reid, the managing director, is to be congratulated on the results attained. If the policy followed from the inception of the company is continued the Western Life is destined for a goodly measure of deserved success.

REVIEW OF THE MONTH

anadian Flotations in London—Investment Offerings —Dividend Changes

SPECULATIVE AND INVESTMENT OFFERINGS

The following speculative and investment offerings were nong those made in Canada during February:—

Winnipeg Northern Realties, Limited.—$250,000 7 per ent. cumulative preferred stock at 92½ with bonus of 40 per ent. common stock.

Send re-ies to Box 167, The Monetary Times, Toronto.

ONTARIO'S MINOR MINERAL PRODUCTS

Are Produced in Large Quantities and Their Commercial Uses Are Varied

A feature of Ontario's mineral industry is the variety of its products, which include most of the metals and a number of non-metallic substances, in addition to those dealt with under their respective headings above. Most of them are being produced in considerable quantity, and in the case of many the supply is limited only by the demand. Among these substances are corundum, feldspar, graphite, to which may be added, among manufactured products, calcium carbide, states the 21st annual report of the Ontario Bureau of Mines.

For a number of years, in fact almost since the discovery of the fact that lime and carbon fused together would on the application of water emit acetylene gas, which could be utilized for illuminating purposes, a factory for the production of calcium carbide has been operated at Merritton, on the old Welland Canal. Some years later another plant was established at Ottawa, both factories taking advantage of cheap water power for the necessary electrical current. The output of these works for 1911 was 1,383 tons, valued at $84,437. In the previous year 3,072 tons were produced valued at $184,323. The explanation of the decrease lies in the fact that the Ottawa Carbide Company sold out to the Canada Carbide Company, Limited, of Montreal, and ceased operations after the sale, having run the plant for 120 days only. The Willson Carbide Company, which carried on the manufacture at Welland, also went out of business.

Fifteen Hundred Tons of Corundum.

The production of grain corundum last year was 1,471 tons, worth $147,158. In 1910 it was 1,870 tons, having a value of $171,944. Formerly, there were two companies engaged in mining and preparing corundum for the market, but in 1910 the Manufacturers' Corundum Company, Limited, acquired the property of the Canada Corundum Company, and leased the mines and works of the Ashland Emery and Corundum Company, thus obtaining sole control. An average of 199 men were employed during the year, earning wages amounting to $124,491. The corundum of Ontario is found as crystals embedded in syenitic rock, from which they are separated by crushing and concentration. The finished product is graded into sizes according to the size of the grains, and is used for abrasive, cutting and polishing purposes in the treatment of metal goods. In hardness corundum stands next to the diamond. Chemically it is pure alumina, and efforts have been made to employ it as an ore of aluminium, but the problem of getting rid of the oxygen has proven a difficult one. It is much richer in the metal than bauxite, the raw material usually employed for the production of aluminium. The mines are situated at Craigmont and Burgess mines, the former being in the County of Renfrew and the latter a short distance away in the County of Hastings.

Potteries Use Feldspar.

The variety of feldspar raised in Ontario for commercial purposes is microcline, pink or salmon-red in color and containing 13 or 14 per cent. of potash. It is exported to the potteries of Ohio and New Jersey, and is also utilized in the manufacture of enamelled ware. The quarries are situated near Verona, in the County of Frontenac, on the Kingston and Pembroke Railway. Some 17,697 tons were raised and shipped in 1911, valued at $51,610, as against 16,374 tons in 1910, worth $47,518. The largest production was by the Kingston Feldspar and Mining Company, Kingston, smaller quantities being raised by the Dominion Improvement and Development Company, Perth; the McDonald Feldspar Company, Toronto, and the Ojaipee Silica and Feldspar Company, Toronto. The property operated by the last-mentioned company is situated at Long Lake, in the Township of Conger, Parry Sound district. Several quarries owned by other persons or firms in the neighborhood of Verona were idle during the year.

Many Uses for Graphite.

Two companies, the Globe Refining Company, Limited, at Port Elmsley, and the Black Donald Graphite Company, Calabogie, raised a total of 4,833 tons of crude graphite ore in 1911, and shipped refined products from their treating plants to the extent of 894 tons, worth $36,492. The Virginia Graphite Company is developing a property and erecting a plant near Wilberforce, but has not yet shipped any ore or product. Graphite has many uses, being employed in the manufacture of crucibles, in lead pencils ,as a lubricant for foundry facings, as stove polish, etc. It is sometimes known as plumbago, and also as "black lead."

ce $200. Insured with Hand-in-Hand and Queen City.
is was a total loss amounting in all to $10,010. Cause un-
own.

WORKMAN'S COMPULSORY COMPENSATION

As president of the Seattle Construction and Dry Dock
mpany, the largest ship-building enterprise in the North-
st, and one of the largest industries in the state of Wash-
gton, and also representing many other employers of simi-
convictions, Mr. J. V. Paterson denies the conclusions
the industrial insurance commission that "The employers
the state of Washington, their employees under the act,
d the general taxpayers, are so nearly unanimously satis-
d with" the state compensation and insurance law and its
eration. He shows in an interesting review that:

(1) The creation of forty-seven separate and distinct
npulsory employers' insurance associations to guarantee
rkmen's compensation is a crime against business.

(2) State administered industrial insurance is an injus
to employers.

(3) The law is a breeder of accidents and is unjust to
rkmen.

(4) It is a tool for unscrupulous politicians to menace
siness.

CANNERIES' BUSY YEAR

This is the year of the big fourth year sockeye run, and it has been announced that every cannery on the Fraser River, B.C., will be operating. These number fourteen and many have been shut down since the last big year in 1909.

In this connection it is interesting to note that the American Can Company which has taken over the Cliff can factory in East Burnaby, is trebling the capacity of its plant.

Mr. Wilfred Doughty, son of Sir George Doughty, head of the British Columbia Fisheries, has also stated that his company will build a salmon cannery on the Fraser River as soon as their plant at Skidegate, Queen Charlotte Island, is finished.

F. N. BURT COMPANY

The F. N. Burt Company's fourth annual statement shows that satisfactory results were obtained during the past year with a noticeable augmentation in the volume of business.

The profits were $189,430, an increase of $10,988 over those of the previous year.

The usual dividends of 7 per cent. on preferred and 6 per cent. on common stock were paid, $25,000 was transferred to the realty and plant reserve account, which now stands at $75,000. $13,625 was paid to underwriters as commission on new issue of preference stock and a balance of $137,874 transferred to profit and loss account.

The $545,000 of new preference stock offered to the shareholders was all allotted and payments were made thereon of $253,322 up to December 31. The company had the use of this extra capital for an average of only twenty-five days, so that the earnings thereon have contributed but little to the year's results. Since December 31 there has been paid the additional sum of $232,203.

Assets totalling $2,990,759 include real estate, buildings, plant, machinery, patents, goodwill and investments, $2,285,626.09; stock in trade, $353,585.96; accounts and bills receivable, $264,802.74; cash at bankers and on hand, $86,744.70.

Mr. S. J. Moore, president of the company, referred to the increased facilities of the company, and in regard to the business of the current year, said:

"It is, of course, impossible to make an accurate forecast for the year 1913, but it will be of interest to the shareholders to know that the outlook for the current year is at least as good as was the outlook at the beginning of 1912; and as we are now possessed of the larger and better facilities our profits should exceed those of 1912 by at least $50,000, if no adverse conditions arise during the year. For the months of January and February our shipments have exceeded the output for the corresponding months of 1912 by upwards of 16 per cent.

REGISTRATION OF VITAL STATISTICS

"Registration of vital statistics is not a fad of doctors and scientists but a fundamental need of the movement to prolong human life," is the statement made by the Association of Life Insurance Presidents in a brief prepared for presentation to the legislatures of states which are deficient in recording births and deaths. The association, which made the brief public this week, has been engaged for some time in planning a war on preventable diseases with the hope ultimately of prolonging the lives of policyholders. In accordance with action taken at its sixth annual meeting in December it is for the time being concentrating its health activities in a movement for better vital statistics that will insure an accurate checking up of the ravages of preventable diseases. Authorities are quoted to show that the elimination of preventable diseases would mean an economic gain of one and one-half billion dollars a year to this country.

"The intimate relationship between the registration of deaths and the intelligent control of the public health is so obvious as to require no discussion," states the brief. "A study of the data of the 'registration area' of the United States in which mortuary figures are accurately collected, leads to the estimate that 1,500,000 persons die each year in this country. A similar well-founded estimate shows that 630,000 of the one and one-half million deaths are due to preventable diseases. It seems almost incredible that a matter of such importance as the saving of over a half million lives has to be a matter of estimation or conjecture. It is the more incredible when we know that the exact truth may be ascertained by a comparatively simple method which is already successfully employed throughout many states.

UNITED STATES BUYS CANADIAN BONDS

Montreal's London Loan—Toronto's Recent Transaction—Indigestion in England—Mexico's Finances

Montreal, through its financial agent, the Bank of Montreal, has placed on the London market a loan of $7,000,000 at 4½ per cent. The loan, while floated at par, brings a net return to the city of 98, the commission and other incidental charges having to be assumed by the city authorities.

More than 75 per cent. of the $1,040,000 Toronto bonds purchased by Messrs. N. W. Harris and Company, of Montreal and Boston, are said to have been sold. This enterprising firm also acquired a block of $1,089,000 4 per cent. Vancouver bonds. These purchases have attracted much attention, especially that of Toronto.

Other purchases by United States firms are reported pending. This transaction was made through Messrs. W. L. McKinnon & Company, Toronto, on a commission of one-quarter of one per cent. The price received by the city was 92.52 and interest.

Regarding Municipal Financing.

In criticizing the price a Toronto daily says, "The bungle of the Toronto loan is being commented on freely in financial circles, and generally the opinon prevails that from the promoters' standpoint the issue was most desirable.

"Toronto is paying five per cent. for its money, and might have obtained it at 4 3-5, the price the investors are obtaining."

Messrs. W. L. McKinnon and Company, the intermediary brokers state in reply to this criticism, that there is a money stringency existing throughout the world to-day which has caused the prices of Canadian municipal debentures to drop all along the line. Edmonton's debentures, for example, between July, 1912, and February, this year, went down fifteen per cent. Hamilton's dropped in twelve months seven per cent. Saskatoon's last issue was ten per cent. less than the preceding issue.

And Mr. A. L. Fullerton of the Dominion Securities Company in discussing the sale suggests, "That one thing is sure, for it has been proved: No English banking house is prepared at this time to pay any such price for city of Toronto bonds; then why grumble if a banking concern on this side is willing to make the purchase at a rate which cannot be obtained elsewhere in the world's money market? Moreover, the fact that the last sale for a longer term was for $80 odd, while this for nine years is for $90 odd, would seem to show a fair and reasonable price has been obtained."

Appetite has Limitations.

Canadians had been very large borrowers on the London market during the last few years, suggested Chairman Tomkinson at the annual meeting of the Bank of British North America, which was quite a healthy sign of the country's growth, so long as the capital obtained was wisely and economically spent.

At the same time the appetite of the English investing public was not unlimited and there were now signs of an attack of indigestion.

The investing public, in quite a number of cases, had failed to come forward to relieve the underwriters.

The present time was very unfavorable for fresh capitalistic expenditures, owing to the activity of trade at home, which kept money dear, while the requirements of foreign governments would also have to be met in the London market.

"We have recently made acquaintance," said the speaker, "with those who undertake these new issues. We think it would be wise of them not to do so without realizing the difficulties they may meet and the high rates they may be required to pay."

Mexico's Financing.

President Huerta is quoted as saying that a French banking house has offered the best terms for a large Mexican loan for pacification and rehabilitation purposes. The government has ordered a coinage of $1,[illegible] in pesos and half pesos to relieve the heavy drain on the banks due to the export of coins instead of bullion.

◆

The net revenue to Medicine Hat, Alta., for the sale of natural gas for the past year was almost $[illegible]. If the weather had not been so mild for the latter part of the year, Commissioner Grimmer estimates that the total would have run close to $[illegible] net. For the year 1911 the net profits from this department of the city's public utilities were $23,280. This was accomplished by selling the gas to consumers for [illegible] use at [illegible] cents per thousand and to manufacturers at 5 cents per thousand feet.

STRINGENCY FELT IN WESTERN CANADA

Increased Immigration—General Trade Conditions—Building at Edmonton

Monetary Times Office,
Winnipeg, March 5, 1913.

Mr. J. Bruce Walker, commissioner of immigration at Winnipeg, reports that during January of this year there was an increase of 53 per cent. in immigration over January of last year. The increase through United States ports amounts to 16 per cent. over the same month last year. In January, 1913, 5,873 newcomers entered the Dominion through ocean ports as against 3,848 in January of last year, an increase of 2,024. From the United States 5,028 entered during the month as against 4,321 in January, 1912, an increase of 687.

Collection and Loans.

The industrial outlook is a little clouded by the money stringency at present, but this is considered to be only temporary. General business interests are not suffering a great deal from the lack of accommodation.

There is no lack of demand for loans, but the volume of business in that connection is being restricted by the limitation of funds for that purpose.

Collections have not improved to any extent, but local jobbers are optimistic in the matter. It is expected that more money will be available as more grain is marketed and industrial work becomes more active.

A country merchant in Saskatchewan blames the machinery men for tightness of money.

Clever salesmen, says he, sell many farmers more implements than are actually necessary. The machinery house is secured better than the other merchants that supply merchandise to these farmers.

The merchant referred to claims that many farmers purchase on credit more machinery than their farms can pay for; they are careless regarding this equipment, and before they are paid for the implements are practically worn out through neglect.

Development Continues.

The railways are preparing to do a great amount of work this year, and if the announced programmes are carried out, the mileage added to the western country during 1913 will be substantially greater than in any previous year.

At Edmonton there are indications of a very active sea son in the building trades, architects and contractors r porting a large amount of business in sight for so early in the season.

LARGELY INCREASED MINERAL PRODUCTION

An increase of $29,906,495, or nearly 29 per cent., shown by the preliminary report on the mineral producti of Canada during 1912.

The total value of the year's production was $133,127,48 or a per capita production of $18, the highest on recor Nearly every important mineral in Canada shows an increased production in 1912, so far as value is concerned. In the case of silver only is there a decrease in quantity, and this only two per cent., the increase in total value of the silv mined being due to higher prices. Increases in output a as follows:—

Pig iron, 10.5; gold, 28; copper, 40, and lead 50 p cent. Increases in total value are: Silver, 12; Nickel, 3 copper, 85, and lead 93 per cent.

Coal shows an increase of 30 per cent. in tonnage, gy sum 11, and cement 26.

Ontario is still the premier province, being credited wi 38 per cent. of the total production, or $51,023,134 wort British Columbia, Nova Scotia, Alberta and Quebec rang in the order named.

◆

The Canadian Alkali Company, Limited, with a capit stock of $200,000, is said to have acquired considerable acr age just inside the lower limits of Sandwich, and near th United States Steel Corporation site. The plant will rival the Alkali industry on the Detroit side of the river, represented by the Solvay Process Company, Pennsylvania Salt Company and Michigan Alkali Works. Large salt beds ar said to underlie the company's property. With one exception the men heading the new industry are Detroit capitalists. They are Mr. James Inglis, president; Mr. William McBain, of Toronto, vice-president; Mr. M. G. Borgman, treasurer; and Mr. H. S. Dodson, secretary and general manager.

ONE HUNDRED AND NINE COMPANIES

Eight With Capitalization of One Million Dollars and Over

The charters granted this week number one hundred and ine, and their capital amounts to $21,665,900. The eight rgest companies are:—

Fort Fraser Industrial Corporation, Vancouver	$3,000,000
Canadian Collieries, Edmonton	2,000,000
Canadian Alkali Company, Windsor	2,000,000
Hygeia Ice Company, Montreal	1,500,000
Edmonton Oil & Asphalt Company, Edmonton	1,000,000
Mills Brothers, Hamilton	1,000,000
Empire Marble Company, Toronto	1,000,000
Industrial Trust Company, Montreal	1,000,000

Grouping the new concerns according to provinces in ich the head offices are situated, we have the following sults:—

Province.	No. of Companies.	Capitalization.
New Brunswick	2	$275,000
Quebec	26	4,599,900
Ontario	24	6,280,000
Manitoba	1	200,000
Alberta	43	6,106,000
British Columbia	13	4,205,000
Total	109	$21,665,900

The following is a list of charters granted during the past ek in Canada. The head office of each company is situat- in the town or city mentioned at the beginning of each ragraph. The persons named are provisional directors:

Fernie, B.C.—Overland, $100,000, (cereals).

Red Deer, Alta.—Red Deer Holdings, $250,000.

Hanna, Alta.—Hanna Realty Company, $10,000.

Stettler, Alta.—Ben Nevis Coal Company, $110,000.

Bassano, Alta.—Chicago Ranch Company, $25,000.

Castor, Alta.—Williston Lumber Company, $40,000.

Claresholm, Alta.—Claresholm Curling Club, $5,000.

Camrose, Alta.—Camrose Produce Company, $6,000.

Taber, Alta.—Consolidated Monarch Collieries, $500,000.

Macleod, Alta.—Union Specialty and Realty Company, 0,000.

Lethbridge, Alta.—Chinook Loan and Investment Comny, $30,000.

Medicine Hat, Alta.—Metzner-Price Building, $125,000. llinger Agency, $100,000.

London, Ont.—Smith Furniture Company, $40,000. H. T. ith, C. J. Smith, A. J. Smith.

Moncton, N.B.—C. P. Harris Realty, $25,000. C. P. rris, Mrs. M. L. Harris, G. L. Harris.

St. John, N.B.—New Brunswick Realty, $250,000. W. S. sher, L. P. De W. Tilley, F. N. Brodie.

St. Leon, Que.—Compagnie Progressive de St. Leon, 0,000. A. Lamy, U. Legris, J. Arvisais.

Mont Laurier, Que.—Tannerie Co-operative du Nord, 0,000. Z. Reno, J. B. Forget, L. Mocion.

Morrisburg, Ont.—Leader Publishing Company, $40,000. E. Murphy, H. H. Bradfield, B. B. Tucker.

Brantford, Ont.—Gun-Munro Spice Company, $40,000. H. Gun-Munro, T. A. Cockburn, C. L. Watson.

St. Tite, Que.—Canadian Union Jewellery Company, $49,-. A. J. Ouellette, C. J. Ouellette, B. J. Dessureault.

Hespeler, Ont.—Stamped and Enamelled Ware, $250,000. D. Forbes, Hespeler; F. Clare, G. A. Clare, Preston.

Hanover, Ont.—Reliance Investment and Developing mpany, $500,000. R. J. Ball, H. Peppler, J. Taylor.

Windsor, Ont.—Canadian Alkali Company, $2,000,000. W. Bain, Toronto; A. L. Stephens, J. Inglin, Detroit.

Midland, Ont.—Midland White-Wear and Costume Comny, $100,000. H. J. Craig, D. White, Jr., F. W. Grant

Winnipeg, Man.—Canada West Investment Company, 00,000. S. C. Trewhitt, G. R. Ferguson, C. W. Buchanan.

Port Dalhousie, Ont.—Port Dalhousie Canning Company, 5,000. A. C. Gregory, F. Blaikie, C. Fretz, Louth Townp.

Rednersville, Ont.—Ameliasburgh Canning and Preserving mpany, $40,000. A. M. Haight, W. F. McFaul, Mrs. L. J. ight.

Vankleek Hill, Ont.—Caledonia Ridge Dairy Company, 0,000. C. Harkin, J. D. Renwick, J. McCrimmon, West wkesbury Township.

Hamilton, Ont.—Wentworth Land Company, $40,000. J. H. Stratton, D. Lyon, R. P. Isbister. Mills Brothers, $1,000,000. S. Mills, R. Mills, E. Mills.

Ottawa, Ont.—Page LeBoeuf Company, $100,000. (general merchants). L. Page, Sandwich; A. T. LeBoeuf, L. Monforton, Sandwich West Township.

St. Jerome, Que.—Compagnie d'Immeubles de St. Jerome, $100,000. C. E. Laflamme, R. Deschambault, St. Jerome; F. X. Cloutier, St. Sauveur des Monts.

Ottawa, Ont.—Duford, $150,000, (painter and decorator). J. B. Duford, E. Desormeaux, H. Goneau. Mance Farming Company, $300,000. Hon. L. A. Audette, Col. E. Fiset, G. H. Cagnat.

Quebec, Que.—T. Matte Oil Clothing Company, $20,000. T. Matte, J. G. Honde, G. T. R. Dery. Roy and Darveau, (boots and shoes), $49,900. T. Darveau, A. Poliquin, D. Darveau.

Vancouver, B.C.—F. R. Murray Company, $25,000, (general merchants). Gresham Investment Company, $30,000. Fort Fraser Industrial Corporation, $3,000,000. Newcastle Lumber Mills, $500,000. Maison Nouvelle, $10,000, (dry goods).

Victoria, B.C.—Co-operative Contract Company, $100,000. Modern Homes, $20,000. Cowichan Repressed Brick and Tile Company, $200,000. Nechaco River Estates, $50,000. Scottish and British Columbian Securities, $25,000. Henson and Wood, $45,000, (builders). Victoria Securities, $100,000, (real estate).

Calgary, Alta.—Taber Development Company, $10,000. R. A. Brocklebank, $130,000. Alberta Still-Alarm Company, $50,000. Pouplier, Pohl and Company, $50,000. Pearce's, $100,000. Tommy Burns Company, $100,000. Windsor Terrace, $135,000. Vitrified Clays, $5,000. Calgary Tannery Company, $50,000. Canadian Brokers, $25,000. Fowler and Wheeler, $50,000.

Edmonton, Alta.—Alberta Canadian Investments, $300,000. Quick Print, $10,000. Sawridge Realties, $25,000. Horner's Livery and Garage Company, $10,000. Canadian Land and Investment Corporation, $300,000. Grady Cast Stone Company, $100,000. Hook Signs, $10,000. Alberta Collieries, $10,000. McCool and Stobie, $10,000. Canadian Collieries, $2,000,000. Edmonton Oil and Asphalt Company, $1,000,000. Apartments, $300,000. S. S. Franklin, $10,000. Namayo Wine and Spirit Company, $25,000. Geo. T. Browne, $50,000. Robertson and Company, $30,000. MacCosham-Gaboury, $10,000. East End Store, $10,000. Beaver Hill Park Syndicate, $20,000.

Toronto, Ont.—Elk Realty Company, $100,000. J. Montgomery, H. P. A. Edge, J. G. Shaw. Credit Forks Tile and Brick Company, $100,000. F. T. Proctor, W. G. Bartlett, L. Smith. F. D. Elliot Company, $40,000, (manufacturers' agents). N. Sommerville, H. A. Newman, F. D. Elliot. House Furnishing Company, $40,000. J. P. MacGregor, A. E. Wilson, Miss I. M. Croker. Yonge Gardens, $50,000. R. W. E. Burnaby, N. Sommerville, H. A. Newman. Empire Marble Company, $1,000,000. M. L. Gordon, J. F. MacGregor, W. H. Walter. Garden Theatre Company, $150,000. F. L. Brick, R. W. Thompson, C. L. Brick. Allen, Edwards, Speirs Realty Company, $40,000. T. A. Allen, G. M. Edwards, P. Y. L. Speirs, Carleton Place. Canadian Ice Machine Company, $75,000. W. S. Shipley, New York; C. E. Allison, Toronto; A. W. P. Buchanan, Montreal.

Montreal, Que.—Canada Roofing and Paving Company, $50,000. J. Chartier, J. F. Chartier, E. Duchesne. General Promoters' Agency, $100,000. J. E. Lalonde, J. A. Guilmette, A. E. de Lorimier. Industrial Trust Company, $1,000,000. A. E. de Lorimier, E. H. Godin, J. E. Morrier, F. J. Jago Company, (builders), $100,000. E. E. Howard, J. DeWitt, W. H. Howard. Simplex Contracting Company, $99,000. B. Melancon, M. Loranger, B. Grandguillot. Hygeia Ice Company, $1,500,000. J. A. L'Heureux, W. Bovey, F. Fleet. Kelly Tire Company, $50,000. E. M. McDougall, J. J. Creelman, P. Francois. Commercial Properties, $150,000. A. R. McMaster, Westmount; T. M. Papineau, G. C. G. Hodge, Montreal. Raymond Construction Company, $40,000. L. A. David, G. L. Alexander, B. C. Macfarlane. Associated Stores, $100,000. J. M. Ferguson, J. M. Adam, S. C. Arrell. Everybody's Store, $50,000. G. L. Alexander, M. Dugas, C. J. Eugene. Mutual Trust Company, $50,000. A. Komaroff, L. A. Ship, M. R. Ship. Credit National, $99,000. E. Robert, J. Lacasse, E. Doucet. Alpha Delta Land Company, $19,000. A. T. Bazin, Westmount; D. F. Busteed, [illegible] Brown, Montreal. Compagnie de Travaux en Beton, de Montreal, $90,000. O. St. Germain, A. Roy, Lachine; L. Mallard, Montreal. Le Credit Montreal, $148,000. A. Handfield, H. Foucreau, J. L'Heureux. L'Association du Coureur de Bois, $19,000. J. E. Leonard, St. Rose; F. Patenaude, [illegible], Montreal. Harlem Heights Land Company, $48,000. J. T. Z. Patenaude, P. F. Kastel, A. Ecrement. Westmount Land Syndicate, $90,000. I. Ballon, M. Fineberg, M. Rabinovitch. Federal Construction Company, $500,000. H. N. Chauvin, G. H. Baker, H. E. Walker.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Smart-Woods Company.—Smart-Woods Company announce that a quarterly dividend of 1¾ per cent., or at the rate of 7 per cent., on the preferred stock of the new company, and of 1¼ per cent., or at the rate of 5 per cent., on the common stock, has been declared. This is the first dividend declared on these stocks.

Macdonald Company, Limited.—The January statement of earnings of the A. Macdonald Company, Limited, show that sales were $520,950, as against $427,000 last year, an improvement of $39,550. For the 12 months ended March 1, 1911, the sales were $4,332,000, and for the same period ended March 1, 1912, they totalled $5,446,000, or a gain of $1,114,000.

Canada Venezuelan Ore Company.—At the annual meeting of the Canada Venezuelan Ore Company, Limited, Mr. A. R. Doble was elected to the board succeeding Colonel H. H. McLean, M.P. As the company's operations have been confined to development work no financial report was made public, but Mr. F. P. Jones, president, gave the shareholders present some informative data on the work done and the future prospects.

Nova Scotia Steel and Coal Company.—During the short month of February the output of the Nova Scotia Steel and Coal Company was as follows:—

	Tons.
Coal mined	59,704
Pig iron made	5,495
Steel ingots	4,828
Ore mined	79,535

Superior Brick and Tile Company.—The contract for supplying the hollow tile to be used in the big plant of the Canadian Car and Foundry Company, has been secured by the Superior Brick and Tile Company.

Mr. Ayer, the manager of the Brick Company, in an interview, states that the contract will take the entire output of the plant for four months, and the process of tile making will begin at the new plant about April 15.

Brazilian Traction, Light and Power Company.—Gross earnings of the Brazilian Traction, Light and Power Company for February will be the largest since the merger went into effect. Each of the first three weeks of February earnings have been larger than those for any week previous to February. The following is the February showing, as reported: Week ended February 8, $462,114; week ended February 15, $429,853; week ended February 22, $432,486.

Lake Superior Corporation.—The net operating results of the Lake Superior Corporation and its subsidiary companies for January show large increases. The improvements undertaken to date were practically completed last year and during the inevitable tuning up process the plants have shown good incrases each month, and they are all now gradually running up to full capacity. The production of steel rails for January was 28,812 tons, or 3,711 tons greater than that for any single month in the history of the corporation.

Freeman's, Limited.—The annual meeting of Freeman's, Limited, was held in Montreal. President Frank Gallagher presented the report for 1912, which was the best in the history of the company.

Twenty-five per cent. was written off for depreciation, and the dividend was raised from six to eight per cent.

The retiring directors were re-elected for the ensuing year, the board being composed of Messrs. F. J. Gallagher, president; Alex. D. Fraser, H. Dorsay, A. C. Calder and M. Doheny.

Intercolonial Coal Mining Company.—At the annual meeting of the Intercolonial Coal Mining Company, Limited, Mr. F. W. Molson was elected a director in place of the late Mr. W. M. Ramsey.

The output of coal and coke this year showed a slight decrease. The output for the year ending December, 1912, amounted to 247,624 tons, compared with 275,633 last year.

The old board of directors was re-elected, as follows: Messrs. D. Forbes Angus, K. W. Blackwell, Jas. Floyd, Frederick W. Molson, R. MacD. Paterson, E. Goff Penny, Duncan Robertson. At a subsequent meeting of the board Mr. D. Forbes Angus was re-elected president and managing director, Mr. James Floyd was re-elected vice-president, and Mr. C. A. Dowd was re-elected secretary treasurer.

Calgary Power Company.—The annual statement of Calgary Power Company shows that the company has participated largely in the growth of the city in which it operates.

Gross earnings amounted to $191,846, while the net earnings were $151,707, as against last year's earnings (8 months' operations) of $81,318 gross and $61,604.09 net. Comparing the earnings of the same eight months of this year with the corresponding period of last year, the increase is 80 per cent. gross and 91 per cent. in net earnings. After deducting the net interest charges for the year, amounting to $89,757.41, the balance, $61,949.73, was transferred to profit and loss account.

Northern Ontario Light and Power Company.—The Northern Ontario Light and Power Company, Limited, reports for January:—

Gross earnings	$72,798
Operating expenses and taxes	16,752
Net earnings	$56,046
Other income	360
Total income	$56,406
Bond interest	22,605
Surplus	$33,801

City Dairy Company.—A large growth in the volume of business done during 1912 was reported at the annual meeting of shareholders of the City Dairy Company. Net profits showed a more moderate increase, amounting to $104,136, or $4,478 greater than those for 1911. After payment of preferred and common dividends and allowance of $20,000 for depreciation, profit and loss balance carried forward was $57,838. Mr. A. E. Ames, president, reported that the sale of milk during the early part of the year and the summer furnished a very narrow profit. The condition was improved after September 1. The ice cream department showed a healthy increase and a fair profit. This part of the company's business has increased by 462 per cent. since 1906.

The sum of $35,000 will be expended in increasing the plant during the coming year, the amount to be taken out of profits. Retiring officers and directors were re-elected.

Consolidated Mining and Smelting Company.—The Consolidated Mining and Smelting Company of Canada, Limited, ore receipts at the Trail smelter for the week ending February 22, and from July 1 to date, in tons:—

Company's mines.	Week ended Feb.22.	July 1 to date.
Centre Star	3,920	103,282
Le Roi	957	29,811
Sullivan	1,333	20,258
Richmond-Eureka	66	844
No. 7	166	387
Molly Gibson	.....	1,277
No. 1	.....	153
St. Eugene	.....	933
Other mines	2,856	52,445
Totals	9,928	209,390

Dominion Canners, Limited.—The annual meeting of Dominion Canners was held at Hamilton. The financial report shows a profit of $503,400.30, from which a dividend of 7 per cent. was paid on the preferred stock and a dividend of 6 per cent. on the common; $50,000 was added to the insurance reserve and $172,593.30 added to profit and loss account.

While it was understood that the company had a successful year, the report was better than expected. The profits of $503,409.30 compare with $363,020.22 for 1911, a gain for the year of $140,380.08.

The surplus earnings, in spite of the addition to expenses in the shape of a 6 per cent dividend on the common stock, which was paid in January for the entire year in the form of a bonus, of $172,503.30, compare with $166,020.2 for 1911.

The earnings were equal to 14 per cent. on the common stock, the amount carried forward to the credit of profit and loss account being equivalent to 8 per cent.

Following the usual practice, $50,000 was added to the insurance reserve, making the total of that fund $150,000.

The old board of directors for last year was re-elected. subsequent meeting W. R. Lalor, M.P., was elected dent; H. W. Richardson, first vice-president; J. J. n, second vice-president and general manager; R. L s, secretary-treasurer, and W. R. Drynan, assistant etary-treasurer.

Hillcrest Collieries, Limited.—The annual statement of rest Collieries, Limited, shows net profits from operat- after providing for all expenses, of $100,100 and a total nue of $103,400 in 1912. After deduction of fixed ges and payment of the 7 per cent. dividend on the com- 's $705,700 preferred stock there remained a balance of 660, equal to 3.26 per cent. on the $1,000,000 common .

The statement is a combined statement of the Hillcrest eries, Limited, and the Hillcrest Coal and Coke Com- , Limited, and the directors announce that the legal alities necessary to the actual merging of the two pro- es are now being proceeded with. In the annual report, stated that the work of equipping the mine was carried during the year, but it was not until December that the us units were in complete operation. A fair amount of opment work had been done, and it is expected that the equipment will greatly facilitate further work of this

The board of directors was re-elected and subsequently same officers were chosen. The officers and board for ear are: Mr. C. B. Gordon, president; Mr. C. Meredith, president, and Messrs. H. S. Holt, W. D. Matthews, J. Fraser, J. M. Mackie, G. H. Duggan, M. P. Davis, C. ill, C. R. Hamilton, and John Brown, the last named also general manager.

Kemp, secretary-treasu North Vancouver City Ferries, Limited, North Vancou (Official advertisement appears on another page.)

◆

WINNIPEG PAINT AND GLASS COMPANY

Winnipeg Paint and Glass Company's progressive nual report, its tenth, shows satisfactory profits to the ex of $372,450, after making allowance for depreciation, do ful debts and contingencies.

Sales showed an increase during the year of thirty-ei per cent.

The balance at credit of profit and loss, January 3 1912, was $102,031.80, and net profits for the year after m ing ample provision for depreciation, doubtful debts contingencies totalled $372,450.42. After deducting $59,39 interest and discount paid from this the total available distribution was $415,082.42, which was appropriated as lows: Dividends, $86.519—dividend No. 2, preference 8 cent., paid September 1st, 1912, $17,988.09; dividend No. common 10 per cent., paid September 1st, 1912, $24,998. dividend No. 3, preference 8 per cent., payable March 1913, $18,158.87; dividend No. 13, common 10 per cent., able March 1st, 1913, $24,999.71; preferred share issue pense, $373.75. The balance of $328,563.23 was carried ward at credit of profit and loss account.

The company's property and assets total $16,792.82.

In moving the adoption of the report Mr. Carr, the v president, made reference to the developments in the c pany's business. During the year, said he, the Edmor branch was incorporated as the Edmonton Paint and G Company and also the marble business under the name the Marble and Tile Company of Canada. Both of th companies are showing satisfactory progress. Branch w houses were opened in Saskatoon and Swift Current, and action has been justified by the results.

The prospects for the present year's business of company are good.

◆

WINNIPEG BANKER PASSES

Mr. William Russell, one of Winnipeg's pioneer bank died at his home in that city last week.

Mr. Russell was born in 1860 at Eglinton, Ont., now part of the city of Toronto. The call of the West attrac him in 1882.

On going to Manitoba he entered the service of Canadian Pacific Railway Company at Brandon and sp several years in charge of the company's business at Nc Portal, Gretna, Portage la Prairie and other points. He the railway service to enter business as a private banker southern Manitoba.

The increasing banking accommodation of the dist attracted the attention of the Bank of Hamilton who purch ed Mr. Russell's business. The bank at once recognized financial knowledge and after leaving him long enough establish their business at Winkler and open a new bra at Plum Coulee, engaged him at the head office as inspec and organizer of new branches. He left the services of bank to organize the Western Trust Company, with head fice in Winnipeg, becoming its managing director, but, af three years, failing health warned him to retire. After year's recuperation he energetically assisted in the format of the Equitable Trust Company, performing the duties secretary-treasurer, until stricken with his fatal illness. was a director on the boards of the associated compa the Winnipeg Investment Company and the Investors' L ited, of Winnipeg. He was also a director of the Cardiff C leries and of the Sovereign Life Assurance Company, one of the board who removed the head office of the l company from Toronto to Winnipeg. last year.

◆

Officers of the South Vancouver Board of Trade for year are: President, Mr R. C. Hodgson, re-elected by clammation; vice president, Mr F. F. Elliott; secret Mr Kenneth Lamond.

The entire issue of $2,100,000 7 per preferred stock of the company was underwritten in Lon- in December when the company was purchased by the inion Bond Company and placed on a new financial basis.

QUEBEC'S MINES

The provincial mines branch of Quebec has just issued eliminary report on the mineral production of the pro- during the year ending December 31, 1912.

Total value of the products of the mines and quarries of rovince during the past year amounted to $11,017,046, rgest annual value yet recorded. This is an increase of 7,260, compared with 1911, when production amounted ,670,786.

n 1892, twenty years ago, the total mineral production e whole of Canada amounted to only $16,625,000, to the province of Quebec contributed probably a little one million dollars.

The principal products of the Quebec mines, according to e statistics, are asbestos, copper ores, mica, graphite, together make up 35 per cent. of the production. Struc- materials, such as limestone, granite, cement, bricks, le, enter for some 60 per cent.

n ten years, the total value of mineral production in- d from $2,772,762 in 1902, to $11,017,046 in 1912.

◆

n insurance congress will be held at Victoria, B.C., in st.

t Kingsville, Ont., the by-law to bonus the Ecothermal Company by exemption from taxation of a five-acre nd a loan of $10,000 was carried.

Northern Pacific Railway officials were recently on the c coast. It is proposed to run a line from Sumas to Westminster, giving the railway an entrance of its own ncouver and the Fraser. At present entry is effected Canadian Pacific Railway lines. The terminals are to the head of False Creek.

MERGER OF CASKET MANUFACTURERS

First Evidences of Proposed Amalgamation—Companies Included—Finances and Arrangements

The incorporation of the Dominion Manufacturers, Limited, is the first evidence of the proposed amalgamation of casket manufacturing firms in Canada, which has been discussed for some time. The companies which are likely to be included are the following:

The Winnipeg Casket Company, Winnipeg, Man.
The Globe Casket Company, London, Ont.
Messrs. Semmens and Evel, Hamilton, Ont.
Messrs. Elliott and Son, Prescott, Ont.
Messrs. Girard and Godin, Three Rivers, Que.
Messrs. Christie Brothers, Amherst, N.S.

What the Charter States.

The Dominion charter of the company gives it authority to carry on all or any of the businesses of manufacturers of and dealers in caskets, coaches and carriages, automobile body builders and of all supplies appertaining thereto, manufacturers of and contractors and dealers in all the branches of undertakers' supplies, hardware, plate and plated goods and to carry on the trade of silver and goldsmiths in all their respective branches, and to carry on all or any of the businesses of silk and satin mercers, silk weavers, cotton spinners, cloth manufacturers, importers, wholesale and retail dealers of and in textile fabrics of all kinds, and wholesale and retail dealers in leather goods and articles required for ornaments, stationery and fancy goods, lumber and timber of all kinds, zinc and copper and kindred objects.

The head office of the company will be at Toronto and the company's finances will probably be arranged as follows:

Common stock, $2,000,000.
Preferred stock, $1,000,000.
Bonds, $550,000.

Arrangements yet to be Completed.

The companies constituting the merger will receive common and preferred shares of the new company in payment, although cash may be paid in some cases. Messrs. Johnston, McConnell and Allison, of Montreal, are the enterprising financial house arranging this merger.

All arrangements have not been completed, as ratification has yet to be made with some of the companies, including the National Casket Company, which is one of the leading concerns. Mr. A. J. H. Eckardt, of that company, may be president of the new company.

SUN LIFE ASSURANCE COMPANY

Increases in new business, assurances in force, cash income and assets are shown in the fine annual statement of the Sun Life Assurance Company of Canada. The increase of new business amounted to $4,377,628 over the previous year's result, the total amount of new business being $30,814,409. It is of interest to note that 40 years ago the total amount of assurances in force was only $1,064,350, while the present report shows that assurances in force at the close of the year totalled $182,732,420, under 118,888 policies, an increase of $18,[illegible]

The income for the year, including premiums, interest, etc., was $12,333,081, an increase of $1,775,746.

The company's assets have been augmented to the extent of $5,704,730, and now total $49,605,616, while the total surplus amounts to $5,331,081.

Mr. T. B. Macaulay, the managing director, predicted a bright future for the company at the annual meeting.

The retiring board of directors were re-elected, with Mr. Robertson Macaulay as president, and Mr. S. H. Ewing vice-president. The following are the directors: Messrs. W. M. Birks, the Honorable Raoul Dandurand, J. Redpath Dougall, George E. Drummond, H. Warren K. Hale, H. S. Holt, Charles R. Hosmer, Abner Kingman, T. B. Macaulay, John McKergow and Mr. T. B. Macaulay, managing director.

◆

The city of St. John has decided to spend $125,000 in permanent street paving.

A drainage scheme is proposed for Lulu Island which will make more valuable 18,500 acres. Lulu Island is in the Fraser delta and is not much removed above high tide.

Vernon's, B.C., prospects and possibilities are presented in an informative and well illustrated booklet prepared by the local board of trade, who will send any desired information regarding this growing district, as also will the financial firm of Messrs. Mutrie and Mutrie, Vernon.

NEW BRUNSWICK

Agriculture, Horticulture and Stock Raising—Increases and Decreases

New Brunswick at the time of the separation from Nova Scotia in 1784 contained about 16,000 inhabitants. Of these 12,000 were Loyalists recently arrived, and of the remainder 2,500 were old inhabitants, most of them from the old colonies, and 1,500 were French. The estimate of 1,500 is probably much too low, but concerning it there is no reliable information. Some of the new arrivals were members of the learned professions; others were tradesmen and small shop keepers; and many had been soldiers. A census of 1834 gave the population as 119,457, and one taken in 1840 gave the population as 156,162. At the census of 1851-52 the population was 193,800 and in 1860-61 it was 252,047. New Brunswick was one of the original provinces of Confederation, and the census of 1871 gave it a population of 285,594, which included the Indians. In 1881 it had increased to 321,233, and at the end of the next decade it was only 321,263. In 1901 it increased to 331,120 and in 1911 to 351,889.

Decrease in Rural Population.

The rural population of the province, composed mostly of farmers, decreased during the last decade by 1,047 in Carleton district, by 2,999 in Charlotte, by 453 in Kent, by 5,666 in Kings and Albert, by 23 in Sunbury and Queens, by 4,319 in Westmorland and by 95 in York. There was an increase in the same period of 3,766 in Gloucester, of 2,415 in Northumberland, of 2,286 in Restigouche, of 13 in St. John County and of 4,629 in Victoria and Madawaska.

The area under field crops increased during the decade in every electoral district excepting Charlotte, Sunbury and Queens and Westmorland, where it decreased by 7,413 acres in Sunbury and Queens and by 4,599 acres in Charlotte.

According to the records there were at the date of the census 739 vacant farm holdings having an acreage of 48,656 acres. As the census of agriculture had to do only with the records of occupied farms, and as in the year 1909 the report of a special provincial commission which was appointed to look into matters pertaining to agriculture estimated that there were 3,428 vacant farms in the province, it is probable that the figures returned by the enumerators are not a complete record.

Land in Cultivation.

The land in field crops increased during the last decade from 897,417 to 979,481 acres, the land in orchard and nursery from 8,924 to 8,937 acres, the land in vegetables from 4,380 to 10,248 acres, and the land in vineyards from seven to 68 acres. The area of land in small fruits was not enumerated for 1901, but in 1911 it is given as 405 acres. The total land occupied in 1901 was 4,443,400 acres and in 1911 4,530,298 acres, of which there was improved 1,409,720 acres in 1901 and 1,447,254 acres in 1911. The number of farm holdings in 1911 was 38,211, of which 36,129 or 94.5 per cent. were held by owners. The land area of the province is 17,863,266 acres, of which only 25.3 per cent. was occupied farm land.

Improved land for the census of 1911 according to manual of instruction to enumerators was defined as "la which has been brought under cultivation, and has been cr ped and is fitted for producing crops." In previous censu no clear definition was given of the term "improved lan The result was that under this heading was included n tillable areas used as pasture. In this census the areas arable lands only were enumerated under this headi Therefore the areas of improved land in this census are strictly comparable with those of previous ones.

In nearly all field crops there were reduced areas in 1 and 1911 as compared with 1900; but the crops of 1911 sh increases over those of 1910. The area under wheat is v little more than half what it was ten years ago; oats, h potatoes and roots are the only crops which show increa in area and production. The number of trees and prod tion of fruit is less than it was in the last census. The a under vegetables and small fruits has materially increas

Live Stock, Labor, etc.

Horses increased from 61,789 to 65,458 in ten years, milch cows decreased from 111,084 to 108,532, other horr cattle from 116,112 to 113,659, sheep from 182,524 to 158, or a decrease of 13 per cent. The number of swine has creased by 70 per cent. in the decade. There is an incre in the number of pure bred animals of 193 for horses, 804 for cattle and of 561 for swine. The number of hors milch cows and other cattle sold in 1900 was 39,466 and 1910 44,107. The production of wool has fallen off by per cent.

The average value of horses in 1911 was $121.75, milch cows $31.80, of other cattle $12.32, of sheep $3.34 a of swine $7.45; in 1901 the average values were hors $69.79, milch cows $20.85, other cattle $10.07, sheep $2. and swine $7.76. The census of 1911 being taken in Ju there were a greater number of lambs and young pigs th there were at the date of the census ten years ago, con quently their average value is adversely affected.

The value of live stock sold in 1910 is given as $1,51 888 more than in 1900, the value of dairy products as $ 970,687 more, the value of animals slaughtered on the fa as $270,633 more, and the value of wool, eggs, honey a wax, and maple sugar and syrup as $331,865 more.

The number of weeks of hired labor on farms in 19 was 102,784 and the value $813,169, being an average wa per week of $7.91 as compared with 158,348 weeks in 19 with a value of $842,253 and an average wage of $5. This is an increase of nearly 50 per cent. in farm wages p week in ten years.

◆

At the annual meeting of People's Loan and Savi Corporation, held at London, officers were elected as follow President, Dr. V. F. Roome; vice-president and managi director, Lieutenant-Colonel A. A. Campbell; secreta treasurer, Alderman William Spittal. Few shareholders tended and only routine business was transacted.

March 1, 1913

We beg to announce that we have this day admitted as partners in our firm, Messrs. Richard Ogle Johnson and Russell Davenport Bell, both of whom have been connected with our business since its inception

VALUE OF LIFE INSURANCE

II.

How Depreciation of Assets Can Be Met

BY C. A. HASTINGS

Has it ever occurred to any young business man that if were to pay in full—a comparatively small sum—the pre- m for an endowment policy, maturing one hundred years ce, the amount to be received by the beneficiary would stonishing?

I remember reading an article on compound interest ver- simple interest which gave the following astounding ılts:—

If the sum of one cent was invested in the year one at simple interest, it would be worth about one dollar in year 1912; but if a similar amount (one cent) was in- ed at compound interest at the same rate (5%), in the 1912 it would be worth $314,250,000,000,000,000,000; icient to pay dividends to every living soul in the world y second.

ain of Definite Amount.

This unexceptional point is mentioned to enthuse the curi- y of the reader in order to induce him to look into the stion of how to meet depreciation of assets.

The prudent business man who takes thought for the row realizes that a crisis may arise in his business and ıas not provided the wherewithal to remedy this. He re- nizes that he is in the meantime deriving a living and in order that he may not be handicapped by lack of funds critical time, he buys what is known as a capital redemp- policy, either by fixed annual payments or in a lump , and, at the end of the period of the contract, the as- d is certain of a payment of a definite amount. Even if etires or dies, the benefits of the policy still hold good his successor.

be Applied in Many Ways.

The percentage cost of a capital redemption policy—or, ther words, a pure endowment policy—is very small, and principal can be applied in many ways:—

(1) Redemption of debentures.
(2) Depreciation of plant.
(3) Repairs to buildings.
(4) Repayment of borrowed money.
(5) Provision for dissolution of partnership.

I feel sure the intelligent reader will comprehend, not that life assurance can be employed in business, but often life assurance companies can assist the prudent ness man.

(To be continued.)

The following article in this series has already appeared: ch 1st, "How to Become Your Own Master."

◆

ADA NATIONAL MORTGAGE AND INVESTMENT COMPANY

The newest mortgage and investment company in West- Canada is having success in disposing of its stock, over ,000 having been sold before the end of February. The ada National Mortgage and Investment Company's pro- tus states that the corporation was formed for the pur- , among other things, of assisting with the development ıis ever-growing West and to give the small investor as as the capitalist a chance to participate in the larger ts and safer form of investment, namely, the buying and ng of farm land inside city property, agreements of sale such other financial undertakings as shall be deemed and expedient by the directors.

As the name implies, it is not only the intention of the pany to confine its operations to the buying and selling nd, but also to the developing and bringing to a revenue ıng basis portions of such land as they may from time to acquire. The Canada National Mortgage and Invest- Company, Limited, is capitalized at $500,000, divided five thousand shares of $100 each.

The directors have decided to dispose of the greater por- of their capital stock in Great Britain and for this pur- will open a branch office of the company in London, and itish advisory board will be formed to assist with the ilding of such office. The services of a practical man- have been secured for the London office, with experi- in both England and Canada. No promoters or bonus has or will be offered or allotted, the directors having for their stock on the same basis as the investing public.

SATISFACTORY TRADE CONDITIONS IN NEW BRUNSWICK

Farming and Lumbering—St. John Railway—Industrial Companies Commence Operations

The general condition of trade throughout New Brunswick is satisfactory. The lumber market shows active demand from the Montreal district and larger shipments also by rail to the United States, while prices in the English market are high and stocks moderate. The whole outlook for the lumber industry is promising, for there will be a good local demand this year.

Agriculture Receives Attention.

The recent convention of farmers, dairymen, fruit-growers and live stock men, held in Fredericton, was the most important ever held in the interests of agriculture in the province. From speeches made by the premier of the province, the commissioner of agriculture and others of authority, it was made clear that both the federal and the provincial governments propose to encourage agricultural education, better farming methods, more co-operation, and the construction of better roads, while it was also stated that the experiment of getting new settlers for the abandoned farms, under the ready-made-farm scheme, will result in the steady increase of the area of farm land in the province under active cultivation.

Street Railway Proposals.

St. John capitalists have associated with a strong group of American financiers, including the presidents of the Portland and Bangor Street Railway Companies and others. In their behalf the St. John Railway Company, at its annual meeting, was offered $1,200,000 for its stock or $150 per share, but this was not accepted. The new organization, however, which is prepared to develop hydro-electric power in St. John and Charlotte counties for transmission to St. John for light and power purposes, and is also seeking legislative authority to construct street railway lines in the outlying parishes of Simonds, Rothesay, and Lancaster, where street railway extension is much needed in connection with the growth of the city. The Street Railway Company also refused a previous offer from another hydro-electric company. The company showed a net profit of $58,158.06 last year, and after paying four dividends of 1½ per cent., carried $10,158.06 to profit and loss account. Its plant was quite extensively improved last year, and further improvement is promised for this year with the extension of its line to East St. John.

The Fredericton Street Railway Company has been organized with an authorized capitalization of $250,000; and American capitalists are said to be interested.

Among Commercial Interests.

The Maritime Oil Fields, Limited, took 101,430 gallons of crude oil from their wells in Albert county last year. This company have spent nearly a quarter of a million dollars in their development work.

The city of Moncton is offering free water to a reasonable amount, and a fixed valuation for taxation purposes for twenty years, on the value of land only, in order to attract new industries.

Humphrey's Unshrinkable, Limited, the new manufacturing concern in Moncton, will soon have its factory in operation and Moncton Woodworkers, Limited, another new industry, will have its factory in operation in a couple of weeks, and expects to operate it throughout the year.

The New Brunswick branch of the Canadian Credit Men's Association is promoting a bill before the legislature providing that a merchant, before disposing of his business, must give public notice of the same for the information of his creditors and others.

The New Brunswick government has awarded the contract for the street car and traffic bridge between East and West St. John, and the Canadian Pacific Railway Company is now considering the question of replacing its railway bridge at the same point by a new one. There is an agitation in favor of a bridge at the head of the harbor, in which the city would be willing to join with the railway company, if the latter should choose that site instead of alongside the present bridge. It is probable that the two bridges will be built between East and West St. John within a short period.

◆

Sir William Arrol and Company, Limited, of Dalmarnock Works, Glasgow, the designers and constructors of the buildings for the Canadian Vickers Company at Montreal, are arranging to establish construction works in Montreal for the production of all kinds of cranes, presses and other machinery and to otherwise extend their operations in Canada.

EARNINGS OF BELL TELEPHONE COMPANY

Show Increases—Assets and Liabilities—New Bond Issue Authorized

An increase of $1,161,456 in gross and of $222,370 is shown in net earnings for the year of the Bell Telephone Company of Canada.

Accompanying the increase in net revenue, however, was also an increase in the capital investment amounting to $517,110 in stock and $1,750,000 in bonds. After deduction of bond interest, the surplus available for dividends showed a slightly decreased percentage to the capital stock, being 11.1 per cent. on the average paid-up capital of the year, as compared with 11.4 per cent. in 1912. The net earnings in excess of bond interest and dividend requirements for the year were $449,133, as compared with $425,835 in 1911. From this surplus the directors announced that $5,358 had been charged off patent account and $100,000 added to employees' benefit fund, leaving a balance to be carried to surplus account, which on December 31st last amounted to $429,189.

Comparison with Previous Year.

The comparisons with the showing in 1911 are as follows in the statement of earnings, etc.:

	1912.	1911.
Gross earnings	$7,638,304	$6,476,848
Deduct:—

Provides for Bond Issue.

Two new directors were added to the board, Mr. U. N. Bethell and Mr. C. F. Sise, jr. The other directors were re-elected, and the complete board now comprises: Messrs. C. F. Sise, Theo. N. Vail, Robert Archer, William R. Driver, Hugh Paton, Charles Cassils, H. B. Thayer, L. B. McFarlane, Z. A. Lash, K.C., U. N. Bethell, C. F. Sise, jr., and Hon. Robert Mackay. The officers, headed by Mr. C. F. Sise, president, and Hon. Robert Mackay, vice-president, were subsequently re-elected.

Following the annual meeting the shareholders authorized the directors to issue from time to time $3,750,000 bonds. Mr. C. F. Sise, the president, in explaining the resolution dealing with the issue, stated that there was no immediate intention to take advantage of the authority asked, but the directors wished to have the power to make further issues according to the demands of the company's business.

'Phones Operated by the Company.

At the close of 1912, completing the thirty-third year of the company's existence, it had in operation a total of 192,748 telephones, operated through 456 exchanges; it owned and operated 64,321 miles of long distance wire on 9,1 poles, and 2,784 miles of wire in underground and submari cables.

The following statistics of the growth of the system five-year periods are interesting:

	Exchanges.	Subs.	Long Distan Wire in Mile
1885	126	10,200	3,000
1890	212	20,437	8,228
1895	345	30,908	14,851
1900	343	40,094	21,350
1905	526	82,351	37,082
1910	508	138,370	54,133
1912	456	192,748	67,105

In addition to its own immediate business, the compa now has arrangements for exchange of business with 4 local organizations serving over 54,942 subscribers. Wi these added to the stations owned by the company itself, th total number of stations served by it was 248,085, an increa of 42,091 in the year.

ELEVATOR COMPANY HANDLED MUCH GRAIN

The Saskatchewan Co-operative Elevator Company ha handled through its elevators 10,000,000 bushels of grain the 1912 crop of Saskatchewan. Eight million bushels grain have also been handled on commission by the Winn peg office of the company. This office is operated by th company for the direct benefit of the farmers of Saskatch wan and a leased wire between the Winnipeg office and th Regina office adds greatly to the service rendered. It is e pected that fully 3,000,000 bushels of grain additional wi be handled before the time arrives to deal with the 191 crop.

There are at present 139 elevators in operation with storage capacity, all told, of 4,250,000 bushels. That th system is working well is evident from the fact that at th present time the company has on file applications for ov 400 elevators in addition to those now operating. Owing the high prices of lumber now existing and the scarcity it, it is not likely that over 50 elevators will be erected b the company during 1913.

PETROLEUM PRODUCTION IN ONTARIO

The expansion of the Imperial Oil Company's activiti has drawn attention to Ontario's petroleum sources. Th latest report of the provincial bureau of mines says regar ing the petroleum supply:—"The production of petroleu in Ontario continues to decline. The quantity of crude o yielded by the wells of Lambton and Kent counties, and tho in the smaller outlying pools, amounted to 10,102,081 im perial gallons, as compared with 11,004,357 gallons in 191 These figures are supplied by the department of trade an commerce, Ottawa, and are compiled from the returns mad by the claimants for the bounty of 1½ cents per imperi gallon paid by the Government of Canada on crude petroleu produced in Canada. Statistics of production by distric are kindly furnished by Mr. W. J. Harvey, supervisor crude petroleum bounties, Petrolia, as follows:—

	Barrels.
Lambton	184,450
Tilbury	48,707
Bothwell	35,243
Dutton	6,731
Onondaga	13,501
Total	288,633

There was only one change in price during the year namely, an advance on September 15th from $1.22 to $1.2 per barrel. Adding to this the bounty of 52½ cents per bar rel, the average return for the year to the producer was $1.7 per barrel.

More crude petroleum was treated at the refining work than in any previous year. There are two refineries, on owned by the Imperial Oil Company, Sarnia, and the othe by the Canadian Oil Companies, Limited, Petrolia. Much o the larger part was, as for many years it has been, importe from the United States. The total quantity distilled wa 38,632,504 imperial gallons, of which 28,244,913 gallons wa American, and 10,387,591 gallons Ontario crude.

The Great West Permanent Loan Company will apply the present session of the Dominion Parliament for an act amend an act incorporating the company, such amendme giving the company power to invest its funds in trust an loan company stock, bonds and debentures.

FEBRUARY MUNICIPAL BOND SALES

ceeded One Million Dollars—Five Provinces in the Market

The municipal bond sales in Canada for February, as npiled by The Monetary Times, amounted to $1,038,806, npared with $1,337,500 for January, and $2,596,378 for the responding period last year, and making a total for the r of $2,376,306.

Five provinces were in the market. The largest issue s made by Prince Albert.

The following are the particulars by provinces:—

Ontario	$524,166
Saskatchewan	292,000
Manitoba	191,890
New Brunswick	23,000
British Columbia	7,750
	$1,038,806

The following are the monthly totals during 1909, 1910, 1, and 1912:—

	1909.	1910.	1911.	1912.
uary	$2,540,862	$ 881,838	$ 420,337	$ 2,133,531

MMISSIONER OF COMMERCE WILL VISIT CHINA

Mr. Richard Grigg, the commissioner of commerce, will e Ottawa on March 14 for the Far East. It is felt that at opportunities exist for the extension of Canadian trade hina and Japan, and Mr. Grigg goes to study the field will go first to Yokohama, and after some stay in Japan proceed to Hong Kong; he will later go to Shanghai and ing.

Mr. Foster, after performing his duties as a member of Dominion Trade Commission in Australia and New Zea- . will join Mr. Grigg, who will have completed his ey.

On his way west Mr. Grigg will stay at the several pro ial capitals and endeavor to arrange a conference de- ed to establish a plan of co-operation in statistical work een the Dominion and the provinces.

COPPER, TIN AND LEAD

Prices and Production—British Columbia Ores—Tariff, Freight, etc.

The total production of copper in Canada in 1911, estimated on the basis of smelter recovery from ores treated, was 55,648,011 pounds, which at the average price of copper for the year in New York, 12.376 cents per pound, would be worth $6,886,998.

The copper production in 1910, compiled on a similar basis, was estimated at 55,692,369 pounds, showing a slight decrease in production in 1911. The average New York price for copper in 1910 was 12.738 cents, the decrease in price being 0.362 cents or 2.8 per cent.

Low Grade Ore in British Columbia.

In British Columbia the copper production is mainly derived from ores carrying a very low content of copper metal. In the smelting of these ores the copper losses in slag are quite considerable, reaching as high, in some cases, as 25 per cent. or more, of the copper content of the ore, says a recent report prepared Mr. Cosmo T. Cartwright, B.Sc., of the department of mines. With ores of this character there is, therefore, a wide difference between the copper content of ore shipped from the mine and the copper metal recovered by the smelters.

Tin ores have not yet been found in sufficient quantities in Canada to be of economic importance.

Average Price at Montreal.

The 1911 output of lead was almost entirely from the mines of British Columbia, and a considerable decrease is shown, the production being 23,784,969 pounds in that year, against 32,987,508 for 1910. A small shipment was made from Quebec, but in regard to this figures are not obtainable.

In valuing the lead production for 1911, the average price per pound at Montreal has been used. The New York market is practically closed to Canadian lead by high tariff, and to the London market price must be added the freight, etc., to reach the Canadian market. The price at Montreal or Toronto is lower than that at New York, and higher than that at London, and is probably a more equitable valuation to place upon the Canadian production.

◆

HAMILTON PROVIDENT AND LOAN SOCIETY

Most of the good loan companies enjoyed the maximum of profitable business during the past year. The Hamilton Provident and Loan Society, with headquarters at Hamilton, is not an exception to the rule. The net profits of the year, after paying and providing for all due and accrued interest on borrowed capital, cost of management and other charges, amounted to $145,769.94.

This amount was disposed as follows: Two half-yearly dividends at the rate of seven per cent. per annum, $81,200; government and business tax, $2,030.31; improvements to head office building, $1,200; added to reserve fund, $60,000; credited to contingent fund, $1,339.63; total, $145,769.94.

After writing off all losses, there remains at the credit of the contingent fund $21,027.15. The reserve fund now amounts to $800,000.

Payments by borrowers were quite satisfactory, and the company's funds were kept employed. Those parties holding stock in reputable loan companies have reason to be well satisfied with the gratifying statements that have been presented for the past year. The company's subscribed capital is $1,800,000, of which $1,160,000 is paid up.

The company receives deposits and allows interest from date of deposit to date of withdrawal, compounded half yearly at [illegible] per cent. The society also issues debentures in sums of $100 and upwards, bearing interest half-yearly at 4 per cent.

◆

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended February 28th:—Cobalt Lake, 63,708; Nipissing Reduction, [illegible]; O'Brien, [illegible]; Dominion Reduction, 87,400; Hudson Bay, 65,206; Colonial, 43,126; Nipissing, 81,340; McKinley Darragh, 193,465; La Rose, 230,691; Temiskaming, 90,314; Beaver, 43,630; total, [illegible] pounds, or [illegible] tons. The total shipments since January 1st now total [illegible] pounds, or [illegible] tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144 tons, valued at $1,437,196; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 20,360 tons; in 1909, 20,041 tons; in 1910, 34,041 tons; in 1911, 25,089 tons; 1912, 21,509 tons.

TRANSPORTATION AND TRADE ALONG PACIFIC COAST

Greater Vancouver Suggestions—Railways and Rates—Fruit Growers and Importations

(Staff Correspondence.)

Vancouver, March 3rd.

Vancouver wants railways, yet there is decided opposition to the city granting to the Canadian Northern Railway what has been proposed at the head of False Creek. The feeling generally is that the city will be the gainer just as much as the Canadian Northern, and if the railway is not allowed to develop False Creek, the city will not be able to for there is no money available for the purpose. But opposition tends to have the matter thoroughly discussed, and considerable interest is being taken.

The suggestion is made that a railway be built to connect with Dawson, and it is reported that important northern interests are in London on business regarding the proposition. A line to Dawson has been talked of ever since the Klondike rush in 1898. More than one company proposed to build, but the only one now remembered is the Victoria, Westminster and Yukon, which was to run between New Westminster and the Yukon. It got as far as Vancouver, and the principals did very well in selling out that part of the line to the Great Northern which comes into Vancouver over it. The charter is still good from Vancouver to the north, but it does not look as if it will be built since the Pacific Great Eastern will serve the purpose, at least for the present. It is doubtful if a line will be extended beyond northern British Columbia.

Passengers and Freight are not Sufficient.

While there is a certain amount of mining in the Yukon many people believe that a railway would hardly pay. There is no travel in winter, and the population along the Yukon is very small, while even Dawson would be but a small town in Ontario. Moreover, the Yukon River affords an excellent waterway throughout the summer, and all parts of the country can be reached without great difficulty in the fine season. It is argued that a main line of railway would facilitate development of mining propositions, but short lines could be effectively run from the river points that warranted the business. Gold mining does not pay freight like copper mining does, where ores have to be carried to smelters, and supplies for the population would not be of such large quantity that the railway would make much money. Rates would necessarily be high, even as high perhaps as at present, and with steamboat competition rates by river might be made lower and get the traffic during the best part of the year. There are coal mines on the upper Yukon, but greater coal areas exist at nearer points, and are yet untouched.

British Columbians, both on Vancouver Island and in the interior, are greatly interested in the representations made to the Dominion government that something should be done to either keep American fruit from being dumped into this country, or else have the act apply in the same measure to the imported articles. It has been shown that British Columbia fruit, the kind that takes first prizes in competition with the world's best products, has little chance in the home market. The Fruit Marks Act discriminates in favor of the American, which is the same as saying that it helps the middleman to make more money out of the fruit brought from across the line. The question is not a new one, and unless something is done the industry in British Columbia will be greatly retarded in growth.

Civic Government by Central Body.

Ex-Reeve Weart, of Burnaby, makes the suggestion that the municipalities comprising Greater Vancouver should adopt a merger scheme of government, which would be of mutual benefit. He pointed out in a speech before the Progress Club this week that each municipality is under great expense in maintaining systems of civic government, when all might be administered by a central body. The interests of all are identical, and although there are boundaries between Vancouver and the outlying municipalities of Burnaby, South Vancouver and Point Grey, they are practically one corporation. He also suggested that a large area, say a thousand acres, should be set aside for sites for industries and rented at a nominal figure as an inducement for manufacturers to establish in this district.

For some years suburban Vancouver has been spreading far out. Big blocks are steadily going up, and several large ones in prospect will make considerable alteration to the city's sky line. A civic ordinance prohibits the height of over ten stories, or 120 feet, but even then the structures are big. Recently the Rogers block was completed, while in the same crowded section, the Bank of Ottawa has a fine building completed last year. In another year, a start will have been made on the new building for the Royal Bank at the corner of Granville and Hastings. Mr. A. Grossman also proposes to erect a building on Hastings Street that will go as high as the law allows. The North German Lloyd Steamship Company also has a 12-story building in hand. Some of the leaders among the workingmen are protesting against total exemption of improvements, declaring that the small land owner has to pay more than his share of the taxes. It is pointed out that the big block owner gets a very large rental from his structure, and if the case happens to be an apartment house, the land is valued at about the same as the lot next to it, which may be occupied by a dwelling house. The contrast is particularly noticeable in such instances.

A Growing Industry.

Can manufacturing is to become a larger industry on the Canadian Pacific coast. The American Can Company has taken over the interests of the Western Canadian Can Company, and the general manager, Mr. F. P. Kendall, remarked recently that between 125 and 150 men will be employed at the two temporary factories in New Westminster and in Vancouver. This company has factories at Montreal, Hamilton, Niagara Falls and Winnipeg, with its head office in New York. Cans will be manufactured for all kinds of packing.

◆

WHAT THE RAILWAYS CARRIED

The total freight tonnage carried in Canada during the year ended June 30th, 1912, totalled 89,444,331 tons, according to Mr. J. L. Payne's, comptroller of statistics, compilation of railway data. The following is an analysis of the items carried:—

(1) The products of agriculture, in tons:—Grain, 9,741,671; flour, 2,303,607; other mill products, 1,387,624; hay, 2,130,803; tobacco, 68,737; cotton, 135,277; fruit and vegetables, 1,135,082; other products of agriculture, 398,144.

(2) The products of animals, in tons:—Live stock, 1,345,182; dressed meats, 591,232; other packing house products, 392,046; poultry, game and fish, 204,421; wool, 34,320; hides and leather, 227,745; other products of animals, 364,334.

(3) The products of mines, in tons:—Anthracite coal, 5,938,466; bituminous coal, 15,027,311; coke, 1,166,874; ores, 3,190,470; stone, sand, &c., 5,186,763; other products of mines, 957,915.

(4) The products of forests, in tons:—Lumber, 8,129,314; other products of forests, 6,023,407.

(5) Manufactures, in tons:—Petroleum and other oils, 728,643; sugar, 635,757; naval stores, 9,472; iron, pig and bloom, 1,104,177; iron and steel rails, 859,897; castings and machinery, 1,214,709; bar and sheet metal, 970,091; cement, brick and lime, 2,996,992; agricultural implements, 552,470; wagons, carriages, tools, &c., 252,638; wines, liquors and beers, 325,412; household goods and furniture, 434,242; other manufactures, 6,156,581.

(6) Merchandise, in tons, 2,711,963.

Miscellaneous, in tons, 4,410,542.

◆

FEBRUARY FIRE WASTE IN TORONTO.

Toronto's fire loss during February totalled $81,606. There were 217 alarms; false alarms numbered 18. There were 45 fires from unknown causes. Other causes were: Overheated stoves, etc., 29; chimneys on fire, 13; grass fires, 30; plasterers' heaters, 4; children and matches, 11; curtains and gas jets, 4; electric wires, 5; gas explosions, 5; thawing water pipes, 5.

Compared with January, the figures for February are:—

	January.	February.
Damage	$42,828	$81,606
No. of alarms	154	217

As seen from the above, the damage was nearly twice as much this past month as in the preceding month, and the number of calls also exceeded those of January.

At 111 cases there was no damage at all, 30 of these being grass fires, 13 chimneys on fire, and the rest for trivial things like steam mistaken for smoke or ashes in a cellar.

The largest fire this last month was that on Dundas Street on February 10th, when six houses and four stores were considerably damaged, while two factories were burned to the ground. The damage to that was $35,000. The smallest fire of the month was for $2, when sparks from a chimney set fire to a roof.

◆

The capital stock of the Hamilton Ideal Manufacturing Company, Limited, has been increased from $40,000 to $100,000, by the creation of 600 shares of new stock of $100 each.

ANNOUNCEMENT *of* a NEW BOND COMPANY

Of interest to financial men and to the public generally is the formation of the Bankers Bond Company, Limited, with a capital of One Million Dollars, headquarters at Toronto.

The President of the Company is Mr. F. W. Baillie, the Vice-President, Mr. F. P. Wood, and, in addition, a group of prominent Canadian banking men are interested both as investors and advisors.

The Bankers Bond Company will conduct the customary bond and preferred stock business, and aims to be of special service to the public in other ways.

It will assist worthy industries, business men and others who have not access to the customary channels for capital, to expand by financing the needed money. Canada has many industries only needing capital to become large and prosperous concerns.

Directed by men experienced in both investments and banking, the Bankers Bond Company should render valuable service to investors and business men. This should especially apply in a country such as Canada, so replete on one hand with opportunities for investment wherein judgment and foresight are needed, and, on the other, with opportunities for business expansion, provided financial assistance is forthcoming in either small or large amounts at crucial periods.

The Bankers Bond Company is the outcome of steady and important growth of the investment business done by the firm of Baillie, Wood and Croft, Bankers and Brokers, Toronto, during a period of ten years. The latter firm will hereafter confine themselves to Stock Exchange business.

The Bankers Bond Company, Limited, have engaged as premises the ground floor of the Imperial Life Building, Victoria St., Toronto.

BANKERS BOND COMPANY
LIMITED
TORONTO, CANADA.

The Western Life Assurance Company

HEAD OFFICE - - WINNIPEG

FIRST ANNUAL REPORT

The Annual General Meeting of the Shareholders and Policyholders was held at the Head Office of the Company on Thursday, Feb. 20th, 1913.

DIRECTORS' REPORT

Your Directors have pleasure in submitting to the Policyholders and Shareholders their Report of the Company's business for the year ending December 31st, 1912.

ASSURANCES.—During the year applications were received amounting to $1,062,000.00, upon which policies were issued for $852,000.00; the balance of $210,000.00 being declined or deferred. After deducting policies terminated, the Insurance in Force amounts to $1,183,349.00.

INCOME.—The Gross Cash Revenue from Premiums, Interest, Premium on Capital Stock, etc., amounted to $38,327.53. The Premiums on Insurance in Force now amount to $38,639.95, showing an average premium of $33.95 per thousand on Business in Force.

ASSETS.—The Assets of the Company now amount to $124,000.14, being an increase over last year of $55,304.96, while 6,416 shares of Capital Stock remain in the Treasury upon which, at present selling price, the amount of call and premium would be $288,720.00.

SURPLUS.—The total liabilities, including Reserve on Policies in Force, Capital Stock called and all other liabilities, amount to $93,694.22, leaving a clear Net Surplus or Undivided Fund of $30,305.92.

POLICY RESERVES.—Computed on the O^M (5) Table of Mortality, with interest at 3½ per cent., being in accordance with the regulations of the Dominion Insurance Act, our Reserves for Policies now in Force, less Re-Insurances, amount to $21,211.00.

DEATH LOSSES.—During the year one policy for $1,000.00 was terminated by death, and the claim was promptly paid. Our experience in this regard has been very satisfactory.

SECURITY FOR POLICYHOLDERS.—The security for our Policyholders, including Policy Reserves, Net Surplus and Capital Stock, amounts to $123,196.92. In addition to this there is Capital Stock subscribed, but not called, amounting to $286,720.00, bringing the total security for the Protection of our Policyholders up to $409,916.92.

CAPITAL STOCK.—Your Directors take special pleasure in reporting to you the fact that all expenses chargeable to the sale of stock and organization accounts, amount to less than $5.00 for each share sold. Stock notes are being well taken up.

Your Directors desire to express their appreciation of the efficient manner in which the Officers and Office Staff have performed their respective duties in organizing and carrying on the business of the Company, and also of the splendid results accomplished by the Agency Force in securing such a handsome amount of new business.

All of which is respectfully submitted.

ADAM REID,
Managing Director.

THOS. W. TAYLOR,
President.

Winnipeg, February 14, 1913.

I have examined the above Statement of Assets and Liabilities and certify them to be in accordance with the Books and Vouchers of the Company, which I have duly and regularly audited, and certify them to have been well and duly kept.

I have examined, as upon December 31st, 1912, the Securities of the Company, the Cash and Bank Balances, and find them to be as shown in the above statement.

CHARLES D. CORBOULD, C.A.,
Auditor

Winnipeg, February 14th, 1913.

Mr. T. W. Taylor, M.P.P., President, in moving the ption of the report, remarked in part as follows:—

"You have heard the financial statement and it is my y to move the adoption of this report. In doing so I have y few remarks to make. This Company, as you well w, is now on a solid foundation. We are building up an itution in a manner creditable to all our representatives, re especially our Managing Director, who is starting in to make it his life work and a great success. There is idea that strikes me in reference to this Company and is that it has been born in honesty and is being carried in honesty and efficiency, and with such characteristics as se governing the management of this Institution, I have no bt it will be a credit to all connected with it.

"All our resources have been conserved in such a man- as to build up and strengthen our institution. Less than oo per share is all that it has cost to secure the amount of k that has already been sold, and I hope that record will kept up to the end. This result has been accomplished the fact that a large amount of stock has been sold by our naging Director for which not one dollar has been rged."

Mr. G. A. Elliott, K.C., in seconding the motion for the ption of this report, said:—

"I am very well pleased indeed to read the first annual ort of the Western Life Assurance Company. It is a re- t and financial statement that everyone can read and un- stand. Everything is plain and above-board, and there is ning hidden or covered up in ambiguous language, or so ngled or complicated as to confuse anyone. The result far attained, as shown by this statement, warrants us in feeling that the foundation has been laid for stability, security and progress. It is a statement that must appeal to the Shareholders and Policyholders of the Company as being very fair and reasonable.

"It is worthy of note, too, to observe the magnificent showing made by the Medical Department of the Company. Although the Company, on the 31st day of December, 1912, had been in active business for a period of eighteen months, and has, during that period, written over $1,500,000.00 of Life Insurance, there was but one loss by death, amounting to $1,000.00. This is a remarkably fine showing, and our Medical Director, Dr. Simpson, is entitled to the utmost good thanks of the Shareholders and Policyholders for the splendid result in this direction."

DIRECTORS AND OFFICERS.

The Directors and Officers of the Company for the ensuing year are as follows:—

President—Thos. W. Taylor, M.P.P., Winnipeg, President T. W. Taylor Company, Limited.

Vice-Presidents—John D. Hunt, Winnipeg, Hunt, Noble & Devaux, Barristers, Director, Sydney Brick & Tile Company; John Leslie, Winnipeg, Furniture Merchant.

George Anderson, Winnipeg, Broker; S. A. Cawley, M.P.P., Chilliwack, B.C., Broker; Geo. A. Elliott, K.C., Winnipeg, Elliott, Macneil & Deacon, Barristers; A. E. May, Edmonton, Alta., Postmaster; Adam Reid, Winnipeg; Dr. R. M. Simpson, Winnipeg, Chairman Provincial Board of Health.

Managing Director—Adam Reid. Medical Director—R. M. Simpson, M.D., C.M., L.R.C.P., L.R.C.S., Edin. Treasurer—O. F. Dannecker.

The number of directors of the Standard Securities, nited, has been increased from three to seven.

The Brandon radial railway charter recently granted by Manitoba Legislature, provides for the building of seven ial lines radiating from the city. The lines which it is posed to construct are from Ninette through Wawanesa Brandon; Souris to Brandon; Neepawa to Brandon by way Carberry; Minnedosa to Brandon; Rapid City through ers to Brandon; Lenore in a southeasterly direction to ndon; and Virden to Brandon. The applicants from ndon for the charter were: Mayor Fleming, Alderman G. B. Coleman, K.C., Messrs. Murdoch McKenzie, J. B. Curran, and H. E. Henderson, city solicitor. It is proposed to hold the charter in trust for the city of Brandon and the adjoining municipalities until it is disposed of to bona fide financiers who will build and operate it under conditions laid down by the vendors. The prime object is to prevent the hawking of electric railway charters by irresponsible persons. Properly administered, it is hoped will encourage intensive cultivation by providing easy and cheap means of transportation for garden and dairy produce. The system is to be known as "The Brandon Radial Railway."

There has recently been organized in the Province of Alberta the

COMMONWEALTH TRUST COMPANY, LTD.

With an authorized capital of

$2,000,000.00

Head Office in Calgary.

PROVISIONAL OFFICERS:

President

HONORABLE CHARLES W. FISHER, Cochrane, Alta., Capitalist, Speaker in the Legislative Assembly of Alberta.

Vice-Presidents

MAJOR DUNCAN STUART, Calgary, Alta., Barrister-at-Law, Director Alberta Interurban Railway Company.

J. R. SUTHERLAND, Esq., Calgary, Alta., Gentleman, Late Dominion Land Agent.

GEORGE F. TULL, Esq., Calgary, Alta., Managing Director of Niblock & TULL, Limited.

Managing Director

D. J. YOUNG, Esq., Calgary, Alta., President of Young & Kennedy, Limited

Secretary and Treasurer

E. W. McMULLEN, Esq., Calgary, Alta., Manager Merchants Bank of Canada, Calgary.

Directors

LT.-COLONEL JAMES WALKER, Calgary, Alta., Capitalist, Chairman South East Land Corporation, Limited.

HAROLD W. RILEY, Esq., M.L.A., Calgary, Alta., President Riley's Limited.

H. A. MacLEAN, Esq., Calgary, Alta., President of Alliance Investment Company (Canada), Limited.

LOUIS M. ROBERTS, Esq., M.L.A., High River Alta., Broker, of Roberts & Hunt.

LT.-COLONEL G. E. SANDERS, Calgary, Alta., Distinguished Service Order, Police Magistrate of the City of Calgary.

GEORGE PIRIE, Esq., M.D., Calgary, Alberta.

Bankers

THE MERCHANTS BANK OF CANADA.

Solicitors

Messrs DUNCAN, STUART & COMPANY, Bank of British North America Building, Calgary, Alta.

Auditors

Messrs EDWARDS, MORGAN & COMPANY, of Calgary, Toronto, Winnipeg and Vancouver.

The Directors believe that the Stock of this Company is a good investment. The Capital of $2,000,000 is divided into 2,000 shares, par value $100 each, which is being sold at a premium of $15, making the selling price $115 per share.

The terms of subscription are $40 per share, which shall include the $15 premium, upon application and allotment, the balance subject to call of not more than $10 per share in any one year. Purchaser has the option of paying in full at any time.

The Company, in addition to the usual powers of a Trust Company, can buy and sell agreements of sale, which at this time is a very profitable business. The main objects of the Company are loaning money on mortgages on improved farm and city property, and to act as Trustees and Executors.

Prospectus and application forms will be mailed on application to

D. J. YOUNG, Managing Director,
410 Maclean Block, Calgary.

J. E. McELDERRY, Managing Director.

We have audited the books and vouchers of the Guelph and Ontario Investment and Savings Society monthly during 1912, and found them correct. We have also examined the Mortgages and calculated the value and earnings of the Mortgages and Municipal Debentures, checked the Savings Department and Debenture balances, proved the Bank balances, and certify that the foregoing Balance Sheet is a correct statement of the Society's affairs at 31st December, 1912. All our requirements as Auditors of the Company have been fully complied with.

J. W. KILGOUR,
J. M. SCULLY, F.C.A.,
Auditors.

Guelph, January 25th, 1913.

The number of directors of the Canada Landed and National Investment Company has been decreased to eight.

The capital stock of Fittings, Limited, has been increased from $200,000 to $500,000, by the creation of 3,000 shares of new stock of $100 each.

The capital stock of the Sarnia Realty Company, Limited, has been increased from $100,000 to $1,000,000 by the creation of 45,000 shares of new stock of $20 each.

The capital stock of the Hinde and Dauch Paper Company, of Canada, Limited, has been increased from $100,000 to $250,000 by the creation of 1,500 shares of new stock of $100 each.

Forest, Ont., board of trade has elected the following officers for the ensuing year:—President, Mr. P. W. Campbell; vice-president, Mr. D. R. McCahill; secretary-treasurer, Dr. C. L. Huffman; executive, Messrs. Dan Johnson, W. J. Skinner, J. H. Pickering, H. J. Pettypiece, and G. E. McIntosh; representatives on county board of trade, G. E. McIntosh, W. J. Skinner.

The Barcelona Traction, Light & Power Company, Limited, have increased the number of their directors from thirteen to fifteen.

The Grain Growers' Association is the farmers' board of trade, and the experience of the cities of the West shows that the formation of a board of trade is essential to the success of any community, said Mr. Roderick Mackenzie, of the Grain Growers' Association, when addressing the Winnipeg Credit Men's Association recently.

The Western Trust Company will apply to the Dominion Parliament for an act to amend the act of incorporation of the company in such a manner as to provide for the creating and issuing of any part or parts of the company's capital stock as preference stock, which preference stock may be preferred in some respects and deferred in any other respect; and also to provide powers for the company to amalgamate and acquire the whole or any part of the business, rights and property of any other companies carrying on a similar business in Canada.

NATIONAL TRUST COMPANY, LIMITED, TORONTO

The legal opinion of Messrs. Blake, Lash Anglin & Cassels, Toronto, will be furnished.

ASSETS—**Value of Assets—$2,022,671 consisting of land, buildings, machinery and equipment $1,017,990, investments $444,300, and net current assets, in excess of current liabilities, $560,380.**

EARNINGS—**Average annual net earnings for four and three-quarter years, March 31, 1908, to December 1, 1912, $158,783, or over 3½ times the interest on bonds now issued.**

SINKING FUND—**An annual sinking fund, beginning February 1st, 1914, sufficient to retire the present issue by maturity at 105 and interest.**

The Harris Abattoir Company, Limited, distributes its products, principally fresh meats, through its branch houses—St. Lawrence Market, Toronto, Sudbury and Haileybury in Ontario; Montreal and Quebec City in Quebec, and Sydney and Glace Bay in Nova Scotia. By-products such as Hides, Wool, Bones, Tallow and Olive Oil are distributed very widely over Canada, the United States and Europe.

The Company has buildings now under construction at the Union Stock Yards, West Toronto, which, when completed, will be one of the most modern packing plants in Canada. They consist of a group of six buildings, mostly of concrete construction and fireproof.

The Management of the Company is in most capable hands. Mr. James Harris and Mr. W. T. Harris have from its inception acted as Managing Director and Sales Manager respectively, while Mr. J. S. McLean, Secretary-Treasurer, has held that position since 1903. There has been no change since then in the personnel of the Stockholders, Directors or management of the Company. Nearly all the heads of departments have been associated with the enterprise for many years.

Copies of the Trust Deed and of the appraisal certificates may be seen at our offices.
Interim Certificates will be furnished pending delivery of definite bonds.

Tenth Annual Report

31st January, 1913

EXTRACTS FROM MINUTES OF ANNUAL MEETING

VICE-PRESIDENT'S ADDRESS:—In moving the adoption of the Report, the Vice-President, MR. CARR, said: "In the absence of the President, I have the pleasure of commenting on what is without doubt, the most satisfactory statement the Company has ever shown.

I think you will all agree with me that the record of the year is one of which we may be justly proud.

The sales were over 38% larger than for the previous year, while the profits are increased 78%, the total profits being $372,450.42, as against $209,956.02 for 1911.

Before showing the above profits we made generous allowances for bad debts and added $27,000.00 to the various reserve accounts.

During the year we incorporated the Edmonton Branch as the Edmonton Paint & Glass Co., and also our marble business under the name of the Marble & Tile Company of Canada. Both of these new companies are showing very satisfactory progress.

We opened branch warehouses in Saskatoon and Swift Current, and our action has been fully justified by the results.

The returns from our other subsidiary companies have also been very good indeed.

While we cannot expect to show such remarkable progress every year, the present prospects for business are very good, the only unsatisfactory feature being the unsettled condition of the money market. Should this continue it will have the effect of checking business to some extent, but conditions in Western Canada are so good in themselves that we can reasonably expect to do a very profitable business during the coming year in any event.

In conclusion I wish to say that we have a particularly efficient staff and that the Directors feel that the credit for the splendid showing we have made is largely due to the keen interest and enthusiasm they have shown in connection with their work."

Mr. Eggertson called attention to several very satisfactory features of the statement, and seconded the adoption of the report, which was passed unanimously.

It was moved by Mr. Eggertson, seconded by Mr. J. S. McDiarmid, and carried, that the retiring Directors, Messrs. E. Cass, J. Carr, Jas. McDiarmid, H. F. Mytton, H. Mead Taylor, and R. W. Paterson, be re-elected for the ensuing year.

On motion of Messrs. Hartley and Brandon, Messrs. Webb, Read, Hegan, Callingham & Company, were re-appointed auditors.

It was moved by Mr. Briercliffe, seconded by Mr. Geo. Patterson, and carried, that a vote of thanks be tendered to the Directors, Officers, and Staff for the very efficient way in which they have conducted the business for the past year, and for the exceedingly good statement they have shown.

REPORT OF DIRECTORS

Your Directors beg to present the Tenth Annual Report showing the result of the Company's business for the year ending January 31st, 1913.

Balance at credit of Profit and Loss, Jan. 31st, 1912		$102,031.80
Net Profits for the year after making ample provision for depreciation, doubtful debts and contingencies	$372,450.42	
Less interest and discount paid	59,399.80	313,050.62
		$415,082.42
Appropriated as follows		
Dividend No. 2, Preference 8%, paid September 1st, 1912	17,988.09	
Dividend No. 12, Common 10%, paid September 1st, 1912	24,998.77	
Dividend No. 3, Preference 8%, payable March 1st, 1913	18,158.87	
Dividend No. 13, Common 10%, payable March 1st, 1913	24,999.71	
Preferred share issue expense	373.75	86,519.19
Balance carried forward at credit of Profit and Loss Account		$328,563.23

Your Directors have pleasure in reporting that the results of the past year's business have greatly exceeded all expectations and that they have been able to show the above results after writing off all doubtful accounts, and adding a large amount to the reserves.

EDWARD CASS, President.

SUN LIFE ASSURANCE COMPANY OF CANADA

The leading features of the Directors' Report for 1912, as presented to the Annual Meeting of the Company, held in Montreal, March 4th, 1913, are as follows:

ASSETS as at 31st December, 1912	$49,605,616.49
Increase over 1911	5,704,730.51
CASH INCOME from Premiums, Interest, Rents, etc., in 1912	12,333,081.60
Increase over 1911	1,775,746.08
PROFITS PAID to policyholders entitled to participate in 1912	691,975.84
ADDED TO SURPLUS during 1912	614,008.09
TOTAL SURPLUS 31st December, 1912, over all liabilities and capital, (according to the Company's Standard, viz., for assurances, the Om. (5) Table, with 3½ and 3 per cent. interest, and, for annuities, the B. O. Select Annuity Tables, with 3½ per cent. interest).	5,331,081.82
DEATH CLAIMS, Matured Endowments, Profits, etc., during 1912	4,732,463.29
PAYMENTS to policyholders since organization	34,402,734.66
NEW BUSINESS (paid for in cash) during 1912	30,814,409.64
Increase over 1911	4,377,628.45
ASSURANCES IN FORCE 31st December, 1912	182,732,420.00
Increase over 1911	18,160,347.00

The SUN LIFE OF CANADA now occupies the premier position among Canadian Life Assurance Companies.

Outside of Companies issuing industrial policies, the SUN LIFE OF CANADA now does a larger new life assurance business than any other company incorporated in the British Empire.

THE COMPANY'S GROWTH

JOHN A. TORY, Supervisor

F. N. BURT COMPANY, LIMITED

Report of the Annual General Meeting of Shareholders, held at the Head Office of the Company, Toronto, on Wednesday, March 5th, 1913, at 12 o'clock Noon

The Annual General Meeting of the Shareholders of F. N. Burt Company, Limited, was held at the Head Office of the Company in Toronto on Wednesday, March, 5th, 1913, at 12 o'clock noon.

The President, Mr. S. J. Moore, occupied the chair.

The Board of Directors presented the following report:—

The Directors present to the Shareholders their Fourth Report, with the accompanying Statement of Assets and Liabilities, showing the result of the operations of the Company for the year ended December 31st, 1912.

The balance at credit of Profit and Loss Account, December 30th, 1911, was	$136,362.93	
Profits for the year were	189,430.55	
		$325,793.48
The Appropriations were as follows:—		
Dividends on Preferred Stock Nos. 10, 11 and 12, at the rate of 7% per annum	$ 75,085.50	
Dividends on Common Stock Nos. 9, 10 and 11 at the rate of 6% per annum	33,750.00	
Reserved for Preferred Stock Dividend No. 13 (including interest on New Stock Payments), payable January 2nd, 1913	26,208.31	
Reserved for Common Stock Dividend No. 12, payable January 2nd, 1913	11,250.00	
Auditors' and Directors' Fees	3,000.00	
Underwriters' Commission on New Issue	13,625.00	
Transferred to Realty and Plant Reserve Account	25,000.00	
		187,918.81
Balance to carry forward		$137,874.67

The $545,000 of New Preference Stock offered to the Shareholders was all allotted, and payments were made thereon of $253,322.00 up to December 31st. The Company had the use of this extra capital for an average of only twenty-five days, so that the earnings thereon have contributed but little to the year's results. Since December 31st there has been paid the additional sum of $232,203.00.

The Realty and Plant Reserve Account has been increased to $75,000 by the transfer of $25,000. By order of the Board

S. J. MOORE, President.

STATEMENT OF ASSETS AND LIABILITIES, 31st DECEMBER, 1912.

Cash at Bankers and on hand	86,744.70	
		$2,990,759.49

CLARKSON & CROSS, Auditors.

The following is an extract from the address of the President, Mr. S. J. Moore:—

"The Profits for 1912 were $189,430.55, being $10,988.84 greater than those of the preceding year. After payment of the usual dividends of 7% on Preferred Stock and 6% on the Common Stock, and making transfer of $25,000 to Realty and Plant Reserve Account, and writing off the entire amount of the Underwriters' Commission on the new issue of Preferred Stock, which was made in December, a balance has been carried forward to Profit and Loss Account of $137,874.67, being slightly in excess of the amount carried forward from 1911.

"Payments on account of the New Capital were made quite largely in advance of the calls. We had but little of the use of this money in 1912, but the current year will show substantial earnings therefrom, as nearly all of the increased facilities which this capital provides for are now in operation.

"The volume of business done in 1912 exceeded that of 1911. We did not, however, obtain the increased Net Profit which the larger volume of business should have produced, f various reasons, amongst which are the following:—

"1. One of our Buffalo factories, being the only one operated in leased premises, was moved during the year into new quarters, with a consequent expense and disturbance of business.

"2. The Automatic Machinery installed in our Toronto factory was not in successful operation until toward the end of the year.

"3. The three plants of the Sales Book Department were transferred during the year to new premises erected therefor on Wellington Street, and the expense of such moving and installation was charged against the profits for the year.

"4. An important part of one of our contracts, which is now being filled by the use of Automatic Machinery, had to be largely executed by hand-made goods during the most of the year.

"5. Our Interest Account exceeded $15,000 on borrowed money during the year, which was largely caused by expenditures in Buildings and Plant, from which we got little or no benefit in 1912, but from which we are now obtaining the expected earnings.

"It is, of course, impossible to make an accurate forecast for the year 1913, but it will be of interest to the Shareholders to know that the outlook for the current year is at least as good as was the outlook at the beginning of 1912; and as we are now possessed of the larger and better facilities, our Profits should exceed those of 1912 by at least $50,000, if no adverse conditions arise during the year. For the months of January and February our Shipments have exceeded the output for the corresponding months of 1912 by upwards of 16%.

"I have pleasure in moving the adoption of the Report, which will be seconded by Vice-President Mr. A. E. Ames."

Mr. A. E. Ames, Vice-President, seconded the motion for the adoption of the Report, after which Mr. Alfred Jephcott gave some interesting additional information with reference to the business and prospects of the Dominion Paper Box Company Department.

The Report was unanimously adopted.

The following is the Board of Directors for the ensuing year: Messrs. S. J. Moore, A. E. Ames, F. N. Burt, Robert Kilgour, Hon. Charles H. Duell, Hon. W. Caryl Ely, James Ryrie, and Alfred Jephcott.

At a subsequent meeting of the Board, Mr. S. J. Moore was elected President, and Messrs. A. E. Ames and F. N. Burt, Vice-Presidents, of the Company.

ie whole issue of preferred stock has been underwrit- r which purpose there has been provided a commis- 2 per cent. in cash and 15 per cent. in common stock. nsures the securing of the full capital.

Of the $500,000 of common stock, the underwriters will receive $75,000, William A. Rogers, Limited, will retain $250,000, and the subscribers to the preferred stock receive $175,000.

It is proposed to establish a well-equipped factory, and the new company will own all the Canadian rights and trademarks, as well as the goodwill, connected with the Canadian business.

◆

The annual meeting of the shareholders of the Montreal Loan and Mortgage Company was held at the company's office, Montreal, and a satisfactory report was submitted showing a surplus exceeding the capital of the company. The president intimated that the shareholders might reasonably expect that the dividend would be increased in the near future to 10 per cent. per annum, payable quarterly. The retiring members of the board were re-elected as follows: Mr. Richard Bolton, president; Mr. George Caverhill, vice-president; Messrs. W. E. Cheese, C. Ernest Gault, M.L.A., S. A. McMurtry and W. Ernest Bolton.

Transfer books will be re-opened April 1st, 1913, at ten o'clock a.m.

Cheques will be mailed to shareholders.

By order of the Board.

JOHN H. KERR,
Secretary.

Hamilton, Canada, February 28th, 1913.

Lethbridge, Alta., requires a first-class industrial commissioner.

The Quebec Bank has opened a branch at Empress, Alta., under the management of Mr. H. J. Read.

The Bank of British North America has opened a branch at Mount Dennis, Ont., under the temporary management of Mr. J. Black.

Upwards of one million dollars were withdrawn during a run on the Montreal City and District Savings Bank, started apparently on some groundless rumor.

The officers elected by the Ontario associated boards of trade for the ensuing year were: President, Colonel W. N. Ponton, Belleville; first vice-president, Mr. A. J. Young, North Bay; second vice-president, Mr. R. Home Smith, Toronto; third vice-president, Mr. H. L. Frost, Hamilton; secretary-treasurer, Mr. F. G. Morley, Toronto. Executive committee, Dr. H. T. Reason, London; W. Taylor, Owen Sound; P. S. Coate, Chatham; W. B. Burgoyne, St. Catharines; Colonel H. Brock, Toronto; W. H. Alderson, Toronto; R. Meek, Kingston; H. L. Janzen, Berlin; George Taylor, New Liskeard; J. F. Black, Sudbury; G. T. McMaster, Guelph; D. B. Wood, Hamilton.

THE FORTY-FIRST ANNUAL REPORT

OF THE DIRECTORS OF

The Hamilton Provident and Loan Society

FOR THE YEAR 1912.

The Forty-first Annual Meeting of the shareholders of the Society was held at the Society's Head Office at noon to-day. Among those present were the following:—

H. W. Clarkson, J. T. Glassco, George G. Carscallen, Rev. George Forneret, George Hope, F. A. Robins, George Watson, Alfred T. Read, Leopold Bauer, John McCoy, J. J. Greene, John H. Coon, Henry L. Roberts, T. H. Crerar, F. H. Lamb, James E. Brown, John Hooper, Colonel A. H. Moore, W. A. Robinson, James Angus, John H. Hendrie, George Rutherford, James Dixon, C. Ferrie, Hon. William Gibson, D. M. Cameron, George Sweet.

The President, George Rutherford, in the chair. C. Ferrie, Treasurer, acted as Secretary.

The Secretary read the report and Annual Statement, as follows:—

The Directors have much pleasure in presenting to the Shareholders the Forty-first Annual Report of the Society's affairs, and accompanying Financial Statement, duly audited.

The Net Profits of the year, after paying and providing for all due and accrued interest on borrowed Capital, paying cost of Management and other charges, amount to $145,769.94.

This amount has been disposed of as follows:—

Two half-yearly Dividends at the rate of seven per cent. per annum	$81,200.00	
Government and Business Tax	2,030.31	
		$ 83,230.31
Improvements to Head Office Building.	$ 1,200.00	
Added to Reserve Fund	60,000.00	
Credited to Contingent Fund	1,339.63	
		62,539.63
		$145,769.94

After writing off all losses, there remains at the credit of the Contingent Fund $21,027.15.

The Reserve Fund now amounts to $800,000.00.

The Directors again acknowledge the valuable services rendered to the Society by its Agents, Messrs. Gillespie and Paterson, W.S., Edinburgh, Scotland.

All of which is respectfully submitted.

ALEXANDER TURNER, President.

Hamilton, January 31st, 1913.

The value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

LEGAL NOTICES

THE CROWELL SHERMAN STALTER COMPANY, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 15th day of January, 1913, incorporating James Steller Lovell accountant; William Bain, bookkeeper, and Robert Gowans, Joseph Ellis and John Joseph Dashwood, solicitors' clerks, all of the City of Toronto, in the Province of Ontario, for the following purposes, namely:—(a) To carry on the business of general contractors and engineers; to construct, erect, execute, equip, improve, make, repair, raise or develop public works or conveniences of all kinds, including railways, tramways, roads, tunnels, harbors, docks, slips, shipping places, piers, breakwaters, dams, jetties, wharves, quays, canals, reservoirs, channels, conduits and embankments, and including the erection, repair or improvement of sewage, drainage, sanitary, water, gas, electric light, telephonic, telegraphic and power supply, plants, works, houses and stations, and to dredge and deepen any waterways or channels and generally to do any construction or development or improvement work in connection with harbors, shipping and navigation routes and channels, and to construct tunnels under contract with any person, corporation or corporations possessing the right to construct such tunnels, and to construct any works in connection with any such tunnels, or with the railroads authorized to be constructed, maintained or operated through such tunnel or tunnels, and for any and all of the purposes aforesaid, to maintain and operate tracks, sidings and switches in or about any works or conveniences being so constructed, erected, executed, equipped, manufactured, made, repaired, raised or developed, and in or about any such waterways or channels or tunnels, and in or about any works being carried on by the company; (b) To construct offices, warehouses and other buildings, public and private, and all other works or conveniences of public utility; (c) To manufacture, buy, sell and deal in iron and iron ore and steel and other ores and metals; to purchase, lease or otherwise acquire any mines, mining rights and lands and any interest therein, and to explore, work and develop the same, and to quarry, smelt, refine, dress, amalgamate and prepare for market ores, minerals and metals of all kinds; (d) To acquire by purchase or otherwise and to hold and deal in lands, timber limits or licenses, water lots, water falls, water privileges and concessions and powers and rights and interests therein, and to build upon, develop, irrigate, cultivate, settle and otherwise improve and utilize the same, and to lease, sell and otherwise deal with or dispose of the same; (e) To sink wells and shafts and to make, build, construct, erect, lay down and maintain reservoirs, waterworks, cisterns, dams, culverts, main and other pipes and appliances and to execute and do all other works and things necessary or convenient for obtaining, storing, selling, delivering, measuring and distributing water for the purposes of irrigation and for the creation, maintenance and development of hydraulic, electrical or other mechanical power, or for any other purpose of the company; (f) To purchase, lease or acquire water powers and water privileges, and to develop therefrom any power, electrical or other energy, and to use the same in connection with the business of the company, and to transmit the same and sell, lease or dispose of water powers and water privileges or power, and to enter into working arrangements with any other companies, persons, firms or corporations for the use thereof, and to establish, operate and maintain any lighting, heating or power plants, and to sell and dispose of light, heat and power, provided always that the rights and privileges hereby conferred upon the company to generate, sell and dispose of electric energy for light, heat and power, when exercised outside the property of the company, shall be subject to all provincial and municipal laws and regulations in that behalf; (g) To manufacture and deal in logs, lumber, timber, wood, metal and all articles into the manufacture of which wood or metals enter and all kinds of natural products and by-products thereof, and goods, wares and merchandise; (h) To build, buy, sell, equip, operate and own steamships, steamboats, sailing vessels, barges and lighters, not as a common carrier, but as an incident to its business; to buy and sell, hold and operate wharves, water rights, powers, bulk-heads and appurtenant property in such places as the business of the company may seem to require, or as may be necessary or convenient in connection therewith; (i) To manufacture or produce, purchase, take upon lease or in exchange or otherwise acquire, whether for any of the hereinbefore mentioned purposes or not, machinery and plant of all kinds and any other articles, products or things used in connection with any of the company's business, and to buy, sell, supply and deal in the same; (j) To apply for, purchase or otherwise acquire or obtain any contracts, decrees or concessions for or in relation to the construction, execution, carrying out, equipment, improvement, management, administration or control of public works and conveniences or otherwise incident to any of the objects herein specified, and to undertake, execute, carry out, dispose of or otherwise turn to account or sell or dispose of the same; (k) To sell, exchange or lease any real or personal property of the company or any rights, easements, privileges or interest in, to, over, under or concerning the same; (l) To purchase or otherwise acquire any patents or patent rights, licenses, concessions and the like conveying any exclusive or limited right to use any invention which may seem capable of being used for any of the purposes of the company or the acquisition of which may seem calculated directly or indirectly to benefit the company, and to use, exercise, develop or grant licenses in respect of or otherwise turn to account the property and rights so acquired; (m) To purchase and otherwise acquire and undertake and assume all or any part of the assets, business, property, privileges, contracts, rights, obligations and liabilities of any person, firm or company carrying on any business which this company is authorized to carry on, or any business similar thereto, or possessed of property suitable for the purposes of this company's business, and to issue in payment or part payment for any property, rights or privileges secured by the company, or for any guarantees of the company's bonds, or for services rendered, shares of the capital stock of the company, whether subscribed for or not, as fully paid and non-assessable, or bonds, debentures or other securities of the company; (n) From time to time to apply for, purchase or acquire by assignment, transfer or otherwise, and to exercise, carry out and enjoy any statute, ordinance order, license, power, authority, franchise, concession, right or privilege which any government or authority, supreme, municipal or local, or any corporation or other public body may be empowered to enact, make or grant, and to pay for, buy in and contribute towards carrying the same into effect, and to appropriate any of the company's stock, bonds and assets to defray the necessary costs, charges and expenses therein; (o) To draw, make, accept, endorse, discount, execute and issue promissory notes, bills of exchange, bills of lading, warrants and other negotiable or transferable instruments; (p) To raise and assist in raising money for and to aid by way of bonus, promise, endorsement, guarantee or otherwise any person or corporation in the capital stock of the company holds shares, or with which it may have business relations, and to act as employee, agent or manager of any such corporation, and to guarantee the performance of any contracts by any such corporation, or by any person or persons with whom the company may have business relations; (q) To purchase, subscribe for, acquire, hold, sell or otherwise dispose of shares or stock, bonds, debentures or other securities in any other corporation and evidences indebtedness in any such corporation (including bonds, debentures or oth securities of the Dominion of Canada or of any of the Provinces of the I minion of Canada or of any municipal corporation), notwithstanding t provisions of section 44 of the said Act; (r) To enter into partnership into any arrangement for sharing profits, union of interests, co-operati joint adventure, reciprocal concession or otherwise with any person company now or hereafter carrying on or engaged in any business or tra action which this company is authorized to carry on or engage in, and promote or assist or join in the promotion of any such company; LEGAL NOTICE

WM. CROFT & SONS, LIMITED.

UBLIC Notice is hereby given that under the First Part of chapter 79
of the Revised Statutes of Canada, 1906, known as "The Companies
," letters patent have been issued under the Seal of the Secretary of
te of Canada, bearing date the 31st day of January, 1913, incorporating
nes Steller Lovell and Charles Delamere Magee, accountants; William
n, bookkeeper, and Robert Gowans and Joseph Ellis, solicitors' clerks,
of the city of Toronto, in the Province of Ontario, for the following
poses, viz. :—(a) To carry on business as general manufacturers, mer-
nts and dealers in all kinds of goods, wares and merchandise, and to
ablish, operate and conduct shops for the sale of all articles manu-
tured by or dealt in by the company and any other goods, wares or
rchandise which may be advantageously dealt in in connection there-
h; (b) To manufacture and deal in logs, lumber, timber, wood, metal
all articles into the manufacture of which wood or metal enters and
kinds of natural products and by-products thereof; (c) To carry on
other business, whether manufacturing or otherwise, which may seem
the company capable of being conveniently carried on in connection
h the business or objects of the company and necessary to enable the
npany to profitably carry on its undertaking; (d) To construct, execute,
and carry on all descriptions of works which may be necessary or useful
the purposes of the company; (e) To purchase or otherwise acquire and
lertake and assume all or any part of the assets, business, property,
vileges, contracts, rights, obligations and liabilities of any person, firm
company carrying on any business which this company is authorized
carry on, or any business similar thereto, or possessed of property
table for the purposes of this company's business, and to issue in pay-
nt or part payment for any property, rights or privileges acquired by
company, or for guarantees of the company's bonds, or for services
dered, shares of the company's capital stock, whether subscribed for or
, as fully paid and non-assessable, or the company's bonds; (f) To
chase or otherwise acquire, hold, sell or otherwise dispose of shares or
ck, bonds, debentures or other securities in any other corporation, not-
hstanding the provisions of section 44 of the said Act; (g) From time to
e to apply for, purchase or acquire by assignment, transfer or other-
e, and to exercise, carry out and enjoy any statute, ordinance, order,
ense, power, authority, franchise, concession, right or privilege which
government or authorities, supreme, municipal or local, or any cor-
ation or other public body may be empowered to enact, make or grant,
and to pay for, aid in and contribute towards carrying the same into effect, and to appropriate any of the company's stock, bonds and assets to defray the necessary costs, charges and expenses thereof; (h) To enter into partnership or into any arrangement for sharing profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise with any person or company now or hereafter carrying on or engaged in any business or transaction which this company is authorized to carry on or engage in; (i) To assist in the promotion, organization, development or management of any corporation or company and to raise and assist in raising money for and to aid by way of bonus, loan, promise, endorsement, guarantee or otherwise any corporation in the capital stock of which the company holds shares, or with which it may have business relations; and to act as employee, agent or manager of any such corporation and to carry on the business thereof and to guarantee the performance of contracts by any such corporation or by any person or persons with whom the company may have business relations; (j) To procure the company to be registered and recognized in any foreign country and to designate persons therein, according to the laws of such foreign country, to represent this company and to accept service for and on behalf of this company of any process or suit; (k) To lease, sell or otherwise dispose of the property and assets of the company or any part thereof for such consideration as the company may deem fit, including shares, debentures or securities of any company; (l) To amalgamate with any other company having objects similar to those of this company; (m) To distribute among the shareholders of the company in kind any property of the company and in particular any shares, debentures or securities belonging to the company or which the company may have power to dispose of; (n) To do all acts and exercise all powers and carry on all business incidental to the due carrying out of the objects for which the company is incorporated and necessary to enable the company to profitably carry on its undertaking; (o) To do all or any of the above things and as principals, agents or attorneys. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Wm. Croft & Sons, Limited," with a capital stock of four hundred thousand dollars, divided into 4,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the city of Toronto, in the Province of Ontario.

LOAN COMPANY AMALGAMATION

An amalgamation has been effected of the Standard Loan Company and the Reliance Loan and Savings Company.

The new company will be known as the Standard Reliance Mortgage Corporation, with an authorized capital of $5,000,000, of which $1,900,000 will be paid up. The combined assets total nearly $5,000,000.

The Reliance Loan Company was incorporated seventeen years ago, and the Standard Loan Company was granted its charter twelve years ago.

Mr. W. S. Dinnick, vice-president and managing director of the Standard Loan Company, will take the presidency of the new corporation. In addition to the directors of both companies who will constitute the directorate of the amalgamated corporation, the following will be added to the board:—Messrs. E. F. B. Johnston, K.C., John Firstbrook, and Lord Hyde of Pickering

Mr. Herbert Waddington, the managing director of th Reliance Loan and Savings Company of Ontario, will be come the managing director of the Standard Reliance Mor gage Corporation.

Pending alterations to the Reliance Loan building o King Street, necessary to accommodate the combined bus ness of the two companies, both existing offices will be cor tinued.

◆

PROOF OF AGE IN LIFE INSURANCE

The amendment to the Ontario Insurance Act, proposed by Mr. C. R. McKeown, would, if it became law, raise serious obstacles to the conduct of the business, disadvantageous both to companies and to policyholders. If an agent has demonstrated the advantages of life insurance and then tells the applicant that before he can be accepted proof of age must be furnished, the applicant will hesitate and may be lost to the company, at the same time losing life insurance protection. As one manager puts it, "If the business must be held up until the information in this connection comes to hand, the delay will, in not a few instances, prove annoying to the applicants and seriously interfere with the prompt dispatch of the business on the part of the companies."

The Ontario Act already provides that where the age has been given erroneously, but in good faith, the policy shall not be voided on that account, but the sum payable shall bear the same proportion to the sum assured, as the premium for the assumed age bears to the premium for the proven age. The same principle applies in the Dominion Insurance Act and in the legislation of most of the States of the neighboring republic. When an error in age is discovered in the lifetime of the assured, the adjustment takes the form of receiving or refunding the difference in premiums according to whether the age was over or under stated. The policyholder, therefore, is well protected under the law as it stands.

Should Mr. McKeown's suggestion become legalized, it would place the onus of proof of age upon the companies. In that connection, another manager points out that dishonest persons might, and many probably would, take advantage of the opportunity to obtain insurance at a low rate by understating their age. It would be difficult for the companies—in nearly all cases impossible—to prove fraud. The honest policyholder would be the ultimate victim, as the loss to the company would fall upon him.

A point Mr. McKeown does not seem to have considered is that supposing the companies attempted to obtain proof of age within the year and the policyholder declined to furnish it, or stated ignorance of his date of birth, what would be the remedy?

The object of the bill is apparently to bring more prominently to the notice of the policyholder the desirability of having evidence of age submitted to the company as early as possible. That object could easily be attained by making it obligatory upon all companies doing business in Ontario, to furnish a printed form to prove age and to deliver a copy of this form, with any instructions necessary, with the policy to the policyholder. That would seem to prevent the blocking of life insurance business and give even further protection to the policyholder. With proper and reasonable protection for the policyholder, there is certainly no need to make it harder to write life insurance. That is quite difficult enough now.

AS TO THRIFT

The penny banks for school children in Canada are excellent footpaths to thrift. The earlier a child is taught the virtue and advantages of thrift, the better for the child as it grows into youth and man or womanhood. In a few cases the education may fail but thrift, once firmly rooted, is likely to flourish. Miss Annie Gray, of the York Street School, Toronto, has thrown interesting sidelights on the patronage of the children's bank. Almost all the nationalities of Europe are represented in this particular school and its penny bank.

A Syrian boy, who sells newspapers, banks from one to two dollars every week because he wants to be "a big guy" when he grows up. One girl wants "to be a lady," and is saving up to go to college. A little French girl is saving her money to learn dressmaking and make her own clothes. Another little girl is saving her money until she gets $25, and then she will assist her cousin to come out from Russia. A boy is saving up to buy a cowboy's suit. Perhaps of the reasons the most remarkable is that of the little one who is saving up to buy a house, because the house where they live is so small and they are so crowded. These are a variety of reasons, but they all induce the early cultivation of thrift.

The foreign children, we are told, are far more thrifty than those born in Canada. From which fact, Canadians young and older may well apply a moral to themselves. Extravagance has a tight grip upon our countrymen and always there comes a reckoning day on that score.

WITHOUT POLITICAL BIAS

It is doubtful whether the people of Canada will accept "it is a great constitutional struggle," as the excuse for the childish waste of time at Ottawa. The whole incident savors of school children rather than of statesmen. Diversions caused in the House by firecrackers, and the entrance of members in night caps, bath robes and with pillows, smacks of vaudeville rather than of parliamentary dignity. If the demonstrated is the only dignified way in which an Opposition can gratify its desires, parliamentary rules are sadly lacking. The country would be grateful for a measure which would make it easier and more businesslike for Conservatives and Liberals alike to act as a respectable Opposition, whoever happened to be in that box.

ALL IS WELL

Things commercial and financial are quiet. A nation cannot keep up a fast gait all the time. If it tries unreasonably, disaster comes. It must rest awhile to get breath. Canada just now is taking a breathing spell. It might have gone a little further, but for international tight money falling across the way. Stock exchange transactions are few and poor in volume. Prices are low. Loan and mortgage companies are gathering new strength for spring operations. The banks are not calling further loans to any extent, but are standing pat—a far better omen than if they had continued to call. Collections generally are slow. Real estate is inactive. Surest sign of between seasons is the amusing and unsuccessful attempt to revive public interest in unhappy mining schemes. These indications are not for mourning. They are a sign of spring fever and national health.

Tight money is a good check to youthful enthusiasm. If this country got all the funds it needed without question, it would soon be heading for a sharp panic and a long period of depression. The fact that money is difficult to obtain now has had a salutary effect in many places. As an example, our municipalities generally had planned an extensive list of local improvements, some of them in the luxurious class. The market conditions have caused them to ponder and to shave the list until only urgent necessities remain. The output of new securities of all kinds has been lessened. That will help matters, too. Credit is slowly being transformed to cash. This must be done occasionally to avoid the temptation of building a fabric of paper. Hesitancy to approach the London market is apparent, and the London market knows best how it needs a rest.

So the quiet being enjoyed is a good thing, for we know that at foundation there is strength unlimited. Population is increasing, naturally and by immigration; homes are multiplying—and homes are a vital necessity to industry; railroad corporations continue to line their steel; crop acreage is expanding; existing industries are extending and new ones being born; British and foreign capital still likes this Dominion. Back of all are vast natural resources and opportunities that would turn a desert green with envy. All of which is sufficient, even in dull days, to give us the pink of enthusiasm.

PROOF OF AGE IN LIFE INSURANCE

Amendment is Proposed to the Ontario Act –Special Committee Will Deal with Objections.

An amendment to the Ontario Insurance Act, in regard to roof of age, has been submitted to the provincial legislature y Mr. C. R. McKeown, M.P.P. The following is the amended rovision that Mr. McKeown desires adopted:—

‘‘When the age of a person is material to a contract of nsurance such age shall be inserted in the policy issued at he time of application and in the absence of fraud shall be inding upon all parties to the contract of insurance unless ithin one year from the date of the said issue, an error in the ge so inserted is discovered, when the said policy may be ectified accordingly.’’

eferred to Special Committee.

The bill has been strongly opposed by Mr. A. E. Donovan, nd at his request referred to a special committee. This conists of Messrs. Hon. W. H. Hearst, S. Charters, T. W. McGarry, . W. Johnson, C. M. Bowman, T. Marshall and G. Pattinson.

The Monetary Times has sought the opinions of leading fe insurance men regarding this matter. Mr. E. W. Cox, genral manager of the Canada Life, says—

‘‘I am sure I do not know what position such legislation ould place the companies in or rather what action it would orce them to take. It would appear to me that we would ither have to refuse to issue a policy until age had been roven or insert a clause in our policy to the effect that we ould not accept the second premium if age had not been roven before its due date. The new proposal would throw he entire burden of proof of age on the companies, and this, am sure, would be impossible for them to undertake. If the ompanies were forced to take the applicant's statement as to is date of birth, I am sure there would be many mistakes ade by people acting in the best of faith, but from those raudulently inclined I am sure we would be liable to serious oss.’’

Mr. J. G. Richter, manager of the London Life Insurance ompany, thinks that such a requirement would prove disadantageous in many cases to both the companies and the pplicants alike.

roofs Not at Hand.

‘‘Many applicants for insurance,’’ he says, ‘‘while being olerably certain of their ages, have not the proofs at hand, nd to obtain same in a satisfactory manner, time is required. n most cases, certificates of birth and proof of age can be btained by writing therefor, but this takes time and if the usiness must be held up until the information in this conneción comes to hand, the delay will, in not a few instances, rove annoying to the applicants and seriously interfere with he prompt dispatch of the business on the part of the comanies.

‘‘As to the necessity for proper proof of age being furished a company before claim is paid, I would point out that he risk to be borne by the company is dependent in large easure on the age of the applicant when insured. Furtherore, that as life insurance is mutual in principle, the share f mortality cost, reserve, etc., being apportionable on basis of ge, plan and amount insured, it is necessary that representaions as regards age in application be subject to verification, nd, if incorrect, to such adjustment as will maintain equity etween all parties concerned.

‘‘Unfortunately neither the agent nor the medical examner can determine the actual age of an applicant from appearnces, or even from a physical examination. An approximate stimate at most is all that can be expected from these sources. n this respect the human anatomy differs from that of many f the animals which, in many cases, afford fairly indisputable vidences of age. The companies are thus compelled to rely pon other evidences in order to hold themselves safe and do justice to all parties. In my thirty years of experience in the ife insurance business, I have come across but few cases in hich reasonably satisfactory evidence of age could not be urnished even after death.

Proof of Age Blanks.

‘‘In order, however, to induce applicants to furnish proof f age during the lifetime of the insured, it is the practice of ractically all the companies to furnish with the policies, when eing delivered, proof of age blanks and literature calling atention to the advisability of having this matter attended to t earliest convenience, so that age may be admitted during the lifetime of the insured. Further attention is also called to this matter in the premium payment notices that are sent out from time to time, so that if proof of age is neglected until after death, it is not, as a rule, the fault of the companies but rather of the insured, and the comparatively few who do neglect to give attention to this matter, are not entitled to the consideration which the proposed legislation is calculated to afford them to the great disadvantage of the business as a whole.

‘‘Legislation of the kind indicated mainly results from lack of practical knowledge of the operation of the matters with which it is proposed to deal. Not a little of this kind of legislation is being put upon the statute books from year to year, only to be amended or repealed in subsequent years, when it becomes apparent that the harm resulting therefrom is greater than any possible good that can be accomplished thereby.’’

Unfair to Companies.

Mr. T. Hilliard, president and managing director of the Dominion Life Insurance Company, regards the bill as exceedingly unfair to the companies, and likely, if enacted, to prove prejudicial to the interests of honest policyholders inasmuch as it would throw wide open an easy entrance to fraud in this matter. ‘‘In practice,’’ says Mr. Hilliard, ‘‘it would be necessary for the companies not to issue any policies without proof of age. To obtain that at the time of writing the application is in many cases impossible. Delays would be incurred, adding greatly to the trouble of the agents, and in many cases by postponement causing the effort of getting a policy to be dropped. The net effect would therefore be to greatly delay, impede and embarrass the issue of policies, adding thereby indirectly to the expense of securing business. There is no good end to be served by the proposed legislation as the present law is eminently just and fair to all parties concerned.’’

STERLING TRUSTS CORPORATION.

Presenting its report at the first annual meeting, the Sterling Trusts Corporation, of Regina, was able to report practically all its $1,000,000 authorized capital as subscribed. For the year ended December 31st, 1912, a good financial statement was presented. It is pleasing to note that the wisdom of inaugurating a reserve account has been recognized by the company's directorate, which is a strong one. Nearly $5,000 was placed to that account as a beginning.

As a result of operations last year, all charges and expenses have been met, all organization expenses have been written off except an item of $1,212.35, and dividends amounting to $8,006.51 paid, leaving a balance of $4,629.71 at the credit of profit and loss account. In addition, as stated above, the sum of $4,175.54 was placed in a reserve account. The dividends paid cover the full period of fifteen months that the company has been in operation, and the rate has been five per cent. per annum, computed from the date upon which payments were made.

The amount of capital subscribed up to the close of the year was $917,700, upon which payments amounting to $200,120.85 have been made.

In addition to the trust business shown in the statement, the company have been entrusted with estates for management amounting in the aggregate to $750,000.

The office quarters of the company have been improved. The directors have thought it prudent to buy a site for a suitable head office building for the company for use as soon as the requirements of its business demand larger quarters. A property adjoining the new office building of the Canadian Bank of Commerce on Scarth street, Regina, was secured.

HAIL INSURANCE IN SASKATCHEWAN

The Saskatchewan Hail Insurance Act of 1912 will be put into force in 102 rural municipalities, so that it is certain that at all events the scheme will have a fair trial. At present it is impossible to discuss with any certainty the probable success of the scheme, or even to figure out accurately how much money will be realized from the assessment of four cents per acre, because the amount of land in the area where the act will be in force which will be non-assessable, exempt or withdrawn can only be a matter of conjecture until after the first of May of this year. We are now in a position, however, to make some interesting speculations.

The ordinary area of a municipality is nine townships, which gives 21,150,720 acres in the 102 municipalities which have accepted the scheme. Deducting the liberal allowance of 20 per cent. of this land as being non-assessable, exempt or withdrawn, there is an area of 16,920,576 acres from which a revenue of $676,823.04 will result from the assessment of four cents per acre. From this amount must be deducted $66,920.58 made up by the estimated amount of $50,000 for cost of administration and 2½ per cent. commission for collection by secretary-treasurers. This will leave a net revenue of $609,902.47.

During the past season there were 4,092,000 acres in crop in the 102 municipalities. In the seven years during which hail insurance was offered by the government the average expenditure for indemnity and cost of administration was over 26 cents per acre of insured crop. If this figure is applied to the acreage in these municipalities in 1912 it will be found that the claims upon the commission for indemnity and cost of administration could amount to approximately $1,063,920 as a maximum, while as has been stated above the net revenue would probably not exceed $610,000. It should be borne in mind, however, that the acreage insured with the government in former years was to a very considerable and ever increasing extent the acreage which was most subject to damage by hail. Too much stress cannot be laid on this point. Consequently there is no reason to expect that the claims upon the commission, made from all parts of the province in any one year, will amount to more than from 14 to 16 cents per acre insured, which means that there should be a fair profit on the operations of the commission for the year.

MONTREAL TRAMWAYS COMPANY

Issue of Bonds—Gross Earnings Show Increase—Growth of Business

Monetary Times Office,
Montreal, March 12th, 1913.

In connection with the issue of $2,000,000 of the first and refunding bonds of the Montreal Tramways Company by the financial house of Messrs. N. W. Harris & Company, a statement of the earnings of the Tramways Company appears. This statement is one of much interest in local financial circles inasmuch as the company for some time past has not issued its regular monthly statements of earnings, as did the old Montreal Street Railway. These earnings, as compared with figures for what is approximately the corresponding period of the previous year, appear below. The comparison is made between the figures for the year ending January 31st, 1913, and those for the year ending February 29, 1912:—

	February 29, 1912.	January 31, 1913.	Change
Gross earnings	$5,598,001	$6,378,212	+ $ 780,211
Operating expenses ..	3,614,357	4,286,517	+ 672,160
Net earnings	$1,983,643	$2,091,694	+ $ 108,051
Bond interest	$ 721,150	$ 865,560	+ $ 144,410
changes	$1,262,493	$1,226,134	— $ 36,359
Surplus over and above			

It will be seen that although the gross earnings showed a very large increase, this increase was in large part absorbed by the increase in operating expenses, so that the net increase was only $108,051.

To Meet Appropriations.

Inasmuch as the company made a new issue of bonds during the year, the bond interest was greater than in the year 1911, this increase being $144,410, so that there was left $36,359 less than the previous year to meet the debenture stock interest and the various appropriations. The total debenture issue now amounts to $16,000,000, the interest on this being at the rate of 5 per cent., making a total for the year of $800,000.

In addition to the interest on the debenture stock, however, there are also other charges. In the past the company was in the habit of writing off the sum of $250,000 each year to contingent fund which, presumably, takes the place of depreciation, no other appropriation having appeared for this item. In addition, however, it was the practice of the old company to set aside a certain amount each year for insurance fund, this amounting to $25,000. The Tramways Company has adopted the practice of insuring in the regular manner, so that the charge on this account in all probability formed part of the increase in operating costs shown above.

Required for Contingent Fund, Etc.

As the company is now larger than ever before and the amount logically required for contingent fund would be greater than in the past, it might do to assume that the sum required for this and similar write off or transfer would be $300,000. On this basis, the remainder of the account might be assumed as follows:—

Year's surplus after bond interest	$1,226,134
Contingent fund, etc.	300,000
	$ 926,134
Interest on $16,000,000 debenture stock at 5%	$ 800,000
Available against dividends on common stock....	$ 126,134

The total issue of common stock is now in the vicinity of $2,000,000, the bulk of this being held by the Tramways-Power Company as the holding company. The amount being earned against dividends on this stock is accordingly 6.3 per cent., and this is increasing all the time. The various bond issues and the fact that the company may shortly issue more stock will keep the surplus for the year an unknown quantity.

◆

RAILROAD EARNINGS

The following are the railroad earnings for the week ended March 7th:—

	1913.	1912	Increase or decrease
Can. Pacific	$2,378,000	$2,144,000	+ $234,000
Grand Trunk	929,622	834,996	+ 94,626
Can. Northern	324,500	312,800	+ 13,070
T. & N. O. ...	28,502	33,030	— 4,527

WESTERN CANADA IS PREPARING FOR ACTIVITY

Agricultural Implements in Demand — Capital for Investment

Monetary Times Office,
Winnipeg, March 11, 1913.

Evidence of the demand for tractors in Western Canada is shown by a shipment which recently reached Winnipeg, consisting of a complete train of over 30 flat cars, 23 of which carried two tractors. The total value of the train load is $142,000, and is believed to be the largest hitherto received in Winnipeg. One Winnipeg firm will manufacture 800 tractors this year, but this, as in other lines of local industry, will not appreciably diminish the demand from outside points.

A compilation made from the returns of the railway companies during the year 1911, showed that 2,120 cars of agricultural implements were received at Winnipeg during that year, and the development of agricultural areas since that time justifies the belief that annual shipments received at Winnipeg are much larger.

Harvesting machinery is sold by the trainload, and it is by no means an uncommon sight to see a complete train of over forty cars, loaded with the threshing engines and separators from Eastern Canada or across the border.

Capital for Investment.

Mr. Edward Brown, who has returned from a trip to the east, where he spent some time in leading cities of the United States and Canada, disposed of 6 per cent. bonds of two Winnipeg industrial concerns. The amount involved was in all $1,750,000.

During his absence Mr. Brown appeared before the committee on banking of the house of commons and secured the charter for the British North Western Mortgage Company. The authorized capital of this company is $10,000,000. Of this sum there has been subscribed by the directors $1,000,000. An additional million will be shortly offered to the public.

The company will, within a few months, absorb the Canada West Securities Corporation, with total assets of $2,275,000. Provision for this is made in the Dominion charter which has just been secured.

Power and Transportation.

Winnipeg's power department's February returns total $59,600, an increase of $5,400 over the January figures, when the receipts amounted to $54,200. The cost of operating the plant and departments for February is estimated at $55,500, which leaves a profit of $4,106.

On May 18, eighty business men of Winnipeg will start on an eight-day tour of the west, under the auspices of the Winnipeg Industrial Bureau, which body annually conducts a trip of this kind for the purpose of trade expansion.

Alderman T. E. Dean, chairman of the Fort William, Ont., utilities committee of the city council, stated recently that the first work of the construction department will be to build the Island No. 2 extension of the street railway system. Alderman Dean expressed the opinion that the island extension is important, as there will be several new industries in operation and building on the island this summer and it is important that the city provide adequate means of transportation.

◆

OCCIDENTAL FIRE INSURANCE COMPANY

The Occidental Fire Insurance Company's capital stock is $500,000. In its balance sheet for last year, $348,067 of this is shown to be uncalled. Its principal assets are mortgage loans to the extent of $120,080; cash in banks and on hand, $72,694.02; municipal debentures, $66,050; interest accrued, $7,392.55; agents' balances (less reserved for bad debts), $49,808.39; real estate and office building, $5,859.84; office furniture and supplies, $2,860.63; and fire maps (less depreciation), $6,882.40. A net surplus of $65,830 was obtained as a result of the year's business. The liabilities of the company are:—Subscribed capital, $500,000; losses under adjustment, $11,878.56; reserve for unearned premiums being full amount as required by the Dominion government, $89,153.30; income taxes accrued, $1,003.97; amounts payable, $5,729.17; and unclaimed dividends, $90.52.

◆

CANADA PAPER COMPANY

At the Canada Paper Company's annual meeting the retiring directors were re-elected for 1913. The board consists of Mr. Joseph Kilgour, president; Sir Montagu Allan, vice-president; Messrs. C. R. Hosmer, H. S. Holt, Hon. Robert Mackay and F. W. Folsom.

UNITED STATES MANUFACTURES AND CANADA'S PULP INDUSTRY

Brief Filed Showing Growth of Business in Dominion

The new brief, which has been filed with the ways and means committee, states a Washington despatch, by what is known as the Paper Trust in the United States, is as follows:—

"The contention of the American paper producers, made at the time that section 2 was being considered, that the adoption of such a measure would necessarily stimulate the growth of the industry in Canada and depress it correspondingly in this country, was evidently not taken seriously. That the prediction was not ill-advised is more than demonstrated by what has already come to pass.

"We give below a summary of companies which have been organized for the purpose of manufacturing pulp and paper in Canada since the serious agitation concerning section 2 began, about three years ago.

"Some of these have already become producers, and many of them have their developments well under way. An examination of the list, which gives the names of the concerns, their locations and capitalization, will not only interest but startle those who have direct or indirect interest in preserving American enterprise.

Ontario and Quebec Firms.

The following firms, located in Ontario, have a total capitalization of $12,930,000:—Abitibi Pulp and Paper Mills, Limited, Iroquois Falls, $3,000,000; the Beaver Company, Beaverdale, $500,000; British and Colonial Land and Securities Company, Toronto, $1,000,000; the Canada Lumber and Land Company, Toronto, $250,000; the Canadian Fibre and Wood Manufacturing Company, Toronto, $40,000; Empire Paper Production Company, Limited, Sombra, $40,000; Fort Frances Pulp and Paper Company, Fort Frances, $50,000; Interlake Tissue Mills, Limited, Thorold, $250,000; National Bag and Paper Company, Ottawa, $250,000; Ontario Paper Company, Limited, Thorold, $1,000,000; Pulp Products Company, Campbellford, $400,000; the Quinze Development Company, Limited, Cobalt, $50,000; Standard Chemical Iron and Lumber Company of Canada, Limited, Toronto, $6,000,000; Suburban Construction Company, Limited, Toronto, $200,000.

Those located in Quebec have a capitalization of $71,390,000, and are as follows:—Bells' Galleries, Limited, Montreal, $400,000; British Canadian Paper Mills, Limited, Montreal, $500,000; Canada Paper and Pulp Company, Ha Ha Bay, $10,000,000; Constructed Works, Limited, Montreal, $500,000; Forest Reserve Pulp and Paper Company, Quebec, $1,000,000; B. Grier, Limited, Montreal, $1,000,000; the Manpuan Power and Pulp Company, Montreal, $90,000; the National Paper Company, Valleyfield, $100,000; Bayless Pulp and Paper Company, Beaupre, $2,000,000; Quebec Pulp and Paper Company, Quebec, $15,000,000; Richelieu Company, Limited,Montreal $250,000; Roberval Paper Company, Limited, Roberval, $3,000,000; South Shore Power and Paper Company, Montreal, $2,000,000; E. Villeneuve & Company, Limited, Montreal, $200,000; Canadian Pulp and Paper Company, Quebec, $15,000,000; the Wanukesha Pulp Company, Montreal, $200,000; Wayagamack Paper Company, Baptist Island, $5,000,000; Lake St. John Paper Company, Lake St. John Region, $10,000,000; McLaren Lumber Company, Limited, Buckingham, $1,250,000; St. Lawrence Pulp and Paper Company, Quebec, $4,000,000.

Other Provincial Corporations.

British Columbian companies' capital amounts to $6,550,000. They are:—Columbia Paper Company, Limited, Vancouver, $75,000; Crown Timber and Trading Company, Vancouver, $50,000; Dominion Development Syndicate, Limited, Vancouver, $500,000; Dominion Mills Company, Revelstoke, $4,750,000; Fort George Timber and Transfer Company, Vancouver, $200,000; Island Lumber Company, Limited, Vancouver, $100,000; Realty Fruit and Land Company, Limited, Vancouver, $500,000; Wolverine Lumber Company, Limited, Vancouver, $75,000; C. B. Pride, near Nelson, $300,000.

In New Brunswick the total capital of the companies is $11,010,000. Consolidated Pulp and Paper Company, Limited, Union Point, $5,000,000; Richards Manufacturing Company, Campbellton, $300,000; St. George Pulp and Paper Company, St. George, $460,000; Edmunston Pulp and Paper Company, Edmunston, $250,000; Grand Falls Company, Grand Falls, $5,000,000.

The captalization of Manitoba Companies is $51,300,000. International Contracting Company, Limited, Winnipeg, $50,000,000; Northern Coal and Coke Company, Limited, Winnipeg, $1,000,000; J. F. Wellwoods and Company, Limited, Elmwood, $300,000.

The total capitalization of all the companies being $152,280,000.

To Engage in Pulp and Paper Industry.

In addition to the foregoing, certain other concerns are projected, which have not yet perfected their organizations. The list follows:—

The Newfoundland Company, Limited, Bay Islands, Newfoundland; Bathurst Lumber Company, Bathurst, New Brunswick; the Edward Partington Pulp and Paper Company, St. John, New Brunswick; Gloucester Paper and Pulp Company, Bathurst, New Brunswick; Edward Partington Pulp and Paper Company, Fredericton, New Brunswick; Victoria Pulp Company, Victoria, New Brunswick; British Canadian Lumber Corporation, Prince Rupert, British Columbia; British Columbia Sulphite Fibre Company, Mill Creek, Howe Sound, British Columbia; Koksilah Lumber Company, Limited, Koksilah, Vancouver, British Columbia; Orient Pulp and Paper Company, Bella Coola, British Columbia; the Western Box and Shingle Mills Company, Nelson, British Columbia; Graham Paper Mill, Graham Island, British Columbia; Lake Winnipeg Pulp Company, Nelson River, British Columbia; Nelson Box and Shingle Company, Nelson, B.C.; Clyde River Paper and Pulp Comany, Limited, Clyde River, Nova Scotia; Elliott Manufacturing Company, Toronto, Ont.; the Recorder Pulp and Paper Company, Calumet, Ont.; Ritchie and Ramsey, New Toronto, Ont.; Cameron Falls Establshment, Cameron Falls, Nipigon, Ont.; Washago Pulp Company, Washago, Ont.; Welland Paper Company, Welland, Ont.; Hamilton Inlet Pulp Company, Hamilton Inlet, Labrador.

Nor must it be forgotten, states the brief, that a number of the old companies which were in operation before this reciprocity movement was started have materially increased their capacity.

Surely no unbiased person can contemplate conditions in Canada and in the United States without being obliged to admit that, as far as the paper industry is concerned, our recent legislation has been wholly in the interest of the Dominion.

Montreal paper manufacturers state that the above list of companies is incorrect and accuse the United States paper trust of "padding" it considerably.

◆

PRUDENTIAL TRUST COMPANY

Monetary Times Office,
Montreal, March 12th.

The Prudential Trust, which has now been formed about two years, has joined the ranks of the dividend payers, by the declaration of a half-yearly dividend at the rate of 5 per cent. per annum on the stock of the company. The declaration was made at the second annual meeting of the company and is for the last half of 1912, and is payable to shareholders of March 12 record.

The financial statement was considered satisfactory. At the end of the year 1912, the trust and agency funds held for investment amounted to $3,817,356. A large part of this, being $3,374,469, was loaned out on stock and bond security, while $27,600 was invested in real estate mortgages, and $29,000 in bonds and debentures, the balance of $386,286 being cash on hand and in bank.

The investment account grew to $251,311 during the year, from $162,161 at the beginning of the year, while time and call loans amounted to $555.971 as compared with $68,743 a year ago.

The following officers were appointed: Mr. B. Hal Brown, president and general manager; Mr. Farquhar Robertson, chairman; vice-presidents, Mr. Edmund Bristol, K.C., M.P., and Mr. W. G. Ross.

The directors were added to this year, the company having extended its business in such a manner as to make the extension of the board necessary. Besides the above, the following were elected to the directorate: Messrs. W. Burton Stewart, H. B. Ames, M.P., of Montreal; W. J. Green, Gilbert W. Ganong, St. Stephen, N.B.; C. A. Barnard, Hon. J. M. Wilson, Clarence, F. Smith, W. T. Rodden, W. M. Doull, W. Grant Morden, W. J. Morrice, Robert Bickerdike, R. C. Smith, K.C., Paul Galibert, J. P. Steedman, C. J Booth, F. B. Pemberton, and Colonel James Mason, Toronto.

◆

The California Insurance Company, of San Francisco, and the British Colonial Fire Insurance Company, of Montreal, have been registered in Alberta.

TO STUDY SOCIAL AND ECONOMIC PROBLEMS

New Canadian Society Formed—Aims and Constitution

In the United States organizations have, for a quarter century, played a notable part in stimulating and clarifying discussion on political, economic and social problems. They include among their members many Canadians interested in common problems. Last December advantage was taken of the fact that an unusually large number of Canadians were in attendance at the joint meetings of the Economic, Political Science, Historical and Sociological Associations held in Boston, to discuss the organization of a Canadian society, and an association was formed, termed, for brevity, the Canadian Political Science Association, though including economic and social issues in its scope; the constitution, based on existing models, was drawn up, and two officers, Professor Adam Shortt, of the Dominion civil service commission, president, and Professor O. D. Skelton, Queen's University, Kingston, Ont., secretary-treasurer, appointed to undertake the preliminary organization. It was thought desirable to postpone the permanent selection of officers until the first general meeting, to ensure the fullest possible representation of all sections and interests of Canadian life. It is planned to hold this first meeting in Ottawa, probably in September, when a varied programme of papers and round table conferences of leading Canadians will be presented.

Best Sources of Information.

Difficulty is frequently experienced, especially by those who have not access to large libraries, in finding out what are the best sources of information on current Canadian issues. One of the objects of the association will be to issue, from time to time, annotated lists of the most convenient and authoritative references on these subjects. Meantime, any member will be entitled to send in a request for such information to the secretary, who will endeavor to furnish references if they are immediately available, or to enlist the good offices of some member who has made a special study of the topic.

Association's Constitution States.

The constitution of the association states that this association is to be known as the Canadian Political Science Association and its object is the encouragement of the investigation and study of political, economic and social problems. The association as such will not assume a partisan position upon any question of practical politics nor commit its members to any position thereupon. Any person nominated by two members and accepted by the executive council may become a member of this association. There shall be an annual membership fee of two dollars. By a single payment of fifty dollars any person may become a life member, exempt from annual dues. Each member will be entitled to receive a copy of all the publications of the association issued during his or her membership.

The officers shall consist of a president, three vice-presidents and a secretary-treasurer, who shall be elected annually, and of an executive council, consisting ex-officio of the officers above mentioned and of ten elected members, whose term of office shall be two years, except that of those selected at the first election five shall serve for but one year.

◆

CANADIAN EXPORTS GROW.

As Canada and the United States are the only two countries which send any considerable quantity of flour to the United Kingdom, it is of interest to compare the relative positions which they occupied in this trade during the past five years. The progress made by Canadian flour millers, says Mr. J. M. Mussen, Canadian trade commissioner at Leeds, is particularly gratifying, as is shown by the following yearly imports of wheat, meal and flour:—

Year.	Imports from Canada. cwts.	Imports from United States. cwts.	Imports from all sources. cwts.
1908	1,529,122	9,958,839	12,969,855
1909	2,059,400	6,929,011	11,052,540
1910	2,783,701	5,123,780	9,960,491
1911	3,268.768	5,116,411	10,065,132
1912	4,003,877	4,212,604	10,189,476

◆

RICHELIEU & ONTARIO APPOINTMENTS.

In connection with Richelieu & Ontario Navigation Company's reorganization, the following appointments have now gone into effect: Mr. James Playfair, as managing director; Mr. J. I. Hobson, as comptroller and treasurer; Mr. F. Percy Smith, as secretary; Mr. H. H. Gildersleeve, manager western lines, with headquarters at Toronto; Mr. Thos. Henry, manager eastern lines, with headquarters at Montreal; Mr. Gilbert Johnston, mechanical superintendent, with headquarters at Montreal; Mr. L. A. W. Doherty, freight traffic manager, with headquarters at Toronto; Mr. H. Foster Chaffee, passenger traffic manager, with headquarters at Montreal. Mr. James Carruthers is president of the company; Mr. William Wainwright and Mr. James Playfair, vice-presidents.

LIFE UNDERWRITERS OF TORONTO.

The Life Underwriters' Association of Toronto, an organization of life insurance agents, under the chairmanship of Mr. M. D. Johnson, has resolved to try a new departure as to its monthly meetings. Instead of holding them in the evening, they are to be held at 12.30 noon. The first one was held on Thursday when a complimentary address was presented to Mr. J. F. Weston, formerly superintendent of agencies of the Manufacturers Life Insurance Company, upon his promotion to the office of manager of the Imperial Life Insurance Company. Mr. Weston's brethren have a high opinion of his good qualities and feel grateful to him on account of his activity in promoting the welfare of their association and wish him success in his new field. He will hereafter occupy a seat at the board of the Life Insurance Managers' Association.

◆

THE BRITISH AMERICA FIRE ASSURANCE COMPANY.

It was an interesting resumé and budget that Mr. Brock had to present to his fellow-shareholders at the annual meeting last week of the British America Assurance Company. A feature which would naturally seize among the first upon the sensibilities of the proprietors was remarkable earnings of $146,578 during the year, more than 43 per cent. greater than the earnings of 1911. The net fire premiums were $1,775,483, a distinct increase over the preceding twelve months, while the losses were $975,751, a trifle less than 55 per cent. of the premiums.

We are to remember that the earlier months of last year showed particularly disastrous results to fire insurance companies from a greater aggregate of fires on this continent than a like period in either of the two previous years. Therefore the more favorable result of the operations of the whole year does the greater credit to the management of this company. It is difficult indeed to perceive why the enormous aggregate of fire loss in the United States and Canada, emphasized so often by publicists and statisticians through the newspapers and other means of information, does not seem to be grasped yet by "the man in the street." Every man, woman and child in Canada paid out of pocket $3.05 for losses by fire last year, while the people of England paid out only 53 cents per head. The comparison, if not the fact, ought to startle the Canadian people to do something to lessen this dreadful prodigality. People seem determined not to understand that it is they themselves, and not the insurance companies, who pay this sum.

In his last paragraph the vice-president scored the people and the governments of Canada for their apparent tranquil acquiescence in a fire waste of twenty million dollars a year by avoidable fires in the Dominion. And he approved, as an important step, the appointment of fire marshals, clothed with power to investigate every fire. The very great effect of the work of fire marshals in reducing the fire waste of Ohio and Massachusetts during late years ought to stimulate our authorities to appoint such officers.

Another feature of interest in the company's report is the passing of a by-law authorizing the undertaking of hail insurance. The general manager's explanation of his recommending this step, so important to the protection of farmers in western Canada, is that until such time as the governments of the western provinces undertake this duty, as they seem likely to do, there is need for some one to offer such insurance, and he thinks that it will pay, besides being a step in the custom the great underwriting companies of the world are now following. That is to say, of launching into a variety of classes of insurance, so that if one branch fails to give a profit in any one year there will be other branches to fall back upon.

◆

The Mutual Life and Citizens Assurance Company, Limited, has been licensed to transact the business of life insurance throughout Canada. The chief agency of the company has been established at Montreal, and Mr. Wilfrid Bovy has been appointed chief agent.

At Stratford, Ont., the by-laws to guarantee the bonds of Farquharson-Gifford, Limited, to the extent of $20,000, provide a free site and a fixed assessment of $10,000 for ten years, and the by-law to guarantee the bonds of the B. F. Kastner Company for $10,000, provide free site and a fixed assessment of $6,000, were carried.

Alberta's financial statement for 1912, submitted by provincial treasurer Hon. Malcolm McKenzie, showed that the province has a surplus at the end of last year of $143,551, of which the telephone department contributed $77,428. The total ordinary receipts amount to $3,359,619 and telephone receipts to $680,731. The total debenture debt of the province amounts to $14,100,000, incurred in the construction of public works, including the parliament buildings and telephone construction.

The annual meeting of Steel and Radiation, Limited, was postponed from March 3rd to March 17th, on account of the rush of business during February, the amount of business of the firm for February, 1913, being almost three times that of February, 1912. The accountants and auditors did not have time to get the annual statement prepared in time for March 3rd, and the meeting had to be postponed. The indications are that 1913 will prove the biggest year experienced by Steel and Radiation, Limited.

LACK OF LIFE INSURANCE KNOWLEDGE

Disseminate Need and Value of Protection by Suitable Publicity—Agents Would be Assisted.

A person unconsciously judges a life insurance company by the character of its representatives with whom he comes in contact. One of the most difficult features of life company management is the securing of agents who will, by their character and standing, be a credit to the company employing them, and at the same time be capable of producing a good volume of new business, stated Mr. C. Elvins, advertising manager of the Imperial Life Assurance Company, in an address on Life Insurance Advertising given before the Toronto Ad. Club. Some time ago Systems magazine published the result of an investigation conducted by an authority on such matters in which it was stated that every time an institution changed an employee it incurred an average loss of $200, and if this is true in any sphere of business activity, life insurance agencies are no exception. Changes in every life company's agency staff are very frequent and in some cases very costly. It is not improbable that a well handled newspaper campaign would attract the better class of agents to the company conducting it, and thus make its field force more permanent and more efficient.

Under present conditions a large amount of money is expended in developing new territory, because, until a considerable volume of business has been placed on the books in a new agency, it is impossible for an agent to make sufficient money under the scale of commissions provided for. It is, therefore, necessary for the companies to assist agents in such cases until their agencies have been built up to a paying basis. Sometimes a number of men try and fail before a successful one is found, and a considerable portion of the money advanced to the unsuccessful men is lost. Good general publicity might make the business so much easier to secure that the amount of money required for organizing new territory would be very much reduced.

Conservation of Business.

If either or both of these two benefits would result from advertising more broadly, the money spent for white space would probably be saved in agency expenses, and when the cumulative effect of good advertising is considered it is quite apparent which would be the better way to spend the money.

Another perplexing problem of the life companies is the conservation of their business. The loss of business from lapses and surrenders greatly impedes the rapidity with which the different companies would otherwise be able to increase the volume of new business which they could afford to write each succeeding year. For, to replace a terminated policy with a new one involves a heavy first year commission expense instead of the very small expenditure which the collection of the renewal premium under the terminated policy would call for and does not improve the company's position, either in the amount of its premium income or amount of assurance in force. Moreover, those who lapse their policies generally become negative media of advertising for they are disgruntled because of the loss they have sustained in dropping their insurance. But if a company was conducting a real up-to-date advertising campaign in the daily newspapers it is very probable that its policyholders would read its advertisements on account of their interest in the institution. Granting that the copy used was right, it is quite evident that the reading of the advertisements would add greatly to the persistence of the business by keeping alive in the minds of the policyholders the sentiments which induced them to insure in the first place. In other words, once a policy had been sold by such a company it would stay sold.

To Educate the Public.

With very few exceptions, under present conditions, all one ever hears from the company with which he is insured is to get once a year an annual statement which is neither illuminating nor interesting to many, or a request for more money in the form of a premium notice.

It must be admitted that the general public is woefully deficient in life insurance knowledge, and advertising which would disseminate broadly the value of and need for life insurance would, no doubt, make it possible for the advertising company to secure more business. Perhaps it would also enable the company to secure its business at a lower cost, or make the business more persistent. Unless it brought about one or both of these it would avail nothing, for in the case of most companies they could not otherwise afford to write more business than they are doing. I have no idea what effect an aggressive advertising campaign would have on the persistency of business, but I do know that one of the large American companies which has for some years been advertising extensively in the magazines, pays its agents right here in Canada a scale of commissions very much lower than the home companies find it necessary to pay. If this company's agents did not secure a sufficiently increased volume of business to overcome the difference in rate of commission paid, they would certainly join forces with some other company very quickly.

The number of directors of the Chippewa Oil and Gas Company, Limited, has been increased from five to seven.

WHEAT PORTS OF WESTERN CANADA

Vancouver's Increased Shipping—Expansion Shown in British Columbia's Main Industries.

(Staff correspondence).

Vancouver, March 10th.

Each week brings indications of the development that will take place on the Canadian Pacific coast within the next few years. Increased shipping is shown by the loading here of a ship for Japan, to carry six thousand tons of wheat, and the beginning of the service to British Columbia ports of the Harrison line, the first steamer of which will reach the coast to-day.

That the shipment of wheat from Pacific ports will grow greater is shown by the statement of Mr. N. Shiota, a Japanese merchant of Seattle, who was here this week. He pointed out that Japan will take anywhere from 50,000 to 100,000 tons of wheat per season, and following the loading of the boat now in port, another will come here for grain cargo. It shows that once the product is available it can soon be marketed. With the Grand Trunk Pacific through to Prince Rupert, it is probable that grain will go through the northern port, as well as through the southern. Once grain shipping facilities are installed in the coast cities, steamers will be encouraged to come here to load.

That the shipping of western Canada is expanding is further shown by the announcement of bigger steamers for the Australian run. For the last few years traffic has been unusual. Outbound from Canada, the boats carried more freight than passengers, while coming this way, the list of passengers has always been to capacity, with room for more freight, with the exception of cold storage. The visit of Hon. George E. Foster to Australia will probably result in a greater volume of trade both ways.

Contractors to Clear Channel.

The service instituted by the Harrison line will be semi-monthly. The boats will be large freight carriers, specially designed for the trade. When the shorter route is available through the canal, the big freighters that come to this coast will be better able to cope with the trade between the Pacific coast and the Atlantic and European ports.

The contract has been let for the dredging of False Creek. The work is to be carried on by the Pacific Dredging Company, of Vancouver, and is to be completed within two years.

A channel 350 feet wide with a minimum depth of twenty feet is to be cleared, the cost to be $700,000. It is understood this channel will extend about a mile, from the mouth of the creek to the Main street bridge. This will bring right up to the western edge of the improved portion contemplated under the Canadian Northern Railway agreement.

Mining on Large Scale.

Definite announcement is made of big mining works at the Britannia, which has operated on a large scale of late. This will give an important mining industry at the south of the British Columbia, as well as one on the north, at Hidden Bay, where the Granby company is carrying out its large scheme.

Expansion along these lines will mean prosperity, not for any one of two cities, but for the western part of Canada, which must benefit by the increased trade.

At the Britannia mine, situated at the head of Howe Sound, it is proposed to have two thousand men at work on the property inside of two years. The output of the mine will be quadrupled, and a smelter will be built, so that it will not be necessary to ship ore to Tacoma, as at present, where it is treated. The Britannia company is to install the new oil method of treating its ores, being the fourth in the world to adopt the process.

Not only on the coast, but in the interior also, is increased development in mining being carried out. Last week's ore production in the Kootenay and Boundary districts was considerably over the average of 1912, with a prospect of heavy output being maintained.

The report of the Hedley Gold Mining Company will attract attention to British Columbia. This concern, which has always paid a good dividend, had net profits last year of $385,000, or thirty per cent. of its issued capitalization. Ore of a higher grade was treated during the year. It is expected this year to increase the ore reserves. Gold amounted to ninety-five per cent. of the ore values.

Development along these lines will bring greater prosperity. There is nothing of the nature of a boom about it, but steady work, which means much to the country. With the government of the province giving every encouragement to the lumber industry, the prospect is bright for the main industries of British Columbia.

◆

At a meeting of the council of Calgary board of trade indications were received from retail merchants in the Calgary district of the passage of the bulk sales act now before the provincial legislature. A petition supporting the measure was returned to the council with nearly five hundred signatures, this endorsement coming from merchants in the immediate vicinity of Calgary. Edmonton and Lethbridge will probably also give similar support.

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

Victoria, B.C.—March 4.—Pier Island hotel. Loss $20,000. Cause unknown.

Vancouver, B.C.—March 2.—818 Keefer Street. Loss slight. Cause, upset lamp.

Centreton, Ont.—March 7.—Post-office and general store. Loss and cause unknown.

North Bay, Ont.—March 10.—Y.M.C.A. building. Loss slight. Cause, incendiary.

Cornwall, Ont.—March 7.—Mr. F. Bennett's bakery, York Street. Loss and cause unknown.

Brandon, Man.—February 28.—Messrs. G. White and Sons. Loss $20,000. Cause unknown.

St. John, N.B.—March 5.—Mr. J. Moynes' cornmeal plant. Loss $5,000. Insured. Cause unknown.

Medicine Hat, Alta.—March 1.—Ogilvie Milling Company's plant. Loss slight. Cause unknown.

Valcartier, Que.—February 26.—Mr. D. Falardeau's residence. Loss and cause unknown. One death.

Hull, Ont.—March 8.—Mr. M. Gagnon's shed, Church and Duke Streets. Loss $2,500. Cause unknown.

St. Thomas, Ont.—March 6.—Mr. Stephen's bakery, Manitoba Street. Loss $2,000. Insured. Cause unknown.

Toronto, Ont.—March 10.—Dominion Cloak Company, Bathurst and Wellington Streets. Loss $50. Cause unknown.

Huntingdon, Que.—March 7.—Mr. Robidoux's residence. Loss unknown. Cause, probably overheated stove. Four deaths.

Peterboro, Ont.—March 2.—Mr. D. Evans. Loss, building, $400; contents, $300. Insurance, $1,000. Cause, overheated stove.

St. Catharines, Ont.—March 9.—McKinnon, Dash and Metal Company's premises. Loss $7,344. Fully insured. Cause unknown.

Galt, Ont.—March 6.—Schlarbaum's block. Mr. B. Cullens. Loss $3,000. Mr. J. E. McBride's loss unknown. Cause, probably stove.

Yarmouth, N.S.—March 7.—Mr. L. Halfield's residence, Lewis Avenue. Loss $1,000. Insurance, building, $1,000; contents, $800. Cause, furnace.

Woodstock, Ont.—March 8.—Mr. A. L. Beauregard's residence, 482 Peel Street. Loss, building, $75; contents, $83. Insured. Cause, ashes from forge.

Vulcan, Alta.—February 26.—The Vulcan meat market, Hub pool hall, dance hall, photograph gallery, law office, real estate office and barber-shop. Loss $20,000. Cause unknown.

Flesherton, Ont.—March 6.—Bond Head Methodist Church.. Loss $6,000. Insurance $2,500. Cause unknown.

March 7.—Mr. Trimble's residence. Loss and cause unknown.

Battleford, Sask.—March 3.—Wilson's jewelry store, Mills and McTavish's office, Norris and Ashton's real estate office, Guthrie and Risdale's shoe store, Willoughby's tailor shop. Loss unknown. Cause, stove.

Winnipeg, Man.—March 5.—Street car. Loss unknown Cause, wires fused.

March 8.—Wilson Company's factory, 61-63 Gertie Street. Loss $2,000. Cause unknown.

New Westminster, B.C.—February 24.—Mr. Preston's residence, 1519 8th Avenue. Chimney fire.

February 27.—Mr. J. Anderson's stable, Queen's Avenue and 2nd Street. Loss and cause unknown.

Sunderland, Ont.—March 7.—The brick block owned by T. Pangman, and occupied by Aziz Brothers, general merchants, and W. Miller, grocer, was entirely destroyed. Loss $25,000. Some insurance. Cause unknown.

New Liskeard, Ont.—March 7.—Fitzpatrick and Mulligan Blocks. Loss $15,000. Insurance, $6,200, as follows: Gordon-Davies Company, $1,700; J. F. Fitzpatrick, $1,000; Perry and Williamson, $1,000; J. F. Mulligan, $2,500. Cause, probably overheated oven.

Ottawa, Ont.—March 7.—Mrs. M. Nepean's cottage. Loss unknown. Cause, stove. One death.

March 9.—McAuliffe-Davis Lumber Company, Limited, woodworking plant. Loss, McAuliffe-Davis Company, $60,000; Grand Trunk Railway, $10,000. Insured. Cause unknown.

Charlottetown, P.E.I.—March 9.—St. Dunstan's Roman Catholic Cathedral. Loss $300,000. There was a total insurance of $100,000. Of this amount the Royal had $17,400; Queens, $14,000; Western Union, $5,000; Yorkshire, $5,000; Fidelity Phoenix, $5,600; Commercial Union, $5,000. Cause, electric light.

Edson, Alta.—March 8.—Business block, including Wener and Goldstick, clothiers; N. Laycock, real estate; Cohn, cleaning establishment; Hicks, butcher; Davis and Lefevre, men's furnishings, groceries; Joel and Holstein, grocers; Frank Fuller, real estate; and Fitzsimmons and Lawrence, real estate. Loss $150,000. Cause unknown.

Montreal, Que.—March 5.—155-7 Coursol Street. Loss $2,000. Cause, overheated stove.

March 6.—Tenement block on Bourgois Street, Point St. Charles. Loss and cause unknown. Canadian Paper Waste Company. Loss $2,000. Cause unknown.

March 8.—Mr. Shaw's residence, Springfield Avenue, Greenfield Park. Loss and cause unknown. Store, 37 Notre Dame Street. Loss, $3,500. Insured. Cause, defective furnace adjustment.

March 9.—Mr. A. Gillet's butcher shop, 246 Dufresne Street. Loss $2,500, partially insured. Cause, overheated stove.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED

Belleville, Ont.—Messrs. Tickell & Sons' furniture factory. Loss on stock $400. Insurance, Dominion, $600; Hudson Bay, $600; Perth Mutual, $600. Cause unknown.

March 3.—Brick tenement owned by Mr. W. Donoghue. Loss $500. Insured with Dominion Insurance Company.

The following fires were adjusted by H. T. Hughes, Toronto.

Camden Township, Ont.—Mr. C. Wilcox's residence, Thamesville farm. Total loss. Insurance $450, Anglo-American.

Toronto, Ont.—Mrs. Catharine Jones, 601 Euclid Avenue. Loss $20. Insurance Royal, $1,800; loss $12. Merchants, $1,200; loss $8.

Sandwich, Ont.—Messrs. Page and Rouchelieu, Bedford Street, Sandwich. Insurance, Ontario Fire Company $450. Loss, $81 stock; $143 furniture and fixtures.

The following fire losses were adjusted by J. S. Rankin, Vancouver:—

Lynn Valley, B.C.—February 6.—Mr. William Jermyn's dwelling. Loss, building, $1,950; contents, $700. Cause, overheated stove. Insurance, $1,500, Commercial Union.

Comaplix, B.C.—February 1.—Mrs. Elmire Allard's residence. Mrs. McKay. Loss, building, $700. Cause, overheated stove pipe. Insurance $500, Liverpool, London and Globe.

Vancouver, B.C.—February 10.—Mr. John E. Braithwaite's, Chinese laundry. Loss, building, $200. Cause, defective chimney. Insurance on building, California Insurance Company, $1,500; Royal, $700.

Camborne, B.C.—February 4.—Messrs. Lindsay, Ware & Company, Limited. Stage stable. Loss, building, $900; contents, $298. Insurance, building, $600; contents, $200, Liverpool, London and Globe. Cause, men smoking in building.

North Vancouver, B.C.—February 6.—Mr. J. W. Horne, premises occupied by North Vancouver Home Furnishers as furniture store. Loss, building, $980; contents, $10,700; fixtures, $700. Cause, electric wiring. Insurance, building, London Mutual, $2,000; St. Paul Fire and Marine, $1,000; Alliance of Pennsylvania, $1,000; German American, $1,000; Royal, $1,000; Dominion, $1,000; Underwriters' Policy, $1,000; Occidental, $1,000; Union Insurance Society, $1,000; Liverpool and London and Globe, $1,000; Colonial Fire Underwriters, $1,000; Commercial Union, $1,000; Atlas, $1,500; Agricultural, $1,500; Providence, Washington, $2,000; Sovereign, $2,000; London and Lancashire, $2,000; total, $20,000.

Victoria, B.C.—February 7.—Holland and McPhillips' premises, occupied by Fred. Quinker, tailor shop, (also other stores and rooms). Loss, building, $800; contents, $2,980; fixtures, $118. Cause unknown. Insurance, contents, $3,200, Liverpool-Manitoba; fixtures, $300, Liverpool-Manitoba; building, $20,000, Phoenix of London.

Mr. John Considine's theatre, valued at $17,500; contents, $3,200. Loss, building, $2,360; contents, $1,563. Cause, defective chimney. Insurance, building, Queen Insurance Company, $3,000; Michigan Commercial, $3,000; Phoenix of Hartford, $3,000; National of Hartford, $2,000; St. Paul Fire and Marine, $2,500; Norwich Union, $2,500; total, $16,000; contents, National of Hartford, $2,000.

Messrs. Holland and McPhillips' premises, occupied by John Cochrane, druggist. Loss, building, $800; contents, $375; fixtures, $41. Cause of fire unknown. Insurance, building, $20,000, Phoenix of London; contents, $5,500, Phoenix of London; $500, Norwich Union; fixtures, $500, Phoenix of London; $1,000, Western.

Holland and McPhillips' premises, occupied by J. Postgage Fowler, ladies and children's ware. Loss, contents, $937; fixtures, $110. Cause of fire, water damage. Insurance, contents, $4,000, Northwestern Mutual; $1,500, Phoenix of London; fixtures, $500, Phoenix of London.

WORKMEN'S COMPENSATION HERE AND THERE

Tax on Yearly Wage Roll Suggested—New Jersey Law as Basis for Legislation—Manufacturers' Associations Make Proposals

"A state insurance scheme with a tax on the yearly wage roll, provided it could be carried out," is what Sir William Meredith favors as the most satisfactory plan for Ontario to adopt in reference to its workmen's compensation proposals. At present, this subject is also occupying the attention of several States in the neighboring republic.

What Various States are Doing.

Steps have been taken by the states named as follows:—

California—Constitutional amendment permitting compulsory compensation adopted December 1911. Industrial accident board now making studies, through its actuary, with a view toward a more general adoption of the compensation plan.

Colorado—A commission is in session, but has not yet indicated what its recommendations will be.

Connecticut—Commission in session; may advocate law similar to those of New Jersey and Massachusetts.

Delaware—Commission in session. No definite recommendations reported.

Indiana—Manufacturers' association favoring state fund to be sustained by contributions from both employers and employees.

Iowa—Commission recently submitted two reports. The majority report recommended a state mutual insurance company with a virtual monopoly. The Iowa Manufacturers' Association is said to favor compensation to which both employers and employees contribute, conducted by the state mutual.

State Insurance Not Very Popular.

Louisiana Commission authorized by legislature at last session but not yet appointed.

Massachusetts—The efforts of the past two years to give the Massachusetts Employees Insurance Association a monopoly will be renewed this winter.

Missouri—Commission in session. A committee has been instructed to draw a bill similar to the New Jersey law. Some members of the commission, however, are said to favor a compulsory measure, with the option to employers of self-insurance, mutual insurance, stock insurance or state insurance.

Nebraska—The industrial accident commission is reported divided between a bill similar to the Wisconsn law and state insurance, the majority inclining to the former.

New York—At a recent meeting of the National Civic Federation in New York City, representatives of the American Federation of Labor, stated that the Bayne-Sullivan bill providing for state insurance would be pressed for passage again this winter.

Manufacturers Recommendation Rejected.

Ohio—Constitutional amendment authorizing the legislature to pass a compulsory compensation measure, with insurance through a state fund, adopted.

Oregon—Commission in session; no definite recommendations as yet reported.

Pennsylvania—The industrial accidents commission has rejected a state insurance recommendation of the Pennsylvania Manufacturers' Association, but it is reported that the manufacturers will nevertheless present the measure to the legislature.

West Virginia—Commission in session; no recommendations have been made public.

Wisconsin—The industrial accident board is pronouncedly inimical to stock casualty companies, and legislative action is expected this winter.

MORTGAGE COMPANIES' ASSOCIATION

The Land Mortgage Companies' Association of Ontario, which is composed of Ontario loan companies, having assets aggregating upwards of $110,000,000, held its annual meeting at Toronto. Representatives were present from London, Stratford, Port Hope, Hamilton, St. Thomas, Brantford, Guelph, St. Catharines, Woodstock, Lindsay, as well as representatives of the several Toronto companies.

The officers and executive committee were all unanimously re-elected as follows:—President, Mr. R. S. Hudson, Toronto; first vice-president, Mr C. W. Cartwright, Hamilton; second vice-president, Mr. Edward Saunders, Toronto; secretary-treasurer, Mr. George H. Smith, Toronto; Messrs. W. B. Wadsworth, Walter Gillespie, G. A. Morrow, Toronto; C. Ferrie, Hamilton; William Buckingham, Stratford; J. H. Helm, Port Hope; J. W. Stewart, St. Thomas; A. M. Smart and Hume Cronyn, London.

MONEY MARKETS

Messrs. Glazebrook and Cronyn, Toronto, exchange and bond brokers, report exchange rates as follows:—

	Between Banks.

DOMINION'S SUPPLEMENTARY ESTIMATES

Supplementary estimates totalling $5,392,507.42 have been brought down by the finance minister, Hon. W. T. White. The amount is made up of $5,205,491.19 chargeable to Consolidated Fund, $91,726.46 chargeable to capital, and $95,280.77 to cover unprovided items for 1911-12 in various branches of the service. These estimates are for the fiscal year just closing, and they bring the total for 1912-13 up to $174,618,874.90.

The main estimates to be voted for 1913-14 total $179,152,183.28. The supplementary estimates brought down bring the total to be voted so far this session up to $184,544,690.70, all, or nearly all, of which is being held up by the Liberal blockade of the Naval Bill. The supplementaries include an additional $10,000 for the archives, $40,000 "for the development of the dairying and fruit industries and the improvement in transportation, sale and trade in food and other agricultural products," $65,000 for experimental farms an additional $75,000 for the health of animals branch, $200,000 for immigration, $25,000 for seed grain for settlers on unpatented lands in the Western provinces, $200,000 for the permanent force, $35,000 for the purchase of Toronto property to be used for divisional offices, $35,000 for the ice-breaking work done at the head of the lakes to facilitate the grain movement, $500 grant to Mrs. E. A. Sjosledt, whose husband went to Norway and Sweden to investigate electric smelting processes for the Mines Department, and was lost in the Titanic disaster, $30,000 to assist in moving the houses of the residents of Frank, Alta., $10,000 for the Chicoutimi fire sufferers, $30,000 for the Regina cyclone sufferers, $285,000 for the salaries and expenses, etc., in the Customs service, $2,265,000 for the Government railways.

WITH CAPITAL EXCEEDING FORTY MILLIONS

One Hundred and Forty-six Companies Were Incorporated in the Dominion.

The headquarters of companies incorporated this week are situated in eight provinces, Nova Scotia not contributing to the list. Prince Edward Island's four new companies are for fox farming while three of New Brunswick's are for the same purpose.

The total number of companies is one hundred and forty-six, the total capitalization being $42,708,800, the largest aggregation being the International Light and Power Company, Toronto, with a capital of $20,000,000.

Other large companies are:—

Company.	Capital.
Dominion Steel Foundry Company, Hamilton	$2,000,000
Lion Porcupine Gold Mines Company, Montreal	1,500,000
St. Matthew's Heights Realty, Quebec City	1,000,000
Kirkland Lake Gold Mines, Haileybury	1,000,000
International Hematite Company, Fort Frances	1,000,000
H. E. Ledoux Company, Winnipeg	1,000,000
Canada West Mortgage Company, Winnipeg	1,000,000

Grouping the new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	No. of Companies.	Capitalization.
Ontario	34	$27,397,000
Quebec	30	4,733,000
Alberta	29	3,720,000
Manitoba	27	4,689,500
Saskatchewan	15	1,412,500
New Brunswick	6	197,800
Prince Edward Island	4	459,000
British Columbia	1	100,000
Total	146	$42,708,800

The following is a list of charters granted during the past week in Canada. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Young, Sask.—Gaines Hotel, $75,000.

Noble, Alta.—Noble Foundation, $200,000.

Gorlitz, Sask.—C. Wiwchar Company, $2,500.

Bassano, Alta.—Bassano Curling Rinks, $10,000.

Gleichen, Alta.—Gleichen Rink Company, $10,000.

Redcliff, Alta.—Redcliff Investment Company, $75,000.

Prince Albert, Sask.—Herald Building Company, $70,000.

Wainwright, Alta.—Imperial Lumber Company, $500,000.

Victoria, B.C.—Royal Bay Springs, $100,000 (mineral water).

Grenfell, Sask.—Grenfell Farmers' Elevator Company, $10,000.

Kenogami, Que.—Angers, $20,000. P. Angers, A. Lapointe, N. Allard, Jonquieres.

Windsor, Ont.—Healy-Page-Chappus, $100,000. A. F. Healy, L. Page, Mrs. A. G. Healy.

Huntsville, Ont.—Hern Hardware, $22,000. W. Turnbull, R. B. Hern, Mrs. E. M. Turnbull.

Ottawa, Ont.—Hotel Cecil, Ottawa, $500,000. W. T. Wallace, E. S. Houston, G. F. Strachan.

Valleyfield, Que.—Valleyfield Glove Company, $19,000. N. A. Ostigny, J. A. Robb, S. W. Laroche.

Canada West Mortgage Company, $1,000,000. W. R. Paterson, W. L. Roblin, S. J. Smith.

Petrolia Investors, $300,000. G. H. Balls, F. W. Sparling, Miss J. E. Dodsworth.

◆

FEBRUARY FIRE LOSSES.

The losses by fire in the United States and Canada during the month of February, as compiled from the carefully kept records of the New York Journal of Commerce, aggregate $22,084,600, as compared with $28,601,650 last year and $16,415,000 in February, 1911. The following table gives a comparison of the fire losses for the first two months of 1913, with the same months of 1912 and 1911, together with the losses by months for the balance of those years:—

	1911.	1912.	1913.
January	$21,922,450	$35,653,150	$20,193,250
February	16,415,000	28,601,650	22,048,600
Total, 2 months.	$38,337,450	$64,254,800	$42,277,850

Canada's February fire losses, according to The Monetary Times' returns, amounted to $2,037,386; the total for the year being $6,051,771.

◆

WEST INDIA ELECTRIC COMPANY

Monetary Times Office,
Montreal, March 13th.

At the annual meeting of the shareholders of the West India Electric Company, the results of the year were considered satisfactory, in view of the conditions alluded to by the directorate, these being drought in the early part of the season and hurricanes in the latter, and the troubles which took place in the city of Kingston itself.

The only department to show an increase during the year was the power department, the earnings from this increasing some $2,344. On the whole the earnings decreased, while the expenses increased, as the following summary will show:

			Inc. or Dec.
Gross earnings		$261,088.66	— $2,027.76
Expenses		136,439.48	+ 3,188.22
		$124,649.18	— $5,215.07
Fixed charges		49,692.47	— 158.97
Net income		$ 74,956.71	— $5,057.00
Sundry write off	$ 5,281.04		
Contingent	19,587.53	24,868.57	
Available for dividends		$50,088.14	
Div. on $800,000 com. stock at 5% per annum		40,000.00	
Year's surplus over all		$ 10,088.14	
Bal. from 1911		345,533.33	
Total P. and L. surplus		$355,621.47	

It will be seen that although the year did not result as favorably as the previous year, there was sufficient to meet the dividends, after all other expenses and appropriations were met. In fact, the amount available for dividends was equal to 6¼ per cent. on the total capital of the company, whereas the amount paid was but 5 per cent. The balance was carried to surplus, which account is being gradually added to from year to year, and now amounts to the very satisfactory sum of $355,621, being nearly 50 per cent. of the amount of the capital.

◆

A branch of the Bank of British North America has been opened at Regina, Sask., under the management of Mr. G. A. C. Weir.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Nipissing Consolidated Mines.—At the meeting of the directors of the Nipissing Consolidated Mines held in New York recently, the regular quarterly dividend of 5 per cent. and bonus of 2¼ per cent. was declared, payable on April the 20th.

Montreal Tramways Company.—At a special meeting of shareholders of the Montreal Tramways Company which endorsed the by-law providing that the unissued capital stock of the company amounting to $4,250,000, may be issued, alotted, sold and disposed of by the directors from time to time in such amounts and on such terms as the directors may deem wise in the interests of the company, with certain provisions. Mr. E. A. Robert said that the company would be spending between $2,000,000 and $4,000,000 during the next twelve months upon extensions and improvements, and that the money needed for such expenses would be provided for by new issues of common stock.

Illinois Traction Company.—The Illinois Traction Company's gross earnings were as follows:—Interurban lines, $228,703.53; electric lighting, $176,708.06; steam heating, $33,354.49; city lines, $173,332.43; gas, $40,304.51; miscellaneous, $1,387.15; total city properties, $425,086.64. The total gross earnings being $653,790.17 showing 6.30 per cent. of increase over previous year. The total expenses and taxes, $375,472.88; net over expenses and taxes, all companies, $278,317.29. Showing 6.36 per cent. of increase over previous year. General expense Illinois Traction Company, $5,982.25. The net earnings being, $272,335.04.

La Rose Consolidated Mines.—The February statement of La Rose Consolidated Mines shows a total production of 230,102 ounces of a value of $136,182. Sundry income for the month amounted to $2,330, giving a total of $138,512. With deduction of $57,409 for marketing and concentration and other expenses this left a balance of $81,103 for the month. The financial position of the company at the end of the month is indicated as follows:—

Cash on hand	$1,425,836
Outstanding shipments	184,032
Ore ready for shipment	78,017
Total	$1,687,885

Montreal Warehousing Company.—Mr. J. E. Dalrymple, vice-president of the Grand Trunk Railway, was elected a director of the Montreal Warehousing Company at the adjourned annual meeting of the company held at Montreal. Mr. Dalrymple is the only new figure on the board, all the other directors being re-elected. At a subsequent meeting of the board Mr. E. J. Chamberlin, president of the Grand Trunk, was elected president, and Mr. Howard Kelley, vice-president of the Grand Trunk, was elected vice-president. Mr. George H. Hanna was re-appointed manager and secretary. The directors are composed as follows: E. J. Chamberlin, H. G. Kelley, Wm. Wainwright, M. M. Reynolds, and J. E. Dalrymple.

Consolidated Mining and Smelting Company.—The Consolidated Mining and Smelting Company of Canada, Limited, ore receipts at the Trail smelter for the week ending February 28th, and from July 1st to date, in tons:—

Company's Mines—	Week ended February 28.	July 1 to date.
Centre Star	3,768	107,050
Le Roi	1,069	30,880
Sullivan	782	21,040
No. 7	28	415
St Eugene	130	1,063
Richmond-Eureka	...	844
Molly Gibson	...	1,277
No. 1	...	153
Other mines	2,080	54,525
Total	7,857	217,247

Asbestos Corporation of Canada.—According to the first report of the Asbestos Corporation of Canada, which took over the properties of the Amalgamated Asbestos Corporation on reorganization last June, covering seven months ended December 31st, net profit from operation for that period of $150,[illegible]04 was shown. Bond interest amounted to $82,222, so that a surplus of $6[illegible] was carried into 1913.

Current assets are $1,024,222, which includes asbestos materials and supplies and merchandise, $404,206; accounts and bills receivable, $129,536, and cash, $490,479. Current liabilities are $101,800.

President W. G. Ross in his report to shareholders says that through curtailment of production the large stocks of asbestos accumulated by the old organization have been considerably reduced, as a result of which prices are improving.

At present the company is working three of its plants—the King's and Beaver properties at Thetford Mines, and the British Canadian property at Black Lake. The management is considering the installation of new machinery, which they believe will reduce the cost of production. The Dominion plant at Black Lake is not in operation.

Hedley Gold Mining Company.—The annual report of the Hedley Gold Mining Company, operating the Hedley gold mines in British Columbia, for the fiscal year ended October 31st, 1912, has just been issued, and the statement shows net profits were $385,880, of which $360,000, amounting to 30 per cent. of issued capitalization, was disbursed in dividends, leaving a surplus of $25,880 for the 12 months, and making the total reserve fund on January 1st, $226,841.

The balance sheet of January 1st, 1913, shows the following assets: Mines, mine buildings, machinery, reduction plant, etc., original investment, $920,000; net expenditure for additions to plant, $127,294; net expenditures for new mining claims, $140,913; cash, $233,634; total, $1,426,841. Liabilities: Capital stock, $1,200,000; undivided profits January 1st, 1913, $226,841; total, $1,426,841.

In his annual report Mr Gomer P. Jones, general manager of the company, says: "During the year our mill treated 70,455 tons of ore, of an average value of $11.19, a total of $788,715, of which $748,123 was gold, representing an extraction of 95 per cent.

Sawyer Massey Company.—The annual statement of the Sawyer Massey Company, Limited, shows a small increase in net profits in 1912, but against this is a new charge created by a bond issue of $750,000 in the second quarter of the year.

The increase in net profits was $13,355. The bond interest and the expenses in connection with the issue entailed charges amounting to $33,850. The balance available for common stock, after meeting the regular preferred dividend, was accordingly $20,495 less than in 1911. Against earnings of 8.3 per cent. shown on the common stock in 1911, the percentage was 6.9 per cent. in 1912.

With the balance of $104,011 carried forward from the 1912 operations, the company had on December 31st last a balance at credit of profit and loss of $360,738, or equal to about 24 per cent. on the common stock.

The principal items in the profit and loss statements of the last two years compare as follows:—

	1912.	1911.
Net profit	$242,861	$229,506
Bond interest	30,000	...
	$212,861	$229,506
Bond expenses	3,850	....
	$209,011	$229,506
Preferred dividend	105,000	105,000
	$104,011	$124,506
Previous balance	256,727	132,221
Total surplus	$360,738	$256,727

Capital liabilities this year include $750,000, which were issues during the year. Accounts receivable amount to $550,000 more than a year ago, the inventory to $200,000 more, and the real estate, etc., shows an increase of about $200,000. On the other hand bills payable show an increase of $80,000, but there are no accrued wages, whereas a year ago this account amounted to $7,000. The statement of assets and liabilities also shows an account having apparently been set up during the year for reserves for depreciation amounting to nearly $65,000.

The number of directors of Brandon's Pressed Brick and Tile Company, of Milton, has been increased from three to seven.

BRITISH COLUMBIA'S FRUIT

Considerations Affecting Marketing and Prices Growers' Association's Remarks

The generally low prices received for fruit during the ast season have made pertinent and proper a discussion of he fundamental considerations affecting the future of our ruit-growing industry. Many different opinions are held as o the remedy for a situation which, if continued, would be inolerable.

The principal factors which seem to underlie the present ituation are given in the following statement issued by the resident and secretary of the British Columbia Fruit Growrs' Association.

The principal condition affecting the prices of British olumbia fruit was the very large crop in the United States, esulting in the importation of large quantities of American ruit at low prices, or, what is worse, shipped on consignment. ll soft fruits yielded very much above the average. The igures are not yet to hand, save that we know that some 40,oo carloads of peaches were shipped commercially this year n the United States. The United States apple crop was 34.3 er cent. larger than the average of the last ten years. It as 12 per cent. larger than the 1911 crop. It totalled around 0,000,000 barrels. The quality was generally high, 15 per ent. better than the ten years' average. In the northwest tates, the box-apple states, about 20,000 carloads are being hipped, as against only 9,000 last year.

xtremely Large Crops.

As a result of the extremely large crops, prices would aturally be low, supply greatly the exceeding demand, 25 er cent. of the Ontario apple crops is said to have rotted on e ground. There has been a similar condition in New York tate. The western states, however, will get something for ractically all their apples. British Columbia did comparavely well in the matter of prices, for our fruit brought more an in any other section of America.

Other general conditions which helped to lower the prices ere :—

1—Tightness of the money market of the United States nd generally throughout the world.

2—The largest proportion of boxed apples to barrels ever xperienced.

3—Defective methods of picking and packing, which inred fruit and lessened its keeping quality.

4—Lack of storage facilities.

5—The fruit growers require their money in the fall, and ank loans are not made on unsold apples; apples must, therere, be sold in the fall.

6—Fruit distributing organization, both in British olumbia and in the northwest states, in the latter particurly, should be made much stronger.

oxed Apple Business.

7—The boxed apple business is a new one, and little is nown about effective means of distributing it to the best dvantage.

8—Practically no advertising is done to increase the deand for the western boxed apple, while $200,000,000 a year spent in advertising California oranges.

9—The very large apple-handling concerns in England d in New York are working to depress prices on boxed apes.

10—British Columbia is fighting for her natural markets, hich we are just beginning to adequately supply, and in hich our competitors are at present strongly entrenched.

11—Because of a curious condition with regard to the uit marks act and its enforcement, British Columbia grows are discriminated against in favor of their foreign comtitors.

12—Canning, preserving, and otherwise preparing fruits d vegetables, are as yet developed to a very limited extent this province. In California $28,000,000 worth of fruit by-roducts are produced annually.

ondition Only Temporary.

The present condition is only temporary. The fruit and roduce business is always cyclical, and subject to periods of epression, followed by like periods of high prices and great rosperity. The more we can eliminate extremes, the less retion there is. British Columbia growers are of a particularly vored position. The population of the prairies, their own rticular market, is growing larger every year, and at a enomenal rate of increase. The whole country now is beg covered by a network of railroads, which will tend to give etter transportation and better service. The experience hich we have had, and which has, perhaps, been dearly ught, will enable us to get better distribution, will better nditions; more advertising; advertising which every successl box of apples brings, through the satisfaction given to the customer, and the careful education of the general public on the subject of fruit. It is a fact often overlooked that the majority of fruit growers are getting returns from young orchards, and just now it is not so much the number of boxes to a tree, as the number of trees to a box, which obviously enhances the cost of production.

Problem Can be Solved.

These same trees are growing up, and it will not be long before we are getting far bigger tonnage per acre, at a same or lower general cost of general production. Freight rates are lower than they formerly were; transportation conditions, although not yet ideal, are better; and it must not be forgotten that fruit prices for box fruit have steadily risen. Orchard returns and shipping returns must be taken over a period of years to enable one to arrive at an average price. Though prices may fluctuate, there is no reason why we may not look to an average of a dollar a box. Twelve years ago, the prices of box fruit were considerably lower than they are now.

There are many problems to solve in the marketing of our increasing crops; but they can all be overcome by our own efforts, ability and energy.

◆

YORK FIRE INSURANCE COMPANY

York Fire Insurance Company's annual statement discloses a successful year's operations, there being carried forward to the surplus account the satisfactory sum of $11,723. The total revenue amounted to $159,098, made up as follows:—Cash premiums, $133,623.25; mutual premiums, $21,514.59; extra premiums, $199.26; interest, $3,220.29; bills receivable $541.08.

Fire losses sustained by the company totalled $72,287, which is less than those of the previous year by $38,258. Net assets are valued at $253,112, after deducting the following liabilities:—December accounts unpaid, $2,000; losses under adjustment (estimated), $5,000; cash re-insurance reserve (government standard), $86,109.76, the total assets being $346,222; cash, $30,397.88; debentures, $65,745.93; agents' balances, $10,180.37; unearned premiums paid for re-insurance, $12,725.03; premium note capital (net), $69,673.21; capital stock, subscribed and uncalled, $157,500.

◆

CAUSES OF GARAGE FIRES

Superintendent F. J. T. Stewart, of the New York Board of Fire Underwriters, in a special report on fires in garages, says:—

"Owing to the general interest expressed by various members recently in connection with the large number of fires in garages, a summary of the causes of fires as shown in reports on 206 fires investigated since January 1, 1911, is submitted herewith:

Back fire into carburetor (43 per cent.)	57
Use of gasoline for cleaning (33 per cent.)	44
Filling tanks while lamps on automobiles were burning	5
Smoking	3
Gasoline torch	1
Gasoline leaks in contact with hot exhaust pipe	4
Defective electric equipment on cars	5
Miscellaneous	12
Spontaneous combustion	1
Total fires from known causes	132
Cause unknown	74
Total	206

"One hundred and thirty-two fires are reported as having originated from known causes. Of such fires 57 in number, or 43 per cent., were due to back fire into the carburetors of automobiles. Likewise, 44 in number, or 33 per cent., were due to the use of gasoline for cleaning. The promiscuous use of gasoline in many garages for cleaning purposes, as reported on inspection, taken in conjunction with the number of fires attributed to this cause, indicates that this is one of the most serious hazards to be contended with in garages.

"Although the investigations indicate that 33 per cent. of all fires of known cause were due to this practice, the actual number is probably even greater, as there is reason to believe that an appreciable number of fires reported as caused by back fire into carburetor are due directly or indirectly to cleaning parts of the car by gasoline.

"In a number of the best managed garages the prohibition of the use of gasoline for cleaning purposes is strictly enforced, and the use of oils no more volatile than kerosene insisted upon. In other cases even kerosene is prohibited for such purposes and the use of caustic soda and water or a similar solution is required."

BOND TENDERS INVITED

Monetary Times' Weekly Register of Information for Bond Dealers and Municipal Officials

Redcliffe, Alta.—The ratepayers voted in favor of the waterworks by-laws.

Calgary, Alta.—By-laws aggregating $4,000,000 were passed by the board of aldermen.

Bow Island, Alta.—Until April 1st, for $40,000 30-year 6 per cent. debentures. W. A. Bateman, secretary-treasurer.

Preston, Ont.—Until March 17th, for $102,300 5 per cent. 20-year, and $8,000 30-year 5 per cent. debentures, H. C. Edgar, town clerk.

Winnipeg, Man.—A by-law authorizing the expenditure of $3,000,000 for new city improvements may be submitted to the electorate.

Calgary, Alta.—By-laws to provide $400,000 for electrical extensions, and $16,000 for police station were approved by Calgary electors.

North Cobalt, Ont.—The council are to be asked to raise $13,000 in 20-year debentures to cover the cost of construction of a brick school house.

Fielding, Sask.—The council has been authorized to borrow $2,000 for permanent improvements. J. B. Brownridge, secretary-treasurer.

North Bay, Ont.—Until March 31st for $80,000 5 per cent. 30-year debentures. T. N. Colgan, commissioner of works. (Official advertisement appears on another page).

Ardath, Sask.—Until April 5th for $3,000 6 per cent. 15-year fire hall debentures. E. G. Sampson, secretary-treasurer. (Official advertisement appears on another page.)

Buffalo Rural Municipality, No. 409, Sask.—The municipality has been authorized to borrow $20,000 for permanent improvements. F. J. Harvey, secretary-treasurer, Wilkie.

Eye Hill Rural Municipality, No. 382, Sask.—Until March 17th for $10,000 5 per cent. 20-year debentures. A. W. A. Carscadden, secretary-treasurer, Macklin, Sask.

Battleford S.D., No. 71, Sask.—Until March 19th, for $100,000 6 per cent. 30-year debentures. F. W. D. Thompson, secretary-treasurer, Postoffice Box 309, Battleford.

Brandon, Man.—Until March 25th for $125,000 5 per cent. 30-year school debentures. J. B. Beveridge, secretary-treasurer. (Official advertisement appears on another page).

Rapid City, Man.—Until March 25th for $12,000 5 per cent. electric light and power works debentures. G. Gordon Murray, secretary-treasurer. (Official advertisement appears on another page.)

Duck Lake, Sask.—Until April 4th, for $6,000 5½ per cent. 20-year town hall, and $4,000 5½ per cent. 20-year debentures, bonus to Dominion Milling Company. Frank Hopwood, secretary-treasurer.

Burnaby, B.C.—Until March 22nd for $1,087,000 40-year 4½ per cent. roads, waterworks and shore debentures, and $50,000 15-year 4½ per cent. sidewalk debentures. A. G. Moore, clerk, Edmonds Postoffice.

Steelton, Ont.—Until March 25th for $40,000 10-year 5 per cent. local improvement, and $60,000 5 per cent. 20-year local improvement debentures. J. Robinson, town clerk. (Official advertisement appears on another page).

Edmonton, Alta.—A by-law for the creating of a debt in the sum of $2,712,193.34, for the purpose of purchasing certain lands for the establishment of a civic centre and for the issuing of debentures will be voted upon March 28th.

Grass Lake Rural Municipality No. 381, Sask.—Until April 7th for $10,000 20-year 5 per cent. general improvement debentures. J. T. Roper, secretary-treasurer, Salvador, Sask. (Official advertisement appears on another page).

Pincher Creek, Alta.—Until March 24th for $30,000 6 per cent. 30-year municipal building; $15,000 6 per cent. 20-year sidewalk debentures. G. D. Plunkett, secretary-treasurer. (Official advertisement appears on another page.)

Moose Jaw, Sask.—A by-law of the city of Moose Jaw for the purpose of raising the sum of $35,000 for the construction of permanent pavements including therein the widening and bettering of the existing sidewalks and curbs, will be voted upon March 13.

Welland, Ont.—Until March 31st for $75,000 30-year waterworks; $45,000 30-year hydro-electric; $17,489.37 10-year local improvements; and $12,109.26 10-year local improvement debentures. Interest, 5 per cent. J. Hamilton Burgar, town treasurer. (Official advertisement appears on another page.)

Estevan, Sask.—Until March 26th for $50,000 5 per cent. [illegible] high school; $30,000 5 per cent. 30 year waterworks; [illegible] 5 per cent. 30-year sewer; and $25,000 5 per cent. 25-year manufacturing establishments' debentures. L. A. Duncan, secretary-treasurer. (Official advertisement appears on another page.)

North Vancouver, B.C.—Until March 27th for $26,000 40-year 5 per cent. debentures to construct additional terminal accommodations, and $137,000 40-year 5 per cent. debentures to construct a new and modern ferry steamer. Both issues fully guaranteed as to principal and interest by the city of North Vancouver. H. E. Kemp, secretary-treasurer, North Vancouver City Ferries, Limited, North Vancouver.

CANADIAN ORDER OF ODDFELLOWS

How Its Position Compares With That of Other Societies—Endowments Not Being Issued Now

A correspondent asks us for some information as to the history and present condition of the Canadian Order of Foresters, in relation, especially to its ability to carry out its undertakings.

We find it was organized in 1852, and for a number of years was issuing endowment as well as life contracts. In 1892 it had 681 endowments in force for $206,200, and 848 life insurance certificates promising to pay $468,300. And at that time it had assets of about $11 for each $1,000 of insurance in force.

In 1902 it had of endowments only 153 certificates for $47,800, and of life insurance 3,423 contracts covering $2,576,800, and its assets were $64,404, or about $25 per $1,000 of risk.

No New Endowments.

It has been issuing no new endowments for ten years past, and in 1911 had only 79 left on hand for $24,000. As for its life certificates, the following figures will give some information relative to their standing, each year, during the past five years:—

Year.	In force.	Deaths.	Income.	Assets.	Per $1,000
1907 . . .	$3,374,000	$17,100	$48,700	$ 96,892	28.72
1908 . . .	3,308,700	16,081	48,039	102,273	30.61
1909 . . .	3,133,400	24,925	49,675	108,849	34.38
1910 . . .	2,885,450	18,968	50,335	126,634	43.44
1911 . . .	3,044,700	24,868	60,254	146,518	47.75

How the Figures Compare.

For an off-hand idea as to whether it is a safe society to join or not, some light is shed upon its position among the sister societies in Canada by a glance at the assets on hand in each of them, per $1,000 of risk in force. Therefore, from the latest chart in hand, we make the following quotations as to strength, on that basis. It is proper, however, to say that the society which heads the list with $129.18, reports to the Dominion Government the same as regular insurance companies, and claims to have a full reserve on the same basis as they:

Name of Society.	Per $1,000.
Ancient Order of Foresters	$129.18
Independent Order of Foresters	72.80
Sons of Scotland	77.21
Royal Templars of Temperance	54.55
Canadian Order of Oddfellows	47.75
Canadian Order of Foresters	47.34
Supreme Lodge Knights of Pythias	39.25
Oddfellows Relief Association, Kingston	31.17
Knights of Maccabees of the World	30.94
Commercial Travelers' Mutual Benefit	30.22
Ancient Order United Workmen	28.14
Chosen Friends, Hamilton, Ont.	27.99
Woodmen of the World, London, Ont.	27.15
Catholic Mutual Benefit Association	22.18
Sons of England, Toronto	14.25
Royal Arcanum, Boston, Mass.	14.07
Home Circles, Toronto	10.53
Orangemen's Lodge, Toronto	7.88

* * *

"I beg to congratulate you on its (The Monetary Times') outspoken and correct criticisms." The above is an extract from a letter signed by one of our regular readers, Mr. John Newmarch, of Caterham Valley, Surrey, England

The Edmonton city commissioners have let contracts for sewers, aggregating $1,170,000. These are for extensions into districts recently built up or now developing, to which it has not been practicable to afford service hitherto. There were also let this week contracts for 175,000 square yards of street paving being somewhat less than half of the amount to be done this year.

VANCOUVER'S- FEBRUARY FIRE LOSS.

The Vancouver fire department responded to 49 alarms during February divided as follows: Chimney fires 9, false alarms 5, exhibition runs 1, smoke scares 3, fires where damage resulted 19, small fires where no damage occurred 12. The estimated damage by fire and water was $12,287, with insurance paid $4,793, leaving the loss above insurance $5,485. The total value of property involved was $434,550.

One investigation has been held and another pending, by Colonel Gunther of the provincial government, into two fires which occurred during February, the origin of which was of a very suspicious nature.

A complete list of alarms where damage occurred follows:—

February 1st. Alarm from box 25 at 1.20 a.m. Fire in paper closet on the second floor of the Arcade building, 365 Cordova street west, caused by spontaneous combustion. Building owned by the Trustee Company and occupied by stores and offices. Damage $50, covered by insurance.

February 2nd. Telephone alarm at 9 p.m. Fire in tobacco store and barber shop at 704 Robson street, cause unknown. The blaze started in the tobacco store and damage also resulted to the barber shop and the Montreal Tailors adjoining. Building owned by Chas. Nelson. Damage $969, partly covered by insurance.

February 4th. Telephone alarm at 9.15 a.m. Fire in coal in basement at 1815 Twelfth avenue west, caused by being piled too close to furnace. The contents of the building suffered from smoke damage. Building owned and occupied by A. G. Martin and used as a dwelling.

February 5th. Alarm from box 23 at 7.38 p.m. Small fire in jewellery, second-hand and clothing store at 148 Water street, presumably of incendiary origin. Building owned by Mr. Cook and occupied by Hausman Brothers. Damage about $460, partly covered by insurance. Telephone alarm at 11.50 p.m. Small fire in partition at 1355 Seventh avenue east, caused by an overheated furnace pipe. Building owned by R. J. Hooper and occupied by W. Rowland and used as a dwelling. Damage $10, covered by insurance.

February 6th. Telephone alarm at 5.35 p.m. Fire in automobile at Georgia and Granville streets, caused by back fire in carburetor. Machine owned by D. Johnstone. Damage $350.

February 8th. Telephone alarm at 3.40 p.m. Small fire in kitchen at 1287 Robson street, caused by spark setting kindling wood on fire. Building owned by Mr. Herman and occupied by Mr. Denman. Damage $10.

February 9th. Telephone alarm at 5.14 p.m. Fire in store room in some trunks at the Carlton Hotel, south-east corner of Cambie and Cordova streets. The blaze was apparently caused by spontaneous combustion and was confined to the room where it originated. Building owned by Beatty & Cottingham and occupied by Mr. Sheppherd. Damage $621, covered by insurance.

February 10th. Telephone alarm at 8.57 a.m. Fire on roof of Chinese laundry at 1815 Fifth avenue west, caused by a defective chimney. Building owned and occupied by Lee Yick Lung. Damage $300, partly covered by insurance.

February 11th. Alarm from box 145 at 1.52 p.m. Fire at 2251 Eaton street in frame dwelling, caused by sparks from chimney. Both building and contents were almost a total loss. House owned by Mr. Muir and occupied by C. Nesner. Damage $950, covered by insurance.

February 12th. Verbal alarm at 2.09 a.m. Mattress in bedroom on fire at 750 Seymour street, caused by man smoking in bed. Building owned by W. Fraser and occupied by Mr. Bouchard. Damage $15, covered by insurance.

February 14th. Alarm from box 618 at 3.50 a.m. Fire in basement at 839 Lakewood drive, caused by putting hot ashes in wooden receptacle. Building owned by Mr. Seabrook and occupied by Mr. Carpenter and used as a dwelling. Damage $15, covered by insurance.

February 18th. Telephone alarm at 10.49 p.m. Fire at 753 Union street, owned by J. Hoskins and occupied by Anton Peres. The blaze started in the basement and ran up the partition to the first floor and was caused by furnace pipes being set too close to woodwork. Damage $150.

February 21st. Telephone alarm at 10.50 p.m. Fire in gasoline launch "Timothy" which was anchored at the English Bay pier, caused by a gasoline explosion. The launch was owned by D. R. Donnelly of New Westminster and was practically a total loss, being burned to the water's edge. Damage $2,500.

February 22nd. Telephone alarm at 7.36 p.m. Fire in wall on the third floor at 722 Granville street, caused by a defective chimney. Building owned by J. West and occupied by the American Club (third floor), stores and offices. Damage $180, covered by insurance.

February 24th. Alarm from box 53 at 2.44 a.m. Fire in two-story frame building at 975 and 977 Granville street, occupied by L. H. O'Neill, furnished rooms, and Sam Scrif, Rex Cafe. The fire started in the cafe kitchen from some unknown cause and spread to the rooms above before being extinguished. The contents of the restaurant were a total loss while considerable damage was also done to the building. Damage about $2,450, covered by insurance. Verbal alarm at 5 a.m. Fire in three-story frame building at 2100 Yew street, owned by Warrell & Edwards and occupied by F. C. Jacoby, grocery store and apartments. The blaze started in the grocery store and was apparently of incendiary origin and was confined to the store where it originated. Damage about $983, covered by insurance.

February 26th. Verbal alarm at 2.45 p.m. Fire in frame work on roof of new building under construction at 771 Seymour street, caused by being placed too close to steel chimney. Building owned by J. W. McFarland. Damage $50, covered by insurance.

February 27th. Alarm from box 53 at 10.03 p.m. Fire in fuse in rear of 1025 Granville street, caused by defective wiring. Building owned by Dr. Boyle Lewerke and occupied by Mr. Rafferty and used as a rooming house. Damage $20.

The total number alarms was 49, chimney fires 9, false alarms 5, property involved $434,550, loss $10,278, insurance paid $4,793, loss above insurance paid $5,485, hose laid at fires 9,250 feet, chemical used 1,230 gallons.

FIVE THOUSAND FACTS ABOUT CANADA.

Canada's wonderful advances year by year are shown in a form convenient to the busy man and to all in the booklet of which the eighth edition has just been issued, viz., Five Thousand Facts About Canada, by Mr. Frank Yeigh.

The present issue has many new features and improvements. A colored map of the Dominion is included.

GOLD CURRENCY

One of the most marked features of economics in the past twenty years has been the triumph of gold over silver as a currency basis among all the most important countries of the world, remarks the Mining Journal. This circumstance has been the outcome of many conditions—the growth of experience, the increased advantage to be looked for from the more general acceptance of the principle, and especially the assurance of a growing supply of gold itself. Now, however, that we are threatened, for a time at any rate, with a period of equilibrium, if not actual decline, in gold production, and we note an increasing adoption in hitherto purely silver using countries of a currency system which depends upon the immobilization of large amounts of gold as a fixed reserve, the question of the extension of a gold based currency system throughout the world begins to offer problems of interest for a much wider circle than silver miners, the silver market and silver currency countries. These and cognate considerations invest with more than local interest the currency operations which are at present under consideration in India and China.

◆

Work has been begun by the Northern Construction Company on the Lulu Island branch of the Canadian Northern Pacific Railway. The first camp has been established six miles below New Westminster, and a second will be located a mile further west. The latter will undertake the construction of the two miles of trestling across the muskeg which exists here and for which two million feet of lumber will be required. According to Mr. J. M. Mercer, general manager of the construction company, this line will be completed by the end of May. The line from Port Mann to Yale is now nearing completion but it is not expected that a train service will be operated until about midsummer. All the stations from Port Mann to Yale have been named and the contract for their construction will be let in a few days. These stations will be Port Mann, Langley, Glen Valley, Mount Lehman, Matsqui, Sumas, Mountain, Chilliwack, Rosedale, Popkum, St. Elmo, Floodville, Hope, Trafalgar, Yale.

DULUTH SUPERIOR TRACTION COMPANY

Effects of the strike of employes of the Duluth-Superior Traction Company, which lasted from September 9, 1912, to November 6, 1912, is shown in the income account of the company for the year ended December 31, 1912, given in the annual report of the company as follows:—

	1912.	1911.	Changes Inc. or de
Gross earnings	$1,083,259	$1,135,299	— $52,040
Net earnings	453,071	527,104	— 74,033
Bal. after divs.	*1,223	84,003	— 85,22
Depreciation	70,114	58,287	+ 11,827
Balance	*71,337	25,715	— 97,052

*Deficit.

During the year $180,022 was expended upon new equipment, construction and extensions, and there was also expended for renewals $45,067, which was charged against depreciation reserve. The depreciation reserve account now aggregates $310,269, of which $70,114 was appropriated in 1912. The regular quarterly dividends of 1 per cent. on the preferred and 1¼ per cent. on the common stock were declared and paid. These dividends are included in the deductions as given in the income account and amounted to $235,000.

The balance sheet of the company December 31, 1912, shows:

Assets—Property, $8,989,156; material, $40,000; current assets, $121,910; reserve fund, $273,493; total, $9,424,559.

Liabilities—Capital stock, $5,000,000; funded debt, $3,333,000; current liabilities, $324,505; surplus and reserves, $767,054; total, $9,424,559.

CHEAP AGRICULTURAL CREDIT

Existing European Systems—Successful American Attempts—This Year's Investigations.

In dealing with European systems of co-operative agriculural credit, Mr. A. F. Mantle, deputy minister of agriculture or Saskatchewan, in a paper given before the standing comnittee of the Saskatchewan legislature on agriculture and aunicipal law, remarked:—

1. Cheaper money for agricultural development is a very ive and important subject at the present time.

2. This is because agricultural credit in this province at he present time is dear, indiscriminate, unregulated and to too reat an extent static.

3. What the farmers need is

(a) Cheaper and more abundant credit of the kind that a nerchant or manufacturer obtains through his commercial open ccount at his bank (dynamic money);

(b) Cheaper and more discriminate credit upon amortisable nortgages extending over longer terms (static money).

4. Such cheap, abundant and discriminating credit can be btained best by the farmers themselves under governmental egulation through co-operative institutions of two general types reated and conducted for the sole purpose of providing credit t two kinds—dynamic and static—practically at cost, and for gricultural uses only.

Iot Peculiar to Saskatchewan

5. Unsatisfactory and inadequate agricultural credit is not condition peculiar to Saskatchewan among the provinces, but common to a greater or less extent in all the provinces of the ominion and the States.

6. Driven 140 years ago in the case of one class of societies, nd 50 years ago in the case of the other, by the pressure of ır greater abuses and economic necessity than exist on this ontinent, German students devised means for providing the ırmers of that nation with the cheap money essential to not ıly the development but to the very life of their agriculture.

7. Societies of both types (Raiffeisen and Landschaften) ave proved perfectly suited to their purpose, have multiplied number until there is now one such society for each 1,600 ersons of the population, and the outstanding loans of all ıch societies of the various sorts are in excess of three and ıe-half billions of dollars.

8. The rates of interest upon these loans, whether tempory or mortgage, never exceeds 4½ per cent.

lan Has Been Successful

9. The principles underlying societies of both types have een applied, through the medium of institutions more or less sembling the originals, to the solution of the problem of agriltural credit in all of the principal nations of Europe.

10. Only in Quebec and Massachusetts has the principle nderlying the Raiffeisen farm banks (one of the two prinpal types in Germany) been applied on this continent. In th cases it is reported that the plan has met with success.

11. Only in the cases of the co-operative mortgage banks eated by the Grange in the early seventies, and of the mortge banks established by American bankers in the eighties, s anything approaching the principles underlying the German ndschaften and mortgage banks (the other of the two prinpal types in Germany) been applied on this continent.

vestigation of Existing Systems

12. There is every reason to believe that if full investigaon of the conditions under which European systems have orked successfully, and a careful comparison of those with skatchewan conditions is made, and the task is approached the right spirit, the principles underlying the successful eration of these systems can be applied to the solution of the me problem in Saskatchewan, and a satisfactory form of ganization and method of procedure devised.

13. A select committee composed of two members from actically every state of the union will investigate this whole estion right on the ground during and immediately following e meeting of the International Institute of Agriculture at me in May, 1913. This committee will work in Europe durg the months of May, June and July, 1913.

14. The appointment of representatives from Saskatchewan ers the cheapest, best and most expeditious means for the oper and necessary detailed investigation of European sysns of co-operative agricultural credit in the interests of this ovince.

ANOTHER ISSUE IN LONDON

Arrangements are in progress in London for an issue at of $1,000,000 Pacific Great Eastern Railway 4½ debentures, deemable in 1942, guaranteed by the British Columbia pronicial government.

FOX FARMING AND FINANCES

Prices Paid for Breeding Purposes Exceeds Pelt Values —Prince Edward Island is Centre.

A return of three hundred per cent. on the capital involved is what silver-fox farmers in the Maritime Provinces received during the past year, according to a report on furfarming in Canada soon to be issued by the commission of conservation. The fur value of a silver fox varies from about $300 to about $2,500 according to the quality of the pelt, but the prices paid for foxes for breeding purposes far exceed this. In 1910 foxes were sold for breeders at from $3,000 to $4,000 per pair; i.e., not far above their fur value. In 1911 prices rose to $5,000 a pair, and about littering time, early in 1912, one pair sold for $20,000. In the latter part of 1912 old breeders were variously valued at from $18,000 to $35,000 a pair.

This remarkable rise in the prices has been due to the keen demand for breeding stock by persons or companies wishing to establish themselves in the fox-ranching business. So keen is this demand for "breeders" that not a fox fit for breeding purposes is being slaughtered for its fur, writes M. J. P. in "Conservation."

Determined by Fur Value

Ultimately the value of the silver fox must be determined by its fur value and not by the prices now being paid for breeders. It is plain, also, that, in the course of a few years, the numerous ranches in process of formation and which, at the present time, are creating such a demand for breeding stock, will be producing pelts for the market. The resultant increase in supply is certain to lower the prices paid for skins of this kind in the fur markets. While there is undoubtedly a sound basis for building up a paying industry in fox-farming, the public should weigh the matter very seriously before investing their money in companies whose capitalizations are based on the remarkably high prices now prevailing for breeding stock. It should not be overlooked that nearly all those who have made large fortunes in the business have done so by selling stock for breeding purposes, not for their pelts.

Eight Hundred in Captivity

It is estimated that in October, 1912, there were about 800 silver foxes in captivity in Canada, of which about 650 were in Prince Edward Island. The principal points at which the industry is carried on are around Alberton, Summerside, Charlottetown and Montague in Prince Edward Island; Quebec city in Quebec; Port Elgin in New Brunswick, and Wyoming in Ontario. Each pair of foxes produces one litter a year consisting of from one to nine pups, and averaging about 3½ pups to a litter. They are sold for delivery in the first week in September and the fur is at its best the last week in December. So high is the speculative fever running in the industry that many of the unborn pups of 1913 have already been purchased and are partly paid for.

Alexo Mines	281.1

CANADIAN PACKING HOUSE BONDS

Four Issues Have Been Made During the Past Fifteen Months—All of Them Were Six Per Cents.

The issue of $750,000 six per cent. bonds of the Harris Abattoir Company, Limited, the other day, recalls the fact that packing plant bonds have become a feature in investment spheres during the past fifteen months. No less than four such issues have been made since December, 1911. They are tabulated as follows:—

Company.	Am't. of Issue.
Matthews-Laing, Limited, first mortgage 20-year gold bonds	$1,500,000
William Davies Company, Limited, 15-year sinking fund gold bonds	1,250,000
P. Burns & Co., Limited, first and refunding mortgage 20-year sinking fund bonds	1,000,000
Harris Abattoir Company, Limited, first mortgage 15-year sinking fund gold bonds	750,000
	$4,500,000

All Were Six Per Cents

Thus in a little over a year $4,500,000 six per cent. bonds of Canadian packing houses have been issued. Their capitalization and bonding powers are set out in the table at the foot of this page.

The earnings of these companies have been large. The Matthews-Laing Company was an amalgamation of three concerns. The combined earnings of the three companies for three recent complete fiscal years, after providing for depreciation of plant and equipment, but before charging interest on borrowed money, were as follows:—

1909	$280,104.75
1910	290,350.94
1911	289,018.83
An average per annum of	286,491.50

The gross sales of the William Davies Company for five fiscal years have been:—

1907	$ 7,933,695
1908	8,308,100
1909	8,204,237
1910	10,245,284
1911	11,680,786

The net earnings applicable to all interest charges during the above five years have been $1,341,937, an average per year of $268,387, or more than three and a half times the interest on the recent bond issue.

The net earnings of the P. Burns Company for three recent years were as follows:—

1908	8,308,100
1909	313,524.97
1910	299,842.89

The auditors of the Harris Abattoir Company made an examination of our records covering four and three-quarter years ended December 31st, 1912. The average net profits of the company during that period, as certified, were $158,783. For the current year, based on nine months ending December 31st, the profits will reach $180,000, or four times the interest requirements of the $750,000 bonds recently offered to the public.

How the Business Grows

An idea of the growth in the packing business can be gathered from the figures of this company:—

Animals Slaughtered.

Year ended March 31.	Cattle.	Sheep and Lambs.	Dressed Meat Sold, Lbs.	Carloads Shipped.
1902	13,323	4,035	9,597,520	175
1904	20,982	34,659	13,642,085	280
1906	27,612	30,104	16,231,075	307
1908	40,250	38,818	26,322,045	600
.1910	49,544	50,270	30,530,021	922
1912	51,056	62,378	34,099,744	1,054

The sales to the public during the past five fiscal years were as follows:—

1909	$3,840,887
1910	4,369,451
1911	4,814,491
1912	5,188,466
Nine months ending December 31st, 1912, $4,616,364 (three remaining months estimated in proportion)	6,150,000

The purpose of the recent bond issue of the Matthews-Laing, Limited, was to furnish additional working capital to extend the company's operations.

The issue of the William Davies Company was made to retire outstanding debts of the commpany and to furnish additional working capital.

The proceeds of the bond issue of the P. Burns Company were used for working capital, replacing bank loans.

The cash realized from the sale of the Harris Abattoir Company's bonds will be used for the construction of the company's new abattoir at West Toronto and to reduce its bank advances.

Large Total Assets

The total assets of the four companies make a substantial sum, as the following table shows:—

Company.	Total Assets.
Matthews-Laing, Limited	$3,277,250
William Davies Company, Limited	3,357,919
P. Burns & Company, Limited	4,529,070
Harris Abattoir Company, Limited	2,022,671
	$13,186,910

All these companies' bond issues were rapidly absorbed and almost entirely in Canada.

◆

HAMILTON WILL TRY LOCAL INVESTORS

Hamilton may try to sell its next small issue of debentures to private investors, instead of selling them in bulk to financiers. The city's 4½ per cent. debentures yield nearly five per cent. interest, and as each bond has a face value of $1,000 it is thought that local investors might desire to purchase them direct from the city. The $25,000 debentures for the Sick Children's Hospital may be sold in that manner.

The city's financial statement for last month shows that on account of the waterworks construction an expenditure of $115,425.67 was made. The amount of the debentures to be issued this year for that purpose has not been determined, but it will be at least $100,000.

◆

NATURAL GAS IN ONTARIO

Ontario's yield of natural gas is rapidly increasing. In 1909 the output had a value of $1,188,179; in 1910, $1,491,239, and in 1911, $2,186,762.

The natural gas territory borders on the east and north shores of Lake Erie, and the gaps between the areas at present productive are steadily being obliterated, and in such a way as to make it not improbable that practically the whole shore will in time be found to be underlaid by gas-bearing strata. It has already been shown by wells drilled in the land under the water of Lake Erie in front of the township of Rainham, that the gas field includes portions of the bed of that lake. The outlines of the gas field in Kent county, and the large yield of wells on the shore line, strongly suggest that there is an extension of the field, probably one of considerable size, beneath the waters of the lake in that district also.

The largest single producer is the Dominion Natural Gas Company, whose head office is at Pittsburgh, Pennsylvania. The Volcanic Oil and Gas Company, Chatham;; the Leamington Oil Company, Detroit; the United Fuel Supply Company, Sarnia; and the Provincial Natural Gas and Fuel Company, Niagara Falls, also produce and market large quantities of gas.

In his report for the year 1911 Mr. Donald Sharpe, of Welland, whose territory covers the counties of Welland, Haldimand, Brant, Norfolk, Wentworth, and Elgin, in which the gas is much more important than oil, states that the producing wells drilled during the year were 254 in number, distributed by counties as follows: Welland, 26; Haldimand, 124; Brant, 60; Norfolk, 19; Wentworth, 9, and Elgin, 16. The dry holes put down number 41. From the new gas and oil field in the township of Onondaga, county of Brant, the output of gas was about 350,000 cubic feet per day, and of oil about 2,500 barrels per month. There are now 25 gas and 32 oil wells in that field. A good gas field has been developed at Vienna, Elgin county, and mains have been laid to supply Tillsonburg and Aylmer with gas. The larger companies are doing their best to keep the wells free from water, while some small companies and private individuals, on account of not having proper machinery, do not care for their wells as they should. By reason of the great quantity of gas being used for manufacturing purposes, and the freezing up of many of the small pipes during the cold weather, many people were much inconvenienced as a result of the shortage of gas. Mr. Sharpe adds: "If gas were available for domestic purposes only, the companies would be enabled to give the public a better service, and natural gas would last for many years."

ALBERTA'S COMPANIES.

An Average of Two Companies Per Day Were Incorporated During Nineteen Hundred and Twelve.

Seven hundred and thirty-one new companies, with a capitalization of $91,351,883, were incorporated in Alberta last year, s compared with 573, with a capitalization of $72,455,100, during 1911. Since the incorporation of the province there have een 2,300 companies incorporated in the province, with an ggregate capital stock of $267,304,508. In addition to the certificates of incorporation issued last year, fifty-two supplementary certificates were issued, thirty-two of which were to increase the capital stock of existing companies by the sum of 5,415,000.

Commenced Business Immediately.

A feature of the recent company incorporations is that while many of those incorporated in former years remained ome time in the charter stage, nearly every company incorporated last year commenced business immediately.

These facts are shown in the annual report of the provincial secretary's department for 1912.

The following table shows the number of companies incorporated under the Companies Ordinance since the inauguration f the province, September 1, 1905:—

ear.	Number of Companies.	Capitalization.
905 (16 months)	161	$18,552,000.00
907	198	22,166,950.00
908	137	11,917,950.00
909	200	19,386,000.00
910	300	31,474,625.00
911	573	72,455,100.00
912	731	91,351,883.33
Total	2,300	$267,304,508.33

Since Alberta Was Made a Province

Extra provincial and foreign companies, registered under he Foreign Companies Ordinance during the year 1912, numbered 168, as compared with 92 in the last previous year. The otal capitalization of these new companies was $142,492,400, as ompared with $111,748,000 in 1911.

The following table gives the number of companies registered in Alberta each year since the establishment of Alberta s a province:—

ear.	Number of Companies.	Capitalization.
905 (16 months)	60	$ 52,405,000
907	58	47,425,000
908	43	31,312,000
909	80	83,345,000
910	85	78,922,000
911	92	111,748,000
912	168	142,492,400
Total	586	$647,648,300

◆

BRITISH COLUMBIA PERMANENT LOAN COMPANY

There was much activity in loan and mortgage spheres on he Pacific Coast last year. The annual report of the British olonial Permanent Loan Company for 1912 shows that this rogressive corporation obtained a good share of the business ffering, which helped to mold a satisfactory balance sheet of he year's operations. Out of the profits a sum of $133,670 was isbursed in dividends of various kinds. The interest on currency and sterling debentures totalled $41,000. The sums mentioned were transferred to the following accounts, respectively: xpense fund, $66,605; contingent fund, $15,000; and reserve und, $47,438. The reserve fund now amounts to the substantial sum of $600,000. Adding to that the total of the contingent fund and balance of profit and dividend account, altogether 29,937, the company has a surplus of $629,937.

The British Columbia Permanent Loan Company has a trong list of assets. Chief among them naturally are first ortgage real estate loans, which total $3,568,200. Share loans mount to $77,313; office property is valued at $425,350, and ther assets bring the total to $4,141,259. The capital stocks f the company are divided as follows: Permanent, $844,297; ull paid and prepaid, $292,550; and instalment, $320,579. Currency and sterling debentures and accrued interest total $958,-50. Deposits and accrued interest amount to $719,547.

This company has made rapid progress in comparatively hort time and has assumed a leading position in the western eld especially. The enterprising management and directorate ave undoubtedly seen to it that they have the most ample ecurity for loans advanced.

ESSENTIALS OF BALANCE SHEETS

Responsibility of Directors—Chartered Bank Premises —Officers Management of Affairs.

The remark is frequently heard that too little information appears in the published balance sheets of corporations, and it is, therefore, difficult for not only present stockholders and bondholders but also intending purchasers of the securities to come to some conclusion as to the advisability of retaining, or purchasing, as the case may be, of such investments. As a matter of policy, however, it is not advisable to submit too much information with published reports, as, naturally, corporations do not care to make public their financial affairs in too great detail, remarked Mr. David S. Kerr, C.A., in a lecture on "How to Read a Balance Sheet," given before the Montreal Chartered Accountants' Students' Society. This emphasizes the necessity of having correct and fair balance sheets, even though in condensed form. The importance of having good officers and directors is the more necessary in view of such practice. Too often the directorate contains "directors who do not direct," instead of "directors who do direct." The average stockholder is not acquainted with the standing of the officers but places his reliance upon the prominent business gentlemen whose names appear on the directorate. And this should be so. The responsibility of directors is not to be minimized.

Obtains First Hand Knowledge.

Discussion frequently arises in connection with the moderate values at which Canadian chartered banks carry their "bank premises." But surely it is good business for a bank (provided it keep within its powers in investing in such assets) to place a nominal value on its bank premises. A bank does not purchase such assets with a view to selling. In the event of liquidation the bank premises would be slow in realizing, and in times of severe panic, necessitating such a step, there would probably be no purchaser for the premises. The whole system of Canadian banking and conservative methods of conducting business throughout the Dominion has, so far, achieved great success, and by a continuation of the past policy and a careful avoidance of becoming involved, directly or indirectly, in the speculative real estate areas, the future can be looked forward to with an abundance of assurance. The broad experience in the different localities throughout this great Dominion and the many varied considerations applicable to each section of the country, of which the average banker and bank clerk obtains first hand knowledge, through the very commendable system of frequent transfer of employees to the branches, place the Canadian banker above the average banker in the United States.

Affected by Local Conditions.

Of course, the stability of the individual banks in the two countries cannot be compared. In the United States the national or state banks, with a very few exceptions and these are chiefly local, do not have branches. Therefore, purely local conditions in any part of the United States affect the banks of that locality very quickly and very perceptibly. This is apart from the different regulations regarding bank note circulation, which, with the branch system, afford Canadian banks benefits not enjoyed by banks in the states. I would not feel justified in passing this phase of our subject without stating that the comptroller of the currency at Washington, D.C., has, during the past few years, done a great deal to improve the status of the national banks, particularly so far as concerns the officers' management of the affairs of the national banks and the duties and responsibilities to be assumed by their directors.

◆

NEW BRUNSWICK'S LIVE STOCK INDUSTRY

The following figures from the recently issued report on agriculture give the per acre yield of the crops for 1912, 1911 in the Province of New Brunswick:—

Bushels per acre.	1912.	1911.
Wheat	19.6	19.2
Oats	31.0	30.1
Buckwheat	24.1	20.0
Potatoes	182.7	170.5
Turnips	506.3	513.0

It is also very pleasing to note that more attention is evidently being given to the live stock industry than in previous years, as the returns show an increase of every class of animal kept on the farm. The following are the totals of the figures for the last two years:—

	1912.	1911.
Horses	61,042	60,829
Cattle	241,130	227,145
Sheep	152,892	150,760
Swine	94,993	91,363

◆

British Columbia Electric Company is spending more than $600,000 on doubling capacity of its Jordan River system.

CANADA INCREASES MINERAL OUTPUT

Preliminary Statistics—Development of Ore Reserves —Provincial Results.

The total value of the mineral production in Canada in 1912 was $133,127,489 according to the preliminary statistics, which are based upon direct returns from mine and smelter operators, but subject to revision. Compared with the previous year this production shows an increase of $29,906,495, or nearly 29 per cent.

The mineral output in 1911, however, was somewhat restricted owing to long extended labor disputes and the largest previous production was in 1910 compared with which that of 1912 shows an increase of $26,243,866, or over 24 per cent. The per capita production in 1910 was $14.93, and this has increased in 1912 to over $18. This record is a gratifying indication or confirmation of the fact that the Canadian mineral industry in 1912 has had by far the most successful year in its history.

This progress is all the more satisfactory because it is evidently due to a widespread and substantial development of the country's mineral resources. The only new camp of importance to contribute largely to the year's output was Porcupine, the gold production of which was about one and three-quarter million dollars.

Labor Disputes Were Few.

A slight scarcity of labor was reported, particularly in connection with the asbestos and clay working industries. There were comparatively few labor disputes to interfere with output, the principal difficulties being a strike of coal miners on Vancouver Island, beginning in September, and a labor dispute at Porcupine toward the latter part of the year. The total coal and gold production were but slightly affected thereby.

A substantial increase in price in most of the metals, which took place early in the year and continued throughout, had a very important bearing on the year's operations and contributed largely to the increased value of the output.

A feature of particular interest during the year has been the continued and extended development of ore reserves. The satisfactory results from these operations, particularly in the case of the nickel-copper ores of the Sudbury district, the Porcupine gold ores of Ontario and a number of the copper and lead deposits of British Columbia, point to much greater annual outputs in the future.

Extension of ore smelting and refining facilities and in a number of cases special improvements in methods of practice have also been important factors in the year's operations.

Tabulated Statement of Metals and Minerals.

The production of the more important metals and minerals is shown in the following tabulated statement in which the figures are given for the year.

	1912 Quantity.	1912 Value.	Increase or decrease in value.
Copper . . . . Lbs.	77,775,600	$12,709,311	+$ 5,822,313
Gold . . . . Ozs.	607,609	12,559,443	+ 2,778,366
Pig iron . . . . *Tons	1,014,587	14,550,999	+ 2,243,874

*Short tons throughout.

The subdivision of the mineral production in 1911 and 1912 by provinces was approximately as follows:-

Province.	1911. Value of Production.	1911. Per cent. of Total.	1912. Value of Production.	1912. Per cent. of Total.
Nova Scotia	$15,409,397	14.93	$18,843,324	14.15
New Brunswick	612,830	0.59	806,584	0.61
Quebec	9,304,717	9.01	11,675,682	8.77
Ontario	42,796,162	41.46	51,023,134	38.33
Manitoba	1,791,772	1.74	2,314,922	1.74
Saskatchewan	636,706	0.62	909,934	0.68
Alberta	6,662,673	6.46	12,110,960	9.10
British Columbia	21,299,305	20.63	29,555,323	22.20
North West Territories.	4,707,432	4.56	5,887,626	4.42
Dominion.	103,220,994	100.00	133,127,489	100.00

Increases are General.

Of the total production in 1912 a value of $61,177,989 or nearly 46 per cent. is credited to the metals, and $71,949,500 or 54 per cent. to non-metallic products. With the exception of petroleum every important mineral mined in Canada shows an increased production in 1912, in so far as value is concerned. In the case of silver only, is there a decrease in quantity, and this slightly less than 2 per cent., the increase in total value of silver being due to the much higher price obtained for the metal during the year. Among the metals, increases in quantity of output are shown as follows: Pig iron 10.5 per cent.; gold, 28 per cent.; copper, 40 per cent., and lead, 50 per cent. On account of the generally higher prices of the metals the increases in total value of output considerably exceed the increases in quantity, and are as follows: Silver, 12 per cent.; nickel, 31 per cent.; copper, 85 per cent., and lead, 93 per cent.

The most important increases among non-metallic products are in coal, gypsum and cement. Coal shows an increase of 30 per cent. in tonnage, gypsum 11 per cent. and cement 26 per cent.

It is a matter of regret to have to report a continued decrease in the production of petroleum. The Canadian output of this product a few years ago was about 50 per cent. of domestic consumption. At the present time not over 5 per cent. of Canada's consumption of petroleum and its products is derived from domestic sources.

Production by Provinces.

The record of production by provinces given above, shows some slight changes in the relative importance of the production of each. The only change in the order of magnitude of output is that Alberta, the production of which had exceeded that of Quebec in 1910, but fallen below again in 1911, on account of its restricted coal output, again takes premier place in 1912. Ontario is still the largest contributor to the total, being credited with 38 per cent., or $51,023,134; British Columbia comes second with 22 per cent., or $29,555,323; Nova Scotia third with $18,843,324, or 14 per cent.; Alberta fourth with $12,110,960, or over 9 per cent., and Quebec fifth with $11,675,682, or a little under 9 per cent.

It should be remembered in dealing with these comparisons that Nova Scotia in the above record is given no credit on account of the large iron smelting and steel making industries at Sydney, New Glasgow, etc. The pig iron made here is entirely from imported ore and naturally is not credited as a Canadian mine output. The same remark applies to a large percentage of the pig iron production in Ontario as well as to the production of aluminum in Quebec.

Contributed to Results.

There was an increased output in each of the provinces in 1912, the largest gains being in Alberta and British Columbia.

In Nova Scotia both coal and gypsum mining were particularly active though a reduced production of gold is reported. Copper and asbestos mining in Quebec contribute chiefly to the increase in that province.

Ontario had important increases in nickel and copper but more especially in gold from the Porcupine district. This province has a large output of non-metallic products including cement, clays, etc. In Alberta coal mining has had a record year exceeding in tonnage the British Columbia production. In the latter province the principal increase was in copper, with gold, silver, lead, zinc, coal and structural or building materials as important contributors.

SCHOOL DISTRICTS EMPOWERED TO BORROW MONEY

The following school districts have been authorized to borrow money. The particulars are given in order, name and number of school district, amount required, and name of secretary-treasurer:—

Saskatchewan

Bisley, No. 1001, $2,250. P. W. Arundell, Bisley.
Wymer, No. 1287, $1,000. W. N. Parlee, Grayson.
Wilkie, No. 2143, $12,000. T. A. Dinsley Wilkie.
Kenaston, No. 1192, $10,000. J. Hewitt, Kenaston.
Eby, No. 1026, $2,100. T. J. Toland, Swift Current.
Handford, No. 1857, $1,800. T. L. Hardy, Tullisville.
Aldag, No. 1361, $2,000. M. A. Peterson, Gull Lake.
Freemount, No. 1303, $1,700. T. J. Knight, Daysville.
Swan Plain, No. 291, $400. F. L. Dickenson, Arabella.

Interest	1,131.73
Sundry Profits	3,634.88
	$315,564.84

Vancouver, B.C., January 13th, 1913.

We have audited the accounts of the British Columbia Permanent Loan Company, from 31st December, 1911, to 31st December, 1912, and find the transactions of that period accurately recorded in the books of the Company; the receipts accounted for; the investments duly authorized; and receipts for all payments produced. We have made a careful examination of the Mortgages, and have verified the Balances in the Bank and the Cash on Hand at 31st December, 1912.

The Statement of Receipts and Expenditures, and also the Statement of Assets and Liabilities, are properly drawn up, so as to exhibit a correct view of the affairs of the Company.

I have audited the accounts of the Occidental Fire Insurance Company for the year ending December 31st, 1912, and certify that the foregoing Balance Sheet is a full and fair statement of the affairs of the Company as shown by the records.

CHARLES D. CORBOULD, C.A.,
Auditor.

Winnipeg, February 8th, 1913.

MONTREAL AND TORONTO BONDS

Success of Former City's Issue in London is Greeted With Satisfaction.

The city of Montreal loan in London was a decided success. It was applied for three times over and applicants for over £500 got only 34 per cent. of their applications. A cable message to the Montreal Star states that this fact has given a more cheerful tone to the Canadian market abroad.

The London Times publishes articles discussing the recent poor reception of the Toronto loan of £71,200,000, the public only taking 15 per cent., showing that with the extraordinary increase of wealth in recent years the city could bear a debt of double that permitted by law. Nevertheless the highest financial authorities urge that the time is not yet come for a fresh flow of Canadian issues. The good credit of Canada demands that borrowers limit their commitments and keep a tight rein on their expenditures.

Large Floating Debt

Some criticism is aroused by Montreal's creation of such a large floating indebtedness, also of the publicity given in advance to the city's financial needs.

The London Financial News remarks that the Montreal issue was cheap without being nasty, as compared with some other Canadian issues.

In the discussion which attended the sanctioning of the $7,000,000 loan by the Montreal City Council, Dr. Lachapelle, in submitting the report, called attention to the fact that by the year's delay in floating the loan the city had lost $600,000, for instead of 97 at four per cent., which had been offered twelve months ago, Montreal was now compelled to pay four and a half per cent. and received $96.82.

What Might Have Been

The figures laid before the city council show that the Montreal loan of $7,000,000 had yielded a lower return than was at first supposed to be the case. The net proceeds, according to the statement of the city treasurer, was 96.825. The price of issue was par, but the commission and other charges, including interest on the whole amount for three months, made up a total of 3.175 per cent. The details were 1.85 for ordinary charges, 0.50 for additional commission to the underwriters, and .825 for loss of interest on payments before May 1. The effect of the three months' interest till May 1 is seen by the allotments. There is to be 20 per cent. now, 40 per cent. on April 1, and 40 per cent. on May 1. The controllers informed the council that three months' interest was payable on May 1, though it was obvious the city would not have had the use of all the money during that period.

Still Discussing Toronto's Failure

A Canadian Associated Press cable says that "some soreness" is still left in London because Toronto did not issue four and a half per cent. stocks instead of four per cent. bonds. If she had done so, it is contended Montreal would probably have got better terms and there would have been little congestion.

Winnipeg's four and a half per cents. stand at quarter premium. Montreal will probably share the same happy fate, whereas Toronto remains forlorn at eight per cent. discount. There is talk of other loans of the same sort appearing before long, including one guaranteed by the British Columbian Government. As there are still nearly $15,000,000 Canadian municipal and provincial government treasury bills afloat in London, Canadian public finances are by no means clear of the woods, so recent expressions of opinion made here that borrowers of this class ought to limit their demands seem perfectly justified.

Must Have Good Terms

The Pall Mall Gazette to-day says: "Canada has for the time being pretty well exhausted the market." This is too sweeping. The point is that the market is not exhausted if proper terms are given as indicated above. The Gazette, however, asserts that the exhaustion is only temporary, and contends that as Canada will want much more capital in future, it is well to slacken the demand just now.

In regard to the recent purchase of Toronto bonds by Messrs. N. W. Harris & Company, of Boston and Montreal, none of the bonds were offered in Great Britain, the firm agreeing not to do so when they made the purchase. A reasonable amount of the bonds were sold in Canada, but Canadian buyers are not as quick in taking hold of an investment of this sort as they are in the United States.

◆

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station, for the week ended March 7th: Bailey Cobalt, 46,500; Crown Reserve, 60,162; Coniagas, 160,501; Trethewey, 83,600; Nipissing, 211,005; La Rose, 135,176; Cobalt Townsite, 142,000; Temiskaming, 60,240; total, 899,184 pounds or 449 tons. The shipments since January 1st now total 7,572,994 pounds or 3,786 tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144 tons, valued at $1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 29,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons; 1912, 21,509 tons.

MONARCH LIFE AGENTS MEET

An enthusiastic gathering of the principal agents of the Monarch Life Assurance Company was held at the company's head office at Winnipeg recently. The gathering consisted of agents who measured up to certain requirements which had been set forth early in the year, and the endeavor was to make the gathering one of both pleasure and profit to all present. Matters of vital interest were discussed, and many suggestions of benefit were made by various agents.

Monarch Life Assurance Company's agents at Winnipeg Convention. Mr. J. W. W. Stewart, the managing director, is in.

The convention closed with a banquet, at which the directors of the company, the members of head office staff, and the agents, were present. The field force of the Monarch Life Assurance Company started 1913 with enthusiasm and with determination to bring to their company this year a large amount of carefully selected business.

◆

EDMONTON'S ADVANCES AND ADVANTAGES

There are at the present time 63 wholesale firms maintaining warehouses and carrying stocks at Edmonton, stated Mr. H. Milton Martin at the annual meeting of Edmonton board of trade; 14 of these have commenced business during 1912.

Fifteen manufacturing concerns commenced operation in 1912.

At the present time there are 90 industrial shops employing 3,232 wage-earners—their weekly payroll being $46,834. Aside from these, there are several concerns now building expecting to operate in the early spring, and they, of course, will increase the payroll. Amongst these may be mentioned the meat packing plant of P. Burns & Company, Limited (the main building of which is now nearing completion), which will shortly commence operations with a force of two hundred men. This enterprise, no doubt, like that of the Swift-Canadian Company established four years ago, will find it necessary to continually expand their facilities and equipment. A very pleasing feature of the industrial situation in Edmonton is the fact that, practically without exception, all industrial concerns are finding continued and rapid expansion imperatively necessary.

An effort should be made to promote the further development of mixed farming, by utilizing every available opportunity to spread the knowledge of the great advantages of the Edmonton district for this form of agricultural effort. It is now generally recognized that central Alberta can and does produce good crops of grain; but it is not yet so well understood as it should be that this part of the country possesses advantages for mixed farming that are probably unequalled on this continent It is the advantages a country possesses for the cheap production of beef, pork and milk, rather than its production of wheat that makes for permanent prosperity, for the highest form of agricultural development, and for cheaper living conditions in the towns and cities. The fact that throughout Edmonton's tributary territory during the past few years of good crops there has been no serious trouble resulting from car shortage or elevator congestion, and that excellent business conditions have prevailed, is attributable to the fact that central Alberta farmers are by no means dependent, generally speaking, exclusively on the marketing of grain, but are also producing beef, pork milk, hay and other easily marketed commodities, permitting them to await reasonably favorable conditions to market their grain.

There are at the present time 87 producing coal mines north of the Red Deer River. The tonnage for 1910 showed a production of 248,911 tons, while that for 1911 was 508,616 tons. Undoubtedly the figures for 1912 output will show very marked increase over those of 1911.

An Offering of Preferred Stock of

The A. Macdonald Company

LIMITED

(Incorporated under the first part of the Companies Act being R.S.C. 1906, C. 79)

CAPITALIZATION

	Authorized	Now Issued
7% Cumulative Participating Preferred Stock	**$3,000,000**	**$2,100,000**
Common Stock	**4,000,000**	**3,000,000**

Bankers	**THE DOMINION BANK**
Registrar	**NATIONAL TRUST COMPANY, Limited**
Transfer Agent	**THE ROYAL TRUST COMPANY**

The LONDON JOINT STOCK BANK, LIMITED, in London, Eng., the DOMINION BOND COMPANY, LIMITED, in Toronto, Montreal and Vancouver, and the ATLANTIC BOND COMPANY, LIMITED, in St. John, N.B., and Halifax., N.S., will receive applications for the purchase of

$2,100,000

Seven per cent. Cumulative Participating Preferred Stock of $100 par value

PRICE $95 per share

IMPORTANT FEATURES OF THE ISSUE

(1) The Preferred Stock participates equally in all profits after 8% has been paid on the Common Stock.

(2) Dividends on the Preferred Stock will be paid quarterly, on the 15th April, July, October and January, and will accrue from date of issue of certificates.

(3) The A. Macdonald Company, Limited, conducts the largest wholesale grocery business (mail order) in the Dominion of Canada.

(4) With eleven branches, the Company covers Northern Ontario and the Provinces of Manitoba, Alberta and Saskatchewan.

(5) The entire stock of merchandise has been turned over at the rate of nearly ten times per annum.

(6) The estimated earnings for the ensuing year are $400,000, which is equal to 19% on the issued Preferred Stock.

(7) The surplus of liquid assets, including accounts and bills receivable, merchandise, etc., over and above all liabilities, amounts approximately to $1,260,000.

(8) The surplus of all assets of the Company over liabilities, exclusive of goodwill, trade marks, etc., amounts to approximately $2,000,000. Of this amount $740,000 is in real estate and buildings.

CANADIAN LIGHT COMPANIES IN MERGER

Rearrangement of Three Big Holding Companies—Concerns Dominion Gas Company and Others

The International Light and Power Company, Limited, recently incorporated under a Dominion charter with a capital stock of $20,000,000 divided into 200,000 shares of $100 each involves several Canadian and United States light and power companies.

A rearrangement has been decided upon of the subsidiary concerns of the three big holding companies of the New York house of Henry L. Doherty and Company, viz., Cities Service, Consolidated Cities Light, Power and Traction and Utilities Improvement Company, of which definite information is somewhat difficult to obtain.

No New Stock Offered to Public.

The rearrangement is designed to afford greater earning capacity and more compact and effective organization. It is planned to include in Cities Service and in Consolidated Cities Light, Power and Traction only those companies returning the largest earnings and regarded as gilt-edged investments. To the Utilities Improvement Company, the third and last organized of the three big holding concerns, will be added those companies which at the present are encumbered or in need of reorganization, but which under proper management promise exceptional development. As these small earning companies expand, they will be transferred to one or the other of the first-named holding concerns.

No new stocks will be offered the public as a result of the extensive scheme of rearrangement, but instead stock from the Cities Service and the Consolidated Cities Light, Power and Traction Companies will be issued to the Utilities Improvement Company for the companies taken from it, this stock to be held by it as an investment.

The new companies, whose earnings and conditions warrant their transfer to the Cities Service Company, are the Empire District Gas Company, of Joplin, Montana; Danbury and Bethel, Connecticut, Gas and Electric Company, and the St. Joseph, Montana, Railway, Light, Heat and Power Company.

The Spokane Gas and Fuel Company is transferred from the Cities Service Company to the Utilities Improvement Company. Other companies which remain within the Citi Service are the Denver Gas and Electric Company, the Er pire District Electric Company of Joplin, Montana, and tl Brush Electric Company, of Galveston, Texas.

Ontario Gas Companies Concerned.

Consolidated Cities Light, Power and Traction Compa is to acquire for the Dominion Gas Company, one of its su sidiaries, from which Hamilton's natural gas supply is present obtained, the Brantford Gas Company, with authoriz capital, $200,000; outstanding capital, $121,000. Woodsto Gas Light Company, authorized capital, $86,120. United G Company, Limited, including the St. Catharines and Niaga Power and Fuel Company, the Niagara Peninsula Power a Gas Company, the Thorold Natural Gas Company, and the S Catharines Drilling Company, authorized capital $300,00 with six other smaller gas companies in Southern Ontari Canada, and also the Hutchinson District Gas and Electr Company, and the Northern Ohio Gas and Electric Compan

From the Consolidated Companies there will be transferr to the Utilities Improvement Company, the City Light a Water Company, Citizens Gas and Electric and the Bristol G and Electric. Additional companies which will remain with the Consolidated Cities group are the Dominion Gas, Cana City Light and Traction, Sedalia, Mo., and Alliance; Oh Gas and Power; Massillon, Ohio, Electric and Gas; Tru bull, Ohio, Public Service; Meridian, Miss., Light and Ra way; Cumberland, Md., and Westport Electric Railway, a Knoxville, Tenn., Gas Company.

The plan of rearrangement includes no new concern ou side of gas and electric companies.

◆

The total loss in the city of Winnipeg through fire 1912 was $775,486. In the province outside the city limits tl total damage was $686,680. The allowance for loss by u reported fires is $15,000, making a total of $1,477,166.

During the erection of the new head office building of tl Dominion Bank, at the south-west corner of King and Yon Streets, Toronto, temporary premises have been secured. T head office officials will occupy the ninth floor of the ne Canadian Pacific Railway Company's building, at the sout east corner of King and Yonge Streets. The main offic where business accounts and the savings department are co ducted, will be on the ground floor of the Crown Life Buil ing at the south-east corner of Yonge and Colborne Street

Public discounts poor paper

Of all concerns which *must* use just the right stationery a bank, broker or financial house is under the greatest necessity to make a careful choice.

The public largely discounts the standing of a concern whose correspondence is not above criticism—whose letter paper is less than 100% right.

Crown Vellum

is the choice of many of our biggest men—and it's worthy of their approval. Fine, substantial, even textured paper—with the "feel" and "look" that begets confidence.

We can supply if your regular stationer will not.

VALUE OF LIFE INSURANCE

III.

How to Borrow at a Profit

BY C. A. HASTINGS.

How to borrow without committing the unpardonable sin, or out of business, of going to doubtful money-lenders, is e point to which I now direct your attention. There are any men who will confess—and many more who will not onfess—that at some time or other had they had the power command a large sum of money it would have considerably nproved their positions.

Of course it is simple enough to borrow money against seurities, but a life office is not only always able to do so but willing to do so at a moderate rate of interest, for no office worthy of the name who is without the available money, at short notice. The reason why the rate of interest is low and hould be low is, because the first object is—or should be—to eep its money safer rather than secure the highest rate posble, and, secondly, because unless the security is really good reputable office would entertain it at all.

lethod of Procedure.

The main point is, how is a person to borrow money withut the security, and there are several in this position and are onsequently very much handicapped in their business. But e method is simple; they must get two personal friends to t as surety for them. These two friends must guarantee e repayment of the loan, the interest on same, and the unctual payment of premiums. Figure this out and you will e that the policy itself will automatically adjust the loan d the guarantors only real obligation is the payment of the emiums and the interest on the loan. The loan may be reid at the borrower's pleasure; it is, of course, cheaper to y it off in insalments as often as possible, for then the inrest is declining also.

ustification of Loans.

A few of the opportunities which may occur to justify a an are:—

(1) To buy out a partner.
(2) To insure partner's life to meet his interest in the usiness at his death.
(3) Provision of capital for extension of business.
(4) Rebuilding of premises.
(5) Installation of new machinery.
(6) Financing a big contract.

Many men are aware of the advantages that life offices fford, but very few men are aware of the fact that a life olicy is a negotiable security, the same as any other kind of roperty, and that the fairest money-lenders are life assurnce offices.

The following articles in this series have already apeared:—

MACDONALD COMPANY'S STOCK ISSUE

An issue of 7 per cent. cumulative participating preferred tock of the A. Macdonald Company, Limited, is being offered or subscription in Canada and London, the English portion eing handled by the London Joint Stock Bank, Limited, and e Canadian by the Dominion Bond Company, of Toronto, tc., and the Atlantic Bond Company, St. John, etc.

The sales of the A. Macdonald Company for the year reently ended exceeded seven and a quarter million dollars, an ncrease of over one and three-quarter millions over the preious year. On this basis and taking into account increases or several prior years the conservatively estimated sales for he ensuing year will probably be eight million. On this basis e net earnings for the ensuing year should be $400,000, which s equivalent to 19 per cent. on the issued preferred stock.

The officers of the company are:—President, Mr. G. . Grant, president of Dominion Bond Company; vice-presilent, Mr. T. H. Watson, vice-president Toronto Paper Manuacturing Company, Limited; general manager, Mr. W. P. Riley, president Riley-Ramsay Company; secretary-treasurer, Mr. H. C. Cowdry.

The issue of A. Macdonald common stock in January on which a dividend may shortly be paid, drew public attention o this long-established and growing company which is making apid strides, having at present eleven established branches.

WORLD'S GOLD PRODUCTION IN TWELVE YEARS

Aggregated About Nine Hundred Millions Sterling—Canada Took One Forty-fifth of Total

London is regarded by all nations as the financial centre of the world, and this has been brought about by the necessity of a convenient centre being chosen as a point on which the drawing of bills of exchange might be concentrated, said Sir Edward Holden at the annual dinner of the Manchester Statistical Society. I should like to shortly examine the position of England in regard to its gold reserves, and how that position is affected by the gold question in India, particularly so because of the great dangers to which we should be exposed in case a serious war broke out in which we might become involved.

If America ships cotton to England, Germany, Italy or France, a bill is drawn, as a rule, payable in London. If commodities be exported from this country to America, they are paid for by the importer in America buying a bill on London.

If America imports copper from Chili, Chili draws a bill on London on account of America. If India sells gunny bags to America a bill is drawn from India on London, and so forth.

Imports and Exports Financed by Credit.

This mode of procedure is not only the most economical, but every financial or commercial house which draws a bill on London knows that in case of necessity that bill can be exchanged for gold. Gold is the basis of the whole of the transactions which take place in this country, but you are all well aware that the document which finances your imports and your exports is this bill of exchange.

The bill of exchange is an instrument of credit. When your merchants buy cotton in America, in order to pay for the cotton, there agents over there sell bills drawn payable in London, and, by means of these money is borrowed from the American bankers.

The latter then sell the bills to London financial houses, who purchase them with borrowed money. Subsequently they are sold by the latter to banks, who buy them with a portion of the money borrowed from their depositors. In this way the imports and exports of every country are financed, that is, by borrowed money or by credit.

If imports and exports largely increase, credit must be created correspondingly. Again, when the international trade of any country increases your home industries will increase, and a further increase of credit will follow.

Loans Made to Foreign Countries.

Again, you have another class of credit in the shape of loans which are made to foreign countries. Take, for example, an issue of bonds in London for Canada. The issue may be taken up by a large number of cheques being drawn on accounts with banks here.

Thus the bank issuing the loan receives the amount drawn from many sources, and this amount is concentrated in one credit in place of the former credits. Canada may then sell exchange on London in New York against this credit, by which operation New York becomes the owner of the Canadian credit in London, and Canada becomes the owner of a similar credit in New York.

New York may use that credit to meet the bills drawn on London to pay for the copper shipped to America from Chili, or for the gunny bags shipped from India; on the other hand, Canada may purchase commodities in America with the credit she has obtained there by selling her exchange on London.

The increased trade which we have been experiencing in recent years has arisen largely from the great number of foreign loans which have been issued in London.

Just as I have shown how cotton is financed on borrowed money or on credit, through the medium of bills of exchange which are eventually found in the hands of the banks, so practically every other commodity is imported and exported in the same way, until ultimately the money is obtained from the banks by the discount of the bills.

Manufactories of Credit.

I now come to another class of credit which is the most important of any kind of credit. In the case of bills of exchange, they are drawn at different usances, so there is ample time to prepare for the payment of them, but the credit of which I am about to speak is always liable to be liquidated on demand. This credit is created by banks.

A bank is really a manufactory of credit.

Thus if you apply to your banker for a loan or an overdraft on which you operate by means of cheques, you thereby create credit, because the cheques which you draw are paid in to the credit of some other firm in current account.

If the account of this other firm be kept at the same bank as your own, the loan would appear on one side of the ledger, and the cheques which you draw would appear as credits on the other side of the ledger. You see, therefore, how the loan creates the credit.

It may happen that one bank makes the loan and another bank receives the credit created by that loan.

Those economists who advocate the Quantitative Theory, or the theory that prices depend on the quantity of gold, only touch the fringe of the question.

It is quite evident that, when credit balances are being created by loans day by day, and are being used for the purpose of commodities, it is the increase or decrease of these credits which affects prices to a much greater extent than the actual quantity of gold, although we must always remember that credit is based on gold.

Development in Banking Has Been Large.

In recent years, foreign countries have established many new banking institutions in various parts of the world. Belgium, France, Germany, Italy and Switzerland have established banks in South America and in the East. A large development in banking has also taken place in Russia during the last few years.

All these new banks have been engaged in creating credit in the same way as the banks here create it, and this credit is also being used for purchasing commodities. In view of this, I maintain that prices have been affected much more by these created credits than they have been by the actual gold.

Now, to resume my argument, if the credits of the banks are payable on demand or at short notice, it is necessary that banks should always keep on hand a sufficient reserve either in gold or the means of obtaining gold.

You will, therefore, easily comprehend that if loans continue to increase and the credits thereby are created, the reserves of the banks must at the same time be increased proportionately.

Joint Stock Banks Composite Reserves.

The reserves of the joint stock banks are composite reserves, consisting, first, of gold and silver, secondly, of Bank of England notes, and, thirdly, of the balances kept by the banks with the Bank of England.

It would appear that if a bank desired to convert its notes and its balance with the Bank of England into gold, it might do so, but if the whole of the banks desired to convert their notes and balances into gold, they might not be able to do so. Therefore, we see the necessity for keeping the reserve of the Bank of England at a proper figure.

The basis of credit is gold, and, as credit increases, so gold ought to increase, and the important question arises do we hold a sufficient quantity of gold at the present time to protect the large amount of credit existing?

Gold Equivalent to Sixty-six Per Cent.

The extended use of the cheque has prevented an increase in the amount of Bank of England notes circulating outside the banking department. The average note circulation for the last five years has been about 28½ millions sterling, of which amount about 10 millions, or 34 per cent. is issued against securities, and give us no gold at all, gold being obtained by the remaining portion of the circulation of 18½ millions, that is, the outside circulation of 28½ millions gives us only 18½ millions of gold, or 66 per cent.

Now, turning to that portion of the notes issued which are held in the banking department of the bank, the average amount of these notes for the last five years was about 25 millions.

Of this amount, about 8½ millions, or 34 per cent., has been issued against securities, and 16½ millions, or 66 per cent. against gold; so that 18½ millions of gold is obtained through the outside circulation of notes, and 16½ millions through the notes held in the banking department, making together 35 millions of gold, which is the average amount held for the last five years in the issue department of the Bank of England.

Reserve Is too Small.

We are face to face with the question—is a sum of 16½ millions of gold a sufficiently large amount to be held against the notes in the banking department, having regard to the fact that, even to retain this average, it is necessary to tax the industries and commerce of the country sometimes up to 5 and 6 per cent., and also having regard to the fact that the Bank of England holds a portion of the reserves of the joint stock banks, and, further, that the international trade of this country alone amounts to about 1,237 millions sterling, and still further that the international trade of the world is to a large extent settled through London.

It cannot be wise to live in a fool's paradise, and that is what we are doing at the present time. We are the cen-e of the financial world. The gold which comes from South rica does not belong to us any more than it belongs to her countries. The highest bidder takes it. It simply sses through London to other places.

Everyone admits the amount of gold here is too small, and therefore ask what can be done to increase it.

orld's Gold Production.

The world's total production of gold during the last elve years has been about 900 millions sterling, which has en distributed approximately as follows:—

£207,000,000	used in the industries.
80,000,000	to South America.
160,000,000	to the United States.
190,000,000	taken by the Banks of Issue in Europe.
100,000,000	to India.
20,000,000	to Canada.
22,000,000	to Australasian and South African Banks.
121,000,000	to other Banks, circulation and private holdings.
£900,000,000	Total.

One hundred millions of this total, that is, one-ninth of total gold production of the world for the last twelve ars, has been absorbed by India. In all other cases where ld has been taken by banks or by countries it has been her for the purpose of currency or for the basis of their nking systems, while in India, although a small propor- n may be used for currency, yet the great bulk of it ap- ars to have been hoarded.

Out of the above total of 900 millions, the Bank of Eng- d during the last twelve years has only increased its stock three millions. About 30 millions has been used in the dustries, and 25 millions has gone into the joint stock nks.

◆

FINANCIAL OFFERINGS

An issue of $2,000,000 Montreal Tramways bonds is be- offered to the public by Messrs. N. W. Harris and Com- ny. The proceeds of the new issue, it is said, will be util- d in part payment of some of the extensions and improve- nts planned for 1913.

The Marcil Trust Company, of Montreal, will offer an ue of $150,000 six per cent. first mortgage bonds, one of features of which is the quarterly payment of interest. e bonds are issued in denominations of $100, $500 and ,000.

The Royal Securities Corporation, Limited, is placing the market $230,000 7 per cent. cumulative preference ck of the Toronto Structural Steel Company, carrying th it a 50 per cent. bonus in common shares. The com- ny was organized three years ago by Mr. R. E. Nicholson, o had been engaged in the steel business in Toronto for previous eleven years.

The proceeds of the present issue will be used to finance construction of the new works near Weston, which, hav- a 15,000 ton capacity, will comprise one of the largest uctural steel plants in Canada. There will also be ample sides to provide working capital.

Of the $1,000,000 capital consisting of $500,000 preferred d $500,000 common stock, $300,000 of each has been issued. e same may be said of the common stock. The company s no bonded indebtedness and no encumbrance on any of properties.

On an output of 2,300 tons during the year 1912, the mpany showed net profits, after making ample provision depreciation, etc., of $12,123.15. It is estimated that in current year, after meeting preferred dividends, there ll be a sum sufficient to give 15 per cent. on the new com- on stock issue.

◆

PERSONAL NOTES

Dr. H. A. Wardell, M.B., has been appointed as medical eree of the Federal Life Assurance Company of Canada.

Mr. Pardoe, of the firm of Messrs. Avern Pardoe and Com- ny, members of the Toronto Stock Exchange, left this ek for London on a business trip.

Mr. Lorne L. Thompson, a well-known young Toronto oker, until recently connected with Messrs. Campbell, ompson and Company, died suddenly at his residence on onday.

Mr. William Molson Macpherson, of Quebec, has been cted a director of the Grand Trunk Railway, to replace the e Sir William Whyte. Mr. Macpherson is already a mem- r of the Grand Trunk Pacific directorate, but he is the first nadian director of the Grand Trunk proper.

LEGAL NOTICE

HENRY HOPE & SONS OF CANADA, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 4th day of March, 1913, incorporating Henry Donald Hope, of the City of Birmingham, in that part of Great Britain and Ireland called England, manufacturer; Alexander Liddell Young, manager, and James Munro Sinclair and Thomas Edward Aikenhead, gentlemen, of the City of Toronto, in the Province of Ontario; and David McGill, of the City of Montreal, in the Province of Quebec, gentleman, for the following purposes, viz.:—(a) To carry on the business of manufacturers of and dealers in steel window sashes, door and window casements, fanlight opening gear, leaded lights, stained glass, glass windows, glass doors and glass roofing; window and door locks and fasteners, door knobs and latches and all manner of door and window fittings; cast lead, cast iron and other metal rainwater goods and accessories, and all manner of contractors' and builders' supplies and material; (b) To carry on any other business, whether manufacturing or otherwise, capable of being conveniently carried on in connection with its business or calculated directly or indirectly to enhance the value of or render profitable any of the company's property or rights; (c) To acquire or undertake the whole or any part of the business, property and liabilities of any person or company carrying on any business which the company is authorized to carry on or possessed of property suitable for the purposes of the company; (d) To apply for, purchase or otherwise acquire any patents, licenses, concessions and the like, conferring any exclusive or non-exclusive or limited right to use or any secret or other information as to any invention which may seem capable of being used for any of the purposes of the company or the acquisition of which may seem calculated directly or indirectly to benefit the company, and to use, exercise, develop or grant licenses in respect of or otherwise turn to account the property, rights or information so acquired; (e) To enter into partnership or into any arrangement for sharing of profits, union of interest, co-operation, joint adventure, reciprocal concession or otherwise with any person or company carrying on or engaged in or about to carry on or engage in any business or transaction which the company is authorized to carry on or engage in, or any business or transaction capable of being conducted so as to directly or indirectly benefit the company; to lend money to, guarantee the contracts of or otherwise assist any such person or company, and to take or otherwise acquire shares and securities of any such company, and to sell, hold, re-issue with or without guarantee, or otherwise deal with the same; (f) To take or otherwise acquire and hold shares in any other company having objects altogether or in part similar to those of the company or carrying on any business capable of being conducted so as directly or indirectly to benefit the company; (g) To enter into any arrangements with any authorities, municipal, local or otherwise, that may seem conducive to the company's objects, or any of them, and to obtain from any such authority any rights, privileges and concessions which the company may think it desirable to obtain and to carry out, exercise and comply with any such arrangements, rights, privileges and concessions; (h) To establish and support or aid in the establishment or support of associations, institutions, funds, trusts and conveniences calculated to benefit employees or ex-employees of the company, or its predecessors in business, or the dependants or connections of such persons, and to grant pensions and allowances, and to make payments towards insurance, and to subscribe or guarantee money for charitable or benevolent objects, or for any exhibition or for any public, general or useful object; (i) To promote any company or companies for the purpose of acquiring or taking over all or any of the property and liabilities of the company, or for any other purpose which may seem directly or indirectly calculated to benefit the company; (j) To purchase, take on lease or in exchange, hire or otherwise acquire any personal property and any rights or privileges which the company may think necessary or convenient for the purposes of its business and in particular any machinery, plant and stock-in-trade; (k) To construct, improve, maintain, manage, carry out or control any roads and ways, tramways, branches or sidings on lands owned or controlled by the company, bridges, reservoirs, wharves, manufactories, warehouses, electric works, shops, stores and other works and conveniences which may seem calculated directly or indirectly to advance the company's interests and to contribute to, subsidize or otherwise assist or take part in the construction, improvement, maintenance, working, management, carrying out or control thereof; (l) To lend money to customers and others having dealings with the company, and to guarantee the performance of contracts by any such persons; (m) To draw, make, accept, endorse, execute and issue promissory notes, bills of exchange, bills of lading, warrants and other negotiable or transferable instruments; (n) To sell or dispose of the undertaking of the company or any part thereof for such consideration as the company may think fit, and in particular for shares, debentures or securities of any other company having objects altogether or in part similar to those of the company, if authorized so to do by the vote of a majority in number present or represented by proxy at a general meeting duly called for considering the matter and holding not less than two-thirds of the issued capital stock of the company; (o) To adopt such means of making known the products of the company as may seem expedient and in particular by advertising in the press, by circulars, by purchase and exhibition of works of art or interest, by publication of books and periodicals and by granting prizes, rewards and donations; (p) To sell, improve, manage, develop, exchange, lease, dispose of, turn to account or otherwise deal with all or any part of the property and rights of the company; (q) To do all or any of the above things and all things authorized by the letters patent or supplementary letters patent as principals, agents, contractors, trustees or otherwise and either alone or in conjunction with others; (r) To do all such things as are incidental or conducive to the attainment of the above objects. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Henry Hope & Sons of Canada, Limited," with a capital stock of two hundred and forty thousand dollars, divided into 2,400 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 6th day of March, 1913.

THOMAS MULVEY,
Under-Secretary of State.

36-2

CORLEY, WILKIE & DUFF,
Solicitors for Henry Hope & Sons of Canada, Limited.

Montreal, February 25th, 1913.

DIVIDEND NOTICE

CANADIAN GENERAL ELECTRIC COMPANY, LIMITED

Common Stock.

Notice is hereby given that a quarterly dividend (No. 55) of 1¾ per cent. for the three months ending the Thirty-first day of March, 1913, being at the rate of 7 per cent. per annum, has been declared on the Common Stock of the Company.

Preference Stock.

Notice is also given that a Half-yearly dividend (No. 34) of 3½ per cent. for the six months ending the Thirty-first day of March, 1913, being at the rate of 7 per cent. per annum, has been declared on the Preference Stock of the company.

The above dividends are payable on the first day of April, 1913, to shareholders of record at the close of business on March 15th, 1913.

The Transfer Books of the Company will not be closed.

By order of the Board.

J. J. ASHWORTH,
Secretary.

Toronto, March 5th, 1913.

Arrangements are said to be under way for the financial reorganization of the Diamond Flint Glass Company. American interests, it is understood, are taking a large share in the reorganized company. The bonds outstanding were due on January 1st last and this, it is believed, has some bearing on the re-financing plan. The scheme for the re-financing of the company is said to provide for a total capital of approximately $8,000,000 in bonds and stock, as compared with a capital on June 1st last of $595,850 bonds, $400,000 preferred stock, and $2,898,000 common stock.

CONDENSED ADVERTISEMENTS

Advertisements on this page will be accepted hereafter at the following rates :—"Positions Wanted" advts. one cent per word each insertion; "Positions Vacant," "Agents or Agencies Wanted" advts. two cents per word each insertion; all other advertisements, three cents per word each insertion. A minimum charge of 50 cents per insertion will be made in each case.

THE Incorporated 1875
MERCANTILE FIRE
INSURANCE COMPANY
All Policies Guaranteed by the LONDON AND LANCASHIRE FIRE INSURANCE COMPANY OF LIVERPOOL.

Messrs. Henry L. Doherty and Company are offering
rough a syndicate of brokers $3,500,000 one-year 6% con-
ertible notes of the Gas Securities Company, dated March
oth, at par and interest. These notes are convertible within
e thirty days from May 10th into 6 per cent. preferred stock
f the Utilities Improvement Company with 30 per cent. of
e common stock of this company. The amount of common
tock given with the preferred in the note conversion will drop 1 per cent. for each month until at time of maturity it will be 20 per cent. In connection with the issue of these notes $3,500,000 of Utilities Improvement preferred has been sold to an English syndicate, the notes sold here representing the same amount of preferred stock held for their conversion. A meeting of more than two hundred brokers from all parts of the country was at 60 Wall Street to discuss the placing of these notes.

The value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

LEGAL NOTICES

McFARLANE-PRATT-HANLEY, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the seal of the Secretary of State of Canada, bearing date the 10th day of February, 1913, incorporating Robert Samuel McFarlane and John Hanley, contractors; David Shear Pratt, lumber merchant, and Florence Isabella McFarlane and Mary Hanley, married women, all of the town of Midland, in the Province of Ontario, for the following purposes, viz.:—(a) To construct, acquire, own, maintain and operate, hire, lease, sell or otherwise dispose of and to contract for the erection or construction of buildings, wireless stations, stores, warehouses, elevators, docks, dry docks, wharves, derricks, dredges, drills, viaducts, vessels, ships, scows, tunnels, tracks, bridges, canals and breakwaters and other like works of internal improvement or public use or utility, including the erection and construction but not operation of railways and tramways and generally to contract for, build, construct and equip public and private works; (b) To invest in and acquire and hold the bonds, debentures and stock of other companies with which the company hereby incorporated is empowered to contract, and; (c) To distribute amongst the shareholders of the company in kind any property of the company and in particular any shares, bonds, debentures or securities of any other companies belonging to the company hereby incorporated or of which the company hereby incorporated may have the power of distribution; (d) To manufacture, produce, buy, sell and deal in articles, tools, machines, metals, building materials and all articles composed or manufactured in whole or in part of iron, steel or other metal or wood, clay, cement, stone or other material or combination of any of them, and particularly all articles which might be of use in the carrying on by the company of any business mentioned as one of the objects of this incorporation; (e) For the purpose above to carry on the business of electricians, mechanical engineers and manufacturers and workers and dealers in compressed air, gas, electricity, motive power, heat and light, and to construct, maintain and operate works for the supply and distribution of compressed air, gas and electricity for light, heat and power; (f) To purchase or otherwise acquire and to sell, develop, work or otherwise deal with land, water, water power, water power supplies and water power work and equipment or works; (g) To purchase or otherwise acquire, hold, maintain, operate, sell and otherwise dispose of stone quarries and the stone taken therefrom and the products thereof; (h) To manufacture, buy, sell and deal in goods, wares and merchandise; (i) To carry on any other business, whether manufacturing or otherwise, which may seem to the company capable of being conveniently carried on in connection with its business or calculated directly or indirectly to enhance the value of or render profitable any of the company's property or rights; (j) To acquire or undertake the whole or any part of the business, property and liabilities of any person or company carrying on any business which the company is authorized to carry on, or possessed of property suitable for the purposes of the company; (k) To enter into partnership or into any arrangement for the sharing of profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise with any person or company carrying on or engaged in or about to carry on or engage in any business or transaction which the company is authorized to carry on or engage in, or any business or transaction capable of being conducted so as directly or indirectly to benefit the company, and to lend money to, guarantee the contracts of or otherwise assist any such person or company, and to take or otherwise acquire shares and securities of any such company, and to sell, hold, re-issue, with or without guarantee, or otherwise deal with the same; (l) To buy, sell, trade, deal in or guarantee the debentures, bonds, stock or other securities of any government or of any municipal corporation or school corporation or any chartered bank or any incorporated company, and to accept said securities or any of them in payment or in part payment for any works carried on by the company; (m) To take or otherwise acquire and hold shares in any other company having objects altogether or in part similar to those of the company or carrying on any business capable of being conducted so as directly or indirectly to benefit the company; (n) To purchase, take on lease, or in exchange, hire or otherwise acquire any personal property and any rights or privileges which the company may think necessary or convenient for the purposes of its business; (o) To do all such other things as are incidental or conducive to the attainment of the above objects. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "McFarlane-Pratt-Hanley, Limited," with a capital stock of fifty thousand dollars, divided into 500 shares of one hundred dollars each, and the chief place of business of the said company to be at the city of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 11th day of February, 1913.

THOMAS MULVEY,
Under-Secretary of State

CANADIAN ICE MACHINE COMPANY, LIMITED.

PUBLIC NOTICE is hereby given that under the First part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the seal of the Secretary of State of Canada, bearing date the 27th day of February, 1913, incorporating William Stewart Shipley, of the city of New York, in the State of New York, one of the United States of America, refrigerating engineer; Charles Edward Allison, of the city of Toronto, in the Province of Ontario, refrigerating engineer; and Arthur William Patrick Buchanan, King's Counsel; Thomas Sargent Owens, advocate, and Harry McIntyre, accountant, of the city of Montreal, in the Province of Quebec, for the following purposes, viz.:—(a) To carry on the business of manufacturers of and dealers in all kinds of ice making and refrigerating machinery and supplies incidental to or used in connection with the installation or operation of such machinery; (b) To construct, install and operate refrigerating and cold-storage plants; (c) To acquire, purchase, sell and deal in, supply, manufacture and produce all merchandise, material, supplies, machinery and other articles connected with insulation; (d) To carry on the business of builders and contractors for the purposes of the company; (e) To establish, maintain and carry on [illegible] shops and offices; (f) To acquire by purchase, lease, exchange or otherwise, and to hold, either absolutely as owner or as agent, such property, lands and buildings as may be necessary and requisite for the purposes of the company's business, and to erect and construct buildings, factories, shops or works of every description thereon, and to rebuild, enlarge, alter or improve the buildings existing thereon and to sell, lease, dispose of and exchange the said lands, buildings and other property; (g) To purchase or otherwise acquire and undertake all or any part of the assets, business, good-will, property, privileges, contracts, rights, obligations and liabilities of any person or [illegible] carrying on any business which this company is authorized to [illegible] and to pay for the same in stock, bonds, debentures or securities [illegible] to take, receive and hold as a consideration for any materials, products or property sold or otherwise disposed of, or for goods supplied or for work done by contract or otherwise, shares, debentures, or other securities of or in any other company having objects similar to those of the company, or utilizing the products of the company, and to sell or otherwise dispose of the same; (i) To raise and assist in raising money for and to aid by way of bonus, loan, promise, endorsement, guarantee of bonds, debentures or other securities or otherwise any corporation in the capital stock of which the company holds shares, or with which it may have business relations; to act as employee, agent or manager of any such corporation, and to guarantee the performance of contracts by any such corporation, or by any person or persons with whom the company may have business relations; (j) To lease, sell or otherwise dispose of the undertaking of the company or any part thereof for such consideration as the company may deem proper and in particular for shares, debentures or securities of any company having objects in whole or in part similar to those of this company; (k) To acquire, hold, sell, assign or otherwise dispose of shares in the capital stock, bonds, debentures or other securities of any other corporation or corporations carrying on a business in whole or in part of a similar nature to that of this company, notwithstanding the provisions of section 44 of the Companies Act; (l) To acquire, hold, lease sell, assign, grant licenses in respect of or otherwise dispose of patents patent rights, licenses and privileges, inventions, all improvements and processes, trade marks and trade names relating to or useful in connection with any business of the company, and to pay for the same either in cash or in shares of the company, or part in cash and part in shares of the company; (m) To pay for any business, right, franchise or property acquired by the company by full paid-up shares of the capital stock of the company, or otherwise howsoever; (n) To consolidate or amalgamate with any other company having objects similar in whole or in part to those of this company; (o) To enter into partnership or into any arrangement for sharing of profits or union of interest with any person or company carrying on or engaged in any business or transaction which the company is authorized to carry on or engage in, or germane thereto, and to make advances to, guarantee the contracts of, or otherwise assist any such person or company, and to take or otherwise acquire shares and securities of any such company, notwithstanding the provisions of section 44 of the said Act, and to sell, hold or otherwise deal with the same; (p) To do all acts and exercise all powers and carry on all business incidental to the due carrying out of the objects to which the company is incorporated and necessary to enable the company to profitably carry on its undertakings. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Canadian Ice Machine Company, Limited," with a capital stock of seventy-five thousand dollars divided into 750 shares of one hundred dollars each, and the chief place of business of the said company to be at the city of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 28th day of February, 1913.

(Signed) THOMAS MULVEY,
Under-Secretary of State.

WHITE & BUCHANAN,
Solicitors for the Applicants.

WHERE DOES THE CORN GO?

What has become of this enormous amount of corn, referring to last year's yield, to hold the market so firm? asks The Wall Street Journal.

Some light may be thrown on the matter by studying the census distribution of the crop of 1909. From those figures it appears that over 80 per cent. of the crop is consumed on the farms. Later, at least 50 per cent. of the crop finds its way from the farms to the consuming markets in the shape of meat, milk, butter and eggs. The cotton mule works on corn, and his driver most likely works on corn bread and bacon (which is only condensed corn) and 90,000,000 bushels are consumed directly as human food. Farm draught animals take 27 per cent. of the average crop. The result of their toil comes to the market in the form of cereal foods, potatoes, cotton and other necessary commodities. Animals engaged in lumbering, coal and trucking industries consume about 5 per cent.

Corn finds a constantly expanding market in the industrial uses. Of the 1909 crop the mills took 245,000,000 bushels. This equals 9 per cent., of which a portion will return to the farms. Starch and glucose took 1.5 per cent. of the crop. Distilleries consumed 20,000,000 bushels; while 15,000,000 bushels went into the brewing industry. These two together amount to something over 1 per cent. Seed takes 25,000,000 bushels, and a portion is held over from year to year as a reserve.

Northern and western Europe uses corn, but does not raise it to any extent. The European demand must be mainly supplied by Northern America, Southwestern Europe and South Africa.

◆

The number of directors of the Finance Corporation of Canada, Limited, has been increased from three to seven.

Moosomin, Sask., advantages, attractions and developments have been effectively described in an illustrated brochure issued under the authority of the Moosomin board of trade.

The capital stock of the L. H. Packard and Company, Limited, has been increased from $95,000 to $300,000, such increase consisting of 2,500 shares of $100 each.

BOND NOTES

Victoria has three million three hundred and ninety-five thousand dollars' worth of long-term bonds that will be directly ready for the market, stated Alderman Cuthbert, late chairman of the city finance committee, in a recent interview. In addition there are some eighty or ninety local improvement bonds which will total about $1,100,000, making a total amount of bonds available of $4,500,000.

Now as to the disposition of these funds, one million will remain on deposit in the bank to be maintained there at a fair rate of interest for the retirement of the treasury bills which become due in October next. Then there is also the following amount to be disposed of for works in this year: $650,000 for sewers (apart from the amount already expended last year, chargeable to this account); $625,000, Sooke Lake; $50,000 for waterworks; $225,000 for Jubilee Hospital; $290,000 for schools; $85,000 for the jail; making a total of $1,975,000.

Now, while we shall realize something like $1,000,000 from the sale of the local improvement bonds we are now ready to put on the market, and which will reduce the floating liability by so much, yet it will take from one to tw years to get down to some businesslike proposition, becau while a portion of the $1,100,000 will go to meet the trea ury bills and a portion to reduce the overdraft, the third po tion will be used in closing up some of these other by-law and it is a question if the overdraft can be reduced ve much.

The council will be in a position to use this mon which comes in from the sale of the present local improv ments debentures to complete works in hand, and when the are completed there is at least a million dollars which d not have to be paid out, and which will reduce the floatin debt by one-third of its present size.

Four offers were received for the $48,334.03 Wetaskiwi Alta., debentures. The award was made to Messrs. Terr Briggs and Slayton, of Toledo Ohio. The other bids w from Messrs. Wood, Gundy and Company, Toronto; Imp ial Bank of Canada, and the Western Securities Corporatio

Five Toronto bond houses bid for the $30,000 5 p cent. 30-year good road debentures of Peel County, Ontar As previously noted, the offer of Messrs. C. H. Burgess a Company was accepted.

VIEWS ON STOCK INVESTMENT

A reader of The Monetary Times has written asking for suggestions for the investment of $25,000. In addition to sending the desired information, we asked several reputable brokerage firms for their ideas also, to be forwarded to our correspondent, who first wrote, "I feel that this year, I would like to invest my income in some good stock or stocks so that I would have some funds always immediately available should I at any time require them. If you consider the present a favorable time to begin buying, I shall feel obliged if you will direct my attention to some Canadian stock or stocks which you may consider a good purchase."

An examination of the situation shows that the prices generally of good stocks are low, with excellent prospects. The time for investment, therefore, seems opportune. The views of the brokers with whom we communicated agree on that score. The general feeling is that with present money market conditions, not only in Canada but also abroad, investments may now be made to as good, if not better advantage, than later when the situation is more normal.

It will be of interest to readers of The Monetary Times to know what stocks were suggested by the various brokers for the investment of the $25,000. Here they are:—

Canadian Pacific Railway.
Monarch Knitting Company.
Canada Interlake Line.
Imperial Bank.
Mackay Companies.
Dominion Bank.
Canada Permanent Mortgage Corporation.
Winnipeg Electric Railway.
Twin City Rapid Transit Company.
Brazilian Traction Light and Power Company.
Sawyer Massey Company, preferred.
Canadian Bank of Commerce.
Canadian General Electric Company.
Canada Cement, common.
Bell Telephone.
Dominion Steel, preferred.
Lake of Woods Milling Company, preferred.
Ogilvie Flour Mills, preferred.
Richelieu and Ontario Navigation Company.

Of that list, Canadian Pacific Railway, Winnipeg Electric and the Mackay Companies were the favorites, being mentioned by nearly all our correspondents. For the particular case under notice, the concensus of opinion was that Canadian Pacific Railway stock was the most suitable, there probably being no stock, or other security, which is so acceptable as collateral throughout the world. For that reason, funds are always available for a holder of that stock, even if he did not wish to sell. The price of these shares are about 224. The return on the investment is not so large as in some other issues, but the prospects of the railway are so good that the likelihood is there will be considerable enhancement in the value of the shares during the coming years. The market for these shares is so wide that they can be disposed of at any time.

With regard to the Mackay Companies, it is noted that the prospects of this concern are good. A weakness, perhaps, is the little information that the shareholders are permitted to receive from the trustees. As against this, however, the control of the company is in the hands of able and honest men, who state that the earnings are increasing and the business is satisfactory. The present price in the market is 80 and the dividend is 5 per cent. At this figure the return on the money invested is 6.25 per cent., and the stock is readily saleable.

Respecting the Winnipeg Electric Railway, that stock has and may fluctuate considerably, on account of rumors of change of control. On its merits, however, the stock is well chosen. Several bank stocks were recommended. They are high priced as a rule, but enjoy a steady market. The dividends generally are large. The double liability naturally makes certain investors shy of these stocks as a class. One of the most interesting conclusions revealed by a careful examination of the long list of Canadian listed stocks, is the fact that so many excellent purchases are available to the conservative investor.

NEEDED AT HOME

Mr. H. Pollman Evans, president of the Union Life Insurance Company, is in Europe. That circumstance combined with the facts that English investors subscribed at a premium to more than $600,000 of the company's stock, paid cash for it, were guaranteed a dividend of six per cent. for three years, and have received only one dividend, the second being overdue, creates a situation which demands the immediate presence of Mr. Evans in Canada. The Monetary Times has previously analyzed the position of the company which, to say the least, is one which must cause grave anxiety to the company's policyholders and the small stockholders, more especially the English investors. The company has control, too, of the Home Life Association, which has a strong foundation, but the directorate of the two companies is now practically a Union Life directorate. Mr. Evans' return to Canada is therefore doubly imperative. The policy of the two companies apparently awaits Mr. Evans' pleasure. Seemingly, no one is willing to make a move until he, as president, is back on the job as advisor. Meantime, the English shareholders are left in darkness and in trepidation as to their funds.

It is quite evident that the affairs of the Union Life need attention right away, but everywhere almost we hear that "Mr. Evans, the president, is away." It is time Mr. Evans, the president, was home again, setting his financial house in order. If he does not recognize the need of his presence in Toronto, the Department of Insurance should, The Monetary Times contends, take a more active part in the situation than has hitherto been the case.

'WARE FOX

Not long ago, oil gushed feebly in Alberta, and money was more plentiful than it is to-day. Hundreds of oil companies were incorporated, and stock was sold to small investors. Then the oil gushes became indolent and in most cases refused to work. Finally, the other day, the Provincial Secretary of the province cancelled the charters of 132 oil companies, because paper and oil are two different matters.

During the past few weeks, a large number of silver fox companies have been formed in the Maritime provinces, chiefly Prince Edward Island. Fox farming has become fashionable, both for promoters and investors. Money has been made in this industry and therein lies the danger for the man who has a little to invest.

Fox farming, from the financial viewpoint, has three important considerations. First, there is the value of foxes sold for breeding purposes. Then there is the value of the pelts, which varies from $300 to $2,500, according to the quality of the pelt. Finally there is the price paid by the investor for his stock or bonds of fox farming companies and the security.

The industry being in its early stages has created a great demand for breeders. These are desired by people who wish to start in the business. Consequently, prices have ruled high. In 1910 foxes were sold for breeders at from $3,000 to $4,000 per pair; i.e., not far above their fur value. In 1911 prices rose to $5,000 a pair, and about littering time, early in 1912, one pair sold for $20,000. In the latter part of 1912 old breeders were variously valued at from $18,000 to $35,000 a pair. This phase will pass in time, as numerous ranches will transform, to a large extent, the market for breeders into a market for pelts. The value of the silver fox will then be determined by its fur value and not by the prices now being paid for breeders. The growing supply of pelts will necessarily lower their price. These are facts which should be borne in mind by those who think of investing hard earned money in our fox companies.

A writer of the Commission of Conservation sounds a timely warning in that respect. "While there is undoubtedly a sound basis for building up a paying industry in fox-farming," he says, "the public should weigh the matter seriously before investing their money in companies whose capitalizations are based on the remarkably high prices now prevailing for breeding stock. It should not be overlooked that nearly all those who have made large fortunes in the business have done so by selling stock for breeding purposes, not for their pelts."

An indication of the feverish state of speculation in this business is found in the fact that many of the unborn pups of 1913 have already been purchased and are partly paid for. That, obviously, is taking a long chance with Nature. Maritime province promoters are quite alive to modern financial methods. One fox company has already made a bond issue with a bonus of common stock. But after all, aside from the guarantee of a certain number of young foxes, given by the vendors of this particular company's animals, the bond interest depends entirely on the mood of the fox in its relation to the live stock census. The investor, therefore, has every reason to exercise the greatest caution in his patronage of the latest channel for the absorption of his funds.

TIGHT MONEY IN DISTANT LANDS

Tight money is not only an inconvenience in Great Britain, Canada and the United States, but it has spread its influence even to Jerusalem. There the Balkan war has cast its effects. Mr. P. T. C. McGregor, the British Consul, reported at the end of January that Jerusalem was then suffering from a severe financial crisis, caused by a glut of metalliks imported from Tripoli and Macedonia. In Jerusalem silver piastres are unknown, and francs are the usual silver currency, whilst metalliks are the only coin in common use among the people. Three and one-fifth metalliks are the usual equivalent of a piastre, and the Napoleon has an average value of 109 piastres in metalliks. Now, however, the Napoleon is worth 160 piastres in metalliks, and the nickel and copper coinage is a drug in the market. For some months past, the Central Government have paid 5 per cent. of the salaries of officials in nickel coin, and local speculators have endeavored to reap an easy harvest by importing cheap nickel and copper and sending "mejidiés" and "bashliks" to Jaffa and Beirut. The consequence was that shop-keepers and Government offices, including the Post Office, refused to accept metalliks except at exorbitant rates. After some days, the municipality was authorized to open certain bakeries to supply bread at usual prices, and the metallik was then accepted at the rate of four to the piastre. It was also announced that the old bronze metalliks were to be withdrawn, and the panic was somewhat allayed, the Napoleon then having a value of 136 piastres in metalliks.

The prices of all articles of ordinary consumption have risen considerably, and it is thought in local financial circles that the situation may become a cause of still more serious trouble unless the Government take some far-reaching measures.

These are further indications of the world-wide stringency and of the harmful effects of war.

CANADA'S FIRE WASTE

The fire losses in Canada for the first two months of the current year total $5,950,771, an average of $2,975,385 per month. This is equal to a daily loss of $100,860. In other words $4,202 worth of property has been burned every hour since the new year dawned, or $70 every minute. This is largely an extravagant waste of capital. The losses as compiled by The Monetary Times during 1909, 1910, 1911 and 1912 are as follow:—

	1909.	1910.	1911.	1912.
January	$1,500,000	$1,275,246	$2,250,550	$3,002,650

October	2,208,715	2,195,781	580,750	1,416,218
November ...	935,191	1,943,708	1,506,500	1,184,010
December	1,433,813	1,444,860	2,866,950	1,769,905
	$18,905,538	$23,593,315	$21,459,575	$22,900,712

Adding to these figures the total loss for the first two months of 1913, we have a fire loss in fifty months of $92,809,911, an average monthly loss of $1,856,198.

In addition, there has to be recorded a disastrous list of fire fatalities. During February in Canada 21 people met their deaths in fires. During the first two months of the year 35 people were sacrificed in the same manner. In the fifty months since January, 1909, no less than 1,030 persons lost their lives in fires, a monthly average of almost 21 persons. The following table gives the details:—

	1909.	1910.	1911.	1912.	1913.
January	16	27	27	27	14
February	8	15	12	11	21
March	16	20	18	24	..
April	18	37	20	15	..
May	21	15	28	18	..
June	16	52	13	6	..
July	4	15	110	9	..
August	17	11	22	16	..
September	10	10	13	6	..
October	26	16	17	21	..
November	34	19	20	22	..
December	33	19	17	28	..
Totals	219	256	317	203	35

In February eleven deaths were caused by burning buildings, six by clothes catching fire, two by coal oil explosions, and one each by playing with matches and fire caused by railway collision.

Of the presumed causes for fires during February, 13 were attributed to defective chimneys and flues, 32 overheated stoves and furnaces, 12 matches, 10 overheated stovepipes, 9 defective stoves and furnaces, 8 thawing pipes, 9 electrical defects, 7 hot ashes, 5 heaters, 4 spontaneous combustion, 4 gas jets, 3 sparks, 3 cigar stubs, 3 candles, 3 lamps exploded and upset, 3 gasoline, 2 defective stovepipes, 2 lighted torches, 1 clothing left near stove, 1 locating gas leak with light, 1 children set pillow alight, 1 incendiary, 1 gas stove, 1 friction, 1 upset gasoline stove, 1 hot journal, 1 smoking in bed, 1 coal oil stove ignited straw, 1 salamander set cotton alight.

The alarming statistics respecting Canada's fire waste may be used as an excellent reason for the celebration of a Fire Prevention Day in Canada. On such a day everything possible should be done to remind the individual of his responsibility in the matter of fire waste, and the subject is one which must be dinned into the public ear every day. We might allot one day a year on which to make a din that would be remembered for many months. Burning property at the rate of $70 every minute this year is a record of which no Canadian citizen can feel proud.

FUEL FROM STRAW

The waste of by-products in Western Canada especially has been noticeable. The chief reason is that time is too valuable and labor too scarce to earn a difficult dollar when an easy dollar calls attractively. So coal dust is wasted, straw is burned by hundreds of tons, and other by-products are sacrificed to the demands of a new country. Many schemes have been mooted to utilize straw in the prairie provinces for commercial purposes. So far, their success has been negligible.

A Dr. Andrews is now trying to convince the Regina board of trade that in straw an everlasting coal mine has been discovered. Regina city's coal bill, not counting that of the individual citizens, during last year cost about $75,000, and consisted of less than 10,000 tons. Within a radius of 20 miles of the city, Dr. Andrews stated there is material for the production of 375,000 tons of briquettes from straw, at a cost of about $2 per ton. As a binder for the briquetting, Dr. Andrews proposes to use potatoes, which can be grown cheaply on the prairies. The board of trade decided to petition the Provincial Government to make an appropriation to permit Dr. Andrews to continue his experiments.

The Saskatchewan Government will undoubtedly prove that Dr. Andrews' scheme has been advanced by him beyond the early experimental stages, before they make a grant, as the Regina board of trade proposes. Science has made much progress in the past few years, and makes it dangerous to be too skeptical in these days. On the other hand, the Provincial Government should keep its eye on the treasury a long while before it parts with money to see if Regina can keep warm on a prescription of straw and potatoes.

SMALL CHANGE

The national watchword for 1913—"Economy."

* * * *

One day, perhaps, the Macleans, MacLeans and McLeans will try uniform spelling.

* * * *

An Amherst child was born with three hands—evidently preparing for the Canadian shipbuilding boom.

London underwriters took 60 per cent. of a Government guaranteed British Columbia railway issue, indicating what a picksome appetite the British investor still has.

INSURANCE ACT FOR ALBERTA

Designed to Protect Policyholder — Every Certificate Must Bear Mark of Registration—Hail Insurance Act Repealed

The Alberta insurance act has been tabled in the provincial legislature at Edmonton. This act provides that insurance companies doing business in the Province of Alberta shall pay license fees which promise to be a considerable source of revenue, but the act is primarily designed as a protection to policyholders. To insure security of policyholders the act provides that every company doing business in the province shall deposit with the provincial treasurer a sum bearing relation to the amount of risks undertaken by it and every company must furnish information as to its capital and assets and liabilities to superintendent of insurance who will be appointed.

Covers All Kinds of Insurance.

Any failure to publish an annual statement or to furnish information when requested to do so involves a penalty, and where the provincial treasurer has evidence that the assets have sunk below amount necessary to meet the unearned premiums and other liabilities or where undisputed claims remain unpaid for sixty days after notice has been given he may cancel the license of the company. Every certificate of insurance after the passing of the act will be required to bear the mark of registration under the provincial act.

Last session a hail insurance act was passed, allowing private companies to do hail insurance business previously done by the provincial government, which act provided for a deposit to be paid to the provincial treasurer, but other kinds of insurance companies were not compelled to make a deposit. The present act covers all kinds of insurance companies and repeals the hail insurance act.

Deposits Fixed by the Act.

The amount of these deposits as fixed by the act is as follows:—

Every joint stock company if provincial $10,000, and if foreign $20,000; except plate glass insurance companies which shall deposit $3,000 for benevolent, provident, industrial or co-operative insurance societies not incorporated under the Dominion act $10,000, but if doing only sickness and funeral benefit insurance $2,000; provincial mutual fire or fire and marine insurance companies, $5,000; while if risks in any one year exceed $1,500,000, then for each one and a half millions or fraction of that amount, the company is required to deposit an additional sum equal to one-half of the original deposit, or if the provincial company shall keep on deposit $200 for every $100,000 by which the total contingent liability is exceeded.

* * *

The average cedar pole is cut from a tree about 190 years old, and if put in place, untreated by any chemical preservative, it will decay and become useless within 14 years. It is evident from these facts that the supply of cedar poles is doomed to speedy destruction.

The first annual meeting of the Consolidated Milk Company, Limited, a newly organized concern formed by milk producers of Ontario and Quebec, to supply and distribute milk products in Montreal, was held at Montreal with Mr. C. A. McNee, of Montreal, in the chair. Secretary W. F. Stephen reported that over $125,000 of the capital stock of $300,000 had been paid up. The election resulted as follows: President, Mr. C. A. McNee; vice-president, Mr. Malcolm Smith, Lachute; secretary, Mr. W. F. Stephen, Huntingdon; treasurer, Mr. B. W. Allen, Huntingdon; directors, president, vice-president, and the following: Messrs. T. O. Bourdon, Chateauguay; George E. Baird, Ormstown; W. R. Stewart, Huntingdon County; J. F. McRae, Bainville, Glengary County.

That over 100,000,000 bushels of wheat have to pass through Regina on its way to the various terminals, was the gist of the evidence before the grain commission in session at Regina recently. Various officials including the representatives of the city council, the board of trade, and the Saskatchewan Co-operative Elevator Company assisted in the presentation of Regina's case. One of the points emphasized was that the implement firms recognized Regina's importance as a logical centre of the farming country of the west, and had built up the largest implement distributing centre in the world, the business handled from the city having exceeded $25,000,000 during the year 1912. The grain commission is securing evidence at the various points with a view to ascertaining the points at which large internal elevators of a storage capacity of 5,000,000 bushels, should be built. At Moose [illegible] claimed that [illegible] bushels of wheat had to pass through the city on its way to the terminals.

CANADIAN ORDER OF ODDFELLOWS

In discussing the position of the Canadian Order of Oddfellows last week in The Monetary Times, the figures given were incorrect on account of an error in the official returns. The table then printed should read as follows:—

Year.	In force.	Deaths.	Income.	Assets.	Per $1,000
1907	[illegible]	$17,100	[illegible]	$ 95,892	28.72
1908	[illegible]	16,081	48,039	102,273	30.61
1909	3,133,400	24,925	49,675	108,849	34.38
1910	2,885,450	18,968	50,335	126,634	43.44
1911	2,703,191	24,868	60,254	146,518	54.20
1912	2,692,296	27,[illegible]	60,308	166,232	61.74

These figures speak for themselves.

RAILROAD EARNINGS

The following are the railroad earnings for the week ended March 14th:—

	1913.	1912.	Increase or decrease.
Canadian Pacific Railway.	$2,541,000	$2,333,000	+ $208,000
Grand Trunk Railway ...	1,007,923	901,358	+ 106,565
Canadian Northern Ry...	336,500	354,000	+ 17,500
Temiskaming & N. Ont...	31,378	35,375	— 3,997

CASE THRESHING MACHINE COMPANY'S ACTIVITIES

The J. I. Case Threshing Machine Company made gross sales during the year ended December 31, 1912, of $14,026,633. The cost of manufacturing threshers, plows, and tractors and other products was $11,606,183, and other expenses amounted to $900,000. The amount saved for the year's profit was $2,264,434, surplus after 7 per cent. dividends on the $12,150,000 preferred stock and liberal reservations for depreciation and renewals was $887,573.

This company sells a large number of its machines in Canada, and has an active selling organization in this country. For possible future development in its Canadian trade, the company owns a manufacturing site of 192 acres at Fort William on the Kaministiquia River, which has 1 600 feet of dockage, with 20 feet depth of water.

COMPETITION FROM CANADA

The International Paper Company, of New York, publishes the following results of its business for 1912:—

Net revenue from operation	$2,562,958
Other revenue	675,401
Total revenue	$3,238,359
Depreciation of mill plants	1,131,615
Interest bonded debt	909,066
Balance for dividends	$1,197,678
Preferred dividend	448,134
Surplus	$ 749,544

According to the company's report, the paper industry in the United States is passing through a period of severe trial, owing to tariff changes, the establishment of competing mills in Canada, the increasing cost of wood, and the refusal of Canada to permit the exportation of its cheap wood for the use of the United States manufacturers. These and other conditions which injuriously affect prices and profits, necessitate many changes in the properties and methods of this company to safeguard its interests through future years, say the directors, who add: "These matters are receiving careful consideration, and although dividends are affected for the time being it is believed future results will justify the conservative course of the management."

This company has license to cut about 3,000,000 acres of woodlands in Quebec and New Brunswick. Among other companies it controls the American Realty Company, which has timber lands in Nova Scotia; the Miramichi Lumber Company, which has a right to cut timber on about 415,000 acres of Crown land limits in New Brunswick, and the St. Maurice Lumber Company, which has mills and rights to cut timber in Quebec.

Representatives of the leading pulp and paper men met at Montreal on Wednesday to organize a Canadian Pulp and Paper Men's Association. The Canadian organization will be modeled after the association now in operation in the United Stated.

DOMINION TEXTILE COMPANY

Labor Difficulty Was Small Satisfactory Amount of Business—Extensions and Growing Market

Monetary Times Office,
Montreal, March 19th, 1913.

Some little uneasiness was felt among the shareholders of Dominion Textile Company, in Montreal, at the end of last week, when it was learned that the concern was having a little difficulty with its employees at the Montmorency mill, near Quebec. This uneasiness was due more to the knowledge that the stock market is now in a condition in which very little bad news is likely to have very considerable effect than to any doubt of the company being able to deal effectively with the matter.

It would appear that a strike took place in the card room and that, as a consequence, it was necessary to close down operations for a couple of days. The strike was not a large one, only some forty-four employees being involved. The chief anxiety, no doubt, was in the possibility that unless the difficulty was settled other employees might be involved in what, it is claimed, was only a misunderstanding between the employees and the management. The Dominion Textile, as is well known, is a very large employer of labor, this labor being, for the most part, fairly well organized.

Trained Labor Essential.

In addition to this the employees must, in very large part, be trained to their specific duties and when these become expert it is not easy to provide substitutes. The company has experienced considerable difficulty during the past few years because of this. For some time it was constantly in danger of a strike owing to a reduction in wages which had taken place. Later these wages were restored and for some time past very little has been heard of trouble between the management and the employees. Labor costs are now said to be 17 per cent. higher than in 1908, when the cut of 10 per cent. just alluded to took place. Hours of labor are now five hours less a week, total working hours being 55.

The Dominion Textile Company, in common with most concerns of this nature, has been doing a very large business during the past year and profits have been accumulating. The demand for cotton cloth of all kinds is unusual, and it would seem that orders have already been placed in sufficient volume to keep the mills operating during a considerable portion of the year 1913. In order to provide for this increase, the company has been increasing its output. An extension has been made to the Magog mills and 600 looms are to be added. The first of these has just started up and it is expected that the entire 600 will be operating by the first of May. The capacity of the Mount Royal mill has also been increased, although not to such an extent as in the case of the Magog mill, the addition being about 300 looms. It is also stated that the Ste. Anne's mill, at Hochelaga, is to be enlarged. In the latter instance it is stated that the capacity may be doubled.

Strong Position Said to be Held.

The general feeling in financial circles here is that the Dominion Textile Company should now be in a safe position to compete with the product of other countries. It has its mills situated at different points where help is most easily available and from which shipments can easily be received and made. The labor for the most part is efficient and not of a discontented nature. The market for the cotton is enlarging each year and the company is constantly improving its methods and systematizing its operations. It not only controls all its own mills from the one office in Montreal, but has close association with a number of other textile concerns, and through its directorate also has an outlet for no small proportion of its output through whitewear manufacturing concerns. All these advantages are being at last reflected in the price of the stock which, heretofore, has been susceptible to bearish influences, but which, throughout the present depressing period, has, together with the stock of Canadian Cottons and other cotton concerns, held firm.

◆

The committee of the National Convention of Insurance Commissioners having charge of the question of the revision of the standard fire policy have held an important conference at New York, and discussed all the points raised against the present standard form, giving due consideration to Commissioner William B. Ellison's report. A tentative draft of a new contract of simpler and briefer form was drawn up, and the meeting then adjourned until Monday, March 24th, when the draft for a new standard form will be put in final shape. After that it is probable that it will be submitted for legislative enactment in the various States.

CITY DAIRY COMPANY REFINANCES

Common Stock to be Halved and a New Issue Made at Par for Cash—Business to be Extended

The common stock of the City Dairy Company, Toronto, will be reduced by one-half, from $565,000 to $282,500. Then when authority has been procured, $282,000 new common stock will be offered to the holders of the reduced common stock, share for share, payable at par in cash. Afterwards it is proposed to place the common stock on a dividend basis of 8 per cent., with the first payment on July 1st, 1913. This plan of providing the company with additional funds for the extension of the business without increasing the amount of capital stock outstanding, was decided by the directors on Tuesday.

Will Give Company Cash.

In connection with the new financing plan, Messrs. A. E. Ames & Company issued the following statement: "The course now decided upon will furnish the company with $282,500 new cash, without increasing the amount of capital outstanding; it will strengthen the position of the preferred stock by putting just that much new assets back of it, and will permit of writing off $282,500 from good-will or organization account. The new money should be worth 7 per cent. to the company in saving in bank interest and in purchases by taking the fullest advantage of cash discounts. Outside of that the only additional payment would be 1 per cent. on the new capital and $11,300 per annum, being the equivalent of raising the common stock dividend to 4 per cent. per annum from 2 per cent., at which rate it has remained for four years.

"The plan adopted will put the company in a strong position should it at a later date require further capital, which could be furnished by the issue of either common or preferred stock or bonds. No further financing is, however, in sight."

Dividends Were Declared.

When the company was organized, a bonus of 100 per cent. of common stock was given with the preferred shares then issued. Subsequent issues of preferred stock were made at par without the bonus.

The net profits of the company last year were $104,136. This week a quarterly dividend of 1 per cent. was declared on the common stock at the rate of 4 per cent. per annum, payable April 1st to shareholders of record March 30th. Common stock dividend has hitherto been at the rate of 2 per cent. per annum, payable half-yearly. The regular quarterly dividend of 1¾ per cent. was also declared on the preferred stock.

◆

DEATH OF MR. ROBERT REFORD

Monetary Times Office,
Montreal, March 19th, 1913.

Mr. Robert Reford, who for many years has been well known in the shipping trade as well as in industrial and financial circles, is dead. He was an Irishman by birth, and together with other members of his family came to Canada in 1845. The family went to Toronto and Mr. Reford remained there for the next twenty years. It was while a member of the firm of Reford and Dillon that he first participated in the navigation business, his firm having sent a Canadian schooner with a cargo of produce from the Great Lakes to Port Natal in South Africa. In 1865 he came to Montreal, and five years later entered the steamship agency business and quickly built up a remunerative trade. He later established the Robert Reford Company, becoming president thereof. The company acts as agents for several lines, among which are the Donaldson Line, the Thomson Line, and others. Mr. Reford was also identified with a large lumber company as well as with the Montreal Grain and Elevating Company, the Lake of the Woods Milling Company, the Bank of Toronto, the Paton Manufacturing Company, the Nova Scotia Steel and Coal Company, the Labrador Company, the Mount Royal Milling and Manufacturing Company, of all of which he was a director. He was also president of the Crown Trust Company, which was largely formed by those who were early interested in the Crown Reserve Mining Company. In the last years of the old harbor commission, which preceded the present commission of three, Mr. Reford was one of the representatives. He was also a governor of McGill University and was a liberal contributor to the fund in 1908. At the time of his death he was 82 years of age.

◆

Applications have been received by the London Stock Exchange to list the following Canadian issues:—City of Montreal, £1,438,300 four and a halves; Grand Trunk Pacific, branch lines, £240,700 fours, and Vancouver Power Company, £50,000 four and a quarters.

CASKET MERGER NOT COMPLETE

Negotiations Are Still Proceeding for the Amalgamation of Leading Companies—New York Man is Interested.

Negotiations for the amalgamation of leading casket manufacturers are still proceeding. Terms have not yet been arranged with all the companies which it is desired to merge. The companies which are likely to be included are the following:—

The Winnipeg Casket Company, Winnipeg, Man.
The Globe Casket Company, London, Ont.
The Semmens and Evel Casket Company, Limited, Hamilton, Ont.
Messrs. Elliott and Son, Limited, Prescott, Ont.
Messrs. Girard and Godin, Three Rivers, Que.
Messrs. Christie Brothers and Company, Limited, Amherst, N.S.
The National Casket Company, Toronto.

The Winnipeg Casket Company was incorporated on May 8th, 1907, with capital stock of $25,000.

The Globe Casket Company, of London, Ont., is not a limited company. It manufactures every description of undertakers' supplies and at present is agent for the Springfield metallic caskets.

As to Ontario Companies.

The Semmens and Evel Casket Company, Limited, was incorporated in Ontario on April 4th, 1906. The following are its officers and directors: president, A. W. Semmens; secretary-treasurer, Thomas Semmens; directors, A. W. Semmens, Mary Semmens, Thomas Semmens and Thomas Spaven, all of Hamilton. The head office is situated at Hamilton. This is according to the government return for 1911.

Messrs. Elliott and Son, Limited, was incorporated by letters patent, dated August 6th, 1898. The company's government return for 1912 shows the following to be its officers and directors: president, W. H. Elliott; secretary-treasurer, H. Elliott; directors, W. H. Elliott, H. Elliott, H. H. Lloyd, and A. G. Palmer, all of Toronto. The head office of the company is situated at Toronto.

Messrs. Girard and Godin are not incorporated by letters patent.

Messrs. Christie Brothers and Company, Limited, were incorporated on November 6th, 1901, by letters patent under the Nova Scotia Joint Stock Companies' Act, and the nominal capital of that company is $100,000 divided into 1,000 shares of $100 each. The letters patent state that the number of shares taken and subscribed at the time was 500, and the amount in cash paid thereon was $5,000.

The National Casket Company, Toronto, was incorporated by Ontario letters patent dated May 27th, 1903, and has made no returns to the Ontario Provincial Secretary's department since incorporation.

Financial Arrangements.

The head office of the company for which a charter has been obtained under the title, Dominion Manufacturers, Limited, will be at Toronto, and the finances will probably be arranged as follows: common stock, $2,000,000; preferred stock, $1,000,000; bonds, $550,000. The companies constituting the merger will receive common and preferred shares of the new company in payment, although cash may be paid in some cases. Messrs. Johnston, McConnell and Allison, of Montreal, are understood to be arranging the merger in conjunction with Mr. George Patten, a financier of New York.

Will Effect Savings.

It is thought that in order to be a success all the large individual companies will have to be included in the merger. Such an amalgamation has been discussed for many years and various interests have endeavored unsuccessfully, at different times, to arrange it. When the combine is completed, the company will make all its purchases direct from the manufacturers instead of from the middlemen, as heretofore. Large savings in overhead expenses are anticipated.

◆

COBALT ORE SHIPMENTS.

The following are the shipments of ore, in pounds, from Cobalt station during the week ended March 14th: La Rose, 70,500; Cobalt Townsite, 66,100; Peterson Lake, 81,000; Beaver Consolidated, 43,300; Nipissing, 106,840; Drummond, 61,479; Bailey Cobalt, 41,830; Right of Way, 63,278; Chambers Ferland, 64,000; Cobalt Lake, 64,482; McKinley Darragh, 58,309; Dominion Reduction, 127,300; Kerr Lake, 121,290; total, 969,708 pounds, or 484 tons. The total shipments since January 1st are now 8,542,002 pounds, or 4,271 tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144 tons, valued at $1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 29,941 tons; in 1910 34,041 tons; in 1911, 25,089 tons; 1912, 21,509 tons.

ONTARIO'S MINERAL RETURNS

Show That Extensive Progress and Development ar Being Made—Increased Production.

The total value of the various mineral products of Ontar during 1912 was $47,471,490, which shows an advance over 191 of $5,495,193, or 13 per cent. The year just closed was one the most prosperous in the history of Ontario's mining industr according to a preliminary bulletin of the provincial bureau mines. The following are the details:—

Mineral Production of Ontario, 1912.

Metallic.	Quantity.	Value

Total production		$47,471,990

Production of Gold.

For the first time in the history of Ontario there was a substantial production of gold. In 1911 the output had a value of $42,637; in 1912 of $1,859,285. The explanation is found, of course, in Porcupine, where the mines came into yield during the year. The Hollinger and Dome are the leading properties, and furnished the bulk of the production, but there are a number of smaller mines, several of which contributed to the yield, and others whose stamp mills are not yet completed and in operation. This group comprises the McIntyre, Vipond, Jupiter, McEnany and others. An unfortunate labor strike occurred in November, and to some extent lessened the output of bullion. In other gold districts, such as Swastika, Larder Lake and Munro-Guibord, a good deal of development work has been done, but the era of steady production has not yet set in. At Long Lake the stamp mill has been waiting for power, now nearly ready for delivery. The St. Anthony mine at Sturgeon Lake and the Cordova mine in Peterborough county both yielded considerable bullion.

◆

DOMINION TEXTILE BONDS.

The transfer of the property of the Merchants' Cotton Company to the Dominion Textile Company, Limited, will mean that Series "B" of the Dominion Textile Company's bonds now becomes a mortgage bond upon the properties formerly held by the Merchants' Cotton Company. This series could not be so described until the entire capital stock of the Merchants' Cotton Company had been transferred to the Dominion Textile Company.

The series has been, until now, secured by deposit with the trustee of the capital stock acquired in the company by the Dominion Textile.

FACTORS IN FREDERICTON'S ENTERPRISE

National Resources Abound — Transportation and Power Companies Developments.

Fredericton, the capital of New Brunswick, is a city of conspicuous enterprise and progress. It controls its own street light system and operates its own filtration plant. It has many industries. The twin towns of St. Mary's and Gibson, connected with Fredericton by substantial steel bridges, and the town of Marysville, three miles distant, connected by rail, are thriving suburbs, containing lumber mills and other factories. At Marysville is situated one of the largest cotton mills in Canada.

Within easy reach of Fredericton, on the St. John and Nashwaak Rivers, are valuable hard and soft wood areas of almost inexhaustible extent, including spruce, pine, hemlock, maple and birch.

Fredericton is also fortunate in being in the centre of valuable agricultural and fruit growing lands. In every direction are districts where excellent results have been secured. This is particularly true of the entire St. John Valley, now being opened up by the new railways. The valley has a length of 280 miles and an average breadth of 100 miles.

Railways and Branches.

On every side of the busy city active construction is being carried on and millions of dollars are being expended in the building of new railways that will serve to open up a vast stretch of country and bring to Fredericton industrial expansion.

The St. John Valley Railway, the largest of those under construction, will have the greatest significance on the advancement of Fredericton. This line of railway is being constructed from Grand Falls to St. John City and involves an expenditure of ten millions of dollars. Careful surveys have shown that the route to St. John via the valley is the shortest by several miles, and when the Valley Railway is connected with the Grand Trunk Pacific Railway at or near Grand Falls, the haul from Montreal and western points will be the shortest obtainable.

There is now under active construction the Fredericton and Grand Lake Railway through a magnificent agricultural district to Minto, a distance of thirty miles. As a result of the building of this line, coal of superior quality will be afforded Fredericton for manufacturing and household purposes at minimum cost. Investigation has shown that there are extensive deposits of a very good quality of fire clay in the neighborhood of Minto and the new railway will systematically develop these deposits. Iron deposits of great value have also been discovered in this district.

Leased and Operated by Canadian Pacific Railway.

Extending from Minto to Norton on the Intercolonial Railway, a distance of 58 miles, is the New Brunswick Railway, owned by the province. This line, as well as the Fredericton and Grand Lake Railway, will be leased to and operated by the Canadian Pacific Railway Company. In view of this fact, the Canadian Pacific Railway will no doubt divert the traffic of the territory, served by the New Brunswick Railway, to the route via Fredericton. Thus it will be seen that Fredericton will become the distributing centre for the entire shipments. Approximate estimates place the quantity of coal in the mines owned by the Fredericton and Grand Lake Coal and Railway Company at 100,000,000 tons. The coal is declared by experts to be of high quality and the fact that the Canadian Pacific Railway have contracted to use 50,000 tons of screen coal per annum from these mines for ten years, and also to undertake such extensive development, is proof positive of the superiority of the coal.

Another railway now being constructed is the Southampton line, on the Gibson branch of the Canadian Pacific Railway. A line from Napudogan to Fredericton, on the Grand Trunk Pacific, will also be constructed.

Powers and Probabilities.

At Grand Falls there is a possible development of 80,000 potential horse power, while below the falls some of the largest tributaries of the St. John have their confluence with that river. These include the Salmon, Aroostook, Tobique, Meduxnekeag and Shogomoc, and although there are no great falls on the river below Grand Falls, the descent of the river would admit of fully three dams being constructed with a height varying from 15 to 20 feet and each of which would have a potential horse power of from 20,000 to 25,000. In all there would be about 150,000 horse power, capable of being developed at and below the Grand Falls. This power would be continuous. With proper locks in the dams, entailing a comparatively small cost in their erection, the navigation of the St. John River with steamboats would be secured throughout the whole open season.

The largest of these powers, likely to be developed at once, is that at Grand Falls. For some time past two contending companies have prevented its development, but lately the old companies have come together and a new company—the Grand Falls Company, Limited—has been formed. This company has absorbed the old companies and plans are now being prepared for one of the largest pulp and paper plants in Canada. The power capable of being developed, however, will greatly exceed the requirements of the pulp and paper mill, and the surplus power will be available for the stimulation of industries at Fredericton and points along the river. Sir William Van Horne, is the president of the new company.

As the company would have a large quantity of logs, which could more profitably be cut into sawn lumber, it is understood from a very reliable source that they will operate a large saw mill and use all the waste in the manufacture of paper. New Brunswick is annually allowing its trimmings, sawdust, slabs and edgings to go to waste, while this waste would be a great source of wealth to the province, if utilized as it could be.

Two Other Sources of Power.

Plans are being prepared by the St. John River Hydro Electric Company for the development of 10,000 horse power, which will be marketed along the valley of the St. John River, and particularly in the city of Fredericton. It is proposed to supply power in large quantities for electric railways and manufacturing purposes.

The Eel River Light, Heat and Power Company, Limited, is another company which has strong financial backing and plans supplying cheap power. The water power of this company on the Eel River is composed of seven large lakes and what is called the dead water, which is 9¼ by ¾ miles. By damming two of these lakes, the company have at the greatest drought that possibly could be, 125 cubic feet of water per second. There is a possible head of 70 feet, four miles below Benton, at the falls so called. There are four other possible powers on the Eel River, one of which would have a 50-foot head.

INSURANCE AGENTS ARE BUSINESS BUILDERS

The plan of writing insurance without the medium of agents has been tested time after time and it has never proved successful.

Wisconsin, for example, has not secured, after the lapse of some weeks, a sufficient number of applications for life insurance to put its state life insurance fund into operation.

Companies have tried to secure business by mail order campaign, by advertising, and so on, says an exchange, and while all these have a certain amount of influence, yet it seems necessary to have the persuasive force of the agent to make men finally decide to take life insurance. Life insurance, in the minds of many of the best observers, is most peculiar in this way. Men literally have to be forced to do their duty and to protect their dependents. Life insurance would never have had its enormous growth had it not been for the army of agents to do the educating, soliciting, and closing. Life insurance companies that have attempted to operate without agents have been satisfied with only a small business.

WILL MANUFACTURE GASOLINE ENGINES

The Massey-Harris Company, Toronto, has decided to engage in the manufacture of gasoline engines, and will establish in Canada during the present year a factory specially equipped for that purpose.

Absolute control of the Deyo-Macey Engine Company, of Binghamton, N.Y., has been secured. The officers and managers of the Binghamton company will continue in their positions, and the plant will be enlarged in order that both the United States and Canadian trades may be taken care of.

The Deyo-Macey Engine Company has a complete line of gasoline agricultural power engines, both stationary and portable, ranging from 1½ to 20 horsepower, and, in addition, manufactures a well-known orchard-spraying outfit.

These products in future will be manufactured and sold under the name of the Massey-Harris Company, which is planning to introduce them into every grain-growing country in the world.

The Massey-Harris Company a few years ago purchased a controlling interest in the Johnston Harvester Company of Batavia, N.Y. The company at the time of the purchase was employing about 1,000 men. The plant has been increased by between six and seven acres of floor space, all the buildings being constructed of reinforced concrete and made absolutely fireproof, and the force increased to 2,000 men. In addition to the large factories in Toronto and Brantford, the Massey-Harris Company has also large interests in the Verity Plow Works of Brantford and the Bain Waggon Company of Woodstock.

◆

A 2,000 barrel flour mill may be located in Regina within the course of the present year. A syndicate of local business men has been organized with that end in view and have already laid a proposition before the city council for consideration. It is understood the council is willing to donate a site for the proposed flour mill and also give certain other concessions. The by-law making such grants will probably be submitted to the ratepayers for a vote.

WESTERN CANADA

Tightness of Money is Affecting Trade — Saskatoon Business Men Are Optimistic

Monetary Times Office,
Winnipeg, March 18th.

The money situation in the West is the chief topic of discussion, and to a considerable extent it is affecting trade. Collections are still slow and merchants and wholesalers are exercising great care in extending credit.

The Monetary Times was informed last week by an Alberta banker, that some people were offering high rates for money. There is no need for alarm regarding the West, the situation is bad with some, but they have brought it on themselves by over-speculation. They will be the losers, and when the atmosphere is cleared it will be a good thing for the country. The banks are doing a wise thing in putting on the brakes.

The Canadian Credit Men's Association of Winnipeg have discussed the question of stopping the retail merchant from speculating. If this problem could find a solution it would solve to some extent at least the present tightness of the money situation.

Activity in Transcona.

Scarcely a month ago the city of Winnipeg purchased debentures amounting to $17,000 issued by the town of Transcona, to pay for last year's sidewalk extensions. These debentures, which bear 6 per cent. interest are the first bonded debt of the new town of Transcona, and were purchased for the Winnipeg sinking funds. As Transcona was governed in its early days by the board of trade, no debentures could be floated until the first council was elected and the necessary formalities complied with.

Further debentures are now being offered for sale by Messrs. W. Sanford Evans and Company. These are $85,000 for a waterworks system, and $25,000 for the municipal offices and fire hall. Other debentures to be sold this year will be from $10,000 to $15,000 for an incinerator, and $10,000 for sidewalks this year. The assessment for this year will not be completed until April 1st, but is estimated to be between $10,000,000 and $12,000,000. The population is given as 2,500, and the area as 5,950 acres.

Among the municipal improvements facing the town council are 10 miles of sidewalks, between 5 and 6 miles of street grading, and from 12 to 16 miles of water mains. Nothing can be done immediately for sewers as the council is taking steps to make a connection with the sewer from the Grand Trunk Pacific shops, which enters the Seine River. Application has been made to the Dominion government, but with no apparent result to date.

Building Prospects Are Good.

The year has started well for Transcona, with the opening of the Grand Trunk Pacific shops, and indications are for a good year of building. Nineteen permits have been issued totalling $35,000, which will be increased when spring opens. Among the proposed buildings are a large $120,000 apartment block, telephone exchange, on the Winnipeg system, costing probably $35,000, a large boarding house, and others.

Dominion Tar and Chemical Company.

A doubling of the plant of the Dominion Tar and Chemical Works will take place, costing over $60,000. Two new creosoting cylinders will be put in and 300 men employed during the summer months. Contracts made by this company, it is stated, will call for the manufacture of 5,000 cars of treated ties every day this summer. The labor required in this plant is unskilled, unlike that employed by the railways.

Work on the new school building, which was held by severe weather and a scarcity of labor during the winter months, will be resumed shortly.

Preliminary plans have been prepared for a $30,000 building on the [illegible] of R[illegible] and B[illegible] Streets for the Bank of Commerce. This building will be of brick, two stories high, and of substantial architecture, being one of the finest in the town. Modern banking offices will occupy the ground floor, and apartments will be provided upstairs for members of the staff.

Saskatoon's In Good Shape.

Mr. M. [illegible], president of the board of trade of Saskatoon, also president of the Associated Boards of Trade of Western Canada; Alderman G. H. Clare, of the city council of Saskatoon, and F. M. Sclanders, publicity commissioner of that city, were in Winnipeg last week. They met railway [illegible] discussed various rate questions and suggested betterments. Saskatoon was fortunate in selling its bonds when [illegible] was free. The result is that the municipality has funds and is preparing for extensive civic improvements in [illegible]. The bonds were sold on the London market at 99½, and were oversubscribed the first day. Mr. Sclanders states that general business in the Saskatoon district is from 25 per cent., to 35 per cent., in excess of the business of the corresponding period of last year, and that building permits are largely in excess of those of last year.

◆

FEBRUARY BANK STATEMENT

The statement of the position of Canadian banks as at the end of February was issued on Thursday. The statement shows an increase in deposits of between four and five millions. During January deposits were withdrawn to the extent of nearly twenty-three millions.

◆

BIDS MADE BY THREE TORONTO HOUSES

Three Toronto firms bid for the $30,000 4½ per cent. 20-year good roads debentures of Prince Edward County, Ont. As previously noted, Messrs. Wood, Gundy and Company were awarded this issue.

◆

BANK ACT AMENDMENTS

Hon. H. R. Emmerson has given notice of two amendments to the Bank Act.

The present limit of interest on loans is 7 per cent., but the Supreme Court has decided that where a higher rate is paid the excess cannot be recoverable.

The amendment will provide that any excess over 7 per cent., whether paid voluntarily or retained by the bank, shall be recoverable by action in any court of competent jurisdiction.

Another amendment seeks to compel the banks to set forth in their monthly statement the maximum rate of interest charged.

◆

Mr. C. Hamilton Wickes, British Trade Commissioner to Canada and Newfoundland, with headquarters at Montreal, is in Toronto for a week. Mr. Wickes has just returned from a trip to England and will be glad to make appointments with those interested in British-Canadian trade matters.

The railways and canals department has given orders for the Lachine and other canals to be closed from March 22 to April 22 in order that necessary repairs may be effected. After April 22 the grain freighters from the Great Lakes ports will come down in a continuous succession with their cargoes of grain, which will be stored in the elevators so as to be ready for loading the ocean steamships on their commencing to arrive in port towards the end of next month.

Montreal capitalists, probably the Royal Securities Corporation group, may finance a street railway for Medicine Hat in the near future. The proposed railway will be about nine miles in length. The power will be generated by the city's gas plant, and a fully up-to-date line is contemplated. As illustration of the growth of the city, the population in 1910 was 4,050, and to-day it is placed at 16,000. The assessed value of real estate in 1911 was $4,153,145, and this year it is $16,500,000. The customs receipts in 1910 were $71,725 and in 1912 they were $18[illegible].

At the monthly dinner of the Calgary Credit Men's Association [illegible] chairman; Messrs. J. P. Sutherland, chartered accountant and J. A. Campbell, of Edmonton. Mr. Sutherland, in his address, pointed out the necessity of scientific bookkeeping in order that it might not only be a record of what had gone before, but also serve as a guide in deciding the future policy of a business, and he also drew attention to the fact that a balance sheet was simply [illegible] of opinion formed from a knowledge of conditions.

FROM ROME

Extract from letter from Mr. John Gault, of Canada, dated from the Hotel D'Italie, Rome, February 23rd, 1913:

"I read *The Monetary Times* regularly; indeed, I find it so interesting that there are very few pages I pass unread. It is amazing to me how you collect so much news of the business world each week."

TORONTO COAL COMPANY'S DEAL

Sterling Coal Company Becomes Interested in Conger Coal Company—Properties are in the United States

The absorption of the Conger Coal Company of Toronto y the Sterling Coal Company, Limited, has apparently been ected by the incorporation of a third concern, the Conger Lehigh Coal Company, Limited, with a Dominion charter, eadquarters in Toronto, and capital of $500,000. The capital s divided into 5,000 shares of $100 each.

The new company has been formed, as the charter states, "To acquire and take over as a going concern the undertakng and all or any of the liabilities of the Conger Coal Company, of Toronto, Limited, incorporated by letters patent nder the Ontario Companies Act, and with a view thereto to dopt an agreement dated the sixth day of March, 1913, made etween Sterling Coal Company, Limited, of the one part nd William Symon Morlock as trustee for the company, of he other part, being an agreement for the acquisition of the ndertaking and all or any of the liabilities of the Conger Coal Company of Toronto, Limited, and to carry such agreement nto effect with or without modification.

usiness as Coal Dealers.

"The company will carry on business as dealers in and roducers of coal, wood and fuel of all kinds; carry on all inds of exploration work and business and search for, prospect, open, explore, develop, work, improve, maintain and manage coal, salt, gas, oil, iron, gold, silver, copper and ther mines, minerals and other deposits and properties, and rospect, dig for, raise, crush, wash, smelt, assay, analyse, educe and amalgamate and otherwise treat ores, metals, ninerals, oil, gases and other deposits, whether belonging to he company or not, and render the same merchantable and ell and otherwise dispose of the same, or any part thereof, or ny interest therein."

The Sterling Coal Company was incorporated January 1st, 1910, with a Dominion charter. The following properties were purchased by the company:—The Hileman Group f Mines, consisting of the Sterling Mine and the Strip Vein Mine, near Salineville, Ohio, the property of the Ohio Coal nd Clay Company, near Washingtonville, Ohio, and the Delmore Mine near Leetonio, Ohio; the Beckwith Group of Mines, onsisting of the Cecil Mine, in Taylor County, West Va.; the Malta Mining Group in Barbour County, West Va. The area f lands is about 6,000 acres. Some leases are on a royalty asis.

terling Coal Company's Output.

The company's output of coal for the year ended December 31st, 1911, was 188,811 tons, compared with 204,903 ons in 1910. The cost of production (approximately) for the ear 1911 at the Sterling and Strip Vein was 95 cents; at Fairview Mine, $1.197; Delmore, $1.205 and Cecil, 56.2 cents per un of mine ton. The company commenced operations on anuary 1st, 1911.

The authorized capital stock of the company is $3,500,000, f which $2,500,000 is outstanding. The par value of shares s $100. The Montreal Trust Company, Toronto and Monteal, are the company's transfer agent, and the National Trust Company, Limited, Toronto and Montreal, the company's egistrar. The annual meeting is held in either January or February of each year at Toronto. The fiscal year closed December 31st. There are no dividends.

unded Debts and Directors.

The funded debt consists of $1,750,000 (authorized, $ 00,000) 6 per cent. 30-year first mortgage gold bonds due anuary 1st, 1940, but subject to redemption at any interest ate at 105. The sinking fund amounts to 2 per cent. of onds outstanding and commenced January 1st, 1912. The onds are secured by a first lien on all property, consisting of bout 6,000 acres of coal lands in Ohio and West Virginia.

The directors and officers of the Sterling Coal Company re as follow:—Messrs. W. F. Tye, A. E. Ames, F. H. Deacon, H. G. Ratcliff, Toronto; Sir Rodolphe Forget, J. W. McConnell, N. Curry, Montreal; H. D. Hileman, Cleveland, Ohio; resident, W. F. Tye; vice-president, A. E. Ames; secretary, H. G. Ratcliffe; treasurer, J. C. Fraser, Toronto; general manager, H. D. Hileman, Cleveland. The company's general offices are at Toronto, Cleveland and Buffalo.

◆

The nickel mine purchases of the French Rothschilds at Sudbury, Ontario, says a London cable, revives the suggesion that a Franco-Canadian agreement be reached to limit he output of the metal, thus helping to ensure world's peace y limited armaments. The syndicates might alternatively mpose a prohibitive price, with patriotic exceptions.

ENGLISH FIRMS TO HAVE CANADIAN BRANCHES

Two Manufacturing Concerns are Obtaining Canadian Charters and Will Seek More Business Here

Two English manufacturing companies are establishing important branches in Canada, Henry Hope and Sons, Limited, of Birmingham, makers of steel window sashes, etc., and Marshall, Sons and Company, Limited, of Gainsborough, engineers and boiler-makers. These are two additions to a small list of English houses with branches here, as compared with about 200 United States companies with sales offices, warehouses, or factories in the Dominion. Both firms are incorporating Canadian companies to handle their business in this country.

Messrs. Henry Hope and Sons, of Canada, Limited, with capital of $240,000 and head office in Toronto, has been incorporated with a Dominion charter.

Steel Window Sashes and Casements.

The chief purpose of the company, according to the charter, is "to carry on the business of manufacturers of and dealers in steel window sashes, door and window casements, fanlight opening gear, leaded lights, stained glass, glass windows, glass doors and glass roofing; window and door locks and fasteners, door knobs and latches and all manner of door and window fittings; cast lead, cast iron and other metal rainwater goods and accessories, and all manner of contractors' and builders' supplies and material."

Business in the West.

Messrs. Marshall, Sons and Company are obtaining a Canadian charter, and will establish a branch in Saskatoon. The capital of this subsidiary company will be about $200,000. This company will seek to obtain a larger share of the demand in Western Canada for tractors, of which they are large manufacturers, and already have a number in commission on our prairies. The company manufactures horizontal engines up to 2,000 horse-power; Cornish, Lancashire, locomotive, vertical boilers, etc.; undertype engines, simple and compound; vertical engines, simple and compound; portable and semi-portable engines; traction engines, road rollers; steam and oil tractors; threshing machinery for all countries; grinding mills; sawing machinery; oil engines; tea preparing machinery, etc.

United States and Branch Factories.

Discussing the establishment of numerous branches of United States companies in Canada, the British Trade Commissioner to the Dominion has said:—"An impartial survey of the field would seem to indicate that United States capital has been more particularly directed into enterprises such as are connected with the import trade of Canada. The purchase of government securities and municipal bonds, and even of the bonds and shares of the great Canadian railroads—the forms which British investment has hitherto principally taken—operates less directly and immediately to stimulate trade than the investment of capital in varying amounts over a wide range of industrial concerns, together with the establishment of branch factories and agencies of all sorts, which has been characteristic of the form of United States interest in the development of the Dominion."

◆

ENTHUSIASTIC FOR THE FOX INDUSTRY

The most unique undertaking in the world is the description applied to the fox industry by Hon. Charles Dalton, a minister without portfolio of the Prince Edward Island government. In the provincial legislature, he stated that the government will introduce measures to give further protection to the black fox industry, "which is destined," he said, "to bring many millions to our people, and change the whole financial face of the province."

"I say emphatically," continued Mr. Dalton, "that the industry cannot slump; though returns so far have been enormous, the business will continue profitable for at least a quarter of a century. There is unlimited demand, not necessarily for breeding animals, but for the pelts. Population and wealth are increasing in cold countries, where furs are worn. This year only 400 black fox skins in the London market were scarcely enough to establish a fashion. When the output increases to a moderate extent the desire of people to wear fox furs of the same grade will increase. Fox skins are not everlasting, like diamonds, but the price of the latter shows no decrease."

DEBENTURES AWARDED

North Battleford R.M., Sask. $15,000 5½ per cent., 20 annual instalments, to Messrs. Flood Land Company, Regina.

CASH IS STILL BEING HOARDED

Anxiety Evident in Europe—Diminution Shown in Returns to Banks—Future Outlook.

The financial situation is affected, first, by the difficulty of raising capital, and, secondly, by the denudation of the banking reserves through the hoarding of cash, which makes banks indisposed to lend for short periods except on high interest, remarked Sir George Paish, in speaking in London of the condition of the European money market.

''The continuance of the Balkan war,'' he continued, ''the uncertainty of the real relations between the great powers and the decisions of the governments of both Germany and France to make great additions to their standing armies, as well as to spend huge sums on additional fortifications, are keeping the people of Europe, and more particularly the people of the Continent, in a state of anxiety which is reflected in the desire of nearly everyone to refrain from enlisting new capital, and is inducing many, especially in France, Germany and Austria, to hoard large sums of cash.

''From one point of view the present position is not much worse than that in December, that is, the amount of cash now hoarded is not greater than the amount hoarded three months ago. But usually in the spring the cash returns to the great banks in a large volume. However, the amount returned this year in much smaller volume than usual.

''A very serious situation would long since have arisen but for the power of the banks of France, Germany and Austria to make practically unlimited issues of notes and the consequent ability of the bankers to supply the cash demanded by customers for hoarding and by borrowing from the state banks.

Money in Much Demand.

''Bankers dislike borrowing from the state banks. As far as possible they are curtailing loans to avoid it. How long this situation will last none is able to predict or forecast, but it is evident the greater the delay in restoring confidence to the European public, the greater will be the monetary stringency, as business in these days cannot be carried on without the free investment of public savings and without the steady expansion of bankers' loans.

''The times of greatest pressure on the Continent are felt at the end of each quarter, more especially in the quarters ending in March and September. The efforts of the Continental houses to borrow money wherever loans are obtainable and to import gold, are for the purpose of assisting customers to satisfy their need of capital at this time of greatest pressure.

''Money probably will be in very strong demand until the end of March, but in April some relaxation may be shown.

Financial Situation is Unpleasant.

''Everything depends on the international political situation. In my judgment the outstanding political problems are in the course of adjustment, and no fresh complications need be feared. Austria and Russia have come to an understanding. I do not believe that Austria will fight about the besieged city of Scutari, which the allies demand shall go to Montenegro. The European investing public, apart from those of England, will not find new capital until a complete settlement of the outstanding problems is effected.

''Whether or not the financial situation will become sufficiently serious to force the various governments to take more active steps to effect a final settlement of the outstanding questions, I cannot say. They are, however, beginning to realize that something must be done to restore confidence, and it is possible that settlement may be reached sooner than one is now able to anticipate.

''Germany's proposal to make what practically amounts to a forced loan of $250,000,000 has, of course, added to the uneasy feeling among the investors of Germany. But it is nowise probable that this crude proposal will be modified.

''Briefly, the financial situation on the Continent of Europe is distinctly unpleasant, but its seriousness may itself cause the various governments to take steps for the essential adjustment and, of course, as the investigators are reassured and capital flows freely again to new enterprises and cash now hoarded is returned to the banks, the situation will immediately lose its danger.''

◆

PROPOSED STATE INSURANCE FOR ILLINOIS

A bill introduced in the Illinois Legislature by Representative Seymour Stedman provides for state life insurance. The measure is modeled after the Wisconsin State Life Insurance Fund Act, and in some ways the bill parallels the provisions of the life insurance law of the state, especially as to premium calculation, valuation, premiums for annuities, and so on. The insurance superintendent and the state board of health, under the Act, are to pass upon all applications for insurance, and the policies to be issued are to be signed by the insurance superintendent and the state treasurer.

The bill provides that state factory inspectors, county clerks and treasurers, similar officials from towns, cities and villages and state banks, shall have authority to fill out and transmit applications for insurance, but there is no compensation for them to do this added work.

WESTERN CANADA POWER COMPANY

Will Issue Three-Year Notes—Financing Has Been Arranged in New York.

Short term notes will be used to finance the present requirements of the Western Canada Power Company. Arrangements have been made by Mr. C. H. Cahan, K.C., and a New York underwriting firm, by which about $3,200,000 will be available to the company to pay for the development work necessitated by the recent agreement to supply 40,000 horse power to the British Columbia Electric Company.

The New York interests, having formed the Western Canada Public Utilities, Limited, will issue three-year notes against the second mortgage bonds and treasury stock of Western Canada Power, which will be turned over by the Canadian company.

The second mortgage bonds will be taken at 90 and the shares at 80.

As to Earnings.

The company's charter requires that the earnings shall be at least one and a half times the interest on outstanding bond issues, so that the increased earnings of Western Canada Power three years from now, for which the present development work is to provide, will allow of the present second mortgage bonds being raised to first ones. When this is done and the three-year notes have been taken up in that manner, the Western Canada Public Utilities, Limited, will cease to exist.

Before the expiration of the short term notes in 1916, the earnings of Western Canada Power by reason of the increased output of the company will be more than the present, and a new bond issue will then be possible.

Capital Stock and Bonds.

The company's capital stock is $5,000,000, of which $3,000,000 is outstanding. It has an authorized bond issue of $4,000,000 first sinking fund gold five per cents. These bonds are secured by a first lien on the company's entire property.

The mortgage covers all present and future concessions, water rights, together with franchises and real and immovable property of every kind and wheresoever situate and also all shares and stocks in, and bonds, debentures and other securities of any other corporation, or company now or hereafter owned by it. Floating charge—all principal money, interest and other moneys for the time being owing on the security of these bonds, all its assets, for the time being, both present and future, of whatsoever kind and wheresoever situate, including its undertaking, tolls, rents, incomes, moneys, rights, powers and privileges.

Transmission of Power.

The Western Canada Power Company was incorporated on May 14, 1909, with a Dominion charter. On June 30, 1909, the company absorbed the Stave Lake Power Company, and owns two water power rights at Stave River Falls, B.C., about six miles north of the junction of the Stave and Fraser Rivers at Ruskin, B.C.

The company transmits power to Vancouver and New Westminster at 60,000 volts on steel tower lines. Delivery of power was begun in Vancouver, New Westminster, Mission and other points in the Lower Fraser Valley on January 1st, 1912. The franchise for light and power in Vancouver is for fifty years, for power in New Westminster is for fifty years, and long-time franchises for power have been granted in nearly all the municipalities in the Lower Fraser Valley.

◆

COST OF POOR ROADS

Mr. B. F. Yoakum, chairman of the St. Louis and San Francisco board of directors, emphasizes the cost to the farmer of poor roads. He said on his last trip to Texas: ''During the year 1912 there were estimated to be 60,000,000 tons of farm and other business hauled over the Texas public wagon roads. The average haul was 12 miles.

''The average cost of hauling by wagon is approximately 21 cents for each ton moved one mile. The same tonnage hauled by railroad costs about one cent per ton for each mile. The difference in cost of handling the tonnage of Texas over the public roads and the railroads therefore is 20 cents per ton for each mile hauled. This carried out logically shows that each mile of wagon haul replaced by railroad transportation saves $12,000,000 annually to the people of the state.

''The average haul over the wagon roads of Iowa is six miles. Therefore if Texas were as well supplied with railroads as the people of Iowa on an area basis and the average haul over the wagon roads in Texas were reduced from 12 miles to six miles, the annual saving to the people of the state would be $72,000,000 a year. These things ought all to be taken into consideration in connection with the agricultural development of Texas, which represents 84 per cent. of the state's resources; that is, Texas is 84 per cent. an agricultural state.

''I would emphasize the importance of aiding the farmers of Texas in getting greater production and in developing better facilities for marketing their products. If anything the latter is more important.''

ONTARIO'S COMPENSATION BILL DRAFTED

3urden of Compensation is Placed Upon Employer—Negligence Clause Eliminated.

The employer, or the industry, is to bear the burden of ompensation, according to the draft Workmen's Compensation 3ill for Ontario, prepared by Sir William Meredith, special comissioner. The only exception proposed is in the case of the orkman whose injury is due to deliberate negligence or disbedience. Even about this there is protection for the dependnts of the workman, since if his injury results in death or ermanent disability compensation is payable.

There is to be no contribution from the workmen, except ndirectly. The draft bill contains provision for a "waiting eriod," which means that for injuries that keep a man away rom work for only a short time he is not entitled to compenation. The length of this period has not been decided upon.

The bill preserves the individual liability features of the nglish law and endeavors to incorporate the state insurance lea that had been adopted by the state of Washington. The egligence clause is eliminated.

Iay Except Railways and Farmers.

The bill covers all employers of labor, large and small, but is understood that the commissioner has no idea of making so wide. When the bill comes before the Ontario Legislature rovision will probably be made to leave out the railways, the armers and retailers, and perhaps one or two industries out of e grouping. The railways propose to handle their own comensation and will do it upon a basis determined by the comission. The farming industry will not be covered or the reail trade. These exceptions are left for the legislature to eal with as it thinks best. Where there is no grouping and o accident fund there will be individual liability with the iterests of the injured person thoroughly safeguarded, and ompensation subject to the orders of the board.

Iot Restricted to Accidents.

Compensation will not be restricted to accidents. The bill framed to allow a workman incapacitated by occupational isease to apply for and receive compensation just as he would or accidents.

The workman who accepts compensation under the act elinquishes all right to private action to recover further comensation.

The general accident funds of the various groups into which e bulk of the industries of the province will be divided are be collected under the supervision of the board by an assessent upon the annual pay-roll of an employer. The draft bill ives no indication of the manner in which these groups will be rranged. They will, of course, be arranged according to hazrd, and probably along much the same lines as under the state f Washington system. The board is given power to rearrange ny of the classes provided in the schedule and establish other lasses, embracing new industries or industries not taken care f in the initial schedule.

s to Accident Prevention.

Accident prevention has received a good deal of attention rom the commissioner, and a number of clauses have been iserted to penalize the careless or negligent employer. Where greater number of accidents have occurred in any industry or mployment than there ought to have happened if proper preautions had been taken, or where in the opinion of the board, e machinery or appliances, etc., are defective or insufficient, e board may add an additional assessment upon the employer r may withdraw the industry entirely from its class, leaving e employer individually liable for any claim his workmen may ring against him for compensation. The additional percentge may be added to the accident fund or, if that is already ufficiently large, may be used to reduce the assessment on the ther industries in the group.

In proceeding along this line the board or its officers may nter any premises to conduct an examination, and penalties re to be imposed for any obstruction or refusal to permit such ispection.

tatement of Pay Roll.

If an employer does not supply the board with a statement f his pay roll, the board will have power to fix an assessment ased upon an estimated pay roll. In addition, the employer ho so defaults or who does not give a correct statement is to e made liable to a penalty. The board will be given power o make an examination of the books of an employer to ascerain whether his statement is correct or not. The collection achinery has been carefully considered, one clause permitting npaid assessments to be collected by municipal collectors as axes and then turned over to the board.

One of the important features of the proposed Act is the lause that throws the burden of proof, where an accident is isputed, upon the employer. The presumption is that where n accident occurs in the course of employment, it arose out of he employment.

The workman who is sent outside the province is also to e protected by clauses that give him the same right to comensation that he would enjoy if the accident occurred in Ontario, provided that his employment outside Ontario has lasted less than six months. If the workman is injured or killed in some province or state where he is entitled to compensation, he or his dependents must decide within three months under which law compensation will be claimed. Where a dependent is not a resident of Ontario he will not be entitled to compensation unless the country in which he is living extends the same boon to dependents in Ontario.

Commission for Ten Years.

The draft bill provides for a board of three commissioners appointed by the government for a term of ten years. The board will be given wide powers, and no commissioner may, directly or indirectly, become interested in any industry, employment or business to which the Act applies. The head office of the board will be in Toronto, and all meetings will be held in the city except where the board considers it necessary to make exceptions.

The commissioners will be independent of the courts. The board is to be given exclusive jurisdiction to examine into and determine all matters arising under the Act, and its actions and decisions shall be final and not open to question or review in any court, and no proceedings of the board may be restrained in any way.

Power to Fix Compensation.

The board will be given power to fix compensation where the employer is individually liable, and any order of the board for payment of compensation by an employer individually liable, if filed with the clerk of the District or County Court, becomes an order of that court, and may be enforced as a judgment of that court.

The regulations of the board are made subject to the Lieutenant-Governor-in-Council.

The clauses dealing with occupational diseases give the workman much the same protection as he receives from accident compensation, except that the disease must be due to the nature of some employment in which he was engaged within twelve months of the date of his disablement.

Mr. F. W. Wegenast, representing the Canadian Manufacturers' Association, protested to Sir William Meredith that the bill was one of individual liability, and that it would bankrupt a small manufacturer to pay the amount of compensation which might be claimed.

◆

EDMONTON SELLS BONDS.

Edmonton city has concluded negotiations with Messrs. Klinewortz, of London, England, says an Edmonton dispatch, whereby the city sells that firm $11,000,000 worth of debentures at 95 net to the city, without accrued interests, debentures to bear interest at five per cent. This means that money costing the city a trifle over 5¼ per cent. is considered a good bargain in view of the large offerings and present conditions of the money market, concludes the message.

◆

CANADIAN GENERAL ELECTRIC COMPANY.

Construction work of all kinds and power plant development were much in evidence last year. According to the annual report of the Canadian General Electric Company, Limited, that corporation played a prominent remunerative role in that activity. The company's profits for the twelve months were $2,011,719. From that amount has been written off for depreciation the sum of $456,358, and of interest on borrowed capital the sum of $158,878, leaving a balance of $1,396,483. Deducting from this amount dividends on preference and common stock, at the rate of seven per cent. per annum, and a bonus of one per cent. on the common stock, amounting in all to $689,871, there remains a net balance of $706,611, of which $700,000 has been added to the reserve fund, which now stands at $2,369,531. The total of the reserve fund added to the balance carried at the credit of profit and loss makes a total surplus of $3,051,922, equal to 30.51 per cent. of the par value of the share capital of the company, both common and preference. In addition to the surplus as shown, the value of the real estate owned by the company is greatly in excess of the cost value as it appears on the books, namely, at $4,884,018. There is also a reserve for depreciation amounting to $1,104,453.

A reference to the company's balance sheet, printed elsewhere in this issue, shows that the total cash and current assets amount to over $9,000,000, of which amount over $5,500,000 is carried in the inventory. This asset includes the materials for all orders and contracts on hand which were not completed and shipped at the end of the year. Following the usual policy of the company, this inventory has been taken at cost price, or the market price, whichever was the lower, plus the actual cost of labor expended on the contracts, and no estimated profit has been taken into account. Uncompleted contracts, to the value of about seven million dollars, in various stages of completion, have been carried over to the current year.

The report is one of the best ever presented by the Canadian General Electric Company. Their financial position has improved and that position should be maintained in view of fairly good business prospects.

INDUSTRIAL LEGISLATION IN NEW BRUNSWICK

Encouragement of Agriculture and Lumbering—Shipbuilding Plant at St. John—Oil Shales

(Special correspondence.)

St. John, N.B., March 18th, 1913.

This session of the New Brunswick legislature has been marked by considerable legislation for the encouragement of agriculture in the province, and especially for the encouragement of agricultural education, not only at two new agricultural schools which are to be established, but in connection also with the universities and the normal school.

Perhaps the most important legislation adopted at the current session was that relating to the crown timber lands. The leases which have been held by the big operators for a term of twenty-five years will expire in a few years, and an entirely new policy has been adopted. Hereafter two classes of license will be issued. The first is a pulp and paper mill license, renewable from year to year for thirty years, and may be extended for a further period of twenty years; and the second a saw mill license renewable from year to year for twenty years, and may be extended for a further period of ten years. Both forms of license, however, are subject to a bonus, payable for each period.

What the License Provides.

The pulp and paper license provides that the licensee must have a pulp mill in operation within three years of the date of the license, and that at least 50 per cent. of the lumber cut on the property must be manufactured into pulp and paper in New Brunswick. It is believed that this will stimulate the pulp and paper industry. It is also provided under the new law that a survey, examination and classification of all the crown lands of the province will be made and completed by the 1st of August, 1917. Provision is also made to encourage conservation of the forest, and if it is found when the survey is made that any licensee is holding more lands than is reasonably required for his operations, the quantity may be reduced and a portion transferred to other licensees.

The weather during the latter part of February and the first part of March was favorable for the lumber operators in the southern part of the province, and they have had success in getting out their logs and the lumber cut in portable mills. The outlook, therefore, is brighter, and this promises to be a good year for the industry. The demand for New Brunswick spruce in the Montreal district and Eastern Ontario is steadily growing, and shippers have had great difficulty in getting enough cars to enable them to fill orders. The result is that the lumber yards at St. John are now nearly bare of some kinds of stock, and the sugar refinery people who wanted 300,000 feet found they could do better in other parts of the province than with the city mills. The lumber market all round is in a strong position.

Assistance Will be Given.

Resolutions have been adopted by the legislature to encourage the establishment of a ship-building plant at St. John. Th resolution recommends the government "to give such reasonable encouragement as may seem proper, and calculated to ensure the construction and operation of the said works." The city and county of St. John are also prepared to give substantial assistance when the ship-building proposition is put in such form as to be satisfactory to the provincial government. It is regarded as certain that the ship-building plant will be established at St. John, and that the present year will see the preliminary arrangements completed.

The government has been given authority to engage a highway engineer and to expend $100,000 per year on permanent roads. The plan will be to select the worst sections of the present roads in various parts of the province, and construct sections of permanent roads, so that by following this course for a number of years, the province will be provided with a considerable mileage of first-class highways.

Value of Natural Resources.

The New Brunswick Hydro-Electric Company has been given some additional powers. It proposes to develop at a point within fifty miles of the city from fifteen to twenty thousand horse-power, and transmit the current to St. John to be used for light and power purposes. Legislation relative to street railways will result in an extension of the St. John street railway system into the suburban districts, enabling the city to expand in these directions. This is very important as the present city is somewhat congested.

In the discussion of a bill giving some additional powers to the New Brunswick Shales, Limited, it was stated that the company, which has Sir Wm. Mackenzie at its head, has already spent about $100,000 in development work in Albert County, and that the carrying out of its plans will result in the creation of one, if not two, towns of five thousand each in Albert County. The Maritime Oilfields, Limited, which has the oil and gas wells, has spent about a quarter of a million in development work and will next summer carry on drilling operations at Sussex, which is within forty-five miles of St. John.—M.

UNITED STATES FIRM EXTENDS CANADIAN CONNECTIONS

The Lautz Company, of Buffalo, is rapidly extending its Canadian connections. It has now become interested in the Missisiquoi Marble Company. The incorporation of the Missisiquoi Lautz Corporation has been effected, by which the Missisiquoi Marble Company, of Montreal, combine with the Lautz Company. The capital will be $1,500,000. Mr. Henry Timmins, managing director of the original Montreal company, is retiring from active participation in the concern, to take up the work of financial brokerage and promotion in the city. Mr. F. J. Lautz will be the new general manager, and Mr. H. W. Richardson, of Kingston, may be the president. The Lautz Company has a branch office in Toronto and handles tiles and marble.

◆

LEMIEUX ACT NOT ENTIRELY APPLICABLE

It does not appear that Sir George Askwith, who recently enquired into the Industrial Disputes Investigation Act of Canada, popularly known as the Lemieux Act, on behalf of the British board of trade, favors the introduction into England of an act on all fours with the Canadian act. He thinks it might be feasible in the United Kingdom to give opportunity for investigation and recommendation, and to create in the public mind and the minds of employers and employed the opinion that strikes or lock-outs ought not to be commenced while such are pending, but he concludes: "I consider that the forwarding of the spirit and intent of conciliation is the more valuable portion of the Canadian act, and that an act on these lines, even if the restrictive features which aim at delaying stoppage until after inquiry were omitted, would be suitable and practicable in this country. Such an act need not necessarily be applied in all cases, but neither need it be confined to services of public utility. It could be generally available in cases where the public were likely to be seriously affected. Without the restrictive features it would give the right not only to conciliate but fully to investigate the matter in dispute, with similar powers in regard to witnesses, production of documents and inspection, as are vested in a court of record in civil cases, with a view, if conciliation fails, to recommendations being made as to what are believed to be fair terms. Such an act, while not ensuring complete absence of strikes and lock-outs, would be valuable, in my opinion, alike to the country and to employers and employed." This would seem to indicate that Sir George Askwith is not impressed with the value of a legal restriction of strikes and lock-outs prior to inquiry, but holds that the principle of conciliation and arbitration should be made more universal in this country, comments the London Chamber of Commerce Journal. Most people nowadays are convinced of the value of conciliation and arbitration in labor disputes, which principle has been championed by the London chamber of commerce in particular for many years past. But whether a wider adoption of the principle, without some means of delaying either side from throwing down the gage of battle at the time most convenient to itself, would materially reduce the number of disputes, is likely to be received with some scepticism in industrial circles in the light of recent happenings.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Dominion Bank.—Ten thousand new shares of Dominion Bank have been listed on the Montreal Exchange to-day.

Montreal Arena Company.—The Montreal Arena Company, has declared a stockholders' bonus of 10 per cent. on the past season's profits. This is in addition to the regular 7 per cent. declared some time ago.

Crossen Car Company.—For the year ended December 31st, 1912, the Crossen Car Company's net earnings amounted to $202,403.80 or over 6½ times the amount of the bond interest. The net liquid assets of the company are more than 125 per cent. of the bonds outstanding.

Calgary Brewing and Malting Company.—For the ten months of the Calgary Brewing and Malting Company's fiscal year, ending January 31st, 1913, gross sales amounting to $1,145,065.78, as compared with $778,324.08 for the previous year, being an increase of $366,741.70.

Price Brothers and Company.—The second paper unit of Price Brothers and Company's new mill at Kenogami has started operation, thus bringing the capacity of the plant up to 100 tons' capacity per day. It is expected that the third unit of 50 tons' capacity will be in operation within six weeks.

Securities Corporation, Limited.—The Securities Corporation, Limited, recently organized by J. H. C. Willoughby-Sumner Company at Saskatoon, declared a dividend on February 22nd, at the rate of 25 per cent. per annum. Mr. J. Trotter, formerly of Montreal, is identified with this company as secretary-treasurer.

Consumers' Gas Company.—A special meeting of the shareholders of the Consumers' Gas Company has been called to consider the sale by auction or tender of sufficient new capital stock to provide for the extension of the company's works and pipes into the townships adjoining Toronto. The meeting is called for April 9th.

Thomas Davidson Manufacturing Company.—An increase has taken place each year in the gross sales of the Thomas Davidson Manufacturing Company, and the figures given below for the past five years are interesting:—1908, $1,036,290.96; 1909, $1,187,887.59; 1910, $1,305,365.71; 1911, $1,397,532.28; 1912, $1,669,631.44.

Dominion Textile Company.—The first of the 600 looms in the Dominion Textile Magog branch were started up and all will be running probably within a month. The capacity of the Mount Royal mill is being increased by 300 looms and the capacity of the St. Anne's branch will be doubled by enlargements now being carried out.

Dominion Steel Corporation.—The Dominion Steel Corporation has secured two steamers, which will be employed exclusively during the next season, for freighting wire, wire nails, fencing and other wire products from their new mill at Sydney to Montreal and the Great Lakes. Arrangements have been made for landing at various ports from which distribution to interior points can be conveniently made by rail.

Camaguey Company.—The following comparative statement of gross and net earnings of the Camaguey Company for the month of January shows the company to be doing better than last year. It is expected that the earnings for 1913 will be larger than for the past year.

	1913.	1912.
Gross	$15,075.41	$19,902.21
Net	6,070.54	6,773.12

Mexican Light and Power Company, Limited.—The Mexican Light and Power Company, Limited, statement of combined earnings and expenses for the month of February, 1913:—

	1912.	1913.	Decrease.
Gross earnings	$ [illegible]	$ [illegible]	$ [illegible]
Net earnings	555,660	548,672	6,988
			Increase.
Gross earnings from Jan. 1	1,497,286	1,545,874	48,588
Net earnings from Jan. 1	1,144,460	1,161,250	16,790

City of Cobalt Mines.—An injunction has been filed against the directors of the City of Cobalt Mines by R. K. Sproule, of Toronto, to restrain them from selling the property to the English capitalists who made the offer recently. The sale of the property was made at the rate of about 54 cents a share, and was sanctioned by a meeting of the shareholders held March 3rd. It has since been alleged that an offer giving the company a larger price for the property was made, and was refused by the directors. This is the occasion for the action. According to the books of the company, Mr. R. K. Sproule holds 2,000 shares of the City of Cobalt stock, which were transferred to him February 20th. Other Toronto men are interested in the action. Mr. Sproule is a Toronto broker.

Mexico Tramways Company.—The Mexico Tramways Company statement of earnings and expenses from traffic only, as advised by cable, for the month of February, 1913:—

	1912.	1913.	Decrease.
Total gross earnings	$ 503,998	$329,361	$174,637
Operating expenses	245,798	182,628	63,170
Net earnings	$ 258,200	$146,733	$111,467
Aggregate gross earnings from January 1	$1,046,777	$890,996	$155,781
Aggregate operating expenses from January 1..	514,323	452,887	61,436
Aggregate net earnings from January 1	$532,454	$438,109	$94,345

Consolidated Mining and Smelting Company.—The Consolidated Mining and Smelting Company of Canada, Limited report ore received at Trail smelter for week ending March 7th, and from July 1st to date, in tons:

Company's mines—	Week ended March 7.	July 1, to date.
Centre Star	2,570	109,620
Le Roi	1,079	31,959
Sullivan	645	21,685
Richmond-Eureka	30	874
St. Eugene	30	1,093
No. 7	84	499
Molly Gibson	..	1,277
No. 1	..	153
Other mines	2,102	56,627
Total	6,540	223,787

◆

POSITION OF UTILITIES COMMISSION

Monetary Times Office,
Montreal, March 19th, 1913.

The decision of the public utilities commission in the matter of the appeal of the Tramways Company against its jurisdiction has been given. It dismisses the opposition entered by the Tramways Company and declares that it has the right to demand and obtain all the information asked for. This victory, however, is apparently of but small effect inasmuch as the chairman, in giving his decision, points out that the commission can do little to remedy the existing conditions against which the citizens have so loudly complained. He comments on the failure of the railway to keep up with the rapid growth of the city and on the fact that no determined and united effort has been made to solve the difficulty. He states that the duty of devising ways and means and carrying them into effect is the joint obligation of the city of Montreal and the Tramways Company chiefly. It is not for the commission to say who is to blame. As for the commission, it is without authority itself to even order an adequate remedy; it may, however, accomplish something as an intermediary or arbiter in the matter and this, he thinks, would be the proper duty of the commission and he would only be too glad to discharge this duty to the utmost of his ability. He says: "The fact that we have no jurisdiction to provide a remedy where the city or any other municipality is to blame, while not of account from a legal standpoint, in my opinion, is of great practical importance in weakening the value and effect of our present enquiry. . . . Should the past deadlock continue, it will be for us to use our power to find a remedy if possible."

The essence of all this is that the commission is powerless in the only question of importance that it has had to deal with.

NEWLY INCORPORATED COMPANIES

Realty, Mining and Development Corporations are Prominent in List

One hundred more companies have been incorporated this week for many and varied purposes. Realty development and mining companies are prominent in the list. The total capitalization of these incorporations amounts to $18,369,999. And the largest companies are:—

Company.	Capital.
Hudon and Orsali, Montreal	$1,000,000
McDonald Hydro-Electric Heating Company, Ottawa	1,000,000
Western Provincial Lands, Prince Albert	1,000,000
Canadian Bonded Securities Company, Vancouver	1,500,000
Missiquoi-Lautz Corporation, Phillipsburg.	1,500,000
Gold Lion Brewery, Valleyfield	2,000,000
Temagami Chief Mines, Toronto	2,500,000

Grouping the new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	No. of Companies.	Capitalization.
Ontario	34	$6,315,000
Quebec	25	6,101,999
British Columbia	32	4,461,000
Saskatchewan	1	1,000,000
Manitoba	7	443,000
New Brunswick	1	49,000
	100	$18,369,999

The following is a list of charters granted during the past week in Canada. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Prince Rupert, B.C.—Piercy, Morris and Company, $100,000.

New Westminster, B.C.—People's Mercantile Company, $50,000.

Kamloops, B.C.—North Thompson Ranching Company, $100,000.

Keremeos, B.C.—Similkameen Development Company, $100,000.

Hazelton, B.C.—Aldous and Murray, $100,000, (financial brokers).

North Vancouver, B.C.—Paine and McMillan, $50,000, (hardware).

Oshawa, Ont.—Stacey Builders, $40,000. J. Stacey, C. N. Stacey, W. Stacey.

Cobalt, Ont.—Moore Drug Company, $10,000. W. Lees, T. Hobson, O. D. Peat.

Sault Ste. Marie, Ont.—Lyttle's, $40,000. F. A. Day, W. A. Gordon, S. H. Glassford.

Chatham, Ont.—James Cornhill Sons, $30,000. J. Cornhill, E. Cornhill, J. T. Cornhill.

Leamington, Ont.—Erie Co-Operative Company, $40,000. J. Atkin, R. Maxwell, J. Bradford.

Brockville, Ont.—Robert Wright Company, $100,000. R. Wright, R. L. Wright, G. A. Wright.

Woodstock, Ont.—Arena Company of Woodstock, $40,000. H. M. McIntosh, F. Millaman, A. W. Muir.

Hagersville, Ont.—Superior Supply Company, $10,000. D. N. Almas, M. H. Legett, A. J. Roulston.

Hamilton, Ont.—Mutual Building and Land Company, $40,000. T. W. Reid, A. C. Vosper, J. Dixon.

Basswood, Man.—Basswood Foresters' Hall Company, $3,000. J. R. McLennan, W. Feir, F. Proven.

Cookshire, Que.—Eastern Investment Realty Company, $99,000. J. A. Butler, H. H. Pope, T. MacRae.

St. Thomas, Ont.—A. E. Ponsford, $60,000, (builders). A. E. Ponsford, J. C. Ponsford, G. H. Ponsford.

Prince Albert, Sask.—Western Provincial Lands, $1,000,000. A. J. Thomson, R. H. Parmenter, W. S. Morlock.

Valleyfield, Que.—Gold Lion Brewery, $2,000,000. E. Hebert, Valleyfield; F. X. Dupuis, A. Leroux, Montreal.

Three Rivers, Que.—Brunelle Furnace and Boiler Company, $100,000. J. A. Jutras, J. Boivan, W. Descoteaux.

St. Alex des Monts, Que.—Compagnie Industrielle de St. Alexis des Monts, $20,000. A. Dho, A. Picard, J. Turner.

Sudbury, Ont.—Cook Construction Company, $200,000. A. B. Cook, Helena; H. F. McLean, W. J. Boland, Toronto.

Phillipsburg, Que.—Missiquoi-Lautz Corporation, $1,500,000. A. R. McMaster, Westmount; T. M. Papineau, J. Kerry, Montreal.

Daveluyville, Que.—Compagnie des Chaises de Daveluyville, $49,000. Z. A. Bruneau, Stanfold; O. Marcotte, L. Nault, Daveluyville.

Windsor, Ont.—Kamiskotia Land Company, $100,000. G. C. Clark, C. D. Ransom, W. J. Clearihue. Windsor Publishing Company, $100,000. J. E. Lapointe, A. St. Onge, E. Jacques.

Campbellton, N.B.—La Cie Industrielle de Restigouch, $49,000. P. E. Bergeron, Dalhousie; A. C. Belle-Isle, Campbellton; F. Lachance, Richard Station, N.B.

Walkerton, Ont.—Walkerton Rink Company, $10,000. L. H. McNamara, C. Smith, F. W. Lippert. Canadian Auto Painting and Trimming Company, $40,000. G. Reid, J. M. Wallace, P. T. Duncan.

Fort George, B.C.—Fort George Lake and River Transportation Company, $50,000. Fort George and Nechaco Lumber Company, $50,000. Fort George Realty and Securities Company, $150,000. Nechaco Stores, $50,000.

Ottawa, Ont.—Federal Stone and Supply Company, $50,000. J. F. Orde, M. Grant Powell, N. W. Lyle. Ottawa. Contractors, $250,000. W. H. Poupore, Chapleau; J. W. Hennessy, Fort Coulonge; W. H. Dwyer, Ottawa. McDonald Hydro-Electro Heating Company, $1,000,000. J. D. McDonald, R. W. Demorest, E. H. Low.

Quebec City.—Railway Centre Park Company, $200,000. N. T. Turgeon, Beauceville; J. DeVarennes, G. Proteau, Quebec. Canadian Promoting Company, $49,000. L. Caron, J. N. Caron, Laurier; E. G. Odell, Quebec. Dominion Investments, $100,000. R. H. Jennings, Ottawa; A. LaRoche, Montreal; P. L. O. Gagnon, Quebec. National Shoe Stock, $20,000. C. Blouin, J. P. Beland, H. Rochette.

Victoria, B.C.—Prospect Park, $80,000. Victoria Building Supplies, $10,000. Green Lumber and Furniture Company, $25,000. Cumshewa Gold Mines, $500,000. Roberts, Beasley and Gallon, $25,000, (stockbrokers). Port Alberni Lumber Company, $25,000. Stewart Transportation and Coal Company, $350,000. James M. Welborn, $100,000, (insurance agents). London Realty Company, $100,000.

Winnipeg, Man.—Jackson and Goldie, $50,000, (builders). J. E. Adamson, C. A. Adamson, F. L. Tait. Contractors, $100,000. R. J. Macdonald, H. J. Macdonald, A. McGougan. Dunmore Development Company, $100,000. W. S. King, W. J. Donovan, A. W. Lewis. Lurie's, $20,000. A. B. Bell, M. Lurie, E. Loftus. Shapiro Chemical, $150,000. L. Shapiro, E. Frith, C. W. Chappell. Jaffa, Turner and Burke Company, $40,000, (confectionary). H. B. Jaffa, E. I. Madigan, J. Row.

Vancouver, B.C.—Central British Columbia Townsites Company, $10,000. Knowler and Macaulay, $100,000, (boarding camp contractors). Goose-Millerd Packing Company, $25,000. North Coast Fisheries, $100,000. National Lumber Company, $75,000. Ryan and McKenney, $50,000, (leather goods). Richardson and Potts, $50,000, (men's furnishing). Dominion Dock and Supply Company, $250,000. Fraser Lake Lumber Company, $25,000. Oriental Transfer Company, $50,000. Omineca Gold Mines, $200,000. Debentures, $10,000. Canadian Bonded Securities Company, $1,500,000.

Montreal, Que.—Oriental Trust Company, $50,000. A. Lavergne, C. Smith, E. Taschereau. Rawdon Heights Realties, $100,000. W. R. Lorimer, F. G. Bush, G. R. Drennan. Hudon and Orsali, $1,000,000, (liquors). A. Orsali, A. Hudon, J. Huysman. W. H. Jackson of Canada, $25,000, (building products), R. C. Smith, F. H. Markey, G. G. Hyde. Realty Exchange of Montreal, $50,000. W. G. Mitchell, R. Chenevert, F. Callaghan. Homes, Limited, $50,000. J. W. Cook, A. A. Magee, T. B. Gould. Cartier Realty Company, $100,000. G. A. Campbell, T. M. Papineau, Miss M. Bradley. Everybody's Stores, $50,000. G. L. Alexander, M. Dugas, C. J. E. Charbonneau. Franco-Canadian Amusement Company, $49,999. E. Viau, A. Gagne, J. W. Themens. Montreal Laundry Company, $145,000. C. A. Duclos, Westmount; J. B. Johnson, Montreal; J. E. Coulin, Outremont. Onontio Club Incorporated, $10,000. T. Jones, T. Langlois, W. L. Lee, Westmount. Park Dollar Annex, $195,000. A. Trappier, J. A. Langelier, V. A. Roy. Canadian College of Fire Arts, $20,000. J. DeWitt, E. E. Roward, W. H. Howard. Le Pret Mutuel Ouvrier, $100,000. L. Blanchet, E. Dumont, A. Gosselin. Ideal Soda Water Company, $20,000. J. B. Dufort, J. A. Bellehumeur, M. Gravel.

Toronto, Ont.—Industrial Buildings, $400,000. A. J. Thomson, R. H. Parmenter, W. S. Morlock. Orion Realty and Investments, $150,000. F. E. Davison, R. E. Campbell, J. A. Rowland. Fit and Fashion Clothing, $40,000. J. Cummings, T. P. Cassidy, R. S. Gee. Temagami Chief Mines, $2,500,000. J. M. Ferguson, J. M. Adam, S. C. Arrell. Dominion Fireless Cooker Company, $40,000. H. E. Wallace, T. W. Wood, E. R. Thomson. United Investments, $40,000. R. W. Eades, D. McNeill, T. Newell. University Heights, $70,000. J. K. Pickett, J. A. McEvoy, H. F. Petman. Queen City Investments, $40,000. E. Eisinger, G. Adams, E. Smily. Bell Realty Company, $40,000. T. Livingston, R. T. Bell, W. W. Brownell. Northumberland Realty Company, $75,000. N. D. Maclean, J. J. Flint, C. W. O. Goshorn. Highcliffe Realty Company, $50,000. J. J. Flint, C. W. Goshorn, G. D. Waters. Hampstead Estates, $50,000. J. J. Flint, C. W. O. Goshorn, G. D. Waters. F. W. Thorold Company, $40,000, (engineering supplies). Upper Canada Investors, $40,000. T. A. Silverthorne, F. J. Foley, J. H. Flett. Chinese Mutual Club, $15,000. C. Hing, L. Wai, R. Ming. Conger Lehigh Coal Company, $500,000. A. J. Thomson, R. H. Parmenter, N. B. Wormwith.

BOND TENDERS INVITED

Monetary Times' Weekly Register of Information for Bond Dealers and Municipal Officials

Bow Island, Alta.—Until April 1st, for $40,000 30-year 6 per cent. debentures. W. A. Bateman, secretary-treasurer.

Ardath, Sask.—Until April 5th for $3,000 6 per cent. 15-year fire hall debentures. E. G. Sampson, secretary-treasurer.

North Vancouver, B.C.—Money by-laws aggregating nearly half a million are being voted on by the electors to-day.

North Bay, Ont.—Until March 31st for $80,000 5 per cent. 30-year debentures. T. N. Colgan, commissioner of works. (Official advertisement appears on another page).

Brandon, Man.—Until March 25th for $125,000 5 per cent. 30-year school debentures. J. B. Beveridge, secretary-treasurer. (Official advertisement appears on another page).

Wallaceburg, Ont.—Application will be made to the Ontario Legislature for an Act validating a by-law authorizing the borrowing of sufficient funds to construct a waterworks system.

Hanover, Ont.—Until March 22nd for $53,500 debentures. Particulars may be obtained from F. S. Mearns, town solicitor, 60 Victoria Street, Toronto. John Taylor, town clerk, Hanover.

Rapid City, Man.—Until March 25th for $12,000 5 per cent. electric light and power works debentures. G. Gordon Murray, secretary-treasurer. (Official advertisement appears on another page.)

Kingsville, Ont.—Until March 26th for $10,000 10-year 5 per cent. and $4,906.31 10-year 5 per cent. local improvement debentures. George Pearse, clerk. (Official advertisement appears on another page).

Duck Lake, Sask.—Until April 4th, for $6,000 5½ per cent. 20-year town hall, and $4,000 5½ per cent. 20-year debentures, bonus to Dominion Milling Company. Frank Hopwood, secretary-treasurer.

Owen Sound, Ont.—The town will apply to the Provincial Legislature for an Act confirming the by-law providing for the issue of $4,000 debentures to purchase certain lands for factory sites.

Steelton, Ont.—Application will be made to the Ontario Legislature at the next session for an Act validating the following money by-laws: $9,000 for parks, $7,000 for public school, and $15,500 for pavements.

Steelton, Ont.—Until March 25th for $40,000 10-year 5 per cent. local improvement, and $60,000 5 per cent. 20-year local improvement debentures. J. Robinson, town clerk. (Official advertisement appears on another page).

Grass Lake Rural Municipality No. 381, Sask.—Until April 7th for $10,000 20-year 5 per cent. general improvement debentures. J. T. Roper, secretary-treasurer, Salvador, Sask. (Official advertisement appears on another page).

Pincher Creek, Alta.—Until March 24th for $30,000 6 per cent. 30-year municipal building; $15,000 6 per cent. 20-year sidewalk debentures. G. D. Plunkett, secretary-treasurer. (Official advertisement appears on another page.)

Welland, Ont.—Until March 31st for $75,000 30-year waterworks; $45,000 30-year hydro-electric; $17,489.37 10-year local improvements; and $12,109.26 10-year local improvement debentures. Interest, 5 per cent. J. Hamilton Burgar, town treasurer. (Official advertisement appears on another page.)

Estevan, Sask.—Until March 26th for $50,000 5 per cent. [illegible]-year high school; $30,000 5 per cent. 30-year waterworks; $25,000 5 per cent. 30-year sewer; and $25,000 5 per cent. 25-year manufacturing establishments' debentures. L. A. Duncan, secretary-treasurer. (Official advertisement appears on another page.)

North Vancouver, B.C.—Until March 27th for $26,000 30-year 5 per cent. debentures to construct additional terminal accommodations, and $137,000 40-year 5 per cent. debentures to construct a new and modern ferry steamer. Both issues fully guaranteed as to principal and interest by the city of North Vancouver. H. F. Kemp, secretary-treasurer, North Vancouver City Ferries, Limited, North Vancouver.

◆

The fact should be borne in mind that the great investment field is constantly being accelerated from several sources. Not only does it benefit by the steady growth of population and general development of the country, but it expands steadily because of the fact that it is becoming increasingly necessary to do things more and more on a large scale, and this tendency automatically involves the elimination of the smaller producer and competitor, and forces a steadily expanding element into the field of investment. Even the busy toilers of to-day, as well as the salaried class and those who are in the professions, find it profitable to place their surplus funds more and more into [illegible] environment. It is this tendency of modern civilization which has much to do with making the investor class of greater importance in all parts of the country.—John Moody.

PACIFIC COAST MUNICIPALITIES

They Require Much Money and Propose Large Expenditures—Burnaby Adopts Insurance Plan—Gold Finds

(Staff Correspondence.)

Vancouver, March 17th.

Those interested in municipal and provincial development on the Pacific coast are beginning to take serious consideration of the money market and the wisdom of floating further debentures.

Much money is needed this year, not only in Vancouver, but in all the surrounding municipalities. Vancouver ratepayers approved by-laws totalling about five million dollars at the first of the year, and in addition nearly two million dollars more for local improvements. If the opponents of the Canadian Northern agreement had their way, they would probably borrow money under a separate clause of the charter, which permits loans without having them charged against the borrowing powers of the city.

Prices for municipal debentures have been low, and to make fairly sure of good returns for the sewer construction debentures, the government was asked to guarantee them. As the sewer scheme embraces all the municipalities on this part of the mainland, and extends over a long term of years, the government gave its backing to the proposal.

A short time ago the city was asked by its fiscal agents not to increase the civic bond interest from four to four and a half, as it was thought the high rate in the market and the scarcity of money was only temporary, but later it was suggested to the city that perhaps it would be best to increase the rate.

Municipal Insurance Scheme.

The municipality of Burnaby has unwisely decided to adopt an insurance scheme of its own, and will set aside $5,000 each year as a nucleus to provide a fund on which to draw when liability has been saddled on the municipality. A public liability policy and an employers' liability policy have been carried, these costing the city last year $7,000. As only $1,500 can be obtained for one person, the council thought the risk of heavier damages might be taken. By setting aside $5,000 a year it is expected to save about $2,000 a year.

Attracted by Gold.

Another rush of gold miners is taking place to the eastern part of the Atlin district in northern British Columbia. Without doubt there is some gold there. From time to time stories come out of the interior of gold discoveries, and here and there throughout the remote portions of the province men are working up prospects under great handicaps. With the construction of railways in the north, many of the good properties will be advanced to the stage where they will be mines. In the meantime, these periodical rushes will take place, every time some adventurous prospector gets further back into almost untrodden country and runs against a good find in a little creek. The last stampede in that direction was to the Igenika, about eight or ten years ago, but it went the way of all gold diggings. Many of the old-time mushers are leaving the coast cities for the new district, and, with spring coming on, the weather will be all in favor of seeing what there is in the country before winter snows make for hardships.

◆

RECOMMENDS SUBWAYS FOR MONTREAL

Mr. Duncan McDonald, in a report made on behalf of certain citizens, on Montreal's transportation, says in part: 'I am of opinion that the traffic of Montreal in the very near future must be handled by the operation of subway trains. This will be the only practical means of catering to the requirements of our urban and suburban population.

"It would be an unwise contemplation to enter into this question with the idea that we must immediately build a complete system of subways in five or six years, but we should commence with such a nucleus of main artery underground that will, as the city grows, be gradually developed in accordance with the growing demands of our traffic."

President Robert, of the Montreal Tramways Company, has announced an elaborate solution of the present congestion. The plan, which will shortly be submitted to the civic board of control, involves an expenditure of from $[illegible] to $[illegible], which the company are prepared to make in an effort to improve the present system. It would also mean the purchase of [illegible] cars in addition to the [illegible] which are now on order by the company. The scheme involves the opening of several new streets running east and west and a corresponding number running north and south

SCOTCH VIEW OF CANADIAN INVESTMENTS

Good Words for the Bank Act—Natural Resources Make a Substantial Foundation.

Some comments of interest regarding Canada as a promising field for the investor, are contributed to the Dundee Advertiser by Mr. J. C. Robertson, C.A., of Dundee. He writes with some authority, having completed nearly forty years' official connection with investment companies doing business on the American continent. During that period he has made ten business visits to this side of the Atlantic—the first in 1883, and the latest in 1910. He has travelled through nearly all the States of the Union, and stayed in the principal cities. In Washington he had an instructive private interview with President Roosevelt and his Chancellor of the Exchequer regarding Dundee investments. Regarding Canada, he made two special missions of investigation there for investment purposes in 1907 and 1910, and travelled through all the provinces from the Atlantic to the Pacific—in the first case from west to east, and in the second from east to west. Both times he visited all the principal cities in the Dominion from Victoria and Vancouver to Quebec, but especially the rising towns in the western provinces, in order to be able to advise prospective investors and settlers.

Recommends Canadian Investments.

Mr. Robertson thinks there is no reason why satisfactory results should not be secured for investments in Canadian companies during the next ten or twenty years, provided due care is taken in securing reliable investing agents. The financial and currency crises of 1893 and 1907 in the United States cost Scottish investors in that country a great deal of anxiety and a considerable loss, but the good banking system of Canada saved its investors and large business undertakings from the troubles of their big neighbour.

Discussing our banking system, he reminds us that it is founded on that of Scotland, viz., strong central banks with numerous branches, whereas in the United States no National Bank can have any branches.

A summary of the certified returns of the twenty-five principal Canadian banks at the end of 1912 gives the following results:—

Paid up capital	£22,976,383
Note circulation	22,009,671
Deposits, including savings bank departments	202,483,712

Praise for Banking System.

"The banks," he says, "have nearly three thousand branches throughout Canada and a few in the United States. A number of branches are opened and a number closed each month in newly settled districts. The banks in Canada are helping all in their power the business and farming community that need money, just as the Scottish banks did in the earlier half of the nineteenth century before they sent such a large proportion of their money to London. In 1912 an amendment of the Canadian Bank Act was passed, authorizing the banks to lend money to farmers on the security of their crops and produce of all kinds. This is rendered possible by the laws of Canada allowing a security over movables, just the same as the English law, and this is an advantage they hold over Scotland. It is already reported that two of the larger banks had lent to western farmers, during the past year, a total of five millions sterling. The chief banks all have a savings bank department, the deposits in which are nearly as large as in the ordinary branch, and they pay thereon from 3½ to 4 per cent. This is a great advantage to the people who live in new districts, as they at once secure equal privileges with the residents in larger centres.

Real Estate Purchases.

"Investors who want to get rich quickly," continues Mr. Robertson, "are advised by the numerous real estate agents to go in either for a city lot or buy agreements of sale of newly-erected houses of a speculator who wants to put his money quickly into some new venture. In either case it is absolutely necessary, to avoid disaster, that both the lots and the sales should be within a reasonable distance of the centre of the city, and not an imaginary boulevard laid out more than a Sabbath day's journey from the centre of the town. If he wants an investment that can be realized on short notice, the investor can buy the bonds of railroad, tramways, or industrial companies, yielding from 5 to 6 per cent., or he could even buy well-selected preferred shares of industrial companies yielding 7 per cent. But if he is willing to fix up his money for a period of three to five years, the safest of all is mortgages on farm or city property.

"The people of Canada generally have faith in Canada and faith in themselves, but there are always a certain proportion of the citizens of any town, and these generally the latest comers, whose faith considerably exceeds any works that are likely to be realized for a long time to come. A public company can lend their funds very safely on town or farming property carefully selected, which past experience proves will increase in value from improvements on itself and its neighbourhood from 25 to 50 and even 100 per cent. within five or ten years. This greatly increases the security of the original loan. The rates obtained for such loans vary from six per cent. in the heart of Winnipeg, or seven per cent. in smaller towns, to eight per cent. on good farming land in the prairie, and, as an additional security in either case, a sober, industrious, and honest borrower, who is loyal to the Dominion and loyal to the Empire. What can cautious Scotsmen and patriotic Englishmen, who have money to invest well and safely, desire more?

Good Words for Laws.

"Moreover, investors and settlers from other countries may rest assured that Canada is a country where 'the reign of law' firmly prevails from the Atlantic to the Pacific. In its courts, whether federal or provincial, justice to citizens, borrowers, and lenders, is swift, sane, and sure, and very different from what prevailed, and even now prevails, across the American border. Dundee investors have reason to remember their losses in the glaring injustice of the state courts in the cases of the Oregonian Railway and the mule suit of the Texas Cattle Company. No such decisions need be feared from the judiciary of our great Dominion beyond the seas. I estimate that its next census will show a total population of ten and one-half to eleven millions, and it is a privilege and a duty of all lovers of our Empire to aid such splendid settlers in cultivating the strong wheat that will reinvigorate our decadent population at home."

◆

INFORMATION FOR INVESTORS.

The business of the money mart and the terms used therein have made many technical volumes necessary. "The Investors Primer," by Mr. John Moody, supplies in understandable language the general definitions of finance, and also gives specific information regarding various issues of preferred and guaranteed stocks, making it a useful adjunct to the library of any interested in the investment of money. The definitions are arranged in alphabetical order, and an index is also given. "The Investors Primer"; $1. J. Moody. Moody's Magazine Company, New York.

NEW REGULATIONS GOVERNING ENTRY OF PURE BRED ANIMALS.

On April 1st there will come into force new regulations governing the free entry to Canada of animals for the improvement of stock. To this end the following amended regulations have been adopted by order in council for the guidance of importers and custom house officers:—

"1. No animal imported for the improvement of stock shall be admitted free of duty unless the owner is a British subject, resident in the British Empire, or if more than one owner, each is a British subject, resident in the British Empire, and there is furnished an import certificate stating that the animal is recorded in a Canadian National Record or in a Foreign Record recognized as reliable by the National Record Committee.

"A statutory declaration by the owner, or one of the owners, that he is a British subject, or that each is a British subject resident in the British Empire and that such animal is the identical animal described in such certificate, must be provided, and that such animal is being imported into Canada for the improvement of stock.

"2. In case such certificate is not at hand at the time of the arrival of the animals, entry for duty may be accepted subject to refund of the duty upon the production of the requisite certificates and proofs in due form satisfactory to the collector within one year from the time of entry.

"3. The form of certificate to be accepted for the free importation of animals for the improvement of stock, and the customs procedure in connection therewith, shall be subject to the direction of the Minister of Customs.

"4. The above declarations shall be attached to the free import entry and may be made before the collector, sub-collector, surveyor or chief clerk at the port where the goods are entered or before any functionary authorized by law to administer oaths."

Under the old regulations a British subject residing in a foreign country or the citizen of another country living in Canada could secure the free entry of properly registered animals, whereas under the new order foreign persons or firms are excluded from this privilege.

Customs officers are required to examine carefully the animals presented for entry to see that they correspond with the description contained in the import certificate, and if they do not, duty is collected.

The statutory declarations required regarding citizenship and identity will, it is hoped, effectively prevent abuses that led up to the passing of the new regulations.

As in the past, animals are subjected to veterinary inspection at the port of entry. Officials of the Health of Animals Branch who do this work are required to make a report as to color and markings. If it is found by the Canadian national records that foreign certificates of registration do not correspond with these reports, Canadian registration and import certificates for the animals in question are refused.

GRAND TRUNK HAS ARRANGED FINANCES

Of Southern New England Road—Waiting for Bond Guarantee of State of Rhode Island

President E. J. Chamberlin of the Grand Trunk, asked as to the situation in Rhode Island and the future plans of the Southern New England Railroad, said:—

"We have arranged the finances of the Southern New England Railway so that work can be started immediately provided that the guarantee of the State of Rhode Island is secured for the bonds. If the State refuses this guarantee there will be no immediate prospect of a resumption of the work."

Hopes are Fading.

A dispatch from Providence, says:—The hopes of the officials of the Grand Trunk Railway to secure the support of the State of Rhode Island in the form of a guarantee for an issue of $6,000,000 in bonds to secure the completion of the Southern New England are dying out. The citizens' committee appointed by Governor Pothier to consider the proposal have voted adversely in a report to the Governor and have also refused to hear the railroad officials interested. The committee was composed of nineteen State and city officials and prominent business men and was under the chairmanship of Mr. Philip H. Wilbour, president of the Senate. The committee in its first report submitted early this month said that "it is the sense of this committee that under no circumstances should the State of Rhode Island guarantee the bonds of the Southern New England Railway."

Plan to Guarantee Bonds.

The plan to guarantee the bonds was suggested by Mr. Chamberlin of the Grand Trunk Railway, and indorsed by the Governor. Mr. Chamberlin said that with the aid of the State the proposed line from Palmer, Mass., to this city might be completed. Before submitting the matter to the Legislature the Governor sought the advice of the committee, the opinion of which he now says he will accept.

Attorney General Herbert A. Rice told the committee that he thought that the State would be "lowering its dignity to consider any proposition from a railroad."

◆

INDUSTRIAL ACCIDENTS DURING FEBRUARY

During the month of February 485 industrial accidents were recorded by the Department of labor; of these 85 were fatal and 400 non-fatal. This is 15 fewer fatal and nine more non-fatal than were recorded in January. The record for February, 1912, was 66 fatal and 391 non-fatal accidents. The greatest number of fatal accidents occurred in steam railway service, and in the mining and lumbering industries, the figures respectively being 17, 12, and 11. The greatest number of non-fatal accidents occurred in the metal trades, there being 140 workmen injured, followed by steam railway service with 83 injured.

◆

PRICES A LITTLE EASIER

The Department of Labor's index number of wholesale prices stood at 135.4 for February as compared with 136.2 in January and 134.7 in February, 1912. These index numbers are percentages of the average prices of 260 commodities during the decade 1890-99. The decline in February was due to decreases in the prices of fodders, fresh vegetables, sugar, copper, lead, spelter, coke, and linseed oil. Advances, however, occurred in the prices of grains, animals and meats, steel and tin. Compared with February of last year, when the index number was slightly lower, the principal increases appear in the groups: animals and meats, hides, leathers, boots and shoes, textiles, metals, fuel and lighting, with important decreases in grains and fodder, dairy products, fruit and vegetables. Retail prices again showed lower tendencies in flour, sugar, prunes and evaporated apples. Rentals were quoted upward in four cities.

◆

Mr. Donald Stewart, formerly chief western inspector of the London and Lancashire Guarantee and Accident Company of Canada, Limited, has taken up his residence in Saskatoon as manager of the miscellaneous insurance department of the office of J. H. C. Willoughby Sumner Company. Mr. Stewart's early training with the General Accident Fire and Life Assurance Corporation, Limited, at their head office in Perth, Scotland, and also with their Toronto office more recently, fits him for the work that he has undertaken.

WESTERN ASSURANCE COMPANY

Matters commercial and financial have been proceeding with a rush for several years now, and the number of companies of almost every conceivable kind formed in Canada within, say, five years, has been very great. Fire insurance is the object of a large proportion of these companies; for it seems still to be the belief of certain groups of men who possess or can control capital that fire underwriting is a profitable business. The number of fire insurance companies licensed by the Dominion Government is to-day 81, where in the year 1907 it was only 43. But the thirty-eight new ones are not all Canadian enterprises. Quite a number have come into Canada from the Old Country or the United States.

The volume of business is increased, of course, by natural growth, and by the efforts of the additional companies. But the ratio of profit that resides in the business is not increased, but rather lessened. This on the testimony of Mr. Brock, the chairman, at the annual meeting of the Western Assurance Company. However, we gather from his address that "a n method of paying for the business according to its quality" has come into Canada, apparently from the United States, and that the ratio of commission is increased. We should think that a sane and business-like method of paying for risks in proportion to the profit they will yield must commend itself to managers of companies who aim at profitable results rather than great volume at risk.

There is, it appears, a continued reduction in the average rate of fire premium in Canada, the United States and Great Britain. And this is brought about, doubtless, largely from the betterments in the character of risks produced by improved building laws and other safeguards thrown around underwriters of late by measures for the prevention and extinction of fires. The experience of the Western in last year's insurance field has been favorable, in Canada especially so. On a premium income of $2,064,362 the losses were $1,065,495, representing a loss ratio of 51.01 per cent., which compares favorably with the 57.33 per cent. of 1911, and the 55.47 per cent. of 191

After discussing the various phases of the company's business, the disastrous character of the season of 1912 preventing any profit in the marine branch, the chairman is able to conclude his address with the words: "The balance hand is increased by, roughly, one hundred thousand dollars," which is a moderate-sized crumb of comfort to the shareholders.

The enormous aggregate of fire-waste in the Dominion and the great country to the south was commented on in our review of the British America Assurance Company last week. That company was able to show, in an experience of eighty years—for it was founded in the reign of King William IV.—a contribution of $36,000,000 towards compensating losses by fire during that period. The Western, with an experience of 62 years since 1851, contributed $56,000,000 as its share of the underwriting capital during that time. It may not be an altogether pleasant retrospect for the proprietors that so many millions have gone up in the smoke of conflagration. Still, there is a sense in which it may be a matter of pride that, where so many United States fire insurance organizations were compelled by the phenomenal disasters of the past ten years to default their policies, these two outstanding Canadian companies have met their obligations, maintained their good credit in the States, and are looking bravely forward to front whatever fortune the future may have in store for them.

◆

FEWER MEN INVOLVED, AND LESS WORKING DAYS LOST

A continued improvement was reported to the Depa ment of Labor during February in regard to conditions from the standpoint of industrial disputes. The number of employees involved in strikes and lockouts during February was over three hundred less than the number similarly affect during the preceding month, while the number of worki days lost was less than the number lost during January over 16,000. Eleven disputes actually commenced du February, only one of which affected more than one hund employees. The only serious disputes of the month w those of coal miners on Vancouver Island, which continu from last month without a settlement being reached, a metalliferous miners at Britannia Beach, B.C. The latt involved upwards of 300 employees and was not terminated a the end of the month. A dispute between the Internationa Marine Signal Company and their employees, at Ottawa, was settled after conferences arranged between the parties by the Department of Labor.

The by-law which was submitted to the ratepayers of th rural municipality of Portage la Prairie to issue debenture to the amount of $35,000 for the erection of two bridges ov the White Mud and Assiniboine Rivers, was defeated.

TRADE OF CANADA COMPARED

With That of Australia—Statistics of Imports and Exports.

An interesting comparison of the trade of Canada and Autralia is made by Mr. D. H. Ross, the Canadian Trade Comissioner at Melbourne. Taking the Canadian figures for the scal year ended March 31, and the Australian figures for the ear ended December 31, the imports, exports and total trade f the Dominion and the Commonwealth in 1911 and 1912 are hown, for comparative purposes, in the appended schedule:—

	Imports.	Exports.	Total Trade.
911—Canada	$472,247,540	$297,196,365	$769,443,905
911—Australia	325,461,991	386,283,773	711,745,764
912—Canada	559,320,544	315,317,250	874,637,794
912—Australia	379,557,801	383,136,787	762,694,588

The total trade of Canada in 1912 showed an expansion of 105,192,889 over 1911, while in the same period the trade of ustralia increased by $50,948,824.

ncreased Imports of Oversea Goods

Coincident with the progress made in recent years by manuacturing industries in Australia, says Mr. Ross, and the great xpansion in the value of their output, has been the increased mports of oversea goods. With bounteous years of production nd remunerative prices obtained for practically all the prinipal products shipped abroad, the import figures reflect the ncreased spending power of the people. The marked growth n the imports and the contraction in exports in 1912 is, howver, viewed with some apprehension. There are already indiations that the 1913 importations will be on a restricted scale nd also that the exports will be considerably less in value than n the preceding three years.

The following comparison of imports, exports and excess of xports for the past ten years is of special interest:—

ear.	Total Imports.	Total Exports.	Increase of Exports.
903	£37,811,471	£48,250,112	£10,438,641
904	37,020,842	57,485,915	20,465,073
905	38,346,731	56,841,035	18,494,304
906	44,744,912	69,737,763	24,992,851
907	51,809,033	72,824,247	21,015,214
908	49,799,273	64,311,058	14,511,785
909	51,171,896	65,318,836	14,146,940
910	60,014,351	74,491,150	14,476,799
911	66,967,488	79,482,258	12,514,770
912	78,098,313	78,834,730	736,417

rade Prospects This Year

The oversea trade of the Commonwealth constituted record igures. The record was attributable to the phenomenal inrease in the value of the imports. Through various causes, hiefly decreased production on account of unfavorable climatic nditions, the trading outlook is not generally considered to e satisfactory. It is anticipated that the decrease in exports n 1912 will be followed by a further decrease in 1913.

While the customs revenue for the first seven months of the iscal year ended January 31, 1912, was £9,252,441 against £8,34,005 for the previous period, and gave net increase of £818,36, yet January was the first month showing a decrease (£113,87). The Treasury Department looks for the remaining five nonths of the financial year to continue to show a shrinkage. he stringent financial conditions in Australia show no abateent, and while importers are unable to obtain their accusomed financial accommodation it is bound to be reflected by a urtailment in the volume of orders being placed oversea. Despite the adverse outlook, trade throughout Australia continues pon a sound basis and if generous rains are experienced in 913 the recuperative powers of the country should speedily llay existing anxieties.

◆

VOCABULARY OF FINANCE.

Finance has a vocabulary of its own, and to the uninitiated many of the terms frequently used are a mystery, and even those whose business compels them to use the jargon and phrases could not clearly elucidate the meaning of them if required to do so. In a recent investigation two thousand business and personal letters were examined by a learned doctor. Only 2,001 separate words were discovered in the 24,000 tabulated words used in the letters, and 751 of these appeared but once; in fact, 43 words occurred so frequently as to make up half the total number. This shows how limited is the use of words. To those interested in banking, money, credit, stocks, bonds, commercial paper, securities, etc., such a state of affairs is unnecessary. For Smith's Financial Dictionary supplies a medium for an increased vocabulary, an increased practical knowledge of finance and its phraseology in all its varied ramifications. It is simply arranged, but comprehensive in scope, and indispensable for everyday usage.

Smith's Financial Dictionary. Howard Irving Smith; $2. Moody's Magazine Company, New York

CAPITAL INVESTMENTS IN LATIN AMERICA

From British Sources Were More Than $1,000,000,000 in Six Years.

(Specially contributed by Mr. P. Tamayo, Mexican consul, Toronto).

There is a strong prejudice, among some people, against Mexico and all Latin-American countries, which is the consequence of news of war or any disturbances there given out by the press, being frequently exaggerated. The press has so many items to handle that it is only the most sensational happenings in those far distant countries that their correspondents furnish them news for the Canadian public.

There is some information, however, which is of great importance for the Canadian business man, as are some facts which will convey the knowledge of the financial standing of the country where he has already made important investments, or may have an opening for same.

Mexico has earned so great a confidence for the investment of foreign capital, that even for the last period, during which it was existing under abnormal conditions, the influx of foreign capital did not seem to be affected.

Latin America Attracts Capital.

The following are the figures given by a well known English paper in regard to the investments of British capital in Latin-American countries for the last six years ending in 1912, which show results as follows:—

Argentine	$498,991,095
Brazil	336,382,935
Mexico	141,299,195
Chile	124,389,265
Cuba	72,244,445
Peru	34,498,455

As it may be noticed, Mexico held third place for those six years.

Decreases are Shown.

Comparing the investments made during 1912 with those of 1911, we find that there was a deficit in 1912, but this fact, however, may not be taken as very significant in that which concerns to Mexico because, as it may be seen from the figures given below, Mexico was not the only one where a decrease of British capital took place, and its deficit was smaller by far than that of some other countries. The record for those two years shows these results:—

	1911	1912
Mexico	$16,519,615	$14,092,375
Brazil	96,569,105	66,714,360
Chile	41,353,560	14,059,975
Cuba	31,658,160	4,212,500
Peru	9,984,655	500,000

◆

NOVA SCOTIA STEEL AND COAL COMPANY.

The profits of the Nova Scotia Steel and Coal Company for the year ended December 31st, 1912, were largely reduced as a result of the continued dumping of United States iron and steel products for the greater part of the year. This affected seriously the price of iron and steel in Canada.

The profits for the year were $1,000,609, as compared with $1,019,392 for 1911. The balance to the credit of the profit and loss account on December 31, 1911, was $508,544, which, with the profits of the year, make a total of $1,509,154. The sinking fund payment for the year, $26,105, was used in retiring the bonds of the company, the sum of $92,196 was added to the reserve funds, and the sum of $61,009 expended for improvement and betterments to plant was written off.

The sum of $10,032 was added to the insurance reserve. After providing for the above transfers and payment of interest on bonds and debenture stock, dividends and other charges as shown by the accounts, the sum of $452,600.21 remains to the credit of the profit and loss account. The amount expended during the year on capital account was $1,279,569, which amount (less $98,241, the original cost of the steamer Wobun, which has been sold, and small sales), have been added to the property and mines account.

The capacity and efficiency of the plant and work of the company have been increased by the expenditure during the past few years. With the increased revenue which the company expect to receive from the larger sale of ore, the higher prices being received for other products, and with the earnings from new plant installed during the past few years, much of which is only now becoming productive, the directors think that 1913 will give a considerable increase in earnings over any previous year. They have under consideration the opening of a new colliery at Sydney Mines and other improvements, and additions to plant and equipment at Wabana, to provide for large outputs of coal and ore. The funds necessary to meet the contemplated capital expenditure will be raised by a further issue of debenture stock. Dividends at the rate of 8 per cent. on the preferred and 6 per cent. on the common shares of the company for the year have been paid quarterly.

It will be interesting to see whether the dumping of United States products continues this year, as that is obviously a serious factor for the Canadian companies.

WEIGHT OF TOMATOES VARIES IN CANS

Chief Analyst McGill Suggests Legal Standard—One Should Also be Set for Fat in Cheese.

According to the records of Mr. A. McGill, chief analyst at Ottawa, the weight of the solid tomatoes varies considerably in canned tomatoes. Of 111 samples taken of the large sized tins, he obtained the following averages:—

Average.	Ounces.
Capacity of the can	37
Total contents	34
Solid contents	18
Water contents	16

The capacity of the largest sized tin in which these vegetables are packed is fairly constant, the variation being about 1 ounce in either direction.

The total content of the can averages about 3 ounces less than the capacity of the can. This space being either vacuous or containing air.

Weight of Solid Matter.

The solid matter of these contents is the true measure of the value of the article, equal quality being assumed. While the average amount of solids is 18 ounces, this varies between very wide limits, viz., from 11.2 ounces to 24.3 ounces; which means that some samples have fully twice the value of others. There is no doubt that some regulation is necessary here, thinks Mr. McGill, who is also of the opinion that it would be reasonable to require a minimum of 20 ounce solids in cans of the large size.

The solids referred to are not the dry solid matter of the tomato, but the moist solids retained on cheese cloth. The weighed total content of the can is poured upon cheese cloth and allowed to drain as long as drops fall at intervals not longer than 5 seconds. The water which passes through is then weighed, and this weight subtracted from the weight of total contents. The remainder is the weight of the solid matter.

In view of the great disparity of values shown in canned tomatoes, Mr. McGill thinks that a standard should be legalized under the provisions of the Meat and Canned Foods Act.

Results of Cheese Analyses.

According to his analyses of 141 cheese samples, taken in Canada, Mr. McGill found that 74 samples, or more than 50 per cent. of the collection, contained about 48 per cent. of fat, calculated upon the dry substance of the cheese; while 102 samples, or over 70 per cent. of the collection, contained above 47 per cent. of fat. None of the samples in the collection contained less than 45 per cent. of fat.

That a standard for fat in cheese should be established in the interest of both domestic and export trade, will readily be conceded. The manufacture of whole milk cheese from normal milk, involves such periodic variation in the character of the cheese as corresponds to the variaton found in milk itself, for the different seasons of the year. From this point of view it may be proper to consider a varying percentage of fat for cheese made at different periods of the year, says the chief analyst.

◆

VERNON'S CHEAP POWER SCHEME.

Vernon has opened its new power house, with a demonstration by several hundred citizens. Interest centered around the new Diesel oil engine, which has just been installed, and the operation of which will enable the city to give its citizens one of the lowest lighting rates and power rates in British Columbia. The oil plant will be operated continuously, the steam plant being used as an auxiliary during the hours when the load is heaviest, until a second unit of oil can be installed.

◆

INTERNATIONAL HARVESTER COMPANY'S SUBSIDIARY.

The directors of the International Harvester Company have decided to separate their domestic and foreign business, and have accordingly formed the International Harvester Corporation. The International Harvester Company has a capital of $140,000,000, and under the new scheme $70,000,000 of this capital will be transferred to the International Harvester Corporation.

The president of the company has stated that the new corporation is intended to take over the business and properties of the original company in foreign countries, including the manufacturing plants in Canada, France, Sweden, Germany and Russia, as well as certain plants in the United States.

The capital stock of Messrs. Ingram and Bell, Limited, has been increased from $75,000 to $150,000 by the creation of 750 shares of new stock of $100 each.

UNITED STATES PAPER BRIEF WRONG

List of Canadian Manufacturers Was Inflated—Position of the Republic.

In the Monetary Times last week was printed the list of pulp and paper manufacturers included in the brief filed by the paper manufacturers of the United States for the purpose of showing the industry had grown in Canada at the expense of the United States. In reference to this list, the Pulp and Paper Magazine of Canada states in terse and emphatic terms that the list is badly padded. "The long list of new companies," it says, "capitalized in Canada under the influence of section 2, out of the total of $152,000,000, only $14,000,000 are in any particular bona fide pulp and paper organizations.

"The others, with individual capitalizations as high as $15,000,000, are, in many instances, hardly even names and frequently have not even a stick of timber, and in all cases have never turned a sod toward the erection of a pulp and paper mill. Such figures existing in the mind's eye of visionary promoters, can hardly be considered as authoritative facts on which such a committee as that of the American government with this question on hand, could base fair decisions.

Subject to Misrepresentation.

"The American manufacturers do not need to descend to such questionable methods of influencing a committee which is attempting to give a fair decision to all.

"There is no doubt that they have some grievances which the committee will do well to consider, but in the employment of such tactics and prevarication of facts the Canadian position is jeopardized.

"Canada and Canadian manufacturers have been the subject of the grossest misrepresentations, and have been credited with some of the vilest of business methods. We cannot be surprised that a Government, once aware of such policies, appear extremely severe on an industry which resorts to these methods. We must regret that the Canadian industry suffers at the hands of such methods and finds it so difficult to do business on any equitable basis under such a regime."

Canada Has Wood and Power.

And Mr. J. H. A. Acer, treasurer of the Laurentide Company, Limited, comments on the brief as follows:—

"The whole list was inflated for the purpose of trying to influence the members of the Congress. The United States is in the interesting position of desiring to get cheap pulp wood for their mills, and also cheap paper for their publishers. Their pulp wood and water power is giving out in the face of their increasing consumption of paper.

"Canada has the wood and the water power necessary and they simply have to come to us. When the United States paper manufacturers get through with their case, the publishers of the country will have something to say on the matter."

Asked about the alleged "unreasonable demands" of Canada in trying to gain free access to the American market for their paper, and at the same time insisting upon maintaining their policy of export prohibition on pulp wood on crown lands, Mr. Acer replied that the Hon. Mr. Fielding, at the time of the tariff negotiations, had told the United States representatives plainly that he could not guarantee anything in regard to the removal of the export duty on pulp wood, as that was a matter over which the provinces had sole jurisdiction. As a matter of fact, the United States had merely made a "bid" for free pulp wood in consenting to the clause being framed as it was.

◆

CANADA'S FIELD CROPS LAST YEAR.

The latest official figures show that the value of the field crops raised in Canada last year was $511,951,100.

Crops.	Area, Acres.	Yield, Bushels.	Average Price Per Bu.	Ttl. Value.
Wheat	9,758,400	199,236,000	$ .62	$123,522,000
Oats	9,216,900	361,733,000	.32	116,996,000
Barley	1,415,200	44,014,000	.46	20,405,000
Rye	136,110	2,594,000	.73	1,904,000
Peas	250,820	3,773,500	1.26	4,771,800

Most acreage was devoted to wheat, oats, hay and clover.

PYRITES IN CANADA

aluable Commercial Ore—Sulphite Process in Pulp Manufacture—Available Markets.

Native sulphur is not known to occur in Canada in com-
rcial quantities; pyrites has been found in many localities,
t it is mined only at a few points. The present rapid expan-
n of our manufacturing industries, and the projection of a
mber of large sulphide pulp mills, have started many inquiries
garding our supplies of this ore. Moreover, some of the in-
stries in the adjacent republic, especially those located in
e region of the Great Lakes, are also in need of additional
pplies of ore. If pyrites ore of a suitable grade can be pro-
ced in Canada, with the assurance of a reasonably steady
tput, there is a large and immediate market for this product
w available, states Dr. Alfred W. G. Wilson in a comprehen-
e bulletin on pyrites in Canada, issued by the Dominion de-
rtment of mines.

owth of Pulp Industry.

The pulp manufacturing industry in Canada has been ex-
nding rapidly in recent years. Where sulphite pulp is made
ported sulphur is used exclusively. A mill is projected in
ich pyrites will be used in the place of sulphur. European
lls, on the other hand, almost without exception, find it pro-
able to use pyrites as a source of sulphur. That this is so is
t due solely to the fact that European labor is cheaper, but
cause pyrites is cheaper than sulphur. Several experimental
nts have been erected for this purpose in America; but the
ocess is not yet well established. That pyrites can be used
this purpose, and that the process is more economical than
en sulphur is used at the present relative market prices, is
established fact. The development of a sulphite pulp in-
stry in Canada, in which pyrites will be used, depends upon
e technical skill of our sulphite pulp makers on the one hand,
d on our pyrites miners on the other.

ed Regular Supply.

If a regular supply of suitable ore could be assured for a
m of years, some of our pulp mills, which are favorably lo-
ted with respect to the mines, would be warranted in in-
lling suitable roasting plants. Under existing conditions,
ere no guarantee can be given that plenty of suitable ore
available at a reasonable price, our mill owners naturally
sitate to assume the heavy capital expenditure necessary to
tall the roasting plants.

The consumers' requirements in the vicinity of the Great
kes alone, including also some points that can be reached from
ke ports, is in excess of 200,000 tons of ore suitable for acid
king. From the reports of the Canadian department of cus-
ns it is found that more than half the Canadian pyrites which
exported finds its way to the eastern market; hence the ton-
ge which reaches the Great Lakes market is very small. On
e other hand, we find that Spanish ore is transported to lake
ints by rail from the Atlantic seaboard.

ited States Market.

Inasmuch as freight rates to ports on the south shores of
e Great Lakes are comparatively low from many Ontario
ints at which pyrites deposits occur, it would appear as if this
tion of the United States market offers great possibilities to
ners of pyrites deposits in that province.

In the late market Canadian pyrites of suitable quality
uld command a price slightly higher than in the New York
rket. This difference in price at any given point will ap-
oximately represent the difference in freight rates between
rtain Atlantic ports and the Ontario point of origin. Accord-
g to the last report of the Ontario bureau of mines, the
erage price, at the mine, for Ontario pyrites, during the year
10, was $2.90 per ton. The average sulphur content of this
e is not given and hence the average value, per unit of
lphur, cannot be ascertained.

◆

EW BRUNSWICK TO ENCOURAGE PAPER INDUSTRY.

In the New Brunswick Legislature Premier Fleming has
troduced a bill entitled "An Act respecting the Crown timber
nds of the province." In it provision is made for the encour-
ement of the establishment of pulp and paper industries in
e province, so that New Brunswick may have the benefit of
ving its raw products manufactured within its borders.

Two classes of licenses will be issued on and after August
t, 1913, namely, (a) the pulp and paper license, (b) the saw-
ll license. The pulp and paper license will be renewable from
ar to year for a period of thirty years, and may be extended
r a further period of twenty years, subject to payment of a
nus for a thirty-year privilege and at the expiration of that
ne of another bonus for the next twenty years.

The sawmill license will be renewable from year to year for
enty years, and may be extended for a further period of ten
ars, with bonuses payable for the privilege of each period
e same as with the pulp and paper license.

NEW LEGISLATION FOR INSURANCE COMPANIES

Provincial Superintendent of Insurance in British Columbia Will License Companies Doing Business in the Province.

A measure of importance to companies transacting insurance, other than fire insurance, in particular, has been assented to by the Lieutenant-Governor of British Columbia. It is officially cited as the Insurance Act. It applies to all companies doing an insurance business save those accepting fire risks—fire companies coming under another Act—and provides that no company within the meaning of the Act shall write insurance until it has been licensed by the provincial superintendent of insurance. Licenses will not be issued until the applicant company has deposited with the superintendent of insurance securities as follows:—

Must Have Large Deposit.

"If on the next preceding thirty-first day of December the company's total contingent liability or amount at risk does not exceed one million five hundred thousand dollars—

"(a) Every company which undertakes life insurance or life and accident insurance, and every company which undertakes guarantee insurance shall keep on deposit twenty-five thousand dollars;

"(b) Every company which undertakes accident insurance or accident and sickness insurance shall keep on deposit twenty thousand dollars;

"(c) Every company which undertakes automobile insurance or insurance against the breakage of plate or other glass, either local or in transit, shall keep on deposit five thousand dollars;

"(d) Every company which undertakes insurance other than that mentioned in the preceding subsections against loss or damage to property from any accidental cause, including boiler and other explosion, or by reason of theft, housebreaking, or burglary, shall keep on deposit ten thousand dollars;

"(e) Every company which undertakes any insurance business within the meaning of this Act shall, if no deposit as hereinbefore prescribed for such business, keep on deposit such sum as may be prescribed by the Lieutenant-Governor in council."

Liability of Companies.

Provision is made for additional deposit of securities with the government to cover increase in the insurance liability carried by companies. Penalty, by way of fine up to $300, is provided for breaches of the Act. Licenses to transact business under the Act will cost $250. Companies incorporated by the province and holding licenses under the Companies Act will be entitled to an initial license under the Insurance Act without any further fee. The Act is to come into force on proclamation.

◆

HAWTHORNE MINING TRIAL ENDED.

Julian Hawthorne, Dr. William J. Morton and Albert Freeman are guilty of using the United States mails to defraud the public in connection with the promotion of four mining properties in Canada, which the three men knew to be worthless.

Judge Julius Mayer sentenced Albert Freeman to serve five years and three days in the federal prison at Atlanta; Julian Hawthorne to serve one year and one day in Atlanta prison; and Dr. Morton to serve also one year and one day in Atlanta prison. Ex-Mayor Josiah Quincy was acquitted of the charge brought against him by the United States Government.

◆

PIANO COMPANY'S STOCK OFFERING.

The Nova Scotia Trust Company of Halifax is offering a portion of the 7 per cent. participating preferred shares of the Amherst Pianos, Limited, at the price of $100 per share, carrying as a bonus 40 per cent. in the common stock of the company.

Of the $225,000 preferred stock issued, over $100,000 was subscribed for by the citizens of Amherst. This, with other large purchases (including the interest taken by Mr. J. A. McDonald, of Halifax), leaves $80,000 available for public subscription.

◆

The Imperial Oil Company, the Standard Oil Company's Canadian subsidiary, gives notice that it has deposited with the Minister of Public Works a plan of the site of its proposed pipe line under the St. Clair River from Sarnia, Ontario, to Port Huron, Michigan, and has applied to the government under the provisions of the Navigable Waters Protection Act for permission to construct the line.

RODDED BUILDINGS PROOF AGAINST FIRE

Lessons Learned From Lightning Rod Statistics in Ontario.

Some interesting facts and figures regarding the value of lightning rods are given by Professor W. H. Day, of the Ontario Agricultural College. Reports from some of the fire insurance companies located in Huron, Perth, Wellington, Peel, Grey, Elgin, Oxford and Welland counties show insurance written during 1912, as follows:—

Buildings insured	8588
Number rodded	1515
Per cent. of buildings rodded	17.6%

The same companies report losses as follows:—

Buildings struck by lightning	84
Rodded buildings struck	3
Per cent. of rodded buildings struck	3.5%
Rods out of repair (rods broken off near ground)	1
Properly rodded buildings struck	2
Per cent. of properly rodded buildings struck	2.5%

The building with rods out of repair will henceforth be considered as an unrodded building. Scientifically it is not rodded.

What Calculations Indicate.

If 17.6 per cent. of the buildings insured by these companies are rodded we should have expected 17.6 per cent. of the buildings struck would be rodded. Since this is not the case, we are led to believe that in all probability the rods prevented some buildings from being struck, or in other words, that if none of the buildings insured by these companies had been rodded a larger number of strokes would have occurred, and, moreover, we can calculate what this number would likely have been. It comes out 99.6 buildings, which means 100, because we couldn't have a fraction of a building. Subtracting the 82 unrodded buildings, we see that 18 of the rodded buildings would probably have been struck if not rodded. Since only 2 of these were actually struck, it would appear that the rods prevented strokes on the other 16.

Law of Proportion.

Now, if the law of proportion is true, what loss would these companies have sustained if all their buildings had been rodded? Only 2/18 or 1/9 of the 82 buildings would have been struck, i.e., 9 buildings, which with the other 2 rodded ones makes 11 in all. Thus it would appear that these companies would have had only 11 lightning claims to pay instead of 84. This would have meant many dollars to them. We believe even better results will be secured as farmers become more familiar with the requirements of good rodding, which they will do as soon as we can get out our bulletin—the lack of this information we are just getting has been holding it back.

The companies are widely spread and may be taken to represent fairly well the conditions in Western Ontario. Some will be inclined to discredit these statistics because they are for one year only, so we must fortify them with reports for a few years to come, and from more companies if possible.

A number of companies who were not able to give detailed reports for 1912 state that they had no rodded buildings destroyed during the past season. Of the 24 companies who have replied to date, not one reports the destruction of a rodded building.

REGINA'S FEBRUARY FIRE WASTE.

Regina's fire loss for February was as follows, reports Fire Chief White to the Monetary Times:—

Loss on contents carrying insurance, $1,617; loss on buildings, $837; loss on automobile, $127; loss on contents, no insurance, $250; loss on hay, $250; loss on buildings, $160; total loss for the month, $3,241. There were 16 alarms for the month. One fire, in a frame building built over 20 years ago, and used for a cafe, was responsible for a loss of $2,445. Insurance on same, $6,500.

AN EXPENSIVE EXPERIMENT.

The Monetary Times is in receipt of a copy of Bolton's "An Expensive Experiment," a comprehensive and compact collection of information showing the financial workings and methods of the hydro-electric power commission of Ontario, hitherto concealed from the public, and the effects and results of governmental operation of electric utilities, and the investigation by the committee of enquiry of the legislature of the State of New York, by Mr. Reginald Pelham Bolton, who is associate member of the institution of civil engineers, secretary of Washington Heights taxpayers association, past president of American society of heating and ventilating engineers, and author of "Building for Profit, Motive Powers," Etc. "An Expensive Experiment." R. P. Bolton; $1.25. McClelland and Goodchild, Toronto.

MUNICIPAL FINANCES

Losses on Debentures Sales — Growth of Public Utilities.

Calgary's estimates for last year were exceeded by $209,929.77, the actual expenditure being $1,770,658.43, whereas the estimates were $1,560,628.66.

The loss on debentures amounted to $81,397.25 over the estimates; the loss on coal, which amounted to $44,041.30; the over-expenditure of $21,091.55 above the estimates by the parks and cemeteries department, and a loss of $55,599.34 over the estimated city's share of the sinking fund.

The loss on coal is, in a measure, offset by the value of coal in stock and receipts from this department since January 1, 1913. The city has disposed of a large quantity since the beginning of the year, and the coal in stock will eventually be sold. This is not taken into consideration in the report prepared.

The loss on debentures will be covered in a consolidation by-law which will be submitted to the people shortly.

The statement prepared for the commissioners is as follows:—

Total revenue expenditure	$1,770,658.43
Total revenue receipts	1,592,261.60
Deficit	$178,396.82

Shows Victoria's Growth.

The statement of Victoria's receipts and expenses for the year indicate the growth of the city's financial affairs. Receipts totalled $3,364,742.25 and expenditures $3,320,254.95. The city's total assets amount to $19,174,744, made up as follows:—

Active—Cash on hand, $44,487.30; Bank of British North America balances, $249,410.98; ledger balances, $23,661.27; taxes outstanding, $142,097.60; debentures unsold, $2,502,231.08; construction expenditure, public improvements, $1,760,052.47; local improvements, $4,415,283.48.

Reserve—General purpose sinking funds, Bank of British North America balance, $590,109.67; local improvements, debentures purchased, $264,908.63; local improvement sinking fund, Bank of British North America balance, $419,643.52.

Passive—Streets, bridges, sidewalks, $1,708,402.93; local improvements, $1,717,641.26.

Fixed—Real property, $2,926,965; other property, $2,409,849.04.

Liabilities total $16,066,858, and are appended herewith:—

Loans—General purpose debentures, $5,257,953.81; general purpose debenture stock, $2,655,000; local improvement debentures (city's share), $576,038.57; local improvement debentures (people's share), $1,348,095.35; local improvement debenture stock, $496,969.06.

Advances and Sundry Accounts.

Advances—Treasury certificates, general purposes, $934,400; treasury bills, local improvements, $2,068,333.34..

Bank of British North America—Local improvement, construction account notes, $205,524; local improvement overdraft, $1,974,140.28; general revenue account, overdraft, $101,017.11; sewers rental and tax, overdraft, $4,149.17; sewer loan, 1912, overdraft, $20,982.79.

Sundry—Ledger balance, $119,833.78; taxes for refund, $6,643.03; sundry creditors, general revenue, $19,606.59; sundry creditors, local improvement construction, $167,285.86; sundry creditors, public works construction, $39,258.22; Westholme Lumber Company, 15 per cent. payable one year after completion of contract, $71,627.58.

Bonded Indebtedness is Large Item.

The statement of New Westminster's treasurer for the past year shows that the assets are estimated at nearly one million more than the liabilities. The total assets are put at $6,344,008 and the surplus at $949,302. The income for 1912 was $558,597; the expenditures were $2,947 less.

The public utilities of the city contributed largely to the city's income. The electric light department earned $92,946 from private consumers and $28,608 from other city departments. Consumers of water paid the city treasurer $72,631, and the city departments were charged with $7,227. The city market earned $3,204, while rents of city property brought in $14,625. The revenue of the police court was $7,341 and traders' licenses added $8,882. The taxes collected amounted to $277,004.

In the city's assets the school buildings are valued at $233,895; school sites at $113,245; fire halls and equipment, $45,000; parks and park buildings are worth $680,500; libraries and books, $66,000; bridges and wooden sidewalks, $96,000; city hall and buildings, $100,000; electric light system, $288,580; waterworks system, $789,254; the city's waterfront lots are valued at $1,150,000, and other real estate at $5,722.

The city's bonded indebtedness is the big item in its liabilities, totalling no less than $4,038,500, made up of street bonds, $1,064,000; gas plant, $225,000; loan account, $233,000; hospital, $130,000; harbor, $515,000; schools, $332,000, and many other smaller items, including the old railway bonus bonds of $155,000. Added to this is half a million in local improvement bonds.

PROOF OF AGE IN LIFE INSURANCE

Strong Objections Advanced to Proposed Change in Law — Policyholders Are Well Protected — Onus of Proof Would be Placed on Companies.

With respect to Mr. McKeown's bill to amend Section 166 of the Ontario Insurance Act, which has reference to the age of the assured and the course to be pursued for adjustment of claims where the age has been misstated, and which was discussed in last week's issue of The Monetary Times, Mr. George Wegenast, managing director of the Mutual Life Assurance Company of Canada, regards the proposal as unfair to the companies, and uncalled for from any point of view.

"The act," he says, "provides that where the age was given erroneously but in good faith, the policy shall not be voided on that account, but that the sum payable shall bear the same proportion to the sum assured, as the premium for the assumed age bears to the premium for the proven age. Thus, let us assume the case of a policy of $10,000 ordinary life, issued at the age of 35, which was found correctly to be 37. The adjustment would be as follows:—

Premium (Net Hm 4½%) age 35	$187.20
" " " 37	201.10

$201.10 : $187.20 : $10,000 : $9,308.80

"The amount payable would be $9,308.80, being the insurance purchased by the premium paid, at the true age.

"For this purpose, the act stipulates that the premium shall be the net annual premium by the Hm table of the Institute of Actuaries with 4½ per cent. interest.

Same as Dominion Act.

"The principle involved in this method, is the same as that in the Dominion Insurance Act, as well as in legislation of the various states of the American Union. Where an error in age is discovered in the lifetime of the assured, the adjustment takes the form of receiving or refunding the difference in premiums according as the age was under or overstated.

"Thus every provision has been made by legislation for fair and proper treatment of policyholders under such circumstances.

"Mr. McKeown's proposed amendment would place the onus of proving age upon the companies. His bill recites that the age inserted in the policy shall, in the absence of fraud, be binding on all parts unless within one year from the date of issue of the policy, an error is discovered, when it shall be rectified.

Proof and Canvassing.

"It is a well known fact that the introduction of the question of proof of age into the canvass for a policy proves a stumbling block to the agent. The prospect almost invariably makes that an excuse to put the matter off. If, therefore, such proof were demanded by the companies before the issue of the policy, a serious hindrance would be placed in the way of agents, and much less life insurance written. But the more serious feature is, that dishonest persons would take advantage of the opportunity to obtain insurance at a low rate by understating their age, and it would be difficult for the companies—in nearly all cases impossible—to prove fraud. The honest policyholder would be the victim, as the loss to the company would fall upon him. Assuming that the companies made an attempt to obtain proof of age within the year, and the policyholder declined to furnish it, or feigned ignorance of his date of birth, what would be McKeown's suggestion as a remedy? His bill is silent on this point.

"Companies Vie with Each Other," Continues Mr. Wegenast.

"So far as my knowledge goes, no reputable company has ever made settlement of a claim difficult, because of the age question. On the contrary, the companies vie with one another to make payment as quickly as possible, and agents lend their assistance in facilitating the completion of claim papers, including proof of age. In the case of our company where no record exists, the sworn statement of some person having knowledge of the facts, is accepted, and I believe a similar course is followed by all other companies. Cases of extreme differences in age rarely occur.

"There would seem to be no justification for such a bill as Mr. McKeown's, and it is to be hoped that it will not become law."

Mr. L. Goldman, vice-president and managing director of the North American Life Assurance Company, reminds us that cases have occurred in the experience of life insurance companies where there has been an understatement of age up to 13 years, and if legislation such as is now proposed were passed, it would have the effect of encouraging understatement of age in certain cases, and the company would be powerless to control cases of this kind.

"Where there is a gross and fraudulent under-statement of age as has occurred in some cases," says Mr. Goldman, the company would be paying out money without adequate compensation and taking funds from those who were justly entitled to participate therein.

"If companies were to insist upon evidence of age being furnished with each application, it would throw a serious difficulty in the way of the life insurance underwriter, and the application would be postponed sometimes for a considerable length of time, and such delay would result sometimes in the policy ultimately not being accepted by the applicant.

Best Evidence Accepted.

"Where for any reason evidence of age from a parent, a family record, birth certificate or other relative cannot be furnished, it is usual and the practice of first-class life insurance companies to consider and accept the best evidence which can be furnished, and this difficulty is often overcome by accepting the statement of the family physician, and the statement if a family friend.

"Many of the companies have found, especially some of the United States companies, that there has been gross misrepresentation in connection with the statement of age given to the agent at the time of the application, and it would be an encouragement to fraud if the proposed legislation were to legitimize such statements and induce such false misrepresentations.

"The obtaining of evidence of age is found not to delay the payment of claims, as in almost all cases evidence is quite readily furnished. This company has not met with a case where there has been practically any delay in furnishing evidence of age or a statement which was accepted by the company.

Effect of Dominion Legislation.

"The effect of the Dominion legislation and of the Provincial legislation as it is at present does not render a policy invalid or contestible by reason of a misstatement of age. The Ontario Insurance Act already provides adequately, and under its provision, the companies and those interested in the proceeds of policies have been adjusting claims for a great number of years and no dissatisfaction appears to have arisen.

"It would be impracticable to insist upon evidence of age being furnished before delivery of the policies, and the result would be to discourage the underwriting of life insurance, which already is quite difficult enough.

"The object of the proposed bill is no doubt to bring more to the notice of the policyholder the desirability of having evidence of age submitted to the company as early as possible, and if thought desirable this object could be attained by making it obligatory upon all companies doing business in this province to furnish a printed form to prove age and deliver a copy of this form, with any instructions necessary, with the policy at the time of its delivery to the policyholder.

Competition Among Companies.

"Competition among insurance companies is keen, and probably there is no business which has developed along this line so much. Experience has shown that, through competition between the companies of the [illegible] and, the cumbersome provisions, which used to exist in life insurance, have been removed, and legislation has had nothing to do with the original removal of these limitations.

"The legislation now proposed would tend to benefit the dishonest at the expense of the honest policyholder. It is found that only seven of the States of the Union have any statutory provision relating to the adjustment of the amount of insurance where the age is understated, and that such provision is practically the same as the clause now contained in the Dominion Insurance Act, which clause is also contained in the policies of all Canadian companies and has been a provision of their contract for many years.

Was Discussed Before.

Mr. McKeown's proposal would, in effect, says Mr. C. C. Ferguson, actuary of the Great West Life Assurance Company, Winnipeg, require the companies to demand evidence of age before issuing the policies. This requirement has been discussed before, and it has been pointed out that in practice it would result in great difficulties. For instance, a man born in England would require to send home for proof of age, and in the meantime he could not obtain his policy and and would be uninsured. Such a person would gladly contract with the company to issue a policy subject to proof of age, but the proposed law would make that impossible and would certainly be an unnecessary and improper interference with the right of contract.

"If there were any abuse in the present system there might be some excuse for the drastic legislation proposed, but the present methods work out with absolute fairness to the insured. Under the present law if a party, for instance, understates his age, he is insured for just that amount of insurance which he has paid for. Nothing could be fairer than this, and there is no need whatever for the new legislation."

Mr. Alexander Bissett, manager for Canada of the London and Lancashire Life and General Assurance Association, Limited, says: If the proposed bill becomes law it will practically throw upon the companies the responsibility of having age proved. This would mean that a very large amount of business would be held up because it would compel the companies to insist upon applicants submitting certificate of birth with the proposal, and this in many cases would be a decided disadvantage to the insuring public. Not infrequently does it happen that insurance has to be obtained with as little delay as possible, and in those cases, where proof is not readily obtainable, the consequences might be very serious.

◆

WESTERN FREIGHT RATES

According to a New York banking house it is recognized by the authorities of the western Canadian provinces, that if a radical reduction of rates is ordered by the Canadian Railway Commission as a consequence of the present investigation, the provinces of Alberta, Saskatchewan, Manitoba and British Columbia will be placed face to face with the proposition of direct taxation in consequence of their heavy guarantees of the bonds of the Canadian Northern, Grand Trunk Pacific, and other railway companies.

The freight rate inquiry which has been under way for some six to seven months by the Canadian Railway Commission has been indefinitely held up. After numerous hearings and the presentation of a large amount of statistical evidence, the greater part of which was prepared by the Canadian Pacific, which has so far borne the burden of the defense, an indefinite adjournment has been taken by the commission to allow counsel for the western provinces to prepare a case as to the reasonableness of the rates now in force, regardless of the question of discrimination, the latter being the principal subject upon which the commission so far has concentrated its attention.

◆

PANAMA CANAL TOLLS AND DISHONOR

That the exemption of United States coastwise shipping from tolls on the Panama canal would be an act of National dishonor is the position taken by the trustees of the Carnegie Endowment for International Peace. In a written statement covering several printed pages is an appeal to the citizens of the United States to do all they can to secure the repeal of the law. The statement also carries a special plea to submit the matter to arbitration before the Hague Tribunal.

After commenting on the calm spirit in which England has presented the matter and pointing out that the United States is obligated in a special sense to submit the question to arbitration because of the initiative this country has taken in promoting international arbitration the statement concludes with the argument:—

"The greatest interest of the United States as a free nation is to represent worthily before the world the principles of civil and religious liberty and the public efficiency and well-being, which those principles develop, and thereby to promote the adoption of these principles the world over. This is a great material as well as a great moral interest. In comparison with this great interest the interest of the United States in its coastwise vessels sinks into insignificance. By securing the repeal of that part of the act of Congress on the Panama Canal which provided for the exemption of American coastwise vessels from the payment of tolls, the American people would embrace a precious opportunity to prove that they understand their highest interest, and recognize their interest and recognize their duty to promote it for the benefit of mankind."

◆

At the annual meeting of the Cobourg [illegible] following officers were elected:—President, Mr. John Dick; vice-president, Mr. W. J. Maher; secretary-treasurer, Mr. E. W. Hargraft; council, Messrs. A. J. Armstrong, T. S. Chatterton, J. J. Daley, F. A. Duncan, A. R. Dundas, G. M. Ferris, Harry Field, A. J. Gould, F. Guillet, J. D. Hayden, John Henderson, A. J. Hewson, A. L. Jex, Jas. Leonard, J. B. McColl, E. H. Osler, A. B. Roberts, and J. E. Skidmore.

VALUE OF LIFE INSURANCE

IV.

THE AUTOMATIC PRODUCTION OF CAPITAL

BY C. A. HASTINGS.

No comparison can be made between the earning capacit of a corporation and of an individual. For instance, the in dividual who can save a few hundred dollars per annum an invest it cannot really do so at compound interest—it is nex to an impossibility—because he cannot re-invest his interes as it comes in in odd amounts. The insurance company, o the other hand, counts its interest in thousands, in tens o thousands of dollars, and is continually re-investing. Thu the only sure method of creating capital can be done by th man who has none—for he can take advantage of the co tinuous re-investment through a life office more safely tha by any other conceivable means; it must be borne in min that, by this method, there is no possibility of depreciation o capital; this is guaranteed and the guarantee of a life offic is absolute.

Loss of Partner.

To a man who, the only dissolver is death. However, there is another side to the question, and that is, the retirement of a partner. In cases of this kind there is only a fixed annual sum to provide, and the possession of such an endowment policy puts the holder in infinitely better circumstances to raise a loan than if he were driven to pledge business assets, as is so often done in this country. How many men can say with truth that they have never been, and never will be, in a position in which the possession of securities capable of being pledged has been, or may be, the means of preserving them from a catastrophe?—not one.

To quote The Joint Stock Companies Journal which states, "There is no doubt that there should be an unwritten law that business men should insure far more heavily than they do.

Policy Gives Liberty.

"An endowment policy gives a man complete liberty and guarantees him against possible failure: it is a haven of refuge which he cannot obtain in any other conceivable way."

Even if he has:

(1) Never to borrow,
(2) Never has to pay out a partner's share,
(3) Never has to extend his premises,
(4) Never has to install new machinery.

he still has an excellent investment, without a shadow of risk of loss of capital, at a cost that is no burden to him; and yet any of these circumstances might arise later in his life, so he must be a winner either way.

I predict that the time is coming when buying insurance will become as much a habit as buying lots and then it is obvious that the dividends will increase, provided the expense ratio is normal.

The following articles in this series have already appeared:—

March 1st.—How to become one's own master.
March 8th.—How depreciation of assets can be met.
March 15th.—How to borrow at a profit.

◆

The capital stock of the Transcontinental Realty Company, Limited, has been decreased from $500,000 to $100,000.

The Yale and Towne Manufacturing Company has declared a regular quarterly dividend of 1½ per cent. and an extra dividend of 1 per cent., payable April 1st, to stock of record March 26th. This company which manufactures locks and keys, has a branch factory at St. Catharines, Ontario.

At the meeting of the Brandon Life Underwriters, addresses were given by Mr. Speed, of the Metropolitan Life, and Dr. Setler, of Moose Jaw. The meeting extended to Mr. Twiss their best wishes upon his departure to Winnipeg where he assumes the position of provincial manager in the Manufacturers' Life. A debate has been arranged between Winnipeg and Brandon underwriters to take place in April.

Mr. F. C. Turner, secretary of the Winnipeg Chartered Accountants' Association, was the recipient of a handsome cabinet of silver at the annual banquet of the association. Among those present were the chairman, W. A. Henderson, A. L. Crossin, Mayor Deacon, H. T. Reade, A. E. Hoskin, K.C., John Paton, H. M. Cherry, T. Harry Webb, J. D. Reid, and A. E. Phillips. The president in his address expressed the satisfaction of the association at the successful legislation which had been carried through before the close of the Legislature. The Province of Quebec was now the only province in the Dominion where the letters C. A. were not recognized.

J. HEYWOOD McGREGOR, F. H. OXLEY, F.C.A., Auditors.

REPORT OF DIRECTORS

The Directors of the Nova Scotia Steel and Coal Company, Limited, submit herewith their Twelfth Annual Report and Statement of assets and liabilities with abstract of Profit and Loss for the year ended December 31, 1912.

In our report for the year 1911 attention was called to the fact that the dumping of American iron and steel products had seriously affected the price of Iron and Steel in Canada and as a result our profits for that year were largely reduced. We regret to state that during the first three quarters of the year 1912, the same conditions prevailed, and it was not till late in the year that the demand in the United States for iron and steel gave the American manufacturers a market at home for their products, and until then very low prices prevailed in Canada, and the profits of the Company from this source were even more seriously interfered with than in 1911.

The profits for the year were $1,000,609.93 as compared with $1,019,392.51 for 1911. The balance to the credit of the Profit and Loss Account on December 31, 1911, was $508,544.81, which, with the profits of the year make a total of $1,509,154.74, which has been dealt with as appears by the Financial Statement.

The Sinking Fund payment for the year $26,105 was used in retiring the bonds of the Company, the sum of $92,196 was added to the Reserve Funds, and the sum of $61,009.85 expended for improvement and betterments to plant was written off.

The sum of $10,032.20 was added to the insurance reserve. After providing for the above transfers and payment of interest on bonds and debenture stock dividends and other charges as shown by the accounts, the sum of $452,600.61 remains to the credit of the Profit and Loss Account.

During the year the Wobun Steamship Company, the whole of the stock of which was owned by the Nova Scotia Steel and Coal Company, Limited, disposed of the Steamer Wobun. The vessel originally cost $95,000, and against this various sums, aggregating $50,000 have been from time to time transferred from profits to provide for depreciation. The proceeds of the sale were more than sufficient to pay the difference.

The amount expended during the year on Capital Account was $1,279,569.00 which amount, (less the sum of $98,241.81 the original cost of the Steamer Wobun and small sales) have been added to the Property and Mines Account.

Owing to the depressed conditions of the iron and steel trade in the United States, and the coal strike in Great Britain, low prices for Iron Ore prevailed during the early part of the year, and the Directors therefore decided that it would be more profitable to carry over a portion of the output. This ore together with our first output for 1913 has since been sold at an advance in price.

The capacity and efficiency of the plant and work of the Company have been considerably increased by the expenditure during the past few years.

With the increased revenue which we expect to receive from the larger sale of ore, the higher prices being received for our other products, and with the earnings from new plant installed during the past few years, much of which is only now becoming productive, your Directors are of the opinion that the year 1913 will give a considerable increase in earnings over any previous year.

Your Directors have under consideration the opening of a new colliery at Sydney Mines and other improvements, and additions to plant and equipment at Wabana, to provide for large outputs of coal and ore.

The funds necessary to meet the contemplated capital expenditure will be raised by a further issue of debenture-stock.

During the past summer the Eastern Car Company was organized, being a subsidiary Company for the manufacture of steel railway cars. The authorized capital of the Car Company is:—

Preferred Stock	$1,000,000
Common Stock	$1,000,000

6 per cent. bonds, $1,[illegible], of which was issued preferred stock [illegible], common stock [illegible], and bonds [illegible].

The bonds are guaranteed by the Nova Scotia Steel and Coal Company, Limited, which holds all the issued common stock.

The plant of the Car Company is situated on a plot of 68 acres adjoining the mills, and plant of the Nova Scotia Steel and Coal Company, Limited, at New Glasgow, having on one side the tracks of Intercolonial Railway, and on the other the tidal waters of Pictou Harbor. It is expected that the plant will be in operation by August next. The Car Company will be a large user of the finished products of the Nova Scotia Steel and Coal Company, Limited. The great increase in railway development in Canada will, it is expected, for many years call for a large amount of rolling stock, and the Car Company should therefore prove highly successful, and be an additional source of revenue to your Company.

Dividends at the rate of 8 per cent. on the Preferred and 6 per cent. on the Common shares of the Company for the year have been paid quarterly. The regular quarterly dividend of 2 per cent. on Preferred and 1½ on Common shares has been declared for the first quarter of 1913, payable April 15th, to shareholders of record of March 31st, 1913.

All of which is respectfully submitted.

ROBT. E. HARRIS, President.

CANADIAN GENERAL ELECTRIC CO., Limited

Annual Report of the Board of Directors for the Year Ended 31st December, 1912.

Directors—W. R. Brock, Hon. President and Chairman of the Board; Frederic Nicholls, President; W. D. Matthews, Vice-President; Hon. J. K. Kerr, K.C., Vice-President. Sir Wm. Mortimer Clark, LL.D., K.C., Hon. Geo. A. Cox, A. E. Dyment, Sir Rodolphe Forget, Herbert S. Holt, Hon. Robert Jaffray, Sir William Mackenzie, F. Gordon Osler, James Ross.

Secretary and Assistant General Manager—J. J. Ashworth.

Solicitors—Kerr, Davidson, Paterson & McFarland.

Bankers—The Bank of Montreal, the Canadian Bank of Commerce.

Stock Transfer Agents—National Trust Company, Toronto; National Trust Company, Montreal; Canadian Bank of Commerce, London, England.

ANNUAL REPORT OF THE DIRECTORS.

To be Submitted to the Shareholders at the Annual General Meeting of the Company in Toronto, on Tuesday, 25th March, 1913.

Your Directors submit herewith the Balance Sheet of the Company as upon the 31st day of December, 1912; also statement of Profit and Loss for the year, and Certificate of Messrs. Price, Waterhouse & Company, Chartered Accountants.

The year 1912 has been a period of marked expansion, with undisturbed prosperity and steady development in every part of the Dominion. Your Company, as evidenced by the Report presented, has participated to the full extent in this increased business, and it is with pleasure that your Directors are able to present a statement showing that the profits for the year 1912 amounted to $2,011,719.83.

From this amount has been written off for depreciation the sum of $456,358.59, and of interest on borrowed capital the sum of $158,878.16, leaving a balance of $1,396,483.08. Deducting from this amount dividends on Preference and Common Stock at the rate of 7 per cent. per annum, and a bonus of 1 per cent. on the Common Stock, amounting in all to $689,871.80, there remains a net balance of $706,611.28, of which $700,000.00 has been added to the Reserve Fund, which now stands at $2,369,531.95. The total of the Reserve Fund added to the balance carried at the credit of Profit and Loss makes a total surplus of $3,051,922.58, equal to 30.51 per cent. of the par value of the share capital of the Company, both Common and Preference.

In addition to the surplus as shown, the value of the Real Estate owned by the Company is greatly in excess of the cost value as it appears on our books.

There is also a Reserve for Depreciation now amounting to $1,104,453.86.

During the year important additions have been made to the Company's buildings and plants. At the Peterborough Works new manufacturing and stores building, 327 feet by 80 feet, by three stories, has been erected; a new office and warehouse building has been erected in Montreal; a new and complete manufacturing plant has been erected in Toronto for our architectural bronze and iron work; an addition, 100 feet by 62 feet by three stories, to the Sunbeam Incandescent Lamp factory, also in Toronto, has been completed; and an office and warehouse building has been erected in Porcupine. Your Directors are pleased to state that the funds required for the greater proportion of the expenditure for real estate, buildings, machinery, and plant has been provided out of the surplus earnings of the year.

A reference to the Balance Sheet shows that our total Cash and Current Assets amount to over nine million dollars, of which amount over five and one-half million dollars is carried in our Inventory. It should be understood in considering this Asset that it includes the materials for all orders and contracts on hand which were not completed and shipped at the end of the year. Following the usual policy of the Company, this Inventory has been taken at cost price, or the market price, whichever was the lower, plus the actual cost of labor expended on the contracts, and no estimated profit has been taken into account.

Uncompleted contracts, to the value of about seven million dollars, in various stages of completion, have been carried over to the current year.

The Company owns the real estate and buildings occupied as District Offices and Warehouses in Halifax, N.S.; Montreal, P.Q.; Toronto, Ont. (Head Office); Porcupine, Ont.; Winnipeg, Man.; and Vancouver, B.C., and plans are being prepared for a building in Calgary, Alta., sui able for the Company's requirements. The remainin Branches, or District Offices, are in rented premises, an are located in: Ottawa, Ont.; Cobalt, Ont.; Regina, Sask Saskatoon, Sask.; Calgary, Alta.; Edmonton, Alta.; Nelson B.C.; Victoria, B.C.; and Prince Rupert, B.C.

Your Directors desire to express their great regret a the death of Mr. H. P. Dwight, who had been a Vice-President of the Company since its inception. Mr. W. D. Matthews, a Director since the organization of the Company was elected to the vacancy created, and on the election of Mr. Frederic Nicholls as President, the Hon. J. K. Kerr K.C., also a Director since the organization of the Company was elected to the Vice-Presidency vacated by Mr. Nicholls and Mr. F. Gordon Osler was elected a Director to fill the vacancy on the Board created by the death of Mr. H. P. Dwight. Your Directors desire to express their pleasure at the acceptance of the office of Honorary President and Chairman of the Board by Mr. W. R. Brock, who had been President of the Company since its inception.

FREDERIC NICHOLLS,
President.

Jarvis Building, Toronto, March 8th, 1913.

To the Shareholders of the Canadian General Electric Company, Limited:—

We have examined the books and accounts of the Canadian General Electric Company, Limited, and of its subsidiary Companies, for the year 1912, and find that the annexed Consolidated Balance Sheet and Surplus Account are correctly prepared therefrom.

During the year there have been charged to Capital Accounts only expenditures in respect of actual additions, extensions or permanent improvements. Sufficient provision has been made for depreciation of Plant and Equipment.

The Inventories of Raw Material, Supplies, Work in Progress and Manufactured Products have been taken and certified by responsible officials of the Company, and have been compared by us with the factory records. The valuations have been accurately made at or below cost price, sufficient allowance being made in respect of goods that are either obsolete or not readily saleable.

Reserves have been made for Doubtful Accounts and Notes Receivable and for all ascertainable liabilities.

We have verified the Cash, the Investments and the Bank Balances by actual inspection or by properly certified statements.

We certify that the annexed Balance Sheet is properly drawn up so as to show the true position of the Company at December 31st, 1912, and that the Surplus Account shows the correct result of the operations for the year.

LEGAL NOTICES

HENRY HOPE & SONS OF CANADA, LIMITED.

UBLIC Notice is hereby given that under the First Part of chap-
ter 79 of the Revised Statutes of Canada, 1906, known as "The
mpanies Act," letters patent have been issued under the Seal of
e Secretary of State of Canada, bearing date the 4th day of
rch, 1913, incorporating Henry Donald Hope, of the City of
rmingham, in that part of Great Britain and Ireland called Eng-
ıd, manufacturer; Alexander Liddell Young, manager, and James
ınro Sinclair and Thomas Edward Aikenhead, gentlemen, of the
ty of Toronto, in the Province of Ontario; and David McGill, of
e City of Montreal, in the Province of Quebec, gentleman, for the
lowing purposes, viz.:—(a) To carry on the business of manu-
cturers of and dealers in steel window sashes, door and window
sements, fanlight opening gear, leaded lights, stained glass, glass
ndows, glass doors and glass roofing; window and door locks
d fasteners, door knobs and latches and all manner of door and
ndow fittings; cast lead, cast iron and other metal rainwater
ods and accessories, and all manner of contractors' and builders'
pplies and material; (b) To carry on any other business, whether
inufacturing or otherwise, capable of being conveniently carried
in connection with its business or calculated directly or indi-
tly to enhance the value of or render profitable any of the com-
ny's property or rights; (c) To acquire or undertake the whole
any part of the business, property and liabilities of any person
company carrying on any business which the company is auth-
zed to carry on or possessed of property suitable for the pur-
ses of the company; (d) To apply for, purchase or otherwise
quire any patents, licenses, concessions and the like, conferring
y exclusive or non-exclusive or limited right to use or any
cret or other information as to any invention which may seem
pable of being used for any of the purposes of the company or
e acquisition of which may seem calculated directly or indirectly
benefit the company, and to use, exercise, develop or grant
enses in respect of or otherwise turn to account the property,
hts or information so acquired; (e) To enter into partnership
into any arrangement for sharing of profits, union of interest,
-operation, joint adventure, reciprocal concession or otherwise
th any person or company carrying on or engaged in or about
carry on or engage in any business or transaction which the
mpany is authorized to carry on or engage in, or any business
transaction capable of being conducted so as to directly or in-
ectly benefit the company; to lend money to, guarantee the
ntracts of or otherwise assist any such person or company, and
take or otherwise acquire shares and securities of any such
mpany, and to sell, hold, re-issue with or without guarantee, or
herwise deal with the same; (f) To take or otherwise acquire
d hold shares in any other company having objects altogether
in part similar to those of the company or carrying on any
siness capable of being conducted so as directly or indirectly
benefit the company; (g) To enter into any arrangements with
y authorities, municipal, local or otherwise, that may seem con-
cive to the company's objects, or any of them, and to obtain
om any such authority any rights, privileges and concessions
ich the company may think it desirable to obtain and to carry
t, exercise and comply with any such arrangements, rights,
vileges and concessions; (h) To establish and support or aid in
e establishment or support of associations, institutions, funds,
ısts and conveniences calculated to benefit employees or ex-
ployees of the company, or its predecessors in business, or the
pendants or connections of such persons, and to grant pensions
d allowances, and to make payments towards insurance, and
subscribe or guarantee money for charitable or benevolent
jects, or for any exhibition or for any public, general or useful
ject; (i) To promote any company or companies for the pur-
se of acquiring or taking over all or any of the property and
bilities of the company, or for any other purpose which may
em directly or indirectly calculated to benefit the company; (j)
purchase, take on lease or in exchange, hire or otherwise ac-
ire any personal property and any rights or privileges which
e company may think necessary or convenient for the purposes
its business and in particular any machinery, plant and stock-
-trade; (k) To construct, improve, maintain, manage, carry out
control any roads and ways, tramways, branches or sidings on
nds owned or controlled by the company, bridges, reservoirs,
arves, manufactories, warehouses, electric works, shops, stores
d other works and conveniences which may seem calculated
ectly or indirectly to advance the company's interests and to
ntribute to, subsidize or otherwise assist or take part in the
nstruction, improvement, maintenance, working, management,
rrying out or control thereof; (l) To lend money to customers
d others having dealings with the company, and to guarantee
e performance of contracts by any such persons; (m) To draw,
ake, accept, endorse, execute and issue promissory notes, bills
exchange, bills of lading, warrants and other negotiable or
ansferable instruments; (n) To sell or dispose of the undertaking
the company or any part thereof for such consideration as the
mpany may think fit, and in particular for shares, debentures
securities of any other company having objects altogether or in
rt similar to those of the company, if authorized so to do by
e vote of a majority in number present or represented by proxy
a general meeting duly called for considering the matter and
lding not less than two-thirds of the issued capital stock of the
mpany; (o) To adopt such means of making known the pro-
cts of the company as may seem expedient and in particular by
vertising in the press, by circulars, by purchase and exhibition
works of art or interest, by publication of books and periodicals
d by granting prizes, rewards and donations; (p) To sell, im-
ove, manage, develop, exchange, lease, dispose of, turn to ac-
unt or otherwise deal with all or any part of the property and
hts of the company; (q) To do all or any of the above things
d all things authorized by the letters patent or supplementary
ters patent as principals, agents, contractors, trustees or other-
se and either alone or in conjunction with others; (r) To do all
ch things as are incidental or conducive to the attainment of
e above objects. The operations of the company to be carried
throughout the Dominion of Canada and elsewhere by the
me of "Henry Hope & Sons of Canada, Limited," with a capital
ock of two hundred and forty thousand dollars, divided into 2,400
ares of one hundred dollars each, and the chief place of business
the said company to be at the City of Toronto, in the Province
Ontario.

Dated at the office of the Secretary of State of Canada, this
n day of March, 1913.

INTERNATIONAL LIGHT AND POWER COMPANY, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 25th day of February, 1913, incorporating James Steller Lovell and Charles Delamere Magee, accountants; William Bain, bookkeeper, and Robert Gowans and Joseph Ellis, solicitors' clerks, all of the city of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To underwrite, subscribe for, purchase or otherwise [illegible] by way of collateral security or otherwise, and to sell, exchange, transfer, assign or otherwise dispose of or deal in the bonds or debentures, stocks, shares or other securities of any government or municipal or school corporation or of any bank or of any other duly incorporated company or companies or corporation or corporations; (b) To assist in the promotion, organization, development or management of any corporation or com- [illegible] bonus, loan, promise, endorsement, guarantee or otherwise any corporation in the capital stock of which the company holds shares, or with which it may have business relations, and to act as employee, agent or manager of any such corporation and to carry on the business thereof and to guarantee the performance of contracts by any such corporation or by any person or persons with whom the company may have business relations, (c) To purchase, lease or acquire lands and interests therein and water powers and water privileges and power to develop therefrom any power, electrical or other energy, and to use the same in connection with their business, and to transmit the same, and sell, lease or dispose of lands or interests therein or power, and to enter into working arrangements with other companies, persons, firms or corporations for the use thereof, and to establish, operate and maintain any electric, gas or other lighting, heating or power plant, and to sell and dispose of electric, gas or power, light, heat and power; provided always that the rights and privileges hereby conferred upon the company to generate, sell and dispose of electrical energy for light, heat and power when exercised outside of the property of the company shall be subject to all provincial and municipal laws and regulations in [illegible] and shafts [illegible], bu[illegible] construct, erect, lay down and maintain reservoirs, water works, cisterns, dams, culverts, main and other pipes and appli[illegible], and to ex[illegible] [illegible] selling, delivering, measuring and distributing [illegible] of irrigation and for the creation, maintenance or development of hydraulic, electrical or other mechanical power, or for any other purpose of the company; (e) To construct, maintain, alter, make, work and operate on the property of the company, and for the purposes of the company, or on property controlled by the company, reservoirs, dams, flumes, race and other ways, water powers, aqueducts, wells, roads, piers, wharves, buildings, shops, stamping mills and other works and machinery, plant and electrical and other appliances of every description; (f) To acquire by purchase or otherwise and hold lands, timber limits or licenses, water lots, water falls, water privileges or concessions and powers and rights and interests therein, and to build upon, develop, irrigate, cultivate, farm, settle and otherwise improve and utilize the same, and to lease, sell or otherwise deal with or dispose of the same; (g) To construct, execute, own and carry on all descriptions of works which may be necessary or useful for the purposes of the company; (h) To issue and allot, as fully paid up, shares of the company hereby incorporated in payment or part payment of any property, movable or immovable, property rights, lease, business, franchise, undertaking, powers, privileges, license, concession, stock, bonds and debentures or other property rights which it may lawfully acquire by virtue of the powers hereby granted, or to pay for same or any part thereof in bonds or debentures of this company; (i) To draw, make, accept, endorse, discount and execute promissory notes, bills of exchange, warrants and other negotiable or transferable instruments; (j) To carry on any other business, whether manufacturing or otherwise, which may seem to the company capable of being conveniently carried on in connection with the business or objects of the company and necessary to enable the company to profitably carry on its undertaking; (k) To purchase or otherwise acquire and undertake and assume all or any part of the assets, business, property, privileges, contracts, rights, obligations and liabilities of any person, firm or company carrying on any business which this company is authorized to carry on, or any business similar thereto, or possessed of property suitable for the purposes of this company's business, and to issue in payment or part payment for any property, rights or privileges acquired by the company, or for any guarantees of the company's bonds, or for services rendered, shares of the company's capital stock, whether subscribed for or not, as fully paid and non-assessable, or the company's bonds; (l) From time to time to apply for, purchase or acquire by assignment, transfer or otherwise, and to exercise, carry out and enjoy any statute, ordinance, order, license, power, authority, franchise, concession, right or privilege which any government or authorities, supreme, municipal or local, or any corporation or other public body, may be empowered to enact, make or grant, and to pay for, aid in and contribute towards carrying the same into effect, and to appropriate any of the company's stock, bonds and assets to defray the necessary costs, charges and expenses thereof; (m) To enter into partnership or into any arrangement for sharing profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise, with any person or company now or hereafter carrying on or engaged in any business or transaction which this company is authorized to carry on or engage in; (n) To procure the company to be registered and recognized in any foreign country and to designate persons therein, according to the laws of such foreign country, to represent this company and to accept services for and on behalf of this company of any process or suit; (o) To lease, sell or otherwise dispose of the property and assets of the company, or any part thereof, for such consideration as the company may deem fit, including shares, debentures or securities of any company; (p) To amalgamate with any other company having objects similar to those of this company; (q) To distribute among the shareholders of the company, in kind, any property of the company and in particular any shares, debentures or securities belonging to the company or which the company may have power to dispose of; (r) To do all acts and exercise all powers and carry on all business incidental to the due carrying out of the objects for which the company is incorporated and necessary to enable the company to profitably carry on its undertaking; (s) To do all or any of the above things and as principals, agents or attorneys. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "International Light and Power Company, Limited," with a capital stock of twenty million dollars, divided into 200,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the city of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 4th day of March, 1913.

LEGAL NOTICE

ENGINEERING SPECIALTIES COMPANY, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 21st day of February, 1913, incorporating David Henderson, William Henry McGuire, George Francis Rooney and Clifton Medley Johnston, barristers-at-law, and Constance Percival Adair, stenographer, all of the city of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To manufacture, buy, sell and deal in castings, machinery, parts, apparatus and appliances necessary for or used in connection with the production and conversion of heat, light or power from hydraulic, electric, gas, oil or other energy, and to carry on the business of manufacturers of and dealers in all plumbing, steam fittings and gas fixtures and electric supplies and sundries and generally to carry on the business of general agents and manufacturers of engineering specialties; (b) To acquire and take over as a going concern the undertakings, assets and liabilities of any person or company carrying on any business in whole or in part similar to that which this company is authorized to carry on, or possessed of property suitable for the purposes of this company, and with a view thereto, to acquire all or any of the shares, debts and liabilities of such company; (c) To sell, lease or otherwise dispose of the whole or any branch or part of the business, undertaking, property, liabilities and franchises of the company to any other person or company for such consideration as the directors may think fit and in particular for shares, debentures or securities of any company having objects altogether or in part similar to those of this company, notwithstanding the provisions of section 44 of the said Act; (d) To apply for, purchase or otherwise acquire any patents, trade marks, franchises, licenses, concessions and the like, conferring any exclusive or non-exclusive or limited right to use, or any secret or other information as to any invention which may seem capable of being used for any of the purposes of the company, or the acquisition of which may seem calculated directly or indirectly to benefit the company, and to use, exercise, develop or grant licenses in respect of or otherwise to turn to account the property, rights or information so acquired; (e) Notwithstanding the provisions of section 44 of the said Act, to purchase, take or acquire by original subscription or otherwise and to hold, sell or otherwise dispose of shares, stock, whether common or preferred, debentures, bonds and other obligations of any other company having objects similar in whole or in part to the objects of this company or carrying on any other business capable of being conducted so as directly or indirectly to benefit this company, and to vote all shares so held through such agent or agents as the directors may from time to time appoint; (f) To enter into partnership or into any arrangement for sharing profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise with any person or company carrying on or engaged in, or about to carry on or engage in, any business or transaction which this company is authorized to carry on or engage in, or any business or transaction capable of being conducted so as directly or indirectly to benefit this company, and to lend money to, guarantee the contracts of or otherwise assist any such person or company and to take or otherwise acquire shares and securities of any such company and to sell, hold, reissue, with or without guarantee, or otherwise deal with the same; (g) To purchase or otherwise acquire, sell or dispose of and deal in such real and personal property as may be necessary for the purpose of the company; (h) To provide, purchase, lease or otherwise acquire and to construct, lay down, erect, establish, operate, maintain and carry out all necessary works, engines, machinery, plant and apparatus connected with the generation, accumulation, distribution, transmission, supply, use and employment of steam, electricity, gas or gasoline gas for the supply of light, heat and motive power and for industrial or other purposes, and to undertake and to enter into contracts and agreements for the supply of light, heat and motive power for any or all public or private purposes, provided, however, that the sale, distribution and transmission of heat, gas, electricity or other power or force beyond the lands of the company shall be subject to local and municipal regulations in that behalf; (i) To carry on any other business which may seem to the company capable of being conveniently carried on in connection with the above, or any portion thereof, or calculated directly or indirectly to enhance the value of or render profitable any of the company's property or rights; (j) The powers in each paragraph hereof shall be in no wise limited or restricted by reference to or inference from the terms of any other paragraph. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Engineering Specialties Company, Limited," with a capital stock of forty thousand dollars, divided into 400 shares of one hundred dollars each, and the chief place of business of the said Company to be at the city of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada this 21st day of February, 1913.

THOMAS MULVEY,
Under-Secretary of State.

34-2

CUMULATIVE PREFERRED SHARES WRONG IN PRINCIPLE.

Several Canadian companies of recent years have adopted the cumulative feature in connection with issues of preferred stock. Many instances can be cited, including those of Central Leather, American Canning and Colorado Fuel and Iron, to show that the cumulative clause for the preferred shares of industrial companies is wrong in principle, says a New York writer. Most of the industrial companies formed a dozen years ago, during the period of wild promotions, made use of the cumulative clause to attract the investing public. A cumulative preferred stock, it was then declared, was just as good as a bond, because the dividend was fixed. Experience has taught that the cumulative clause has done a great deal of harm, for many over-capitalized companies have strained their resources to keep abreast with the so-called fixed dividend charges. One of the few companies that realized the mistake of the cumulative clause and corrected the mistake in the proper way, was the General Electric Company of the United States. That company persuaded its stockholders to exchange their cumulative preferred shares for common stock. The accomplishment of that exchange was the beginning of General Electric's prosperity.

QUEBEC CENTRAL RAILWAY.

The new securities of the Quebec Central Railway Compan
are now officially quoted in London. The line is leased fo
999 years, as from January 1st last, to the Canadian Pacifi
Railway, and all interest and dividend payments are now
direct obligation on that company. The new issues consist o
£604,837 four per cent. first mortgage debenture stock, £336,50
three and a half per cent. second mortgage debenture stock
£336,500 five per cent. third mortgage bonds, and £571,300 cap
ital stock. The capital stock is entitled to a dividend of
per cent. per annum for the first four years from July 1, 191
and to a dividend of 5 per cent. per annum thereafter. Th
price is 108, and the yield from the existing rate of dividen
is about £3 14s. per cent. Allowing for the loss of one pe
cent. of dividend for the next three and a half years, the retur
on a five per cent. basis would be about £4½ per cent. Th
four per cent. debenture stock is quoted at 97 and yields th
investor 4⅛ per cent. The quotation for the three and a hal
per cent. second mortgage debenture stock is 84, and the yiel
is £4 3s. 4d. per cent. The price of the five per cent. 50-yea
bonds is 110 and a yield of about £4⅝ per cent. is forthcomin
Under the guarantee of the Canadian Pacific, stockholders ma
rely on receiving their interests payments regularly.

◆

SOUTHERN ALBERTA LAND COMPANY'S FINANCING.

This company will raise new capital to complete the irr
gation scheme recommended by Mr. Taylor, the company
engineer. He estimates that the cost will be about £278,40
plus £200,000 if certain other recommendations made are ca
ried out by the company. The directors think that not mo
than £250,000 additional capital will be required at presen
The company has a cash balance of £80,000, and with the pr
posed new capital that it is intended to raise, this sum wi
provide more than the amount estimated by Mr. Taylor as th
cost of completing the entire system. Accordingly, shareholde
are to be asked to sanction the creation of £500,000 of six p
cent. "A" debenture stock, of which only £250,000 will
issued at present. The "A" debenture stock will rank aft
the existing five per cent. debenture stock, but in other
spects it will be secured upon the property and assets in t
same manner as that stock. Subscribers of the "A" debe
ture stock are to be offered an option over 250,000 shares
the company at 30s. per share for a period of three years. T
proceeds of this option, if and when exercised, will be appr
priated to the redemption of the "A" debenture stock.
the present authorized capital of the company, amounting
£700,000, has all been issued, it will be necessary to create ne
shares to provide for the option, and the board has decide
therefore, to increase the authorized share capital to £1,000,0
by the creation of 300,000 new shares. The balance of 50,0
shares remaining, after providing for the option, will be he
in reserve. It is also proposed to create a sinking fund of
per cent. of all moneys received by the company in respect
land hereafter sold, which will be applied first to the redem
tion of the five per cent. debenture stock, and subsequently
the redemption of any "A" debenture stock not previous
paid off out of the proceeds of the option shares.

The value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

LEGAL NOTICES

McFARLANE-PRATT-HANLEY, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the seal of the Secretary of State of Canada, bearing date the 10th day of February, 1913, incorporating Robert Samuel McFarlane and John Hanley, contractors; David Shear Pratt, lumber merchant, and Florence Isabella McFarlane and Mary Hanley, married women, all of the town of Midland, in the Province of Ontario, for the following purposes, viz.:—(a) To construct, acquire, own, maintain and operate, hire, lease, sell or otherwise dispose of and to contract for the erection or construction of buildings, wireless stations, stores, warehouses, elevators, docks, dry docks, wharves, derricks, dredges, drills, viaducts, vessels, ships, scows, tunnels, tracks, bridges, canals and breakwaters and other like works of internal improvement or public use or utility, including the erection and construction but not operation of railways and tramways and generally to contract for, build, construct and equip public and private works; (b) To invest in and acquire and hold the bonds, debentures and stock of other companies with which the company hereby incorporated is empowered to contract, and; (c) To distribute amongst the shareholders of the company in kind any property of the company and in particular any shares, bonds, debentures or securities of any other companies belonging to the company hereby incorporated or of which the company hereby incorporated may have the power of distribution; (d) To manufacture, produce, buy, sell and deal in articles, tools, machines, metals, building materials and all articles composed or manufactured in whole or in part of iron, steel or other metal or wood, clay, cement, stone or other material or combination of any of them, and particularly all articles which might be of use in the carrying on by the company of any business mentioned as one of the objects of this incorporation; (e) For the purpose above to carry on the business of electricians, mechanical engineers and manufacturers and workers and dealers in compressed air, gas, electricity, motive power, heat and light, and to construct, maintain and operate works for the supply and distribution of compressed air, gas and electricity for light, heat and power; (f) To purchase or otherwise acquire and to sell, develop, work or otherwise deal with land, water, water power, water power supplies and water power work and equipment or works; (g) To purchase or otherwise acquire, hold, maintain, operate, sell and otherwise dispose of stone quarries and the stone taken therefrom and the products thereof; (h) To manufacture, buy, sell and deal in goods, wares and merchandise; (i) To carry on any other business, whether manufacturing or otherwise, which may seem to the company capable of being conveniently carried on in connection with its business or calculated directly or indirectly to enhance the value of or render profitable any of the company's property or rights; (j) To acquire or undertake the whole or any part of the business, property and liabilities of any person or company carrying on any business which the company is authorized to carry on, or possessed of property suitable for the purposes of the company; (k) To enter into partnership or into any arrangement for the sharing of profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise with any person or company carrying on or engaged in or about to carry on or engage in any business or transaction which the company is authorized to carry on or engage in, or any business or transaction capable of being conducted so as directly or indirectly to benefit the company, and to lend money to, guarantee the contracts of or otherwise assist any such person or company, and to take or otherwise acquire shares and securities of any such company, and to sell, hold, re-issue, with or without guarantee, or otherwise deal with the same; (l) To buy, sell, trade, deal in or guarantee the debentures, bonds, stock or other securities of any government or of any municipal corporation or school corporation or any chartered bank or any incorporated company, and to accept said securities or any of them in payment or in part payment for any works carried on by the company; (m) To take or otherwise acquire and hold shares in any other company having objects altogether or in part similar to those of the company or carrying on any business capable of being conducted so as directly or indirectly to benefit the company; (n) To purchase, take on lease, or in exchange, hire or otherwise acquire any personal property and any rights or privileges which the company may think necessary or convenient for the purposes of its business; (o) To do all such other things as are incidental or conducive to the attainment of the above objects. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "McFarlane-Pratt-Hanley, Limited," with a capital stock of fifty thousand dollars, divided into 500 shares of one hundred dollars each, and the chief place of business of the said company to be at the city of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 11th day of February, 1913.

THOMAS MULVEY,
Under-Secretary of State

33-2

CANADIAN ICE MACHINE COMPANY, LIMITED.

PUBLIC NOTICE is hereby given that under the First part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the seal of the Secretary of State of Canada, bearing date the 27th day of February, 1913, incorporating William Stewart Shipley, of the city of New York, in the State of New York, one of the United States of America, refrigerating engineer; Charles Edward Allison, of the city of Toronto, in the Province of Ontario, refrigerating engineer; and Arthur William Patrick Buchanan, King's Counsel; Thomas Sargent Owens, advocate, and Harry McIntyre, accountant, of the city of Montreal, in the Province of Quebec, for the following purposes, viz.:—(a) To carry on the business of manufacturers of and dealers in all kinds of ice making and refrigerating machinery and supplies incidental to or used in connection with the installation or operation of such machinery; (b) To construct, install and operate refrigerating and cold-storage plants; (c) To acquire, purchase, sell and deal in, supply, manufacture and produce all merchandise, material, supplies, machinery and other articles connected with insulation. (d) To carry on the business of builders and contractors for the purposes of the company; (e) To establish, maintain and carry on branches, factories, warehouses, shops and offices. (f) To acquire by purchase, lease, exchange or otherwise, and to hold, either absolutely as owner or as agent, such property, lands and buildings as may be necessary and requisite for the purposes of the company's business, and to erect and construct buildings, factories, shops or works of every description thereon, and to rebuild, enlarge, alter or improve the buildings existing thereon and to sell, lease, dispose of and exchange the said lands, buildings and other property; (g) To purchase or otherwise acquire and undertake all or any part of the assets, business, good-will, property, privileges, contracts, rights, obligations and liabilities of any person or company carrying on any business which this company is authorized to carry on and to pay for the same in stock, bonds, debentures or securities of the company; (h) To take, acquire and hold as a consideration for any materials, products or property sold or otherwise disposed of, or for goo supplied or for work done by contract or otherwise, shares, debentur or other securities of or in any other company having objects similar those of the company, or utilizing the products of the company, and to s or otherwise dispose of the same; (i) To raise and assist in raising mon for and to aid by way of bonus, loan, promise, endorsement, guarantee bonds, debentures or other securities or otherwise any corporation in t capital stock of which the company holds shares, or with which it m have business relations; to act as employee, agent or manager of a such corporation, and to guarantee the performance of contracts by a such corporation, or by any person or persons with whom the company m have business relations; (j) To lease, sell or otherwise dispose of t undertaking of the company or any part thereof for such consideration the company may deem proper and in particular for shares, debentures securities of any company having objects in whole or in part similar those of this company; (k) To acquire, hold, sell, assign or otherwise di pose of shares in the capital stock, bonds, debentures or other securiti of any other corporation or corporations carrying on a business in who or in part of a similar nature to that of this company, notwithstanding t provisions of section 44 of the Companies Act; (l) To acquire, hold, leas sell, assign, grant licenses in respect of or otherwise dispose of patent patent rights, licenses and privileges, inventions, all improvements a processes, trade marks and trade names relating to or useful in conne tion with any business of the company, and to pay for the same either cash or in shares of the company, or part in cash and part in shares the company; (m) To pay for any business, right, franchise or proper acquired by the company by full paid-up shares of the capital stock the company, or otherwise howsoever; (n) To consolidate or amalgama with any other company having objects similar in whole or in part to tho of this company; (o) To enter into partnership or into any arrangement f sharing of profits or union of interest with any person or company carryi on or engaged in any business or transaction which the company authorized to carry on or engage in, or germane thereto, and to mal advances to, guarantee the contracts of, or otherwise assist any su person or company, and to take or otherwise acquire shares and securiti of any such company, notwithstanding the provisions of section 44 of t said Act, and to sell, hold or otherwise deal with the same; (p) To all acts and exercise all powers and carry on all business incidental the due carrying out of the objects to which the company is incorporate and necessary to enable the company to profitably carry on its underta ings. THE GOOSE THAT LAID GOLDEN EGGS.

By Ellis O. Jones.

A certain Man had a Goose which laid him a Golden Eg every day. A foolish friend advised him to kill the Goose an realize at once on the future.

"No," said the man; "that is not the proper way. I kno a better." Thereupon he organized a company and issue stocks and bonds which he sold at a good round figure. The he gave out the report that the Goose had quit laying. Thi enabled him to buy the stock back at a low figure. Then h gave out the report that the Goose was laying two Eggs day, which enabled him again to sell the stock at a big ac vance. After he had repeated this process a number of time he was so rich that he didn't care what the Goose laid o when. Accordingly, he invested his wealth in gilt-edged s curities, journeyed abroad, and went in for art.

◆

THE POINT OF VIEW

Brute Force is Defeated by Free Speech. Liberals Emerge Triumphant. Government Forces Capitulate. Attempts to apply the "Gag" in Commons on Saturday night resisted successfully by Opposition. Opprobrious epithets hurled across floor by Conservatives. Dr. Clark named by Speaker, and W. M. Martin reported. Premier Borden secures withdrawal of both actions, and finally moves adjournment. — Toronto *Globe*, (Liberal), March 17th.

Most Disgraceful Scene Parliament's History.—Lit eral members break bounds of decency and pr cipitate a near riot. For th first time on record Speaker is forced to nam member for persistent disre gard of the Rules of House. Dr. Michael Clar of Red Deer, the offend Cool headed generalship the Premier alone avoided physical collision. Toro *Mail and Empire*, (Co servative), March 17th.

◆

The capital stock of the Seaman-Kent Company, Limite has been increased from $500,000 to $1,000,000.

The Midland and Textile Insurance Company, of London, gland, which owns the London Mutual Fire Insurance Comny of Canada, is writing down its share capital by £47,796. the same time they propose to call up six shillings a share the 150,000 partly paid shares, and to create cumulative ticipating shares and ordinary shares. Under the proposed scheme each fully paid share will become one ten-shilling preference share and one five shilling ordinary share, both fully paid. Each existing partly paid share will, after the call of six shillings has been paid, become one fully paid ten-shilling preference share and one five-shilling ordinary share, one shilling paid.

TORONTO SELLS MORE BONDS

Lloyd's Bank Takes Two Million Dollars Worth at 89½—Three Sales This Year.

The city of Toronto has placed another $2,000,000 of its debentures. Lloyd's Bank, London, which acts as the city's English agent, cabled the mayor that it could place another $2,000,000 of debentures immediately at a slightly more favorable rate to the city than it received for the issue marketed in January last. The offer was considered by the civic treasury board. Lloyds were advised the city would sell another block of debentures if the price were favorable. In reply the bank quoted 89½ rate, or ½ per cent. higher than the amount nett to the city on the January issue.

Treasury Board Accepted Offer.

The treasury board accepted the offer and advised the Lloyds Bank accordingly. The bank, in acknowledging the city's order to sell, requested that the matter be kept strictly private for one week. This was on March 11th. The news became public prematurely on March 17th. However, as the same underwriters have underwritten this latest amount, it may be presumed no danger can occur.

Toronto has now made three issues this year, as follows:—

Sold in.	Amount.
London	$5,224,500
United States	1,000,000
London	2,000,000
	$8,224,500

First London Issue.

The first London issue was handled by Lloyds Bank and was for £1,075,000 four per cent. consolidated debentures. They were issued at 92½, and 85 per cent. were reported as left with the underwriters. The subscription list opened on January 27th and closed on January 31st.

The second sale was made to Messrs. N. W. Harris and Company, of Boston. It was for $1,000,000 four per cent. bonds due on July 1st, 1922. The company offered the bonds to investors at 94¾ and accrued interest, yielding 4.70 per cent.

The third loan, as stated, was handled by Lloyds Bank and was for $2,000,000.

Issued One-Year Notes.

Unable favorably to float its securities in London last year, the city issued £1,200,000 one-year notes at 4½ per cent.

Prior to that, early in 1912, local financial houses offered as high as 97 for the city's bonds. These offers were refused, the city hoping—vainly as it has since been shown—to receive a better price.

◆

FOUR BIDS FOR THESE BONDS.

Three Toronto bond firms and one Regina firm bid for the North Battleford Rural Municipality, Sask., $15,000 5½ per cent. 30-year road debentures. The offer of the Flood Land Company, Regina, was accepted.

◆

NEW ISSUES IN LONDON.

In February the new issues in London totalled £20,000,000, in comparison with £23,000,000 in February last year and £14,000,000 in 1911. Of the new issues during the past month, nearly £7,000,000 was for railways, £3,500,000 for governments, and the remainder mainly for industrial undertakings. The issues include £1,000,000 of new capital for the Bank of Australasia.

Total issues for the first two months of the year are £66,086,289, as compared with £47,192,681 in the same period of 1912. The distribution of the new issues in February this year and last was:—

	1913.	1912.
United Kingdom	£ 2,893,270	£ 5,734,515
India	108,750	3,500
British possessions	4,681,436	2,998,592
Foreign	12,301,542	14,407,912
Total	£19,984,998	£23,144,519

MUNICIPALITIES AGAIN ISSUING SHORT TER NOTES.

Regina and South Vancouver to Finance in that Way Civic Authorities Should Act Very Cautiously in this Direction.

That the market for large issues of municipal bonds is li better than during the greater part of last year, is indica in the action of civic authorities in issuing or renewing sh term treasury notes.

The city of Regina will issue treasury notes to the ext of $1,000,000 in order to secure funds for the financing of city's local improvement for the present year. The aldern think that the money market is not in a condition to se good bids for debentures, and in order not to hold up the w notes will be issued. The Bank of Montreal, acting as fi agents for the city, will negotiate the treasury bills. The ma and treasurer have been authorized to sign the necessary b

South Vancouver to Renew Notes.

South Vancouver has decided to renew the treasury ficates aggregating nearly $1,500,000, authorized for issue the Lieutenant-Governor a year ago. Certificates totall £300,000 were authorized, and certificates to the amount of £2 000 were issued. Those issued fall due on April 1st, 1913, a the council resolved not only to renew them, but to issu remainder authorized last year, but not used.

The amount of treasury bills issued in London by Can municipalities to October, 1912, was estimated by Sir Freder Taylor, manager in London of the Bank of Montreal, at 770,000. Among civic authorities deciding on that method temporary financing were the following: Burnaby, Montr, Moose Jaw, Point Grey, Port Arthur, Prince Rupert, Que, South Vancouver, Toronto, Victoria, Westmount, and Vancou

Competition for Short Loans.

Short loans, such as exchequer bonds, treasury bills, issued by the Bank of England on behalf of the Imperial ernment or the India Council, are eagerly competed fo London, chiefly by the money market, as such securities always in demand, for even in the most stringent times t can usually be resold, or, as a last resort used as security loans from the Bank of England. They accordingly are a liquid and thus an extremely valuable security, practically to cash, and form a good reserve against days of financial culty. The short dated issues of the county councils and cipalities of Great Britain come close to the above categor after these a wide gulf, as a general rule, intervenes, fo reason that the issues of colonial and other governments, made by the Bank of England, do not command the privileges and accordingly when tendered as security for or offered for sale, especially in periods of stress, do not se the same terms and conditions, with the result that the mar especially the discount houses, must of necessity limit t holding of this class of security, as it is their constant end to keep their assets in the most liquid condition.

Should Exercise Caution.

Canadian municipalities should remember that the mar as Mr. H. V. F. Jones, the London manager of the Cana Bank of Commerce has pointed out, generally becomes qui cognizant of any plethora of securities of this description, this knowledge tends naturally to react upon the price, not of the securities of the government or corporation already iss and dealt in on the stock exchange, but on the price at w the new issue is to be made. Prices will tend to fall and in long run the borrower may have to bear the chagrin of dis ering that all his manoeuvres to avoid a period of apparent money and depreciated prices has ended in failure and poss severe loss.

◆

UNDERWRITERS TAKE RAILROAD BONDS.

The final showing of the Great Eastern Railway issu London, which in spite of the 4½ per cent. yield and the that it was guaranteed by the British Columbia Governm shows that 60 per cent. has been left with the underwrit

The result suggests that the success of Montreal's 4½ cent. issue was due to its attractiveness and not to any ing of the purse strings of the investing public, says a to the Montreal Star.

BANK STATEMENTS

Banks, banking and borrowing are topics which are receiving more than usual attention at the moment, and, in view of prevailing conditions, the bank statements from the principal monetary parts of the world are being closely examined and analyzed.

The February statement of Canada's chartered banks shows comparatively few changes. The principal items, with comparisons, contained in the statement are appended below. Increases are shown in circulation, current loans and call loans elsewhere. Decreases in deposits on demand and after notice, current loans elsewhere and call loans in Canada.

An expansion of about seven million dollars in current loans in Canada, following a contraction of about the same amount in January is the principal change in loans. Call loans, after showing a small gain in January, show a decrease in February to the extent of only $89,711.

The following table shows the course of current and call loans in Canada for the past thirteen months:—

Loans.	Current in Canada.	Call in Canada.
1912—February	$793,853,547	$71,181,510
March	815,948,308	69,846,338
April	833,242,621	69,243,791
May	837,282,550	68,305,157
June	848,940,088	68,701,855
July	852,256,651	70,407,734
August	852,045,624	75,194,735
September	859,341,193	72,205,261
October	879,676,655	73,959,866
November	874,721,593	70,668,521
December	881,331,981	70,655,661
1913—January	874,705,616	71,376,510
February	882,112,726	71,286,799

These figures reveal the extension of commercial credit and the demands on the banks in financing the business of the Dominion, the total increase in the twelve months being $88,259,179 in current loans in Canada, while current loans outside of Canada increased only about two million dollars.

	Feb., 1912.	Jan., 1913.	Feb., 1913.	Year's increase.	Month's inc. or dec.
Deposits on demand	$321,152,954	$354,518,964	$349,661,830	- 8.8	— 1.3
Deposits after notice	600,252,128	635,000,056	630,467,518	- 5.0	— 0.7
Current loans in Canada	793,853,547	874,705,616	882,112,726	+ 12.3	+ 0.8
Current loans elsewhere	35,946,475	40,098,146	37,673,798	+ 4.2	— 8.5
Call loans in Canada	71,181,510	71,376,510	71,286,799	+ 0.1	— 0.1
Call loans elsewhere	88,589,472	92,387,847	95,229,407	+ 7.4	+ 3.0
Circulation	88,920,598	94,575,644	97,206,713	+ 9.3	+ 2.7

The growth of current and call loans in Canada and elsewhere during the past few years is clearly shown in this table:—

	Current loans in Canada. $	Current loans elsewhere. $	Call loans in Canada. $	Call loans elsewhere. $
1909	507,349,748	35,055,266	47,555,140	101,443,902
1910	602,454,539	42,403,784	61,855,519	120,374,681
1911	689,234,781	37,099,221	59,132,092	85,420,046
1912	793,853,547	35,946,475	71,181,510	88,589,472
1913	882,112,726	37,673,798	71,286,799	95,229,407
Inc..	274,763,000	2,618,000	23,731,000	Dec.6,214,000

While current loans in Canada have been amplified to the extent of 54.1 per cent. since 1909, current loans elsewhere have only extended 7.4 per cent. Call loans in Canada have grown nearly fifty per cent. and call loans elsewhere six per cent. during a similar period.

The following table traces the on demand and after notice deposit accounts during the past thirteen months:—

	On demand.	After notice.
1912—February	$321,152,954	$600,252,128
March	331,896,238	606,044,932
April	345,365,183	615,370,348
May	376,953,217	625,294,344
June	373,500,189	631,317,687
July	372,012,494	640,592,345
August	360,575,425	643,663,596
September	374,368,917	640,536,652
October	383,814,572	640,097,928
November	376,829,372	635,810,703
December	379,777,219	632,641,340
1913—January	354,518,964	635,000,056
February	349,661,830	630,467,518

February deposits on demand show a further downward movement, and deposits after notice were smaller than the previous month, the total decline being nearly ten millions.

Deposits outside Canada were augmented to the extent of about eight and a half million dollars.

February.	On demand.	After notice.	Total.
1909	$192,968,536	$441,390,540	$634,359,076
1910	236,697,987	507,307,733	844,005,720
1911	268,360,503	551,424,373	819,784,876
1912	321,152,954	600,252,128	921,405,182
1913	349,661,830	630,467,518	980,134,348
Inc.	$156,693,000	$188,067,000	$345,775,000

The total increase in Canadian deposits is shown in the above table to be $345,775,000 as compared with February, 1909, returns; this is equivalent to 54.3 per cent.

Circulation was increased by nearly three millions. From this Canadian bank statement some small evidences of improvement in financial conditions can be noted.

Other statements of interest are those of the Banks of England, United States and France. The Bank of England for the week just past reported a decrease in its gold coin and bullion holdings of £555,354, while a reduction of £1,000,000 was registered in the item indicating the total reserve. Loans were increased £180,000, but Lombard Street received the benefit of a decrease of £1,142,000 in public deposits. The gold holdings amount now to £36,862,105, which compares with £38,337,550 one year ago and £40,319,997 in 1911. The proportion of reserve to liabilities—40 per cent.—stands at the lowest figure for any corresponding week since 1891, when it was 38⅛ per cent.

The statement of New York banks was favorable. The average reserve for the week increased $5,665,700 and the actual increased $4,318,750. The surplus reserve is now $13,556,200, as compared with $13,341,900 a year ago.

Average loans decreased $34,342,000 for the week, deposits decreased $37,024,000, legal tenders increased $1,070,000, and specie decreased $4,198,000.

Actual loans decreased $35,550,000, deposits decreased $36,445,000, specie decreased $3,223,000, and legal tenders decreased $819,000.

The Bank of France indicated an increase of 9,366,000 francs in the gold holdings, which was undoubtedly due to the arrival of the first consignment of American gold. Silver holdings increased 2,916,000 francs, but there was a decrease in note circulation of 34,775,000 francs in discounts of 45,300,000 francs, while deposits showed an expansion of 45,400,000 francs.

NAVIGATION STARTS SOON

Navigation on the Great Lakes is expected to be general by April 15th. This early commencement of the wheat movement will bring about many beneficial results to grain-grower and merchant alike, and will greatly assist the trade of the west and of Canada generally.

Reports indicate that the upper lake harbors will be free of ice the first week in April, thus releasing the large fleet of grain-laden freighters waiting for the opportunity to rush their cargoes eastward. Freight boats at the head of the lakes contain about 13,000,000 bushels of grain, and the work of the government ice-breakers in the harbors during the winter has enabled them to load at the elevators, one after the other, and thus to prepare for departing as soon as the way is open. The presence of such a number of loaded freight boats adding to the winter storage capacity and providing for so great an initial movement in the spring is due principally to the action of the Dominion government in suspending coasting trade regulations in the fall so as to permit American vessels to take cargoes out of Port Arthur or Fort William to Canadian lower lake ports.

ADVICE TO PESSIMISTS

Scarcity of money, of liquid capital, is the present bugbear of banking people and political hostility the prospective bugbear.

What are the facts? April is always a critical date on the financial calendar, for enormous payments have then to be met, both abroad and at home. This year the conditions have been aggravated by the costly and unsettling European wars, for small investors, the backbone of financial Europe, have withdrawn their cash from the banks and have hoarded not less than half a billion dollars ($500,000,000). This sum in ordinary times would form the basis of some two billion dollars of credit.

While this is so, the New York American's business editor does not think it is a time for wails, and gives the following advice to American financiers and business men:—

Bankers and other men of finance:—Be calm, courageous and optimistic.

Business men:—Be cautious, slow to assume fresh indebtedness, prudent in laying plans for the near future and frank in your interviews with your bankers. Take them into your confidence and learn definitely and explicitly how far you can depend upon them for facilities.

This advice may also suit the needs of some Canadians who are looking pessimistically at the present monetary situation.

SMALL CHANGE

Mr. William Jennings Bryan's first speech as secretary of state has been dubbed by an English critic as "inflated nonsense"—which counts as a hit for the republicans.

* * * *

The Colorado trophy for the best bushel of oats shown at the National Corn Exposition, Columbia, was won by Messrs. J. C. Hill & Sons, Lloydminster, Sask. If the United States want to keep such prizes, they must limit the competition to residents in the republic.

HOW CANADA'S TRADE HAS GROWN

Business With the Countries of the World and With the United States, the United Kingdom, France and Germany in Particular

The accompanying tables show the trade of Canada with the world and with the four countries with which we do the largest business, namely, the United States, the United Kingdom, France and Germany. For the fiscal year, 1912, our trade with the world was valued at $874,000,000, an increase of more than $100,000,000 over that of the previous year. This large gain has been almost maintained for several years past, for in 1909 the total was $571,000,000; in 1910, $693,000,000; and in 1911, $769,000,000. Canadian trade with the world has almost quadrupled since 1893, when the figures were $247,000,000. These include coin and bullion.

We imported merchandise in 1893 valued at $122,000,000. This had increased in 1906 to only $287,000,000. Last year, the figure had changed to $533,000,000, compared with $462,000,000 in the previous year. Our exports of merchandise to the countries of the world have almost trebled in the past 20 years. In 1893, they were $114,000,000 and last year, $307,000,000. Canadian produce represented the bulk of these exports every year. Last year they were valued at $290,000,000 of a total of $307,000,000.

Of the merchandise imported for consumption last year, $335,000,000 was dutiable and $186,000,000 free, as compared with $282,000,000 and $169,000,000 in 1911. The duty collected last year was $87,000,000 as against $72,000,000 in 1911, $60,000,000 in 1910 and $47,000,000 in 1909. Of the total imports of $533,000,000 last year, $343,000,000 were dutiable and $190,000,000 free. A table elsewhere in this issue, Canada's Commercial Balance Sheet, shows the countries of the world with which we are trading, and their share of business.

United States Trade.

The United States has obtained a remarkable increase in business with Canada. Including coin and bullion its total trade in 1893 was $109,000,000. Last year, it exceeded $488,000,000. Our trade with the United States, always one-sided, is growing more so. Canada's imports from that country in 1893 were $59,000,000, against our exports, exclusive of coin and bullion, of $39,000,000. Ten years later, 1903, they obtained $136,000,000 worth of our import business, while we exported only $71,000,000. In 1909, the imports from the United States had grown to $182,000,000 against our exports of $91,000,000. In 1911, they had still further increased their business to $284,000,000, while our exports to the Republic were $112,000,000, only $2,000,000 greater than in 1910. Last year, the disparity was still further enlarged, the imports from the United States being $342,000,000 and our exports to that country practically remaining at $112,000,000, to be exact, $112,956,000.

Sir Edmund Walker has said that an examination of the items of imports and exports, while suggesting many explanations for the respective increases and decreases, does not minimize the importance of the fact that we must enlarge the volume of products we have to export and either lessen our imports by curtailment of expenditure or by manufacturing at home many of the articles we buy abroad, especially from the United States.

Free of Duty.

Last year, there were some big items of Canadian business with that country, which come in free of duty. Hard coal and coke represented $20,796,746—soft coal pays a duty; rubber and gutta percha, $4,967,218; tobacco, $3,817,904; hides, $2,669,196; raw cotton $8,322,345. We buy these goods from the United States because we need them, and because the United States is close to our borders. The merchant amongst us most loyal to Britain would not bring his fuel from the Old Country and pay a heavy toll in freight across the ocean, if he could buy it close at hand in the United States. Trade has certain restrictions, made by Nature, which the most well-meaning of Imperialists cannot get over mmediately.

There are many other articles from the United States on our free list, and a group of them may be mentioned here:—Iron and steel, in shapes which Canadian manufacurers have not yet overtaken; tin and copper in the ingot and in sheet, jute, raw silk, furniture woods, fruits, drugs, dyes and chemicals, petroleum, manila, grease, gums.

Trade With Great Britain.

Our business with the United Kingdom has not increased as rapidly. The total trade in 1893 was $107,000,000. Ten years later, it had risen to $190,000,000. In the two succeeding years, 1904 and 1905, it declined. In 1909, it had risen to $204,000,000 and gradually increased in the three latest years to $245,000,000, $247,000,000, and $269,000,000 respectively. With United States trade, our imports are far greater than our exports. With British trade it is the reverse, Canada being large sellers in that market and small buyers.

Of the total trade with the United Kingdom last year, exclusive of coin and bullion, our exports were $151,000,000 and our imports $117,000,000, as compared with $137,000,000 and $110,000,000 in 1911. Of our imports from the United Kingdom for consumption last year $89,000,000 were dutiable, and $27,000,000 free, $22,000,000 duty being collected.

Greater efforts are being made to promote British trade in Canada. According to Mr. Richard Grigg, who resigned last year as British Trade Commissioner in Canada, and was succeeded by Mr. C. Hamilton Wickes, increased experience has confirmed an opinion already expressed that there exists throughout Canada a keen desire both on patriotic and business grounds better to understand differing points of view, and to draw closer the bonds of commercial union. Although a marked improvement has occurred in the attention given to the Canadian market by British manufacturers, the impression still remains that British knowledge of the Canadian market, and appreciation of the great future, is much less extensive than in the case of our friendly United States rivals.

Analysis of Canadian Market.

The Canadian market, as a field for present and future British trade, he continues, is governed by certain conditions which give to the economic life of the Dominion a character of its own. Canada has for a decade past been undergoing, and seems destined to undergo for a considerable period a great industrial and financial expansion. This phenomenon is not comparable to the mere alternation of good times and bad, of inflation and restriction, the periodicity of which has been for generations past a commonplace of economic discussion. An expanded market due to the incidental occurrence of "good times" is often a cause rather of apprehension than of confidence to the manufacturer and trader, as it suggests rapid gains and the utilization of the present without counting upon the future. The trader makes hay while the sun shines, well aware that an overcast and clouded sky may at any moment check his activities. Present opportunities he utilizes to the full, but anything in the shape of larger capital expenditure, of patient preparation for the future, of immediate sacrifice for later gains, he is disposed to regard with the utmost caution. In Canada the case is different; expansion is not an incident but rather a permanent condition of economic life, the existence of which, in the interests of the British trader, cannot be too highly emphasized.

It is true that in the general movement of the industrial progress of the Dominion the same oscillation of good and bad years is to be observed as elsewhere; the progress of the country, for instance, industrially and in the growth of its population, during the decade 1881-1891 was by no means rapid, and the development of Canada was held in check by the extraordinary industrial expansion of the United States, and by the large area of fertile land still open for settlement in the American West, but it was inevitable that sooner or later the resources of the country would attract the population and capital necessary to its development. The reasons, therefore, for the present expansion are obvious.

The sum we pay every year, largely to the old countries across the sea, for cotton and woolen textiles, clothing, stockings, laces and embroideries, is large. The bulk of the cottons come from Great Britain, Germany, Switzerland and the United States; of the woolens, from Great Britain, Austria-Hungary, France and Germany. The United States sends us some clothing.

Trade With France.

The trade is comparatively small with France, although that nation is one of the four with which we do our largest business. In 1893, the total imports and exports were valued at $3,000,000. In 1903, they had increased to $7,845,000. In 1911, they totalled $14,537,000, and last year they showed a slight decrease, the figures being $14,009,000. Our imports from France last year were $11,885,000, as compared with $11,755,000 in 1911. In 1912, $9,000,000 of these were dutiable, and $2,000,000 came in free. The exports last year totalled $2,123,100, practically all Canadian produce, and in the previous year, $2,782,000. Canadian exports to France have expanded considerably since 1893, when the total was only $264,000.

A convention with regard to commercial relations between Canada and France was signed on September 19th, 1907, and a supplementary convention was executed on January 23rd, 1909. The ratification of both these was exchanged on February 1st, 1910. Certain concessions were made by France regarding the admission of Canadian products into that country, and a number of French products received more favorable treatment on importation to Canada. Many of these received the benefit of the intermediate tariff.

Canada's trade with Germany is attached to a somewhat romantic tariff story. In 1899, Germany refused Canada the most favored nation treatment on the ground that Canada had

TRADE OF CANADA

Summary of the Imports therefrom and Exports thereto

given a preference to the United Kingdom, while refusing a similar concession to Germany, and on April 17th, 1903, a surtax on German goods entering into Canada came into operation, the increased duties being 33 1-3 per cent. beyond he tariff common to all markets (except those from the United Kingdom). Its effect was to reduce the rapidly growng German imports by nearly 50 per cent. during the years ollowing 1903, and that in a period when Canadian markets were undergoing rapid expansion. Early in 1910, negotiations of a more or less informal character took place between Mr. Fielding, then Canadian Minister of Finance, and Dr. Lang, German Consul-General at Montreal, which resulted in the signature of a provisional agreement, under which Germany gave up her demand for treatment similar to that which Canada extends to Great Britain under the preferential duties, and agreed to give Canada the conventional rates of the German tariff upon many of the important articles exported by Canada to Germany.

The operation of the Canadian surtax upon German goods was intended to be automatic and only to continue for such period as Germany discriminated against Canada. Upon the signature of the agreement referred to, thererfore, the surtax terminated; the agreement, however, is provisional, and contemplates, at a later date, a formal convention for the regulation of commercial relations between the two countries. There is little doubt that Germany will recover much of the trade which was lost because of the imposition of the surtax, and trade so recovered will be mainly taken from that at present enjoyed by Great Britain and the United States. German houses are showing great activity and earnestness in their attempt to re-enter the Canadian market. If Germany succeeds in obtaining the benefit of the intermediate tariff, she will prove an extremely formidable competitor, and the utmost efforts would be required on the part of British and United States manufacturers and merchants to maintain their position in the Canadian markets.

Trade With Germany.

In view of these facts, the fluctuations of the trade with Germany, as shown in the accompanying tables, are unusually interesting. In 1904, the year after the surtax was applied on German imports, the total imports from that country to Canada dropped from $12,000,000 to $8,000,000, and in the ollowing year to $6,000,000. Then they rose to $7,000,000 in 1906, $8,000,000 in 1908, and declined again to $6,000,000 in 1909. Tariff negotiations taking a more favorable turn, the figures have gradually improved, the imports last year totalling over $11,000,000. Our exports to Germany in 1912 were $3,814,000, as compared with $750,000 in 1893.

Dr. Stresemann, president of the German Canadian Economic Association, was a visitor to Canada last year and addressed the National Club regarding the trade of Germany and Canada. The Association, with its headquarters in Germany, has for its object the promotion of trade relations between the two countries. The German merchants, he said, are no longer complaining against the British preferential tariff. They have recognized that the preferential duties involve a principle of relation between Great Britain and Canada concerning these two only.

Want Better Relations.

"It is a one-sided German interest, but a joint Canadian and German interest that we are looking forward to in the endeavor to strengthen the trade relations between these two countries," he continued "Germany is a growing nation with a population of sixty-six millions. In less than a score of years she will have to feed within her boundaries over eighty millions. She is an industrial nation, and her agriculturists are not in a position to furnish her with all the food stuffs she requires. The imports of agricultural products into Germany amount to more than $750,000,000. How very small is Canada's share in these imports! How much more could the German market be enlarged for the Canadian farmer! And the prosperity of the Canadian farmer is of immense benefit to Canadian industry, inasmuch as prosperous farmers are the manufacturers' best customers. There is a large import of industrial products into Germany, notably from the United States. Canada furnishes Germany with a large percentage of the import of agricultural machinery.

"What is lacking for a mutual increase of the exchange of products between the two countries is the establishment of a closer and more friendly relation between the business men of both countries. Permanent trade relations on the basis of a fair give and take in the exchange of products, would, at the same time, tend towards an improvement in shipping facilities between Canada and Germany.

Big Steamship Lines Interested.

"Both the Hamburg-American Line and the North German Lloyd are represented on the board of the German-Canadian Association by their presidents. Both lines are much interested in having their service to Canada improved. This is only possible through an increase of freight, consequently dependent upon an improvement of trade relations."

Mr. R. S. Gourlay, president of the Canadian Manufacturers' Association, in replying to Dr. Stresemann, said that Canada's share of the $750,000,000 of Germany's imports was so small that he was almost ashamed to mention it. Yet, he was sure that all had resolved, in so far as Germany's protective tariff will permit, to do all possible to foster and augment that trade.

Mr. Gourlay pointed out that in the ratio of respective populations we spend in Germany nearly $40 for each $1 they spend with us. "We must seek the trade of our friends in Germany as wisely, as energetically and as persistently as we follow trade in our own country, or as our German friends seek it here."

NEW GRAND TRUNK DIRECTOR

Mr. William Molson Macpherson, of Quebec, has been elected a director of the Grand Trunk Railway, to replace the late Sir William H. White, and not Sir William Whyte, as was stated in a previous issue. Mr. Macpherson is already a member of the Grand Trunk Pacific directorate, but he is the first Canadian director of the Grand Trunk proper.

The St. Catharines by-law authorizing the expenditure of $250,000 to build a high-level bridge or viaduct across the old canal, and so continue King Street to the Grand Trunk station, was voted down.

The Alberta legislature, on a party division, turned down the resolution of the leader of the opposition, Michener, for the appointment of a commission of chartered accountants to examine into the financial affairs of the province. Premier Sifton asserted that nothing had been brought to the attention of the house to warrant such an inquiry

UNITED WORKMEN ADOPT LONGMORE SCHEDULE

Scale of New Rates Options in January, February and March—Reserve Fund

After a discussion lasting over a period of two days, the Grand Lodge of the Ancient Order of United Workmen adopted the No. 1 amendment, proposed by Mr. R. W. Longmore, by much over the necessary two-thirds majority. This is the same measure that was adopted at the special session of the Grand Lodge held last June, and which was later declared illegal by Mr. Justice Riddell, on the grounds that the members had not been given proper notification. The following is the Longmore amendment:—

"From and after the first day of May, 1913, each and every member of this order who joined prior to the first day of May, 1905, shall, without notice, pay to the financier of the lodge a monthly assessment of the amount designated opposite the age of the member on the first day of May, 1905, members over 72 years of age to be taken at age 65, and each and every member commencing with the month of receiving the Workman degree shall, without notice, pay to the financier of the lodge a monthly assessment of the amount designated opposite the age of the member at the date of admission to the order, according to the following graded plan:—

Scale of New Rates.

Then follows a table of the rates, running from age 16, at 74 cents per month per $1,000, up to age 65, at $5.60 per $1,000.

Up to age 44 the list shows the same rates as have been in operation since 1905, ending with $2,05 per month per $1,000 at that age. Then they continue upon the higher ages as follows:—

Age.	Per $1,000.	Per $2,000.
45	$2.19	$ 4.38
46	2.34	4.68
47	2.42	4.84
48	2.50	5.00
49	2.69	5.38
50	2.71	5.42
51	2.73	5.46
52	2.86	5.72
53	3.00	6.00
54	3.15	6.30
55	3.30	6.60
56	3.49	6.98
57	3.65	7.30
58	3.85	7.70
59	4.05	8.10
60	4.28	8.56
61	4.50	9.00
62	4.75	9.50
63	5.01	10.02
64	5.30	10.60
65	5.60	11.20

The chief officers elected were: Grand Master, Jas. M'-Every, Drayton; Grand Foreman, W. G. Mikel, K.C., Belleville; Grand Overseer, J. Lockie Wilson, Toronto; Grand Recorder, M. D. Carder, Toronto; and Grand Treasurer, F. G. Inwood, Toronto.

No doubt the new scale of rates thus adopted for those who joined previously to May, 1905, will do something toward increasing the monthly income, and make things look a little brighter. There is a gap still left in the shape of the rates which ought to have been collected in 1905 and since, from all the old members, based upon the ages attained in 1905, but now impossible of collection. These new rates, it will be noted, apply only hereafter to the ages attained in 1905. Therefore, there was a period of eight years when many deaths of those old members took place, leaving much to fill for which no provision has been made.

Cashing In Certificates.

In the meantime the members who have attained age 70 are cashing in their certificates under the option that allows them to sell out for one-half what they have contributed since joining.

In January these options cost the order $153,474; in February, $45,321; in March, $31,228. During the same three months there was paid for death losses, $100,066 in January, $104,334 in February, and $86,379 in March. And still there were delayed and reported claims and options to pay amounting to $225,613. The estimated collections were set down at $74,550, thus showing a net deficit to be met during March of $157,062.

The reserve fund has been decreasing for some time past, as shown by the following statements, taken from The Canadian Workman, viz.: September, 1912, $1,398,702; December, 1912, $1,144,483; January, 1913, $1,112,505; February, 1913, $1,059,537, and March, 1913, $1,019,337.

It should be understood that the Ancient Order of Unite Workmen of Ontario has no connection with any other branc of the order, except that they have some subordinate lodge in other provinces. They seceded from the parent order o the United States many years ago. Therefore, they hav now no claim upon the Supreme Lodge, of Meadsville, Pa. as have some of the state grand lodges whenever their death exceed a certain scale of loss. There is also a small branc of the United States Workmen in Manitoba, which reports t Meadsville, Pa., and is not affected by the rates of the Ontario Workmen.

GREAT BRITAIN'S FOREIGN LOANS

Great Movement of Trade — Freedom With Which Investors Supplied Capital to Young Countries

In 1896 Great Britain was indisposed to place but a ver small amount of capital abroad in consequence of the grea distrust that prevailed concerning the credit of nearly ever country, remarks The Statist. In 1903 the credit of othe countries had improved, but Great Britain was unwilling t lend, as it was still suffering from the consequences of th South African war. But in the past year the British peopl were willing to employ their capital wherever there was sufficient inducement to do so. In consequence of this the not only supplied the colonies with £64,000,000 of new capital, but they provided foreign countries with about £95,000,000 of new money the greater portion of this being len to Argentina, Brazil, the United States, Russia, China Japan, and various other countries.

Do Not Mean Corresponding Increase In Exports.

Of course, large loans to an individual country b British investors do not mean a corresponding increase i exports of British goods to that country. Of course, th British people are not able to supply everything a natio needs, and the capital borrowed is employed by the borrowing country in purchasing the things it needs from an country in which they can be obtained. Thus a large par of the capital which Great Britain supplies to Canada i used by the Canadian people for the purchase of America agricultural machinery and for American specialties whic are of special value to Canada. The capital Great Britai supplies to Argentina is in part used to purchase clothing not only from Great Britain, but from the Continent, machinery from the United States, and the specialties of ever country.

Great Movement of Trade Felt Everywhere.

Still, the fact that Great Britain lends capital doe directly increase the exports of Great Britain to the borrowing country, while it expands the exports of Great Britai to other countries whose purchasing power has been increased by the expenditure with them of the capital obtaine by the borrowing countries. And the result is that a grea movement of trade is created which is felt everywhere, an increases the trade and commerce of the whole world. Thu one of the greatest causes of the immense activity of trad in 1912 was the freedom with which British investors supplied capital to the young countries to enable them to increase their productions of foodstuffs and raw materials.

CANADIAN PULP AND PAPER MANUFACTURERS

The Canadian Pulp and Paper Manufacturers' Association has been formed for the "object of gathering statistic on the possibility of the world's market, the collection o rainfall data, and to co-operate with the Dominion Government in the establishing of laboratories for forest products. elected the following officers: Mr. Carl Riordon, of th Riordon Pulp and Paper Company, Montreal, president Mr. W. P. Gundy, of the Kinleith Paper Company, St Catharines, Ont., vice-president; and Mr. A. C. McIntyre honorary secretary-treasurer.

The official announcement states that the associatio will have nothing to do with the sale or price of paper.

* * *

From the three sugar beet factories at present in operation in Canada there was produced during the sugar-refinin campaign of 1911-12 from Canadian grown sugar beets total of 22,157,155 pounds, or 11,078 short tons of beet ro sugar, as compared with 20,612,276 pounds, or 10,306 tons in the previous campaign of 1910-11. The three factories ar situated at Wallaceburg and Berlin in Ontario and at Raymond in Alberta.

CANADA'S AGRICULTURE AND MINES

Glasgow Writer's Errors—Reasons for Diminution in Area and Value—Mineral Statistics

Comparing the 1912 figures, as received from the Canadian government printer, with those for 1911, under exactly similar headings, there cannot be a shadow of doubt left that Canadian land to the extent of approximately 400,000 acres has gone out of cultivation, and that the value of the crops harvested has declined by approximately $50,000,000, writes G. W., of Glasgow, in the London Economist.

Now, these results are not in accordance with those the public were led to expect. Before the official figures were published very little was heard about the disastrous effects of "killing frosts." All newspaper estimates were for record crops. As recently as December 2nd last the president of the Bank of Montreal, in his speech to the shareholders, estimated an increased wheat yield in the Northwest of 11,000,000 bushels, whereas the actual result shows a decrease of practically the like amount. But it is said that the decline, now that it has to be admitted, in agriculture, as shown by the crop returns, is made up for in other directions, and the Canadian Gazette suggests that live stock farming is taking ts place. No figures, as you justly point out, are given to substantiate the suggestion, and what figures are available are opposed to any such conclusion.

The figures given on this subject in the lately published Statistical Abstract for the Colonies are not complete for all provinces, but assuming that in those cases where they are ncomplete for 1911 (the latest year given) they are the same as those given for the previous year, we find that since 1907 here has been an almost continuous decline. Thus, cattle are down from 7,193,386 to 6,548,083, sheep from 2,771,447 o 2,493,163 and pigs from 3,381,510 to 3,297,938.

Similar Tendency in Minerals.

Not only is agriculture in Canada declining in all its branches, but a similar tendency is found in the production of metals and minerals. The production of gold in 1911, compared with 1910, declined by 20,000 ounces; silver, 130,000 ounces; iron ore, 44,000 tons; and coal, 1,400,000 tons, against which there was an increase of 70 tons of copper.

We may well ask: What are all Canada's new inhabiants, of whom we hear so much, doing? They are not producing wealth in proportion to their numbers, that is clear. But they are consuming wealth, and that as fast as we are oolishly exporting it, in the form of loans, from this side.

That there is great prosperity in Canada at present no one would attempt to deny. But it is prosperity based on he issue of an almost unlimited number of promissory notes, nd cannot last. In truth, promissory notes now figure as Canada's principal export commodity.

Exceptionally Severe Winter.

Dr. Archibald Blue, chief officer of the census and staistics office, in commenting on the above letter, states:—

"In 1912, for the first time since the crop estimates of he Dominion government began to be collected in 1908, the otal area under field crops shows some diminution as compared with the previous year. In 1912 the estimated area under field crops was 32,449,000 acres, and in 1911 it was 2,853,000 acres, the decrease being thus 404,000 acres. Of his decrease not less than 326,000 acres was in respect of all wheat winter-killed by the exceptionally severe winter of 911-12. The remaining net decrease of 78,000 acres may be ccounted for by the disastrously wet and cold weather which prevailed throughout the greater part of Canada during the owing season last spring. Thousands of farmers were unble to sow wheat at all, and had either to sow late crops or let their land lie fallow.

"In the three Northwest provinces the acreage under ats was increased by 351,000 and of barley by 48,000, while he wheat acreage was less by nearly 340,000 acres.

"Owing to the special circumstances of weather and the onsequent difficulties of grain growing, I think it probable hat in 1912 a larger proportion of the area than usual was ut into summer fallow, and if this was so the returns of creage sown in the ensuing season should show a correponding expansion.

"Anyway, it is certain that the decrease to which the orrespondent of the London Economist calls attention is ttributable entirely to the abnormal character of the season f 1912, and not to any other set-back in the development of he Northwest or of other areas of Canada.

"As was pointed out in the Census and Statistics Monthly for December last, the average prices for most of the crops were less last year than in 1911, and this, with the other factors, accounts for the diminution in total value."

With regard to the statistics dealing with minerals the total value of the mineral production in Canada in 1912 was $133,127,489, according to the preliminary statistics, which are based upon direct returns from mine and smelter operators, but subject to revision, prepared by Mr. J. McLeish, chief of the division of mineral resources and statistics. Compared with the previous year this production shows an increase of $29,906,495, or nearly 29 per cent.

The mineral output in 1911, however, was somewhat restricted owing to long extended labor disputes and the largest previous production was in 1910, compared with which that of 1912 shows an increase of $26,243,866, or over 24 per cent. The per capita production in 1910 was $14.93, and this has increased in 1912 to over $18. This record is a gratifying indication or confirmation of the fact that the Canadian mineral industry in 1912 has had by far the most successful year in its history.

RAILWAY CONSTRUCTION AT NEW WESTMINSTER

British Columbia Electric Railway Improvements—Lulu Island Branch—Elevator Facilities

(Special correspondence.)

New Westminster, B.C., March 25.

The British Columbia Electric Railway Company will spend nearly $200,000 in New Westminster this year. The new freight yards between Fourteenth and Sixteenth Streets, which will have a storage capacity for four hundred and fifty freight cars, will take $100,000, while $50,000 have been appropriated to new car barns. These barns, it is believed, will be the largest in Canada and will be capable of housing nearly fifty interurban cars. The clearing of the site is nearly completed and building will start shortly.

In addition to these improvements the company will double track the line along Columbia Street from Leopold Place to Brunette Street. Surveys are being taken between New Westminster and Port Moody for locating the line which the company intends to build in the near future. Other lines planned are one from New Westminster to Port Mann and another from New Westminster to the Delta.

Canadian Northern Busy.

Work is in full swing on the Lulu Island branch of the Canadian Northern Railway running from the west boundary of New Westminster to Steveston at the mouth of the Fraser. The contracts, sub-contracts and station contracts are now being let and the grade will be completed by the beginning of June.

Mr. T. H. White, chief engineer of the railway, visited the eastern terminal at Steveston and Woodward's Landing the other day to choose a site for the terminal ferry wharves. The company also has plans for several miles of freight tracks which there is good authority for stating will probably be used in connection with terminal elevators. Within about three months tenders will be called for the portion of the line running parallel to New Westminster's waterfront, where it is believed over a mile of double track overhead steel work will have to be built.

A second elevator was opened in the city the other day by the Grain Growers' British Columbia Agency. This elevator is situated on the Canadian Pacific Railway and British Columbia Electric Railway tracks in the west end of the city and has a capacity of 25,000 bushels and an additional storage of 500 tons. The other licensed grain elevator has been operated by the Brackman-Ker Milling Company for fifteen years on Front Street. The same company also operates a grist and rolled oats mill.—K.M.

◆

NEW TRUST COMPANY

At the annual meeting of the People's Loan and Savings Corporation the directors reported having made application to parliament for a charter for a trust company, to be known as "The Premier Trust Company," and to be operated in connection with the corporation. This action was approved and authority given to take a controlling interest in the proposed company.

◆

The Grand Trunk Railway Company reports that during February it received on outstanding orders 428 box cars from the Pressed Steel Car Company, twenty-five box cars from the Canadian Car and Foundry Company; twenty-four Pacific type locomotives from the Montreal Locomotive Works; nine switch engines from the Canadian Locomotive Company; seventeen Mikado locomotives from the American Locomotive Company, and four refrigerator cars from the Canadian Car and Foundry Company.

RAILWAYS REQUIRED THIRTEEN MILLION TIES

Eighteen Kinds of Wood Used—Steam Roads Took Ninety-five Per Cent. of Total

There were 13,683,700 cross-ties purchased in Canada in 1911. This is an increase of 4,469,808, or 48.5 per cent., over the figures for 1910. The increase is due largely to railway construction, which was specially noticeable in the Western provinces on the new transcontinental lines. The replacement of ties on existing lines amounted to about 10,000,000.

There were in all eighteen kinds of wood reported for cross-ties in 1911. Red pine, Western cedar, birch, maple, beech, poplar, Southern pine, elm and black ash were reported and classified separately for the first time.

Jack pine replaced cedar at the head of the list and formed about 40 per cent. of the total. The quality of available jack pine and its wide distribution were probably responsible for its popularity. Tamarack moved up from fifth to second place and formed over 19 per cent. of the total.

Eastern Cedar is Practically Exhausted.

Douglas fir increased from 9 per cent. in 1910 to 14 per cent. in 1911 and moved up from fourth to third on the list. Hemlock fell back and formed only 12 per cent. The new railway lines are building north of the northern range of this species. Spruce increased from 2.5 to 6.6 per cent. on account of the same activity of railway building in the northern regions of the country.

Cedar took an abrupt fall from first place on the list in 1910 to sixth in 1911. Practically all the cedar reported is Eastern cedar, as the Western species is too soft for satisfactory use for cross-ties. The supply of Eastern cedar of either tie or pole size is practically exhausted. These six species together form 97 per cent. of the total. The others in the list are used in small quantities only, and for particular uses.

The average price of ties in 1911 was 39 cents, one cent more than in 1910. Of the species used in quantity, oak ties at 81 cents were the most expensive, and spruce ties were the cheapest at 26 cents. Spruce, hemlock and cedar all show a decrease in average price while jack pine, tamarack, Douglas fir and oak all show an increase. The prices of other woods are not comparable as they are purchased in such small quantities.

Sawn Tie Growing in Favor.

About 63 per cent. of the ties purchased in 1911 were hewn. In 1910 about 70 per cent. were hewn, so the sawn tie is evidently increasing in favor, states a recent bulletin of the forestry branch compiled by Mr. R. G. Lewis, B.Sc.F. Douglas fir ties were 94 per cent. manufactured in this way. Oak chestnut and Southern pine ties were more than 50 per cent. sawn.

Jack pine, tamarack, hemlock and spruce were mostly hewn, while cedar ties were about half and half. All the poplar and red pine ties were hewn.

Sawn ties cost on the average 41 cents, or 4 cents more than hewn ties, while in 1910 the hewn ties were the more expensive by three cents.

The ties purchased by electric roads were 81 per cent. sawn as opposed to 35 per cent. in the case of steam railways.

In 1910 the electric roads used only 38.6 per cent. of their ties sawn and 61.4 hewn, so with these companies as well as with the steam railways the sawn tie increased in popularity.

Of the sawn ties Southern pine ties were the most expensive at $1.11, with oak next at 82 cents. The cheapest sawn ties were of birch, beech and maple at 23 cents. Of the hewn ties chestnut were the most expensive at 58 cents and birch, maple and beech the cheapest at 20 cents.

Percentage Used by Railways.

Steam railways in 1911 used 95 per cent. of all the ties purchased. They purchased, in 1911, 13,094,528 ties—an increase of 4,185,106, or 47 per cent. over 1910. This increase is due, as stated above, to the construction of the new transcontinental railways. They used all the ties made from Western tamarack, Larix occidentalis, Western cedar, Thuja plicata, birch, maple, beech, poplar, Southern pine, elm and black ash.

Electric railways used only 5 per cent. of the total number of ties purchased in 1911.

Used by Electric Railways.

The electric railways' total of 589,242 is an increase of 95 per cent. over 1910. This increase is greatest with Douglas fir, the use of which has increased over sixfold from 1910 to 1911, on account of the exclusive use of this material by some of the larger companies in Western Canada. Douglas fir was not used for ties by any of the electric railways of Eastern Canada. Fir ties formed over half of the total number purchased; this species replaced cedar at the head o the list. The cost of 20 cents is below the average for al kinds of wood.

Cedar ties, which had hitherto headed the list, fell back to second place with 28 per cent., and these ties increased in price from 37 to 41 cents, a price above the general average, demonstrating the increasing scarcity of this material.

Tamarack shows an increase in number but a reduction in price. Tamarack is found in small isolated stands and its prices and quantities vary with the accessibility of the material to the railway line.

The average price of 29 cents per tie in all species used by electric railways is a reduction of 12 cents from 1910 and is due to the great reduction in the cost of Douglas fir ties which form over half of the total. Electric railways go their ties 10 cents cheaper than steam railways. No red o white pine ties were used by electric railways in 1911.

◆

VALUE OF LIFE INSURANCE

V.

How to Redeem Debentures

By C. A. Hastings.

Every business man knows, that if he is able to borrow prudently, it is a simple matter for him to turn it to useful account. There is an old adage, "Neither a borrower nor a lender be," but it is considered, in a commercial sense, sound business when a house of strong repute employs borrowed money. How an insurance office of standing can assist to reduce the cost of borrowing to a minimum will prove interesting to a large number of persons.

The strongest houses cannot hope to borrow—whatever the security—on better terms than the great powers of the world. In Canada 5½ per cent. would be considered at the present time a low rate, and only houses in a very strong position would be able to obtain such a rate; even then, the security offered must be abundant. Although life offices los no opportunity for the employment of their funds, their firs concern is safety rather than enormous returns—I refer to reputable offices.

Sinking Fund Policies.

I will take, for example, a business that could be improved with additional capital. There is a new issue o stock, and if the concern is earning 10 per cent. on th capital it employs and is able to borrow money at 5½ per cent. on this fresh issue of stock, the difference is a mean whereby the loan can be depleted, without taking a cent ou of the business; and this is being done by some public companies to-day.

The procedure is as follows: Apply for a Sinking Fund policy which matures when the loan falls due for payment and if a good office is approached, it can be shown that th premiums will rapidly earn interest—and good interest—so that the net cost by this means works out at a low figure. It is usually the case that borrowed money earns much mor than it costs, so that the difference between the net cost o the loan and the assets created, plus the profits earned b means of the loan, is bound to become a very important item in the revenue account.

An Every Day Asset.

Many houses prefer nowadays to trust to future borrowing, or to provide a sinking fund of their own—which is an impossibility in proportion to the risk and the loan—to redeem debentures falling due.

Since the South African war, borrowers have found tha money costs more, owing to the condition of trade all ove the world, but, the house that is fortunate enough to posses a sinking fund policy, has not got to worry about the condition of the money market, nor the revolutions of trade; thei policy, moreover, is cheap, because the assurance compan endures no danger of loss; it is also safe, because a first class life office is the soundest institution in the world, a last, but not least, the policy is an every day asset, becau it always can command a cash value.

The following articles in this series have already appeared.

(1) March 1st.—How to become one's own master.
(2) March 8th.—How depreciation of assets can be me
(3) March 15th.—How to borrow at a profit.

ARGE PERCENTAGE OF THESE FIRES WERE PREVENTABLE

Causes of Twenty-five Thousand Conflagrations Analyzed—Need of Building Laws

The Texas state insurance board in a review of 25,000 eports of fire losses filed with it since December 10, 1910, gives the following summary as to causes.

The following are the causes of fires in dwellings, apartnent houses, boarding houses and private outhouses:

Cause.	Number.	Per cent.
*Flues	1,865	16.6
†Exposures	1,771	16.0
†Conflagrations	185	1.6
†Unknown	1,912	17.0
*Stoves and heating	1,100	10.0
Sparks on roof	547	5.0
*Kerosene lamps	479	4.2
*Curtains gas	397	3.6
Electric wiring	354	3.1
*Ashes, candles, carelessness	437	4.0
*Parlor matches	423	3.9
*Gasoline and volatiles	379	3.3
*Kerosene stoves	186	1.7
Incendiary	281	2.5
*Fireworks	45	.4
Lightning	407	3.6
*Burning grass and rubbish	117	1.0
*Spontaneous combustion	85	.7
*Cigars and cigarettes	119	1.0
*Electric appliances	95	.7
*Incubators and brooders	4	.1
Total	11,188	100.0
*Preventable fires	9,297	83.1

†Same per cent. of preventable fires as for known causes.

ll Other Classes.

The following are causes of fires in all other classes except cotton gins and automobiles (which classes burn from nherent hazards):

Cause.	Number.	Per cent.
†Exposures	3,780	29.0
†Conflagrations	577	4.3
†Unknown	3,421	26.0
Incendiary	507	4.0
*Cigars and cigarettes	351	2.6
*Stoves and heating	319	2.4
*Flues	330	2.5
*Electric wiring	571	4.3
*Gasoline and volatiles	459	3.4
*Kerosene	113	.8
*Fireworks	40	.3
Sparks on roof	162	1.2
*Spontaneous combustion	236	2.0
*Parlor matches	340	2.5
*Curtains—gas	132	1.0
*Lights (miscellaneous)	197	1.4
*Burning grass and rubbish	55	.4
*Rubbish	145	1.1
*Ashes and coals	29	.2
*Electric appliances	135	1.0
Lightning	230	2.0
Machinery	156	1.1
Boilers	59	.4
Slab pits, shaving vaults	37	.2
*Fuel, oil	12	.1
Dry kilns	15	.1
Cotton fires	740	5.6
Dust explosions	2	.1
Total	13,150	100.0
*Preventable fires	9,905	75.4

†Same per cent. of preventable fires as for known causes.

eed of Adequate Building Law.

The board in discussing the above says:—

"The need of an adequate building law applicable to all arts of the State is evidenced by the number of preventable res reported to the board, and particularly by the large perentages of losses directly traceable to defective flues, stoves nd heating, sparks on roof, and other causes, the result of nterior or combustible construction.

"The above extract from the annual report of this office led with the Commissioner of Insurance for the fiscal year nding August 31st, 1912, is substantially verified by the gures contained in the foregoing tables.

"Fully 35 per cent. of all fires that occur in this State are preventable, and it will be noted in the data herein presented that more than 18 per cent. of all fires charged to the dwelling class alone, from known causes, are the result of defective flues. The unsafe installation of stoves and other heating devices in that class of risks is responsible for 11 per cent. of losses, while sparks on roof produced more than 5 per cent. of dwelling fires. The ever present menace of the shingle roof is in evidence on every hand, and particularly is it noticeable in almost every cause shown carrying a heavy percentage of losses. It will be noted that gasoline and other volatile fires are entered with a loss ratio in all classes entirely out of keeping with conditions as they should be, due almost entirely to improper storage and careless handling of those products.

"Every city, town and village in Texas should enact and enforce rigid building laws, and ordinances governing the handling and storage of all volatiles and explosives."

◆

CANADIAN VENEZUELAN ORE COMPANY

Organized and Controlled in Canada—Properties and Estimates

Monetary Times Office,
Montreal, March 27th.

The Canadian Venezuelan Ore Company, Limited, has been attracting attention in financial and iron and steel circles. This is the concern in connection with which Mr. Frank P. Jones, general manager of the Canada Cement Company, Limited, has made several visits to Venezuela, and the organization of which has now been completed. Recently, also, the stock sold on the unlisted department of the Montreal Stock Exchange at $36 per share, but whether or not this price is any sure indication of value is not known, the trading not having reached any volume.

The company was organized in Canada and is controlled here. Mr. Jones is president and Sir William Van Horne vice-president, and on the board are Messrs. H. S. Holt, of the Montreal Light, Heat and Power Company; G. M. Bosworth, of the Canadian Pacific Railway; A. R. Doble, of the Royal Securities Corporation, all of Montreal; Sir Max Aitken, of London; G. F. Pearson, of Halifax, and Hon. J. D. Patterson, of Brantford. The capitalization of the company is as follows:—

	Authorized.	Issued.
Common stock	$4,500,000	$4,347,500
Preferred stock	500,000	....
Bonds	1,000,000	1,000,000

Hematite of High Grade.

The mines of the company are situated at Imataca, Venezuela, a few miles up the mouth of the Orinoco River, the area owned by the company amounting to 6,300 acres. The ore is high-grade hematite iron ore of Bessemer quality, and active operations for mining are under way. Shipments already made to the United States have given satisfactory results. A somewhat unusual feature of the ownership of the areas and the royalties is the fact that the royalties start off at a higher rate than is paid later, the sum being 20 cents per ton until a total of $385,000 has been paid to government, after which the royalty is reduced to 10 cents. The engineers of the company estimate that a considerable quantity of the ore can be mined above water level, and the drilling and testing done by the engineers also demonstrate that an unlimited amount of ore is available below water level.

Financing and Estimates.

The company has recently sold $1,000,000 of its 6 per cent. bonds. These may be called for redemption on any interest date at 105 and interest. A feature of the stock issue is that no dividends can be paid till the bond issue of $1,000,000 is redeemed or until the company shall deposit with the trustee a sum, which compounded annually at 4 per cent., shall be sufficient to redeem the bonds at maturity. Also, no further bonds may be issued save upon a resolution of the bondholders.

It is estimated that, on the basis of the sales already made, the company can obtain a profit of $1 per ton on all the ore mined. This, on an output of 600,000 tons mined per annum, would give a profit, it is claimed, of 12 per cent. on the company's common stock. Steamers carrying loads of 5,000 tons can make the round trip between the mines and Philadelphia, in about 24 days, so that it will require about 10 steamers to transport the 600,000 tons. Already a contract has been entered into with a large Pennsylvania concern for the delivery of 500,000 tons covering a period of five years. Other deliveries have been made to various manufacturers in the United States, and the product has given every satisfaction.

NEW COMPANIES AND THEIR CAPITALIZATION

Mining Corporation is Largest to Receive Incorporation This Week—West Contributes its Share

Companies are being incorporated in Canada at the rate of one hundred per week. The capitalization of those receiving charters this week amounts to $29,068,000.

The largest companies are:—

Company.	Capital.
Canadian Klondyke Mining Company, Windsor...	$8,000,000
Sovereign Cotton Mills, Toronto	6,000,000
Pleindor Porcupine Mines, Toronto	1,500,000
Canadian Rogers Company, Toronto	1,000,000
John Inglis Company, Toronto	1,000,000
Fiscal Corporation of Canada, Saskatoon.........	1,000,000

Grouping the new concerns according to provinces in which the head offices are situated we have the following results:—

Province.	No. of Companies.	Capitalization.
Quebec	23	$2,455,000
Ontario	21	19,155,000
Saskatchewan	20	3,683,000
British Columbia	19	1,960,000
Manitoba	17	1,815,000
Total	100	$29,068,000

The following is a list of charters granted during the past week in Canada. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Wilkie, Sask.—Grain Lands, $250,000.

Indian Head, Sask.—Head Investors, $250,000.

Vernon, B.C.—Shuswap Cattle Company, $90,000.

Kamloops, B.C.—Sage Creek Oil Company, $250,000.

Maple Creek, Sask.—T. A. Drury Company, $250,000.

Yale County, B.C.—Mount Olie Power Company, $10,000.

New Westminster, B.C.—Chee Kong Tong Company, $25,000.

Mirror Lake, B.C.—Mirror Lake Electric Light Company, $10,000.

Regina, Sask.—Albert Improvement Company, $500,000. Regina Ball Club, $20,000.

Hull, Que.—M. Carriere, $20,000, (drygoods). J. E. Gravelle, D. Dumontier, M. Carriere.

Windsor Mills, Que.—Les Terrains du Plateau, $35,000. J. A. Guimont, A. C. D. Smart, L. Bureau.

Simcoe, Ont.—Simcoe Lithographing Company, $100,000. W. Lees, T. Hobson, O. D. Peat, Hamilton.

Hamilton, Ont.—Central Properties, $40,000. T. M. Chambers, H. C. Constable, G. R. Haslewood.

Palmerston, Ont.—Taylor Scott and Company, $200,000, (timber). C. E. Perry, J. G. Schaefer, R. J. Knowles.

Thorold, Ont.—Davy Pulp and Paper Company. $50,000 G. H. Sedgwick, A. G. Ross, E. V. Macmillan, Toronto.

Midland, Ont.—W. E. Preston, $250,000, (general merchandise). W. E. Preston, T. A. Sharp, J. W. Preston.

Brandon, Man.—Moose Creek Farming Company, $450,000. Hon. H. A. Armstrong, W. J. Lindsay, S. A. Bedford.

St. Boniface, Man.—Norwood Masonic Holding Company, $5,000. H. M. Sutherland, A. E. Godsmark, C. E. Bowmaker.

Victoria, B.C.—Shrine Temple Association, $75,000. Victoria Development Company, $250,000. Victoria Liquor Company, $50,000.

Windsor, Ont.—Canadian Klondyke Mining Company, $8,000,000. J. W. Boyle, Dawson City; A. R. Bartlet, A. Braid, Windsor.

Prince Albert, Sask.—Crescent Creamery Company, $10,000. Prince Albert Development Corporation, $750,000. Owners' Garage Company, $20,000.

London, Ont.—T. H. Baker and Company, $300,000, (jewellery). T. H. Baker, R. W. Glover, C. O'Hara. Wright Company, $40,000, (hats). J. H. McDonald, L. C. Jarvis, J. A. Kent.

Quebec, Que.—Donnacona Improvement Company, $50,000. R. P. Kernan, L. A. Cannon, G. Parent. C. Emile Morissette, $100,000, (builders). C. E. Morissette, C. T. Morissette, A. Mercier.

Moose Jaw, Sask.—Mason Heating and Plumbing Company, $30,000. Model Bread Company, $75,000. Clover Hill, $60,000. Kingsway Park Development Company, $26,000. Tripure Water Company, $2,000.

Saskatoon, Sask.—D. Campbell Company, $200,000. Dominion Agencies of Canada, $20,000. Standard Auto and Supply Company, $50,000. Elliott Drug Company, $20,000. Fiscal Corporation of Canada, $1,000,000. Baldwin Hotel Company, $75,000. Potter's, $75,000.

Ottawa.—J. G. Butterworth and Company, $150,000, (coal). J. G. B. Butterworth, J. G. H. Butterworth, W. T. Bush. Ottawa Tripure Water Company, $15,000. J. C. Mitchell, J. McKnight, T. B. Beaumont, Toronto. Owl Club. E. W. [illegible], W. Thomas, D. E. Allen.

Vancouver, B.C.—Anthony's, $250,000, (real estate). Anthony-Ferguson, $50,000, (commission merchant). Sanitary Laundry and Linen Supply Company, $500,000. Railway Townsites, $40,000. Vancouver Opera House, $100,000. Dimock Rating and Mercantile Agency, $50,000. Western Press, $20,000. Whonnock Brick and Tile Company, $50,000. Budd Olmstead Company, $50,000. Davies Paper Box Company, $40,000. Northern Dredging Company, $50,000.

Toronto.—Canadian Rogers Company, $1,000,000, (cutlery). A. J. Thomson, R. H. Parmenter, W. S. Morlock. Sovereign Cotton Mills, $6,000,000. J. S. Lovell, C. D. Magee, W. Bain. John Inglis Company, $1,000,000. E. A. J. Case, J. B. Taylor, C. G. Lynch. Capital Investments, $100,000. C. H. Kemp, J. Singer, A. Singer. F. W. Thorold Company, $40,000, (engineering supplies). R. Gowans, J. J. Dashwood, W. G. Flood. Pleindor Porcupine Mines, $1,500,000. J. E. Day, J. M. Ferguson, S. C. Arrell. Ontario Preserving Company, $40,000. R. Laing, Winnipeg; J. E. Day, J. M. Ferguson, Toronto. Ads, Limited, $40,000. D. Urquhart, H. W. Page, C. B. Scott. Pioneer Land and Building Company, $250,000. H. J. Mansell, C. R. Lavoie, E. Worsley. Superior Investments, $40,000. H. R. Morwood, E. R. Beatty, Welland; L. P. Wilson, Toronto.

Winnipeg, Man.—Grosvenor Investments Company, $100,000. J. S. Menzies, J. E. Adamson, C. A. Adamson. Houston and Company, $20,000, (machinery). W. M. Houston, C. B. Handcock, R. O. Berwick. Westrumite Asphalt Paving Company, $250,000. M. Anderson, W. F. Guild, G. S. Haig. Acme Grain Company, $50,000. A. Cavanagh, C. L. Simmonds, J. W. Thompson. Eastern and Pacific Land Company, $500,000. C. W. Chappell, A. P. Scott, W. L. Bell. Inland Investment Company, $100,000. F. B. Hugg, J. B. Hugg, H. G. Gunn. United Canadian Investment Company, $50,000. H. R. Hollingshead, R. A. Talbot, H. Meckling. Interprovincial Realties, $40,000. W. H. Turnbull, G. D. MacVicar, S. R. Flanders. Hyland and Galloway, $50,000, (builders), J. F. Hyland, J. Galloway, F. R. Sproule. St. John Cabinet and Supply Company, $25,000. T. Willoughby, A. J. Kelso, J. Willoughby. Souris Realty Company, $20,000. G. F. Loree, J. B. Hugg, H. Edwards. Fort Garry Construction Company, $50,000. D. D. Wood, A. J. Wills, J. Fraser. Western Canada Time Table Distributing Company, $5,000. W. J. Quinlan, J. F. McGuire, A. G. Richardson. Winnipeg Central Investments, $100,000. R. A. Duff, J. W. Woolfe, R. E. Atkinson. Sheffield Cutlery Agencies, $5,000. G. G. G. Milne, A. E. Bingham, W. G. Cranwill.

Montreal, Que.—D'Allaird, Rettie, $75,000, (dry goods). W. Rettie, F. G. Bush, G. R. Drennan. A. A. Ayer Company, $750,000, (produce). A. A. Ayer, A. J. Ayer, A. A. McKergow. Wedgewood Park Company, $100,000. E. N. Hebert, E. R. Decary, J. C. Barlow. Canadian Tabulating Machine Company, $50,000. F. G. Bush, G. R. Drennan, H. W. Jackson. B. Silver and Company, $75,000. B. Silver, L. P. Silver, H. Weinfield. Anderson and Delaney Contracting Company, $20,000. J. H. Anderson, T. L. Delaney, H. J. Trihey. North American Steel Corporation, $100,000. A. H. Elder, P. F. Brown, S. T. Mains. LeMay, $150,000, (manufacturers' agents). L. LeMay, E. Duquette, A. Duquette. A. F. Byers and Company, $100,000, (contractors). R. T. Heneker, W. S. Johnson, E. J. Waterston. Bogue Brothers and Henry, $50,000, (paper materials). D. D. Bogue, Montreal; M. A. Phelan, Westmount; W. B. Bogue, Toronto. Canadian Drednot Motor Trucks, $250,000. H. S. Ross, J. S. Rigby, O. F. Shearer. Swedish Canadian Steel Company, $50,000. J. J. Creelman, G. S. Stairs, J. B. Henderson. Childlow Patent Process Company, $60,000. F. G. Bush, G. R. Drennan, M. J. O'Brien. North Company, $100,000, (building contractors). B. J. Clergue, T. L. Van Norden, L. J. Mouton. Financial Investment Company, $100,000. A. H. Elder, P. F. Brown, W. R. Ford. Gray and Wighton, $100,000, (builders). J. Gray, H. Wighton, H. U. P. Aylmer. Richard Realty Company, $50,000. E. Gadbois, J. E. Bernard, G. Derome. Co-operative Investment Company, $50,000. M Greenblatt, U. Lemay, P. Campaux. River Sights, $20,000. E. W. Tobin, R. Prefontaine, E. Prevost.

The Providence Washington Insurance Company has been licensed to transact throughout Canada the business of automobile, in addition to fire insurance, for which it is already licensed. The company's chief agents are Messrs Robert Hampson & Sons, Limited, Montreal.

NITED STATES STEEL COMPANY IN CANADA

hairman Gary Tells of Canadian Plans -Company's Results Last Year

The first official announcement respecting the United ates Steel Company's plans in Canada, were made at a rectors' meeting in New York last week by Chairman E. H. arry. "In order to meet in a more satisfactory manner the owing demands of the Canadian trade for the products of e subsidiary companies," he said, "it has been decided to tablish a manufacturing plant in Canada at the site which e corporation secured some years ago at Ojibway, Ont., posite the city of Detroit, Mich. The site consists of about 500 acres, with a frontage of about a mile and a half on the etroit River. The plans for and the scope of the construc- on of the plant have not yet been fully developed, but will obably include blast furnaces, open-hearth steel works, rail ill, wire mill, structural and bar mills; and perhaps some her mills. It is expected the cost of the plant will, in part, financed by an issue of bonds."

gures of Production.

The production of the United States Steel Corporation 1912, including the Tennessee Coal, Iron and Railway mpany, compares with previous years as follows (in ns):—

	1912.	1911.	1910.
on ore	20,428,449	19,933,631	25,245,810
oke manufacturing	16,719,387	12,120,212	13,049,578

Number blast furnaces	125	125	......

---

*Decrease.

The exports of the United States Steel Corporation in 1912 amounted to 2,280,796 tons, compared with 1,746,492 tons in 1911.

◆

BUILDING MATERIAL IN WESTERN CANADA

Rocks Are of Soft Character—Clays, Shales, etc.— Cement Plants in Operation

With the exception of British Columbia, there is very little building stone produced in Western Canada. This is due to two causes. First, the rocks which underlie the developed portions of the prairie provinces are of comparatively recent age, and are consequently soft in character and weather rapidly; second, there are very few rock exposures in the settled portions of these provinces except in the Rocky Mountains and the foothills.

In British Columbia there are large potential resources of building stone. They have, however, been developed only in certain localities on the Pacific Coast, and have been confined to cretaceous sandstone and certain volcanic rocks, situated on Vancouver Island and adjacent islands. Varieties of marble are also quarried on Texada Island.

Building Stones and Clays.

While the prairie provinces have not been proved to contain building stone in great quantity, states Conservation, they possess large deposits of lime-rock shales and clay suitable for the manufacture of cement; also large deposits of clay and shale suitable for the manufacture of brick of various kinds, tiles, sewer pipe, etc.

The region bordered on the east by the great plains, and on the west by the coast range, does not, so far as known, contain extensive clay resources. Shales also are rare, because, in most instances, the deposits of argillaceous material have been altered to slaty rock or schists.

Exploration in the Pacific Coast region has, thus far, disclosed only a limited extent of clay resources, but important shale deposits are found at Sumas Mountain, southeast of Vancouver. Surface clays are more extensive than the shale deposits, and a number of these clays are found in the vicinity of Vancouver, Victoria, and on several of the islands in the strait of Georgia

Cement Plants and Raw Material.

The cement plants in operation in Western Canada are situated at: Babcock, Man.; Winnipeg, Man. (under construction); Calgary, Alta.; Exshaw, Alta.; Blairmore, Alta. (one operating and one under construction); west of Edmonton, Alta., one under construction; Todd Inlet, British Columbia (one operating and one under construction).

During the summer of 1911, owing to a shortage in the supply of cement in Western Canada, the duty upon cement was reduced by 50 per cent. for a period of six months.

In the above list there are four new plants described as under construction, but all expect to be in operation this spring. The Rocky Mountains undoubtedly contain enormous deposits of raw material similar to that used at Blairmore and Exshaw, which will be developed as the demand increases.

◆

BRITISH SHAREHOLDERS OF UNION LIFE FORM COMMITTEE

At a meeting of British shareholders of the Union Life Assurance Company, held at the General Buildings, Aldwych, London, W.C., at which Mr. Newdigate presided, it was resolved to appoint a committee of seven, all of them to be shareholders, with the exception of Mr A. M. de Beck, to look after the British shareholders' interests. The following gentlemen constitute the committee: Messrs. de Beck, C. E. Lucas, W. D. Stanton, R. A. Fairclough, R. J. Foster, Newdigate and Flowers.

The Merchants and Employers Guarantee and Accident Company has received a license authorizing it to transact in Quebec province the business of accident and sickness insurance. Mr. J. George Dubeau, Montreal, has been appointed chief agent.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Laurentide Company.—The Laurentide Company is establishing a New York office to care for its paper business in the United States. Mr. J. F. Patton will be in charge, and a special traffic department in the Montreal office with an experienced transportation expert in charge.

Canadian Locomotive Company.—The Canadian Locomotive Company, of Kingston, has received an order from the Dominion Government to construct 15 locomotives, ten of consolidated type and five switching.

Twin City Rapid Transit Company.—The earnings of the Twin City Rapid Transit Company for the month of February amounted to $140,968.14, as compared with $132,707.15 for the corresponding month last year.

Sawyer-Massey Company.—Mr. Robert Harmer, president of the Sawyer-Massey Company, has stated:—"We have just received a nice-sized order from the Argentine Republic for a number of our threshers. This is the first order of the kind that ever reached Canada for export."

Goodwins, Limited.—The financial statement of Goodwin's, Limited, it is understood, will show about $165,000 after bond interest, and $77,500 after preferred dividends, being equal to 4.42 per cent. on the outstanding common stock of $1,750,000. The surplus available on the preferred is equal to over 13 per cent.

The Porto Rico Railways Company, Limited.—The comparative statement of earnings for February, is as follows:—

	1912.	1913.	Increase.	%
Gross	$71,842.83	$73,469.87	$1,627.04	2.26
Net	34,040.26	34,871.46	831.20	2.44

British Columbia Packers' Association.—At the annual meeting of the shareholders of the British Columbia Packers' Association, held in Vancouver, Sir Henry M. Pellatt was elected to the Board of Directors. The rest of the board was re-elected. W. H. Barker to be president, and Æmilius Jarvis as vice-president. Proceedings at the meeting were purely routine.

International Nickel Company.—International Nickel Company's earnings are keeping up satisfactorily. February's showing, while not the largest month on record, was nevertheless the largest February to date, and the fiscal year, which ends with this month, is expected to establish a new high record in point of earnings The previous largest year was that ended March 31st, 1911, when there was balance of $3,240,852. equal to 10½ per cent. on the present $38,000,000 outstanding common stock.

St. Lawrence Brewery.—The annual meeting of St. Lawrence Brewery, Limited, was held at Cornwall. The earnings proved to be satisfactory, notwithstanding the high cost of materials during the past year. The regular seven per cent. dividend was declared and the same board of directors was re-elected for another year, as follows: Mr. P. Shuaufer, president; Mr. J. J. Robson, vice-president; Mr. H. J. Elliott, K.C., treasurer; Mr. Ralph Douglas, secretary and manager; Mr. H. Deschambeault, director.

Nova Scotia Steel Company.—At a meeting of the shareholders of the Nova Scotia Steel Company all the directors were re-elected. The reports of both General Manager Cantley and President Harris were well received, and indicated that the company was enjoying a prosperous season, with a bright outlook for the present year. Reference was made to the establishment of the Eastern Car Company, which by midsummer it was hoped would be turning out finished cars. The plant is to have a capacity of thirty finished cars per day and will be one of the most complete and modernly equipped works on the continent.

British Canadian Canners, Limited.—At the first annual meeting of the British Canadian Canners, Limited, the following retiring directors were re-elected for the ensuing year: Mr. H. A. Lovett, K.C., president; Mr. J. P. Black, vice-president; Sir Henry Bate, Senator Robert Mackay, Mr. John Wall and Mr. G. F. Gyles, directors. The company showed a good cash position, having $15,902 on hand, in addition to which accounts receivable amounted to $61,345, making total current assets of $[illegible]. After paying bond interest the company had a surplus of $[illegible] to carry forward, which is a little over five per cent. on the $750,000 issue of common stock.

Monarch Knitting Company, Limited.—Earnings for the ten and one-half months ending November 30th, 1912, were $198,231.67. After payment of dividends for the portions of the year as arranged at commencement of the company, $50,000 was written off goodwill, contracts and trade marks account, and a balance out of the year's profits was carried forward at credit of profit and loss account of $10[illegible],820.02.

Profits for the ten and one-half months showed an earning rate, after providing for preferred stock dividend, of over 11 per cent. on the common stock for a full year. The business of the company is in a healthy condition and the outlook good.

Canada North-West Land Company.—At the annual meeting of the Canada North-West Land Company Mr. W. D. Matthews was in the chair. When the Canada North-West Land Company was organized in England the amount of land purchased embraced 2,200,000 acres. In 1893 the Canadian company (when it was thought that a directorate on this side the water would be preferable) took over out of that total 1,938,318 acres. There only remained unsold at the end of 1912 a total of 373,165 acres. No land will be now sold at less than $12 an acre, and as high as $35 an acre is being realized. Most of the very select land—that most readily accessible—has been sold, but, despite that fact, better figures are constantly being secured. In 1894 the average price obtained was $5 per acre; last year the average was $14.40 per acre.

Riordon Pulp and Paper Company.—The Riordon Pulp and Paper Company's profits in 1912 were $306,834, an increase of $54,006 or about 25 per cent.

From the profits $30,400 was deducted, also $50,185 for interest paid on bank loans during the early part of the year, the bond issue, which was made last fall, is going to reduce this bank balance. The balance left, being the profits, amounts to $220,249. If the interest on bank loans be not deducted from the profits, the net profits amount to $276,435, which really represents the earnings available for bond interest, which last year's earnings cover three times. When the $1,500,000 issue of 6 per cent. bond was made in October last, the managing director estimated 1912 profits at $300,000.

Canadian Rogers Company, Limited.—"The Canadian Rogers Company, Limited, is the name of the new company which will buy the Canadian good-will, trade marks and designs of the William A. Rogers Company for the purpose of manufacturing and carrying on business in Canada," stated President S. J. Moore at the special meeting of shareholders of the William A Rogers Company, at which the plan submitted by the directors was unanimously adopted. More than two-thirds of the outstanding capital of the company was represented at the meeting The new company, Mr. Moore said, has been incorporated under Dominion charter, with a capital of $500,000 preferred and $500,[illegible] common stock.

Shareholders of William A Rogers, Limited, will be given the exclusive right to subscribe for the preferred stock of the Canadian company, carrying a bonus of 35 per cent. common stock, in the ratio of one share of preferred stock of the new company for every preferred or common share in the parent company held on March 31 next. Subscription lists will close April 10 Payment for new stock will be made in four instalments of $25 each, namely, on application, April 30, May 31 and June 30

Dominion Coal Company.—The Dominion Coal Com- any expect to begin their coal shipments within the next vo weeks, and to provide for the transportation of the mil- ons of tons of coal that will be sent up the St. Lawrence, ie company has provided no less than 22 coal carrying eamers, with a total capacity of 116,150 tons. This is the rgest and most modern and up-to-date fleet yet operated the company.

Besides the 2 boats that will be engaged in the coal ade, two steamers, the Sandefjord, 11,000 tons, and the orstjord, 11,000 tons, will be employed in bringing ore om Wabana to Sydney. SS. Heachcote, 4,000 tons, will as sual be employed in the Marble Mountain limestone trade. addition to these boats the steamers City of Sydney and orwenna will be employed in the freight service between ontreal, Sydney and St. John's, Newfoundland. The total nnage, therefore, which the Dominion Steel Corporation ill possess in addition to the passenger boats, will be 2,250.

Abitibi Pulp and Paper Company.—The Abitibi Pulp d Paper Company have let contracts for the construction their various buildings at Iroquois Falls and also for the achinery which is to go into their plant. The company al- eady have a sawmill in operation at this point cutting up mber, which will be used in the construction of their ills. These are now being pushed to completion as rapid- as possible.

"Our forest engineers, after a careful survey, estimate at there is enough pulpwood on our Abitibi limits to fur- sh us with 60,000 cords of wood a year for ninety years," id Mr. F. H. Anson, head of the Abitibi Pulp and Paper ompany, who are building a large mill at Iroquois Falls Northern Ontario.

"This estimate is based on an average production per re of but eight to ten cords of wood, while as a matter of ct we have large sections of our property on which the eld is considerably more per acre. By careful forestry ethods, we will have, practically speaking, a perpetual sup- y of pulpwood."

Wentzell's, Limited.—At the annual meeting of Went- ll's, Limited, the usual dividend of seven per cent. was eclared upon the preference stock of the company and a oderate surplus was carried forward. The gross profit on ading account for the year was the same as 1911, although e turn-over of the company increased $55,000 to a total of 968,000.

Owing to increased expenses the net profits were some- hat less than 1911 and the management reported that 1912 as a very difficult year in the grocery trade, there being a lling market in staple lines and extremely fine margins all general groceries.

The president stated that the goods were turned over veral times a year and the business was economically anaged under one roof, and yet the net profit was less than per cent. of the turnover. He pointed out that the large umber of shareholders and the small profit rendered the usiness practically a co-operative enterprise. The direct- rs were re-elected, namely, Messrs. Howard W. Wentzell, E. Smith, G. F. Ring, J. J. Penny and John W. Regan. r. Wentzell was elected president, Mr. Smith vice-presi- ent, and Mr. Penny secretary.

Otis Elevator Company.—The Otis Elevator Company as issued its report for the year ended December 31st, 1912. he income account compares as follows:

	1912.	1911.	1910.
Net earnings	$1,282,195	$1,082,116	$1,157,371
id. div.	389,808	385,076	381,100
Balance	†892,387	696,141	776,262
om. divs.	255,012	255,012	255,012
Balance	637,375	441,129	521,250
ns. fund	100,000	......	......
epr., etc.	298,868	331,019	391,124
Surplus	238,507	-110,110	130,125

*After deducting all charges for interest and patent ex- enses and for renewals and repairs for maintenance of plant.

†Equal to 14 per cent. on $6,375,000 common stock be- re charging out current depreciation as compared with 9 per cent. on same stock previous year.

The balance sheet shows a profit and loss surplus $2,470,152.

The president's report says, in part:—The esculator or avelling stairway branch of the business shows a healthy owth, and is gradually gaining in popular favor. The reign business has also substantially increased, confirm- g the judgment of the board in exploiting the elevator siness abroad, and justifying further extension along is line.

During the year 1912 $366,968 have been expended in quiring real estate, erecting additional buildings and uipment. The company's plant at Peru has been sold, and the work previously done there has been transferred to the factory at Quincy, Illinois, where further extensions of the plant are contemplated during the year 1913.

Canadian Westinghouse Company.—The strong financial position of the Canadian Westinghouse Company, Limited, was emphasized at the annual meeting when the statement showed net earnings for the year of $1,050,123.

The management reported every evidence of continued prosperity.

For the year's profits, regular quarterly dividends at the rate of seven per cent. per annum, and a bonus dividend of two per cent. (making a total for the year of nine per cent.), have been paid, amounting to $399,762.97.

Fifty thousand dollars have been added to the reserve for insurance fund purposes, which reserve now totals $100,000.

The sum of $348,505.96 has been written off property and plant against items included in that account, consisting of factory equipment and manufacturing appliances of more or less depreciating nature, and also against items not immediately productive from a manufacturing standpoint.

The remaining balance, amounting to $251,754.64, has been carried forward to the credit of profit and loss account, which shows, as of December 31st, 1912, a total unapportioned surplus of $1,302,599.37.

The directors and officers of the company were all re-elected.

◆

CORPORATION FINANCING

An offer is shortly to be made of £527,500 sterling Algoma Central Terminals 5 per cent. first mortgage gold bonds at about 96. The bonds are to be guaranteed as to principal and interest by the Lake Superior Corporation.

There is no word of a public issue of a Mackenzie loan, states Windermere in a cable to the Montreal Star, yet possibly he may be arranging it privately.

The directors of the Toronto General Trusts Corporation have decided to make a further issue of £250,000 capital stock at 185. This will bring the total paid-up capital of the company up to $1,500,000. The last allotment of $250,000 was made on June 5th last.

The new stock will be offered to shareholders of April 15th in the proportion of one new share for every five now held. New stock will be paid for in four instalments as follows: Fifty dollars on May 15th, $50 on July 15th, $50 on September 15th, and $35 on November 15th. The stock sold yesterday ex-dividend at 192½.

An additional $500,000 Steel Company of Canada bonds has been listed on the Montreal exchange. The Calgary Power Company's securities were also called on the exchange.

Messrs. A. P. Cameron & Company, Winnipeg, are offering for private subscription 2,500 shares of the Stanley Mineral Springs and Brewing Company, Limited, at $60 per share. The issue will provide working capital to meet the growing business of the company. The company's capital is $500,000 6 per cent. bonds and $1,000,000 common stock authorized, with $350,000 bonds and $500,000 stock issued. The prospectus states that the increased demand for the product of the Stanley Mineral Springs Company (the original concern) has made it impossible for the company, with its present plant, to supply the wants of its customers. The officers and directors of the company follow: Messrs. R. J. Mackenzie, John Galt, Hugh Sutherland, John Carroll, D. E. Sprague, F. S. Wiley and James Whalen.

◆

The capital stock of the North Huron Telephone Company, Limited, has been increased from $10,000 to $20,000 by the creation of 1,000 shares of new stock of $10 each.

At the organization meeting of the Ottawa, Rideau Lakes and Kingston Railway Company, held in Ottawa, the following board of directors was elected: Mr. N. M. Clougher, of London, president: Hon. William Dennis, R. H. McElroy, M.P.P., Dr. H. D. Ball, G. L. Dickinson. The company, which is being financed by English capital, expects to build a line from Ottawa to Kingston. Surveys have been completed.

The sale of a large area back of the Montreal mountain by the Canadian Northern Land Company, Limited, to Sir Max Aitken and James E. Wilder, has taken place this week. The total area involved is in the vicinity of 350 acres, and the price was $3,500,000, which would figure out at $10,000 per acre. After the streets have been deducted in the subdivision plan, an area of 9,000,000 feet is left, so that the cost price reported is in the vicinity of 40 cents per square foot. The property is situated on the western slope of Mount Royal, and will be known as Mount Royal Heights.

The Temiskaming and Northern Ontario Commissioners have let the contract for the six miles of road from Iroquois Falls Junction to Iroquois Falls, on the Abitibi River. This is for the purpose of connecting the pulp mills of the Abitibi Pulp and Paper Company with the main line of the Temiskaming and Northern Ontario Railway. It is believed that further extensions will be made during the summer.

SUTHERLAND, SASK.

We wish to call attention in this issue to an offering of Debentures of exceptional value, namely, that of Two Hundred Thousand Dollars at 5% of the Town of Sutherland, Saskatchewan.

Sutherland is an incorporated Town with a population of 1,500 people at a conservative estimate, immediately adjoining the City of Saskatoon to the East. The nearest point of the limits of the Town to the West being about one mile from Saskatoon City Post Office.

Sutherland is, in fact, the Saskatoon Terminal of the Canadian Pacific Railway, on their main line from Winnipeg to Edmonton, Saskatoon to Brandon, Regina and Moose Jaw.

Sutherland is the Head Quarters of the Canadian Pacific Railway for Districts Numbers Two and Three Saskatchewan Division, and is the largest Divisional Point between Winnipeg and Edmonton.

Sutherland has a Canadian Pacific Railway Pay Roll at the the present time of over Fifty Thousand Dollars per month.

There are, including Engineers, Firemen, Conductors, Brakemen, and Shopmen, between 450, and 500 men working in the local Shops and Yards.

Sutherland is the Headquarters of the Building and Bridges, Mechanical, Car, and other Departments of the Canadian Pacific Railway.

Sutherland has twenty-eight miles of Track, shortly to be much increased, a Twenty-Car Stock Yard, Ice House with a capacity of 2,000-ton, Sixteen Stall Round House, Machine Shops and Car Repair Tracks.

Sutherland is only Three-Quarters of a Mile from the Saskatchewan Provincial University and Experimental Farm Buildings, 1,333 Acres of the best of land are absorbed by the above institutions, a great part of which forms the South-West Boundary of the Town. Over Three Million Dollars have been spent to date, on the above Buildings and Grounds, and before they are completed, it is estimated that over Ten Millions will be spent. These institutions are planned for the eventual accommodation of Five Thousand Students. Of great value to Sutherland, is the fact, that the new City Hospital, costing over Three Hundred Thousand Dollars, is being placed on the University campus, bringing this valuable asset also, within Three-Quarters of a Mile and easy reach of the Town.

Sutherland has the Dominion Forestry Reserve, comprising 320 Acres of Land located with 160 Acres of it, within the Town limits.

Improvements forecasted for this year, will total Five Hundred Thousand Dollars, including the present issue of Debentures.

Appropriations have already been sanctioned, for the expenditure immediately, of Fifty Thousand Dollars by the Canadian Pacific Railway, mainly for a Freight Shed and construction of Trackage in the local Yards, and it is known positively, that the Railway authorities intend double-tracking from Sutherland into Saskatoon, this year if possible.

The Dominion Government have appropriated in their last estimates, Thirty Thousand Dollars, for work on the Forest Reserve this year.

The Royal Bank of Canada have also purchased a valuable site, and intend erecting a substantial Building for their use at an early date.

The Saskatoon School Board, in whose district Sutherland is located, are just completing a magnificent brick School at a cost of One Hundred and Twenty Thousand Dollars.

At the present time, certain Financial Agents of Saskatoon are dealing with the City Council for the construction of an extension of the Street Railway to Sutherland, and have actually placed securities to the amount of Fifty Thousand Dollars for the construction of the line as an unreserved Gift. This is expected to be done this year.

Certain industrial enterprises will commence the erection of their plants at an early date. The Provincial Government have material now on the ground to install a local telephone system and exchange.

Last Year's assessment totalled $1,835,255, and this year will be well over Two Million Dollars.

The present Debenture Debt is the insignificant total of Five Thousand Four Hundred Dollars, none of which is in arrears.

By the Financial Statement appended, it will be seen there is a Surplus credit to the Town of $16,452.38 on December 31st, 1912.

There is every evidence that large investors are only waiting for the utilities to be provided, to force the pace for Sutherland, and put it in the front ranks of any Division of the Saskatoon Area. This issue of Debentures is absolutely Gilt Edged. It is a virgin field for investment of unequalled quality and will bear the strictest investigation.—(Advertisement).

LUMBER IS VALUED AT EIGHTY-TWO MILLIONS

British Columbia Follows Ontario Closely in Productio —Twenty-six Kinds of Wood

The total value of lumber, square timber, lath an shingles produced in Canada in 1911 was $82,321,664, th items being: Lumber, 4,918,202,000 feet, valued at $75,830.954; square timber, 34,847 tons exported, valued at $766,40 shingles, 1,838,474, valued at $3,512,078, and lath, 965,235.000, valued at $2,212,226.

The total lumber output of 4,918,202,000 feet is an increas of 466,550,000 feet, or 10.48 per cent., over 1910. The averag mill in 1911 cut 1,713,000 feet as compared to 1,611,000 fo 1910.

In the United States in 1910 the total lumber cut was r ported as 40,018,282,000 feet, being a decrease of ten per ce from 1909. Canada's production for the same year was abou one eighth of this amount.

Ontario still leads in lumber production, as in forme years, although British Columbia seems to be gradually m ing up to first place.

Production by Provinces.

In 1910 Ontario cut almost 37 per cent. of the total an only about 35 per cent. in 1911. British Columbia has increased from 26.3 to 27.3 per cent., cutting 14 per cent. mor lumber than in 1910. Quebec is the only province reporting a decrease in production. In 1911 this province cut 4.3 pe cent. less lumber than in 1910 and dropped from 17.7 per cent to 15.4 per cent. of the total. New Brunswick yielded abou the same part of the total cut, but increased its productio over 1910 by 11.5 per cent. The production in Nova Scoti increased by 48.8 per cent. over 1910. Saskatchewan showe the greatest increase in annual cut with 77.5 per cent Manitoba increased its cut by one quarter and now stand ahead of Alberta on the list, although Alberta has also increased its production by 13.2 per cent. Prince Edwar Island has very greatly increased its cut and now forms on and a half per cent. of the total Canadian production.

The average price of lumber throughout Canada was 3 cents less than in 1910.

The reduction was evident in Prince Edward Island Quebec, Manitoba, British Columbia and Ontario, bein greatest in the case of British Columbia where a reduction 99 cents is noted. It is evident that this reduction applied the large cut of the province would have a considerable effe on the average price in Canada.

Changes are Few.

Twenty-six kinds of wood were reported having bee sawn into lumber in 1911. This list is practically identica with the 1910 list, states Mr.. R. G. Lewis, B. Sc.F., in recently issued bulletin of the Forestry Branch of the Department of the Interior, except for the fact that alder, reporte in 1910, was not reported in 1911, and sassafras was added.

Spruce, whilte pine, Douglas fir, hemlock and cedar retained their relative positions at the head of the list. Spruce made up almost one third of the total cut, increasing by 27. per cent. from 1910. Spruce and white pine together forme over half of the total. The cut of white pine and Douglas fir remained at practically the same figures as in 1910. Hemlock did not increase in cut as rapidly as it did from 1909 to 1910.

Birch now forms two per cent. of the total cut; this is large for a hardwood. It has moved up on the list from tenth to seventh place, increasing in cut by 38.8 per cent.

There were 11 kinds of wood that showed a decrease in cut—cedar, red pine, tamarack, yellow pine, balsam fir, maple, basswood, elm, ash, beech and oak. This decrease is greatest with basswood, beech and balsam fir. The cut of these three was less than half what it was in 1910.

Valuable Woods Show Increases.

The more valuable hardwoods (hickory, walnut and cherry) all show increases, the cut of cherry advancing by over 50 per cent.

The average price of lumber has decreased by 39 cents per thousand, on account of the decrease in the average price of white pine and Douglas fir, which together form 38.3 per cent. of the total. Spruce increased by 10 cents a thousand from $13.55 to $13.65. White pine decreased by 40 cents and Douglas fir by $1.51. Among the other decreases in price are the following:—cedar, 51 cents; birch, 15 cents; tamarack, $1.26; yellow pine, 73 cents; balsam fir, 91 cents; jackpine, 88 cents; ash, 4 cents; oak, $1.15; hickory, $10.31; walnut, $18.81; tulip, $10.57. The only woods used in quantity that showed an increase in price were the following:—spruce, 10 cents; hemlock, 20 cents; red pine, 93 cents; maple, $1.98; basswood, $1.35; elm, $1.29; beech, $2.00; poplar, 53 cents; chestnut, 89 cents; butternut, $2.10; cherry, $1.88, and sycamore, $1.03.

PRODUCERS OF SILVER IN ONTARIO

and Concentrates Treated at Local Refineries New Veins, etc.

Cobalt well maintained its rate of production, the output ver being a little over a million ounces less than in 1911. g, however, to the higher prices for silver, the money n to the mining companies was greater by about one and f millions of dollars. It would appear as if the crest of iction at Cobalt were reached in 1911, and that the deling curve brought the output in 1912 to nearly the same as in 1910, according to the latest available statistics e Ontario Bureau of Mines.

The total production since the opening of the mines has nted to nearly 156 million ounces, and the total value to t 82 million dollars, as follows:—

Year.	Ounces.	Value.
904	206,875	$ 111,887
905	2,451,356	1,360,503
906	5,401,766	3,667,551
907	10,023,311	6,155,391
908	19,437,875	9,133,378
909	25,897,825	12,461,576
910	30,645,181	15,478,047
911	31,507,791	15,05[illegible],847
912	30,260,635	17,455,[illegible]
Total	155,832,615	$81,777,260

The tendency towards final treatment of the ore in the is manifested in the increased shipments of bullion, gnments of which amounted to 5,071,897 ounces in 1912 gainst 3,132,976 ounces in 1911.

and Concentrates

The Nipissing and Buffalo mines are now equipped for cing their entire output to merchantable bars on the spot. rtheless, the tonnage of ore and concentrates shipped to de points was larger than in 1911, the respective tities being 17,959 tons ore, and 11,214 tons concentrates, ompared with 17,278 tons ore, and 9,375 tons of concens in 1911. The year of largest shipments was 1910, when 7 tons ore and 6,845 tons concentrates left the camp.

The largest producers during the year were as follows:—

Nipissing	4,680,670	ounces.
Coniagas	3,703,942	"
La-Rose	2,920,344	"
Crown Reserve	2,714,765	"
McKinley-Darragh-Savage	2,694,560	"
Kerr Lake	1,895,309	"
Buffalo	1,890,150	"
Cobalt Townsite	1,505,396	"
Temiskaming	1,217,994	"
O'Brien	1,091,631	"

n Gowganda three mines—Miller-Lake, O'Brien, Millerett Mann—produced in all 549,976 ounces, and in South ain one—Wettlaufer-Lorrain—834,119 ounces. The iskaming and Northern Ontario Railway branch line Earlton to Elk Lake is now in operation.

ted at Ontario Refineries.

As in previous years, the larger proportion of the highe ore and concentrates produced at Cobalt was treated in eries situated in Ontario, the principal works being e at Copper Cliff, Deloro, Thorold and Orillia. At Deloro Thorold, also at a small refinery opened during the year orth Bay, the oxides of cobalt and nickel are produced large shipments made both of refined cobalt oxide and of mixed oxides of cobalt and nickel to the United States and opean markets.

Another by-product turned out by the refineries is white nic, of which nearly four million pounds were made durthe year.

There were paid out in dividends by silver mining comes in the Cobalt camp over seven million dollars in 1912, total distribution of profits since the beginning of the p have been close on forty-one million dollars on a gross regate return for return sales of silver of $81,777,260.

New and important silver-bearing veins were found at Rose, Cart Lake, (Seneca Superior), Casey Cobalt, etc. last-named mine is significant of the possibilities of the glomerate, situated as it is on an outlier of this formation e 14 or 15 miles distant from Cobalt proper. The findof good ore by the Beaver mine in the diabase underlying Keewatin, and the recrudescence of the Cobalt Townsite e were other features of the year.

◆

A branch of the Quebec Bank has been opened at Ednton under the management of Mr. H. B. Wilson.

EVIDENCES OF MONEY STRINGENCY

Scarcity of Money is Being Felt in the West as Well as the East

Scarcity of money is being felt in the West as well as the East. The like has not been experienced since 1908. Many of the smaller organizations are almost unable to stand the strain, and each day witnesses the closing of some one or other of the many mushroom real estate offices. Within the last two weeks an Eastern house had no less than twenty drafts, returned unpaid, mostly from real estate firms.

A reputable broker in Toronto, a member of the exchange, last week had two men from the West call upon him at different times to endeavor to arrange the sale of bonds. Immediate cash was imperative, and ridiculous sacrifices were suggested in both cases.

An Edmonton authority has informed The Monetary Times that many of the larger interests in the West are realizing as much as possible on vacant land and turning the resources to building operations and mortgages.

Building is Consistent.

Building in the centres is going on perhaps as consistently as usual, and is the one branch that feels the stringency least. Western building operations have the advantage of those of the east. The terms of payment there are limited to six, twelve and eighteen months, whereas they usually extend over five years, and at a slightly lower rate of interest. At the present time mortgages are placed at eight and ten per cent. The "nine per cent." is usually pased over for no apparent reason. By the authority referred to the profits on properly managed building construction are placed conservatively at more than fifty per cent. per annum, and are made, as has been indicated, so as to allow early reinvestment.

Profits Are Assured.

Mortgages of $2,000 and $2,400 realized up to a few days ago $1,700 and $2,000, respectively, in cash. This investment, if made with the ordinary precautions and good judgment, is excellent in every respect. The payments permit of re-investment at early dates, and excellent profits are assured.

It is possible that the real estate market will readjust itself in the West during this period. When the stringency lessens, real estate values and offerings will possibly be the healthier for the purging.

◆

CROP OUTLOOK

From the following reports it will be seen the outlook is generally favorable:—

United Kingdom—The winter wheat crop looks well in most districts. The weather is fine.

France—Outlook generally favorable. Spring prospects are excellent. Native supplies small, and it is predicted that there will be continued large purchases of foreign wheat.

Germany—There are no complaints heard regarding the crop outlook, and sowing continues rapidly. Supplies of native wheat are smaller, and demand for foreign wheat has improved, and some authorities predict large imports in the near future.

Russia—Winter wheat outlook favorable. Navigation is reopening. Arrivals at ports small, but will increase shortly. The weather is mild.

Roumania—Crop outlook favorable. Oat sowing is proceeding satisfactorily. Supplies of native wheat moderate.

Hungary—Winter crops doing well. Spring sowing is being done under very favorable weather conditions. Weather is mild.

Italy—Crop outlook is mostly favorable. It is generally claimed that there will be a continued large import of foreign wheat needed.

Spain—There are some complaints of drought.

North Africa—Crop outlook is mostly excellent.

◆

The Lumbermen's Association of Western Nova Scotia held its annual meeting in Halifax. The membership of the association includes fourteen representative lumber firms, operators and pulp companies. President, A. W. Eakins, of Parker, Eakins & Company, of Yarmouth; vice-president, A. Davison, of the LaHave Pulp Company Limited, Bridgewater; secretary-treasurer, F. C. Whitman, of Annapolis Royal. The association has always taken an active interest in the forestry of the province and in the protection of woods against fires. Following the recommendations of the Conservation Commission the legislature is expected to favorably consider putting the railways of the province under a patrol to endeavor to stop fires along the lines, and the lumbermen's association concur most heartily in so important a movement of protection.

MONTREAL WIRES TO BE UNDERGROUND

Monetary Times Office,
Montreal, March 20th.

The network of wires which has heretofore disfigured Montreal's main retail thoroughfare and proved a source of annoyance, expense and danger to the community, is at last to be removed. Recently the signature of Lieutenant-Colonel Hibbard, chief of the public utilities commission of Quebec, was attached to the plans of the Montreal Electrical Commission, which had been pending since last October, thus making the plans effective. The latter commission, it may be remembered, was for the purpose of drawing up plans for placing all the wires underground.

The public utilities companies are to pay for the change from the overhead to the conduit system. The city is to pay for the cost of constructing the conduit system, and the companies are to rent the space. In forty years the capital cost, it is estimated, will be returned in the rental charges. The amount of the rentals, however, will depend upon the number of companies making use of the conduits, and it does not appear that these will be very numerous in the city of Montreal. The number has decreased during the past year or so by amalgamation. It is claimed that by next winter the wires will have disappeared from the street all along St. Catherines from Guy Street to Papineau Avenue, a distance of 2 1-5 miles. Some 76 miles of single duct and 200,000 feet of fibre duct for service connections to the various places of business will be laid. The excavation will be about ten feet deep and 9½ feet wide, and will contain the conduit for the accommodation of the wires of the Montreal Light, Heat and Power Company, the Montreal Public Service Corporation, the police system of lines and burglary company's alarm wires as well as some of the telephone lines.

GOODRICH COMPANY'S CANADIAN FACTORY

The Canadian automobile field is a growing one and the "Goods Roads" policy of the federal and various provincial governments cannot fail to have a beneficial effect in further developing the industry.

The B. F. Goodrich Company, of Akron, Ohio, recognizing these possibilities offered, have secured 32 acres of land at St. Catharines, Ontario, conveniently located for the handling of traffic by railroad, and a new factory modeled on the lines of the parent Akron plant, will be established, which when fully developed, is planned to employ at least one thousand hands, with ample provision for future extensions.

THREE YEARS IN ADVANCE

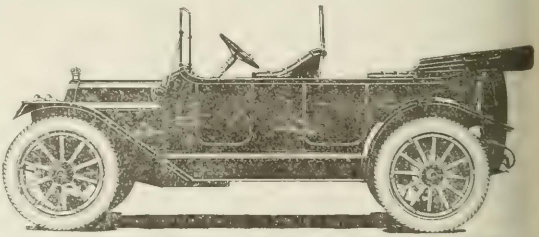
Bishop, Pratt & Delavault, Barristers, Solicitors, Notaries etc.

Edmonton, Alta., March 10th, 1913.

Monetary Times Printing Company of Canada, corner Church and Court Streets, Toronto:—

Dear Sirs,—I enclose herewith money order in your favor for $9 in payment of renewal subscription for three (3) years (to February, 1916), to The Monetary Times, beginning with the expiration of my present subscription.

Yours truly.
(Signed) E. T. Bishop.



Be Influenced
By Successful Men

Russell-Knight "28" Touring Model - $3250
Russell-Knight "28" Roadster Model - $3200
Russell-Knight Seven Passenger - - $3500
F.O.B. West Toronto

Canada's most influential business men have chosen the Russell-Knight "28" as their 1913 car because it expresses their ultimate ideas in automobile construction.

Their choice is entirely logical, because the efficiency, comfort and equipment of this model rank it as "a master creation" among the world's great cars.

The Russell-Knight "28" is essentially a "class" car, and for this reason production is limited.

To insure early delivery, orders should be placed now.

Its features are beyond comparison. Its equipment is absolutely complete. There is included

Russell-Knight Engine
Russell Electric Starter
Left Drive and Centre Control
Combined Electric Dynamo and Motor for Starting Engine, Lighting Lamps and Charging Battery.
Electric Head Lamps, Side Lamps, Tail Lamps.
Combined Speedometer and Clock, with Electric Light attached.
Heating System for the Tonneau
Non-Skid Tires, 36 x 4½ inches

Power Pump for the Tires
Demountable Rims, with one spare rim
Folding Glass Windshield for Front Seat
Folding Glass Windshield for Rear Seat
Extension Top with Side Curtains
Top Envelope
Foot Rest
Robe Rail
Tire Holders (double)
Electric Horn, under the bonnet.

A FULLY DESCRIPTIVE CATALOGUE WILL BE MAILED UPON REQUEST TO THE NEAREST BRANCH OR AGENT. IF POSSIBLE CALL AND SEE THE CAR.

Russell Motor Car Co.
Limited

Head Office and Factory:

Solicitors for Henry Hope & Sons of Canada, Limited.

INTERNATIONAL LIGHT AND POWER COMPANY, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the [illegible] day of February, 1913, incorporating James Steller Lovell and Charles Delamere Magee, accountants; William Bain, bookkeeper, and Robert Gowans and Joseph Ellis, solicitors' clerks, all of the city of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To underwrite, subscribe for, purchase or otherwise acquire and hold either as principals or agent, and absolutely as owner or by way of collateral security or otherwise, and to sell, exchange, transfer, assign or otherwise dispose of or deal in the bonds or debentures, stocks, shares or other securities of any government or municipal or school corporation or of any bank or of any other duly incorporated company or companies or corporation or corporations; (b) To assist in the promotion, organization, development or management of any corporation or company and to raise and assist in raising money for and to aid by way of bonus, loan, promise, endorsement, guarantee or otherwise any corporation in the capital stock of which the company holds shares, or with which it may have business relations; and to act as employee, agent or manager of any such corporation and to carry on the business thereof and to guarantee the performance of contracts by any such corporation or by any person or persons with whom the company may have business relations; (c) To purchase, lease or acquire lands and interests therein and water powers and water privileges and power to develop therefrom any power, electrical or other energy, and to use the same in connection with their business, and to transmit the same, and sell, lease or dispose of lands or interests therein or power, and to enter into working arrangements with other companies, persons, firms or corporations for the use thereof, and to establish, operate and maintain any electric, gas or other lighting, heating or power plant, and to sell and dispose of electric, gas or power, light, heat and power; provided always that the rights and privileges hereby conferred upon the company to generate, sell and dispose of electrical energy for light, heat and power when exercised outside of the property of the company shall be subject to all provincial and municipal laws and regulations in that behalf; (d) To sink wells and shafts and to make, build, construct, erect, lay down and maintain reservoirs, water works, cisterns, dams, culverts, main and other pipes and appliances, and to execute and do all other works and things necessary or convenient for obtaining, storing, selling, delivering, measuring and distributing water for the purposes of irrigation and for the creation, maintenance or development of hydraulic, electrical or other mechanical power, or for any other purpose of the company; (e) To construct, maintain, alter, make, work and operate on the property of the company, and for the purposes of the company, or on property controlled by the company, reservoirs, dams, flumes, race and other ways, water powers, aqueducts, wells, roads, piers, wharves, buildings, shops, stamping mills and other works and machinery, plant and electrical and other appliances of every description; (f) To acquire by purchase or otherwise and hold lands, timber limits or licenses, water lots, water falls, water privileges or concessions and powers and rights and interests therein, and to build upon, develop, irrigate, cultivate, farm, settle and otherwise improve and utilize the same, and to lease, sell or otherwise deal with or dispose of the same; (g) To construct, execute, own and carry on all descriptions of works which may be necessary or useful for the purposes of the company; (h) To issue and allot, as fully paid up, shares of the company hereby incorporated in payment or part payment of any property, movable or immovable, property rights, lease, business, franchise, undertaking, powers, privileges, license, concession, stock, bonds and debentures or other property rights which it may lawfully acquire by virtue of the powers hereby granted, or to pay for same or any part thereof in bonds or debentures of this company; (i) To draw, make, accept, endorse, discount and execute promissory notes, bills of exchange, warrants and other negotiable or transferable instruments; (j) To carry on any other business, whether manufacturing or otherwise, which may seem to the company capable of being conveniently carried on in connection with the business or objects of the company and necessary to enable the company to profitably carry on its undertaking; (k) To purchase or otherwise acquire and undertake and assume all or any part of the assets, business, property, privileges, contracts, rights, obligations and liabilities of any person, firm or company carrying on any business which this company is authorized to carry on, or any business similar thereto, or possessed of property suitable for the purposes of this company's business, and to issue in payment or part payment for any property, rights or privileges acquired by the company, or for any guarantees of the company's bonds, or for services rendered, shares of the company's capital stock, whether subscribed for or not, as fully paid and non-assessable, or the company's bonds; (l) From time to time to apply for, purchase or acquire by assignment, transfer or otherwise, and to exercise, carry out and enjoy any statute, ordinance, order, license, power, authority, franchise, concession, right or privilege which any government or authorities, supreme, municipal or local, or any corporation or other public body, may be empowered to enact, make or grant, and to pay for, aid in and contribute towards carrying the same into effect, and to appropriate any of the company's stock, bonds and assets to defray the necessary costs, charges and expenses thereof; (m) To enter into partnership or into any arrangement for sharing profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise, with any person or company now or hereafter carrying on or engaged in any business or transaction which this company is authorized to carry on or engage in; (n) To procure the company to be registered and recognized in any foreign country and to designate persons therein, according to the laws of such foreign country, to represent this company and to accept services for and on behalf of this company of any process or suit; (o) To lease, sell or otherwise dispose of the property and assets of the company, or any part thereof, for such consideration as the company may deem fit, including shares, debentures or securities of any company; (p) To amalgamate with any other company having objects similar to those of this company; (q) To distribute among the shareholders of the company, in kind, any property of the company and in particular any shares, debentures or securities belonging to the company or which the company may have power to dispose of; (r) To do all acts and exercise all powers and carry on all business incidental to the due carrying out of the objects for which the company is incorporated and necessary to enable the company to profitably carry on its undertaking; (s) To do all or any of the above things and as principals, agents or attorneys. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "International Light and Power Company, Limited," with a capital stock of twenty million dollars, divided into 200,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the city of Toronto, in the Province of Ontario.

OPLE'S LOAN AND SAVINGS CORPORATION

The transactions of the People's Loan and Savings Cor- tion during 1912 show a satisfactory year's returns were eved. Increases are noticeable in loans, permanent capital, ngs deposits and debentures. Profits amounting to $50,- were made, excluding $845 brought forward from the ious year. After paying expenses of management, taxes, ests, etc., $27,956 were available for distribution. Two yearly dividends at the rate of 6 per cent. were paid rbed $24,304. The reserve fund was augmented by o and $652 carried forward. The corporation's assets $805,397.

Dr. Roome, the president, remarked in moving the an- report: "Material progress has been made; in fact, it e of our best years. We have now a total reserve of oo, being 9.32 per cent. of the paid-up capital. It is pleasing to relate that the terminating capital has been off, and the company is now what is known as an dox loan company.

The following directors were elected for the ensuing : Messrs. A. W. Peene, W. F. Roome, M.D., Malcolm ugan, W. H. Moorhouse, M.D., W. Spittal, F. G. Rum- and Lieut.-Col. A. A. Campbell. The directors elected Roome as president, Lieut.-Col. A. A. Campbell vice- ident and managing director, and W. Spittal secretary- urer.

By order of the Board.

GEO. A. WANLESS,
Secretary-Treasurer.

March 26, 1913.

EVIDENCES THAT MUNICIPAL ISSUES CAN BE ABSORBED

The good reception with which the recent Vancouver and Toronto issues met in New York is regarded as evidence that more Canadian municipal issues can be as readily absorbed in the same market.

In consequence of the unusual tightness of money in Canada there is little activity in bond dealings. Canadian investment bankers find the demand for bonds comes mainly from unexpected sources and, for the most part, from small buyers. The London financial market has again showed evidences of stringent conditions and Canadians are disappointed with the outlook in that quarter, remarks the Wall Street Journal.

Canadian municipalities are still laboring under the handicap of being unable to appreciate the changes in economic and financial conditions, the tendencies of which have been to demand gradually but surely an increasing return on investments. They have, consequently, interpreted these changes as a reflection upon their credit instead of a conformity to economic conditions.

The value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

LEGAL NOTICES

McFARLANE-PRATT-HANLEY, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the seal of the Secretary of State of Canada, bearing date the 10th day of February, 1913, incorporating Robert Samuel McFarlane and John Hanley, contractors; David Shear Pratt, lumber merchant, and Florence Isabella McFarlane and Mary Hanley, married women, all of the town of Midland, in the Province of Ontario, for the following purposes, viz.:—(a) To construct, acquire, own, maintain and operate, hire, lease, sell or otherwise dispose of and to contract for the erection or construction of buildings, wireless stations, stores, warehouses, elevators, docks, dry docks, wharves, derricks, dredges, drills, viaducts, vessels, ships, scows, tunnels, tracks, bridges, canals and breakwaters and other like works of internal improvement or public use or utility, including the erection and construction but not operation of railways and tramways and generally to contract for, build, construct and equip public and private works; (b) To invest in and acquire and hold the bonds, debentures and stock of other companies with which the company hereby incorporated is empowered to contract, and; (c) To distribute amongst the shareholders of the company in kind any property of the company and in particular any shares, bonds, debentures or securities of any other companies belonging to the company hereby incorporated or of which the company hereby incorporated may have the power of distribution; (d) To manufacture, produce, buy, sell and deal in articles, tools, machines, metals, building materials and all articles composed or manufactured in whole or in part of iron, steel or other metal or wood, clay, cement, stone or other material or combination of any of them, and particularly all articles which might be of use in the carrying on by the company of any business mentioned as one of the objects of this incorporation; (e) For the purpose above to carry on the business of electricians, mechanical engineers and manufacturers and workers and dealers in compressed air, gas, electricity, motive power, heat and light, and to construct, maintain and operate works for the supply and distribution of compressed air, gas and electricity for light, heat and power; (f) To purchase or otherwise acquire and to sell, develop, work or otherwise deal with land, water, water power, water power supplies and water power work and equipment or works; (g) To purchase or otherwise acquire, hold, maintain, operate, sell and otherwise dispose of stone quarries and the stone taken therefrom and the products thereof; (h) To manufacture, buy, sell and deal in goods, wares and merchandise; (i) To carry on any other business, whether manufacturing or otherwise, which may seem to the company capable of being conveniently carried on in connection with its business or calculated directly or indirectly to enhance the value of or render profitable any of the company's property or rights; (j) To acquire or undertake the whole or any part of the business, property and liabilities of any person or company carrying on any business which the company is authorized to carry on, or possessed of property suitable for the purposes of the company; (k) To enter into partnership or into any arrangement for the sharing of profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise with any person or company carrying on or engaged in or about to carry on or engage in any business or transaction which the company is authorized to carry on or engage in, or any business or transaction capable of being conducted so as directly or indirectly to benefit the company, and to lend money to, guarantee the contracts of or otherwise assist any such person or company, and to take or otherwise acquire shares and securities of any such company, and to sell, hold, reissue, with or without guarantee, or otherwise deal with the same; (l) To buy, sell, trade, deal in or guarantee the debentures, bonds, stock or other securities of any government or of any municipal corporation or school corporation or any chartered bank or any incorporated company, and to accept said securities or any of them in payment or in part payment for any works carried on by the company; (m) To take or otherwise acquire and hold shares in any other company having objects altogether or in part similar to those of the company or carrying on any business capable of being conducted so as directly or indirectly to benefit the company; (n) To purchase, take on lease, or in exchange, hire or otherwise acquire any personal property and any rights or privileges which the company may think necessary or convenient for the purposes of its business; (o) To do all such other things as are incidental or conducive to the attainment of the above objects. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "McFarlane-Pratt-Hanley, Limited," with a capital stock of fifty thousand dollars, divided into 500 shares of one hundred dollars each, and the chief place of business of the said company to be at the city of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 11th day of February, 1913.

THOMAS MULVEY,
Under-Secretary of State.

33-2

Solicitors for the Applicants.

PROTECTING THE FORESTS FROM FIRE

One of the most encouraging signs during the past year in connection with better fire protection in eastern Canada has been the organization of the St. Maurice Forest Protective Association, says Conservation. This association is composed of limit-holders in the St. Maurice valley, Quebec. A manager, three inspectors and fifty rangers for patrol work were employed during the past season.

As a result, while ninety-seven fires were extinguished only one attained proportions of any consequence, and thi was in an old cutting. In addition to patrol, a start has bee made in the construction of permanent improvements, such as trails, telephone lines and lookout stations.

The cost is met by an assessment upon limit-holders in proportion to acreage, aided by a contribution from the Quebec government, in consideration of the protection of provincial property. It is greatly to be hoped that the activity of this association will be extended, and that others will be formed.

The rapid development of the co-operative idea in the fire protective work in the United States is shown by the fact that the subsidiary organizations comprising the Western Forestry and Conservation Association last season patrolled approximately 20,000,000 acres, holding fully five hundred billion feet of timber, or one-fifth of the entire supply of the United States.

They kept about 450 patrolmen in the field, supplied these with the necessary extra help to handle fires, and buil hundreds of miles of telephone lines and trails. What is more to the point, they kept the area of merchantable timbe burned over down to 14,000 acres, or about 1-16th of 1 per cent. of the area protected.

Only about 700,000,000 feet of timber was damaged by fire, and most of this will be logged without loss. The actua destruction was only about 76,000,000 feet, or about 1-70th of 1 per cent.

They spent, to make this a remarkable record, abou $200,000, or a cent an acre, for the entire area guarded although, as it was necessary to protect fully double the are that actually contributed, the cost to association member averaged about two cents an acre on their own holdings

◆

The Scottish Equitable Life Assurance Society has been registered in Saskatchewan.

Insurance men state that they never remember a storm hich Ontario farmers suffered so heavily as in last :'s. Hundreds of barns were unroofed and dozens were olished. As a result of the very small amount of wind rance carried, the loss will fall heavily on the owners. rance men say that they expect a big increase in the l insurance policies.

The New Brunswick legislature has adopted the principle of financial aid to the Norton Griffiths Company in establishing a shipbuilding plant at St. John.

The Montreal branch of the Canadian Credit Men's Association has passed a resolution favoring a Dominion bankruptcy law providing for a compulsory assignment and the discharge of the honest debtor.

MUNICIPAL BONDS

Calgary's Proposed Expenditures—Interest on Fer Bonds—Bids Not Accepted

From figures prepared by the city commission and t heads of the various departments of the municipal gove ment it is evident that close on seven million dollars is be spent by the city of Calgary this year on its public wor and public utilities. The amount estimated is $6,821,897, compared with $4,301,387 in 1912. This does not include t general estimates nor the annual school levy, but $750.c is allowed for river improvements, trunk roads, gene grading of roads in the outlying portions and contributio to the hospitals and children's shelter.

Sewer Disposal Works.

There is close on a million dollars for sewer work, cluding the laying of new mains and the preliminary app priation for the sewage disposal works which the provinc department of health has been urging the city to install a long time. Over a million dollars is to be spent on pavi This is mostly work which was authorized by the ratepay last year. Over two million dollars is to be spent on t three big revenue producing departments of the city, street railway, electric light and water plants. Of this s $600,000 is accounted for by water main extensions, $925. for electric light and power extensions, and $637,000 street railway.

Interest on Ferry Bonds

North Vancouver city council have decided to pay interest on the ferry company's bonds amounting to $3,2 According to the agreement entered into between the fer company and the city, the city is required to pay the inter on the bonds in the event of the ferry service not havi earned enough to do so.

The statement of the transportation company show there was a profit last year of several thousand dollars, the assets of the company had been increased by the ex diture of a large amount for permanent improvements, wh resulted in an overdraft of $25,216 The interest being and no ready money being available, the directors asked city council to meet the payment.

As the manager of the Bank of British North Amer had intimated to the mayor that he would not honor a cheque drawn for this purpose, the council passed a re lution specifically asking the bank to honor the cheque, whi will be drawn on the general account of the city.

Messrs. Wood, Gundy & Company, fiscal agents of Saskatoon public school board, will place on the ma $175,000 worth of debentures for the work on the school- the Saskatoon school district.

No Acceptable Bid.

Three offers were made for the $100,000 5 per c 40-year debentures of St. Hyacinthe, Que., but none of the was accepted.

For the St. Paul rural municipality, Man., $4,000 5 p cent. road debentures two bids were received. Neither these were accepted.

The $15,000 5 per cent. 20-year and $9,527.37 5 per c 10-year debentures of Thorold, Ont., for which tenders w called until February 28th, have not yet been sold.

THE CREDIT SUPERSTRUCTURE AND ITS BASE

In reviewing world conditions during the past year, the benefit of his stockholders, the chairman of one ie great London banks mentioned that in Canada e had been great prosperity, and the liabilities of banking institutions showed important increases, but additions to the stock of gold were comparatively nportant. Taking our position at the end of the year , the visible amount of gold in the country was ,856,879—the Dominion Treasury holding $104,-546 and the chartered banks $33,780,333. At the of 1911 the banks held $37,464,226 and the Treasury $100,630,792—the total being $138,095,018. So ng the year there was a slight decrease, about ,000, in the visible stock of gold in the country; and ng the first two months of 1913 a further diminution ie stock of metal held in the Dominion occurred. At end of February, 1913, the banks held $37,592,441 the Treasury held $98,782,004—the total being ,374,445, which is about $3,500,000 less than the ing of December 31st, 1911.

Now, this gold constitutes the better part of the base oundation of the mass of credits by which the busi- of the country is carried on. However, the gold held ome does not represent the whole of the metallic dation on which Canada's credit structure rests. banks have a certain command over the cash re-rces of New York and London. By exercising this mand they have it in their power to bring in some l from abroad for the purpose of strengthening the lit structure at its base if that becomes necessary. s at the end of 1911 they had in net bank balances in don, balances in New York, and call loans elsewhere n Canada, about $134,000,000. The February bank statement showed a satisfactory increase over January in these loans and balances; but even after that addition the total amounted to but $126,000,000, or $8,000,000 less than the total shown fourteen months earlier.

While this outside fund constitutes a most important part of the reserve against liabilities, it cannot be ranked as equal to the specie held at home, for the simple reason that it could not be converted suddenly into an equal amount of specie for transmission to Canada. Theoretically, the banks can call in their loans abroad, engage gold at the New York sub-treasury, and express it to Canada. In actual practice that process would work all right up to a certain amount; but the New York market would offer resistance when the loss of gold reached certain proportions. In case of a sudden outgo that point would be reached probably long before $50,000,000 gold had been lost. After that, our banks would have to take payment in other ways.

So we see that the basis of the credit structure in Canada consists of $134,000,000 gold plus an indeterminate amount of gold realizable from the outside reserve of $126,000,000. It has also been shown that the basis of the structure underwent a slight shrinkage during the past fourteen months. Now, how about the superstructure? There is no difficulty in discovering that the credit structure above ground was considerably enlarged in this period. Bank liabilities increased from $1,174,323,431 to $1,252,269,981—a matter of $78,000,000. It is certain that liabilities of railway companies, industrial companies, mercantile companies, loan and mortgage companies, trust companies, realty companies, and private individuals, not reflected in the bank figures just given, must have also increased largely during the period. That is indicated by the increased footings of balance sheets issued by the public and semi-public companies. Hence we have to consider an important growth in the size of the superstructure coincident with a shrinkage of the foundation. We also know that the superstructure has been growing with abnormal rapidity for three or four years, while the foundation was being extended relatively more slowly. Now a year is experienced in which the foundation actually decreased in size and strength.

It is quite clear that if the banks had not taken up an attitude discouraging credit extension in the past six or eight months, we should have seen a superstructure bulging over farther than at present. The process of continually adding to the upper stories while taking away the foundation obviously cannot be carried on indefinitely. Soon the top begins to sway whenever there is a strong wind, and ultimately the whole building comes down with a crash. That is what usually happens in the United States, because the bankers there who can see the danger have no power to effect a timely contraction of credit. Fortunately, the Canadian bankers are in better position to see the danger, and they have the requisite power to effect reductions. This power they have been using freely. That is one reason why they have been so bitterly attacked. Their efforts have been bent towards preventing a too rapid enlargement of the credit structure and towards maintaining the strength of the foundation works; and, notwithstanding the predictions of a Canadian disaster, confidently made by foreign prophets, there is no reason to suppose that the bankers will fail to maintain financial stability, as they have in the past. Those business men who have the best interests of the country at heart can help in the work of keeping the credit structure strong through keeping their own liabilities within reasonable compass until the ratio of reserve to liabilities rises to a more comfortable figure.

PAYMENT OF DIVIDENDS

The most pleasing duty the management of a corporation has to perform is the payment of dividends. Though upon the methods by which the directors determine the dividends to be paid largely rest the reputation of the corporation, its financial standing, and, indeed, its success or failure.

Therefore, it can only be assumed Canadian directorates with so prominent, so determining, a factor before them have acted wisely, and that progress, expansion, and growth of the companies of the Dominion are indicated by the increases in dividends made, liberal bonuses paid, and the re-entry among the ranks of dividend payers of companies which for a time have been missing, and the companies making their first appearance as dividend payers. A list of companies which have this year increased their dividends follows:—

Company.	Dividend increased From.	To.
Bank of Hamilton	11	12
Kaministiquia Power Company	4	5
Granby Consolidated Mining, Smelting and Power Company	1	1½
Detroit United Railway	5	6
Canada Landed and National Investment Company	8	9
Canada Permanent Mortgage Corporation	9	10
Huron and Erie Loan and Savings Company	10 + 1	11 + 1
Dominion Park Company	5	6
Northern Ohio Traction and Light Company	4	5
Colonial Investment and Loan Company	5	6
Toronto Mortgage Company	7	8
Real Estate Loan Company	6	7
Grand Trunk Railway Company (third pref. shares)	1½	2½
City Dairy Company	2	4

Dividends, debenture and bond interest to the exte of about $30,000,000 will be paid out in the Domini during this month.

In the United States the April disbursements w reach a total of about $170,000,000.

Canadian disbursements are growing at a rate co responding to the commercial and financial importan of the Dominion.

THE PASSING OF PIERPONT MORGAN

The death of Mr. J. Pierpont Morgan has depriv those powerful monetary connections in America, in En land, in Germany, in France and throughout the wor of their dominant commander.

When questioned as to the essentials of success t late financier once wrote: "Foremost amongst these should place honesty of purpose, energy, confident jud ment, knowledge of men and values, and the ability construct and harmonize, but above and beyond the is the man himself." The force of these last three wor has been evident in the many expressions of praise the world's press since the death of Mr. Morgan, for t commandership in the world of constructive and admi istrative finance held by him was reached by his ov inherent qualities, by "the man himself."

"To inspire confidence was the keynote of Mr. Mc gan's career," states the New York Tribune. "His wo was his bond, always redeemed at full value. He h great riches, but he also left a good name, more pricele than riches. He was a leader of his day, whom both fellow-citizens and the world at large have long reco nized as a representative American."

Mr. Morgan's interests in Canada were practica nil, so that no ill effects will be felt in the Dominion a result of his death.

MARKETING MUNICIPAL BONDS

At the time of the disposal of Toronto's and Va couver's bonds to well-known United States bond broke *The Monetary Times* remarked that several other li purchases were pending. Since then enquiries emanati from United States have been frequently received aski for information regarding Canadian bonds, status municipalities, methods of debenture issuage, etc., of which seems to show there is a market available bonds of Canadian municipalities. Two issues recen disposed of in the United States were those of Prin Rupert, B.C., and Welland. Prince Rupert's iss amounted to $90,491, and Messrs. Terry, Briggs Slayton, Toledo, Ohio, were the purchasers.

Welland, Ont., issue consisted of the following bentures: $75,000 5 per cent. 30 years, $45,000 5 cent. 30 years, $17,489 5 per cent. 10 years, $12, 5 per cent. 10 years. These were acquired by Mess Spitzer, Rorick & Company, Toledo, Ohio.

SMALL CHANGE

During the Hawthorne mining trial, in which O tario properties figure, counsel for the defence referr to District Attorney Wise as a "pinch-hitter," becau he had taken the summing up from his assistant "Since you have adopted the phraseology of the baseb field," Mr. Wise rejoined, "I may say I have been s ting on the side lines watching the game, and I ha got on to the crooked curves of Albert Freeman. W are hitting all kinds of crooks, and we are hitting th all the time. We do not need any pinch-hitters." Wh is another case of addressing a visitor in his own la guage.

FOREIGN EXCHANGE FLUCTUATIONS

ount Rates and Their Influences—The Bank of England—Marketing Bullion

he rough division of bills of exchange into two great s, namely, commercial and finance bills (although there some which partook of the nature of both classes), cor- nd to a similar division in the monetary relations be- one country and another, remarked Mr. Hartley Withers, aluable address before the British Institute of Bankers. relations depend largely on (1) the exchange of goods ommercial services; (2) the exchange of securities and ial services. Of these two divisions, the first was, on hole, much steadier and less liable to fluctuation, and nuch less susceptible to control by those whose business s to watch exchange fluctuations and influence them they needed control.

was difficult, continued the lecturer, to draw the line en commercial and finance bills, but the following defini- might be assumed: (1) Commercial bills were those in the first place against goods exported; secondly, st any services rendered in connection with the inter- e of goods such as freights, insurance and brokerages oduce, and thirdly, against any services rendered. All ebbed and flowed in a more or less constant stream. inance bills were drawn against the export of a promise , whether in the shape of a government loan or a rail- oond having a hundred years to run, or the implied un- nding that the drawer would put the acceptor in funds et the bill before its maturity. According to this divi- bills drawn in anticipation of shipments of goods were inance bills. The ebb and flow of the stream of finance had all the suddenness and strength of a freshet, and effect upon exchange rates was very marked.

nce of Discount Rates.

here was a close connection between market rates of nt and the creation of finance bills. The finance bill simple form, i.e., one that was drawn on an English pondent by an operator abroad, who wanted to finance lf for a time, would, as a rule, only be created when the f discount in London was lower than that at home.

his rule also held good in the case of bills drawn on n by American or English houses under instructions English firms who wanted to lend money in the United or in France.

he same applied to a third class of finance bills, i.e., drawn to supply a demand for exchange and in antici- of an increase in the supply of commercial bills later bviously high discount rates made inroads into the of exchange.

s to bills drawn against exports of the more permanent f investments, a low rate of discount in London tended nulate the creation of fresh securities. In so far as were foreign or colonial securities, the creation of e bills was implied, the sale of which in the countries they were drawn would turn the exchanges against nd. Contrariwise, an abnormally high rate of discount stop the import of this kind of security altogether.

and Dear Money.

s regards commercial bills, cheap money stimulated im- and a ready demand for foreign goods, followed by free ng of bills on England and a downward tendency in the nges, while dear money would bring out the goods of sh merchants and send them abroad for what they fetch and turn the exchanges in our favor. Since, how- the price of a credit was a much smaller item to a mer- or a manufacturer than to a financier who was drawing modation bills, the effect of money rates on international was much slower than on international financing.

followed then, continued the lecturer, that those who study and forecast exchange fluctuations must master ovements of discount rates. Conversely, those who want- orecast discount rates must watch the rates of foreign ex- e, the action and reaction of these two rates on each being constant and effective.

s regards the influence of exchange on discount rates, the former moved against us, discount rates would ably tend to rise, because a large supply of bills for nt in London would be expected, and bankers and dis- ers would raise their rates in anticipation. Another was that if the exchanges fell sufficiently, exports of rom London would be threatened.

nd and Supply of Bills.

iscount rates were established by demand for and supply ls. The batches of bills that arrived by the various day by day were, after acceptance, usually sold to a oker or a discount company, who usually held a large of bills of various maturities to suit their customers— anks—but, in the main, acted as intermediaries. Any slackening in the demand of the banks for a certain class of bills tended to throw an additional burden on the billbroker and discount houses, who generally financed themselves by borrowing at call or for short periods from the banks. This was another influence exerted by bankers on the price of bills.

Discount rates thus depended, in ordinary times, on what the managers of the clearing banks thought ought to be the price of bills, but sometimes the sceptre of the discount market passed into the hands of the Bank of England, which watched over the money market and regulated its rates, with a view to influencing exchange rates, and protecting London's reserve of gold, which was in its keeping. This it did, either (1) naturally, when the excess of supply of bills over demand sent people, who had bills to sell, to borrow on them at the bank, which thus got control of the market; (2) artificially.

When the bank thought discount rates too low, in view of the state of the exchanges or of the size of the reserve and its proportion to their liabilities, it would secure control by borrowing money from the market, and so create a scarcity of funds. When market rates rose in response, the bank was said to make its rate effective. Students of exchange had to take into account such interventions by the Bank of England. As under the English system we worked on a much smaller gold basis than any other leading financial nation, and at the same time were always prepared to hand the metal out when asked for, there was twofold need for vigilance on the part of those who kept our reserve. Hence it was that discount rates in London were so sensitive to foreign exchange movements.

Methods of Bank of England.

The rise in discount rates, continued the lecturer, would, for reasons already given, be probably followed by a favorable movement in the foreign exchanges, owing to a decrease in the amount of finance bills drawn on London, and to the inducement offered to English and foreign capitalists to employ their floating supplies of credit in London.

Such was the method by which the Bank of England tried to keep the foreign exchanges above the "gold point," i.e., the point at which it was theoretically more profitable to send gold instead of buying a bill. In practice gold shipments from London were made by firms who specialized in it, and bought up bills on London so as to put themselves in funds there to meet their purchases of gold. By buying the bills, they prevented the rate from falling far below gold point.

As regards a rise of the exchanges up to the incoming gold point, it was by no means certain to be followed by imports of gold.

In the case of the United States, it was generally possible to get gold certificates, and turn them into gold at the subtreasury. In the case of France, the Bank of France charged a premium on gold when it chose, and Germany took measures which were so effective that the theoretical gold point was often reached without gold being shipped. In other centres the theory only worked partially.

As regards a fall in the exchanges, it was safe to assert that when the point was reached at which it paid better to ship gold from London than to buy a bill, gold would go, but experts always differed as to when that point was reached, and, moreover, gold often left London long before there was any question of it being the more profitable form of remittance. The latter kind of export was made for a variety of reasons, e.g., for the sake of the advertisement gained by the importing firm; to produce a stimulating effect on stock markets by making credit cheaper and more abundant; to enable bankers to lend more freely at attractive rates. The effect of movements of gold on the exchanges was, of course, the same as those of other commodities; an import turned them against us, and an export turned them in our favor.

Trading in Precious Metals.

For purposes of export, bar gold was preferred to sovereigns, or better still, coins of the country to which the gold was to go, and as the Bank of England was entitled to meet demands on its store in sovereigns, which were usually below full weight, and involved loss on recoinage, it could fix, within certain limits, the price at which it was prepared to supply bars or foreign coin.

The bullion market consisted of three or four firms, which specialized in trading in gold and silver. Arrivals of gold were sold to the highest bidder, two buyers being always constant in their demand, namely, India and "the trade," i.e., the goldsmiths.

Bar gold could not fall below £3 17s. 9d. per ounce, because at that price the bank was bound to buy any amount offered to it, and the mint would coin it at the price of £3 17s. 10½d., the difference of 1½d. being the demurrage charge.

In conclusion, the big lesson we learned from the exchanges was that every nation that bought must also sell, and vice versa. Finally, the lecturer hoped they had seen how important and useful the foreign exchanges were, and what an interesting job all who worked in and around Lombard Street were engaged on.

MONTREAL TRAMWAYS COMPANY

Declared Dividend on Common Stock—New Bond Issue —Tramways and Power is Holding Company

Monetary Times Office,
Montreal, April 3rd.

Something of a surprise was sprung on the street when the announcement of a dividend of 5 per cent. on the common stock of the Montreal Tramways Company was made.

Accompanying the announcement concerning the dividend, was one concerning the issue of $1,000,000 of new stock at par, in the proportion of one share of new to each two shares of old stock, the rights to subscribe going to shareholders of record of April 15th and subscription lists to close on May 15th. The first payment on the new stock will be due on June 20th, later payments to be made on the call of the directors but not to exceed 10 per cent. per month.

Although nothing to the effect that a dividend might be declared on the Tramway Company's common stock had been heard, the possibilities of dividends had been discussed upon more than one occasion extending back for many months. Up to the present the Tramways Company has been very reticent in the matter of its earnings. The weekly reports which appeared in the days of the old management have ceased entirely and for a long time past the reports of earnings have not been of a nature to throw any very great light on the situation.

Declaration May Just be Preliminary.

From time to time have appeared statements which, although not sufficient to provide the basis for accurate comparisons with the past, have yet indicated that the company was making a balance on its common stock of at least the amount of the dividend just declared, namely, 5 per cent., and in all probability would still have two or three per cent. left to be placed to the credit of surplus account. In this connection, it may be well to point out that the dividend just declared, while it was 5 per cent., is not necessarily at the rate of 5 per cent. per annum, this being simply an interim dividend. It is considered, however, that this declaration is preliminary to placing the company on a dividend basis. As to what the rate of dividend may be, when the declaration is finally made, there is considerable speculation. Some place it at 10 per cent. and even more, however, it does not seem likely that it will be as high as 10 per cent., and 6 per cent. is thought all that any conservative shareholder could expect.

Shareholders are not Numerous.
